AWS D9.1 Sheet Metal

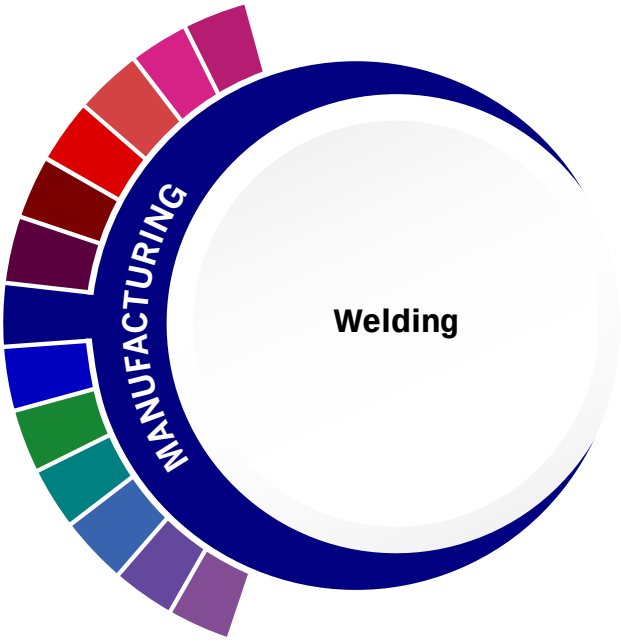
INDUSTRY-BASED CERTIFICATION DESCRIPTION

The AWS D9.1 Sheet Metal Welding Code provides specifications and requirements for welding procedures.

A student can earn a welder performance qualification by demonstrating the ability to produce welds meeting the prescribed standards in accordance to AWS D9.1 Sheet Metal welding code.

If a student obtains the qualification, the document certifies that the student is qualified to produce specific welds in accordance with D9.1.

There are various certifying entities that offer this certification. When selecting a qualification provider, districts should choose certifying entities who are best aligned with their regional employment needs.



ADDITIONAL INFORMATION

Certifying entities can include a Certified Welding Inspector or Certified Welding Educator who is qualified to inspect AWS 9.1 Sheet Metal Welding Code.

Check with regional providers who offer qualification testing in your area.
