Autodesk Certified Professional in Revit Building Systems Mechanical

INDUSTRY-BASED CERTIFICATION DESCRIPTION

The Autodesk® Certified Professional (ACP) is designed for professionals and students who want to advance beyond the Autodesk Certified User. For the Revit MEP Mechanical, only the professional level certification is offered.

This credential is for those who possess more advanced skills and can solve complex challenges in workflow and design. ACP is the logical credential for advanced and professional Autodesk software users who possess at least 400 hours of real-world Autodesk software experience.

Individuals who have earned a certification have demonstrated mastery of a variety of skills, such as collaboration, documentation, modeling and views.
