Certified Coding Associate

INDUSTRY-BASED CERTIFICATION DESCRIPTION

The Certified Coding Associate certification from the American Health Information Management Association measures domains such as confidentiality, privacy, information technology, health records and data content, clinical classification system, and compliance and reimbursement methodologies.

Specific competencies include interpreting healthcare data for code assignment, incorporating clinical vocabularies and terminologies used in health information systems, abstracting pertinent information from medical records, and applying inpatient, outpatient, and physician coding guidelines. Additionally, CCA's will link diagnoses and CPT codes according to payer specific guidelines, analyze medical records quantitatively for completeness and deficiencies and ensure patient confidentiality.
