Licensed Veterinary Technician

INDUSTRY-BASED CERTIFICATION DESCRIPTION

A student who completes the Licensed Veterinary Technician certification could work in a variety of occupations. Some of the work activities could include prepare medications or medical solutions, test biological specimens to gather information about patient conditions, assist healthcare practitioners during examinations or treatments, administer basic health care or medical treatments, and maintain medical equipment or instruments.

A candidate to become a Licensed Veterinary Technician will need to be at least 18 years old and has obtained a passing score on the VTNE and LVTE. A candidate must first take and pass the VTNE in order to apply for the LVTE. Candidates should also be a graduate of a Veterinary Technician Program approved by the TBVME.
