NCCER Plumbing Level 1

INDUSTRY-BASED CERTIFICATION DESCRIPTION

A student obtaining this certification will will identify hazardous situations and unsafe conditions as well as how to handle and respond to these situations and conditions. Students will safely use, properly care for, and maintain plumbing tools use basic math to calculate pipe length and read, interpret, and sketch construction drawings, as well as how to draw lines to scale.

Exam content asks students to identify various types of materials, schedules, and applications of plastic piping. Students will need to know how to determine the appropriate types of fittings, valves, hangers, and supports needed for plastic piping. Students will learn to properly measure, cut, and join plastic piping.

Schools who are interested in starting the NCCER program should start with the Accreditation pathway found under the Get Involved tab at the NCCER website.
