Cisco Certified Network Associate Data Center

INDUSTRY-BASED CERTIFICATION DESCRIPTION

The Cisco Certified Network Associate Data Center exam is going to be retired on February 23, 2020. The replacement exam, the Cisco Certified Network Associate or CCNA measures performance on network fundamentals, network access, IP connectivity, IP services, security fundamentals, and automation and programming.

Cisco will be releasing a new version of the CCNA exam on February 24, 2020. The information included on this document reflects the new CCNA exam information. If a student will be taking the CCNA Data Center exam prior to February 23, 2020, the exam versions are 200-150 DCICN and 200-155 DCICT.

Minors are individuals between 13-17 years of age who, with parental or legal guardian consent, may take tests and if passed, receive certification. During the registration process, minors must agree to their Cisco certification and confidentiality agreement. At that time, online consent forms may be downloaded for signature and submission by the minor's parent or legal guardian. Minor's certifications and fulfillment packages may only be processed after Cisco receives signed minor's consent forms.
