Google Cloud Certified Professional Cloud Architect

INDUSTRY-BASED CERTIFICATION DESCRIPTION

A professional cloud architect enables organizations to leverage Google Cloud technologies. With a thorough understanding of cloud architecture and Google Cloud platform, this individual can design, develop, and manage robust, secure, scalable, highly available, and dynamic solutions to drive business objectives.

The Google Cloud Certified Professional Cloud Architect exam assesses your ability to design and plan a cloud solution architecture, manage and provision the cloud solution infrastructure, design for security and compliance, analyze and optimize technical and business processes, manage implementations of cloud architecture and ensure solution and operations reliability.

The recommended experience a candidate should have to sit for the professional cloud architect certification is 3+ years of industry experience including 1+ years designing and managing solutions using GCP.
