Limited Licensed Radiology Technologist

INDUSTRY-BASED CERTIFICATION DESCRIPTION

The limited scope of practice in radiography examination includes the following topics: radiation protection, equipment operation & quality control, image acquisition & evaluation and patient care & education

In order to be scheduled for the limited exam, the Texas Medical Board must receive an application to take the Limited Scope of Practice in Radiography Examination. The application and additional information can be found at on the following page, http://www.tmb.state.tx.us/page/LMRT-Exams.

All candidates will take the CORE exam and one or more of the subsections listed under specific radiographic procedures. This will depend on the categories listed on your temporary limited certificate. The specific radiographic procedures subsections include the chest, extremities, skull/sinuses, spine and podiatric radiography.
