Texas Health Skills for Middle School - Online Learning Suite

Component Title	ISBN	Page Number	Location	Link	Description of Feedback	Publisher Accept/Reject	Publisher Response
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	362	11.3 Review #5	View Link	Consider changing the "classmate" to person or another generic term such as loved one or family member. Its a bit concerning to think that a 6th grader would have a classmate that has a prescription drug problem.	accept	Accept; On page 362, in #5, we will change "a classmate" to "someone"
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	364	#12	View Link	Looking at the information from the lesson, the answer choices could be better.	accept	Accept; replace #5 and #12 (in Student Edition and Teacher's Edition, including answer key) with 5. List four potential health effects (signs or symptoms) of marijuana use or misuse. 12. List three signs of medication and drug abuse.
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	284	2nd paragraph - mental consequences	View Link	This sentence in that passage seems to be a stretch as something that is caused from nicotine use especially for 6th grade: People who use nicotine are more likely to engage in other risky behaviors, such as sexual activity and illegal drug use. Like on P. 344 they mention only risky behaviors not listing specific behaviors.	accept	Accept; on page 284, we will delete "sexual activity and"
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	568	4th paragraph - social emotional development	View Link	Needs more examples of how adolescent changes can affect self esteem such as height, weight, facial hair, acne, brace, wearing glasses etc.	accept	Accept; On page 568, we will add a sentence that says: "Changes to adolescent appearance such as braces, glasses, facial hair, acne, and changing height and weight can affect an individual's self-esteem."
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	568	4th paragraph under Emotional & Social Development	View Link	Could provide examples of the physical changes that adolescents deal with that effect self-esteem.	accept	Accept; On page 568, we will add a sentence that says: "Changes to adolescent appearance such as braces, glasses, facial hair, acne, and changing height and weight can affect an individual's self-esteem."

Subject: Health Education, Grades 7–8

Texas Health Skills for Middle School - Online Learning Suite

Component Title	ISBN	Page Number	Location	Link	Description of Feedback	Publisher Accept/Reject	Publisher Response
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	571	Lesson 17.3 Review #2	View Link	Needs to mention transgender, non-binary, and gender-fluid individuals.	reject	Reject; transgender, non-binary and gender-fluid not covered in the TEKS.
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	564	Puberty in males and females	View Link	Imperative this section includes mentioning the term "gender" contrasted with sex at birth. This distinction is inclusive of individuals who are transgender. Transgender adolescents may wish to "pause" the secondary sex characteristics of their sex at birth in order to later develop the sex characteristics associated with their gender, often known as gender identity.	reject	Reject; transgender, non-binary, and gender fluid not covered in the TEKS.
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	564	Physical development and puberty	View Link	Should include description of transgender, non-binary, and gender fluid individuals.	reject	Reject; transgender, non-binary, and gender fluid not covered in the TEKS.
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	571	Review 2	View Link	Should include the wording "sex at birth" because transgender, non-binary, and gender-fluid individuals may take hormone blockers that "pause" the secondary sex-characteristics of their sex at birth during early adolescence.	reject	Reject; transgender, non-binary, and gender-fluid not covered in the TEKS.
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	361	First sentence under Helping Someone with a Substance Use Disorder.	View Link	Suggestion regarding the use of the word "addiction"- because the rest of the textbook correctly uses clinical jargon regarding substance use, abuse, misuse, dependence, I suggest eliminating the use of the word "addiction." "Addiction" is not a clinical term. Substance use, abuse, misuse, and dependence are clinical terms. While middle schoolers would not be expected to know clinical terms, because the text uses all the other terms correctly, it's a disservice to use one popular culture term ("addiction") in conjunction with the correctly used clinical terms.	reject	Reject; "addiction" is terminology used in the TEKS.
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	361	Description of specific location: paragraph beginning "Your community may offer ..."	View Link	Provide a citation for a safe haven in general, not specific to drug use.	reject	Reject; we cite safe havens for drug use (361), violence and abuse (535, 545) and options for teen pregnancy (630).

Component Title	ISBN	Page Number	Location	Link	Description of Feedback	Publisher Accept/Reject	Publisher Response
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	564-5	Puberty what to expect graphic	View Link	Need to mention "sex at birth"as well as transgender, non-binary, and gender fluid individuals.	reject	Reject; transgender, non-binary, and gender fluid not covered in the TEKS.
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	365	Develop Your Skills #19	View Link	General feedback - if possible add a demonstration part to the skill development.	reject	Reject; we do not correlate any of the skill development activities on page 365 to "demonstration" TEKS breakouts.
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	506	Individuality bullet point	View Link	Suggestion to use the words "personal boundaries" in the bullet point. The concepts listed are congruent with personal boundaries, but I think it would be helpful to list personal emotional boundaries as a part of individuality.	accept	Accept; in Individuality bullet on page 506, change "person maintains their" to "person uses personal boundaries to maintain their"
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	571	Hands on Activity	View Link	Need to mention "sex at birth"to include transgender, non-binary, and gender-fluid individuals.	reject	Reject; transgender, non-binary, and gender-fluid not covered in the TEKS.
<i>Texas Health Skills for Middle School - Online Learning Suite</i>	9781683115298	513	Develop Your Skills #18	View Link	General Feedback - #18 lacks a question that covers trust, honesty, support, commitment	accept	Accept; on page 513, we will add "such as trust, honesty, support, and commitment" to question #18

Subject: Health I

Texas Health Skills for High School - Online Learning Suite HEALTH I

Component Title	ISBN	Page Number	Location	Link	Description of Feedback	Publisher Accept/Reject	Publisher Response
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	402	in this chapter	View Link	Please add: According to the National Institutes of Health, any alcohol use by underage youth is considered to be alcohol abuse.	accept	Accept; We will add the sentence "According to the National Institutes of Health, any alcohol use by underage youth is considered to be alcohol abuse." after the Figure 12.4 reference.
<i>Texas Health Skills for High School -</i>	9781683115335	764	Challenges of Teen Pregnancy and Parenthood	View Link	Abortion should be included as an option under any pregnancy discussion. Adoption should also be explored as an alternative to parenting.	reject	Reject; The TEKS list parenting and adoption as options for pregnancy, but do not cover abortion. Note that adoption is explored in-depth on pages 762–763.

Component Title	ISBN	Page Number	Location	Link	Description of Feedback	Publisher Accept/Reject	Publisher Response
<i>Online Learning Suite</i>							
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	465	hands-on skills activity	View Link	add general health advocacy. Detail taking to city, county, state etc.	reject	Reject; General health advocacy is discussed at length in Lesson 2.4.
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	713	Treating Cardiovascular Disease	View Link	Can add biomarkers cardiovascular disease and metabolic syndrome.	reject	Reject; We will consider this topic as a focus area for a future content update lesson.
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	232-234	What Factors Affect Risk for Suicide? section, Figure 7.15	View Link	Including a citation for where the data came from, and including all of the protective factors currently listed on the CDC website would be helpful. "Protective Factors: Coping and problem-solving skills Cultural and religious beliefs that discourage suicide Connections to friends, family, and community support Supportive relationships with care providers Availability of physical and mental health care Limited access to lethal means among people at risk" Source: https://www.cdc.gov/suicide/factors/index.html	reject	Reject; The text covers all of the protective factors for suicide.
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	713	Develop strategies to prevent non-communicable diseases	View Link	Students need a stronger understanding of biomarkers related to cardiovascular disease in order to create a SMART goal for themselves. Students need to understand biomarkers at they influence our goal setting.	reject	Reject; We will consider this topic as a focus area for a future content update lesson.
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	687	Treating STIs, #3	View Link	"A person with an STI must abstain from sexual activity until a doctor determines the disease is cured and will not spread." This implies that people with incurable STIs including HPV, Herpes and HIV then must abstain from sex forever after being diagnosed. Please consider revising this stigmatizing wording.	accept	Accept; We will revise "A person with an STI must abstain from sexual activity until a doctor determines the disease is cured and will not spread" to read "A person with an STI must abstain from sexual activity until a doctor determines the disease is cured or will not spread."
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	588	588	View Link	I would elaborate developing strategies to resist inappropriate online communication within the gaming environments..	reject	Reject; We will consider this topic as a focus area for a future content update lesson.
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	269		View Link	improve alignment of impact of healthy vs unhealth intake	reject	Reject; On page 257, the text outlines the impact of unhealthy versus healthy intake.

Component Title	ISBN	Page Number	Location	Link	Description of Feedback	Publisher Accept/Reject	Publisher Response
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	687	Treating STIs - second paragraph	View Link	CDC and Preventative Taskforce recommend annual screening for STDs for sexually active individuals. The following sentence: "People can get tested during yearly physicals if they have symptoms." is misleading since a sexually active individual can be asymptomatic so should still be screened for STDs at the yearly physical even if they are not having symptoms.	accept	Accept; We will change "People can get tested during yearly physicals if they have symptoms" to "People can get tested during yearly physicals and if they have symptoms."
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	411	Add this focus point	View Link	Alcohol outlet density is an important determinant of the amount of alcohol advertising in a community. Merchants use storefronts and the interiors of alcohol outlets to advertise alcohol products. Therefore, areas with a high density of outlets have a greater number of advertisements. Alcohol outlet density is an important determinant of the amount of alcohol advertising in a community. Add billboard advertising.	reject	Reject; We will consider this topic as a focus area for a future content update lesson.
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	504	Importance and Benefits of Abstinence	View Link	In this paragraph, "Abstinence also encourages emotional growth and maturity. Healthy sexual relationships include emotional maturity, intimacy, closeness, and trust. Teens are not emotionally ready to handle a sexual relationship or the possibility of becoming a parent. For example, imagine that after having sex with her boyfriend, Winnie finds out that he told his friends. She feels betrayed that he shared something so private with others, and this breach in trust ends the relationship. As another example, after Miko began having sex with her boyfriend, she noticed a change in herself. She became possessive and jealous and got upset if her boyfriend was out with friends. The more she pushes, the more her boyfriend withdraws, and the more unstable the relationship becomes." both examples given are of how girls are negatively impacted after having sex with boys. To be inclusive and give more realistic examples, please consider any negative effects boys engaging in sexual relationships may deal with, as well as sharing examples of people who are having sex with same sex partners or nonbinary people.	accept	Accept; On page 504, we will revise the example about Miko as follows: "As another example, after Michael began having sex with his girlfriend, he noticed a change in himself. He became possessive and jealous and got upset if his girlfriend was out with friends. The more he pushes, the more his girlfriend withdraws, and the more unstable the relationship becomes." Reject; The TEKS do not discuss same-sex and nonbinary relationships.
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	684	Preventing STIs/STDs	View Link	This is an important area to talk about PrEP and PEP for the prevention of the spread of HIV.	reject	Reject; We discuss PrEP and PEP in-depth on pages 694 and 695.
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	598	p. 598	View Link	Add for individual initiating CPR to not bend elbows	accept	Accept; We will revise "Position your hands over the center of the person's chest and push hard and fast using your own body weight" to read "Position your hands over the center of the person's chest and push hard and fast using your own body weight. Keep your arms straight."

Component Title	ISBN	Page Number	Location	Link	Description of Feedback	Publisher Accept/Reject	Publisher Response
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	759	Figure 21.17	View Link	"External condom Fits over an erect penis to block sperm from entering the vagina Internal condom Fits inside the vagina to prevent sperm from entering the uterus" Suggestion to change to "External condom Fits over an erect penis to block sperm from entering sexual partner's body" as this also includes oral and anal sex. And change to "Internal condom Fits inside the vagina to prevent sperm from entering the uterus or fits inside the anus to prevent semen from entering the rectum"	accept	Accept; On page 759, we will revise to state that an external condom "Fits over an erect penis to block sperm from entering the sexual partner's body" and that an internal condom "Fits inside the vagina to prevent sperm from entering the sexual partner's body."
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	236		View Link	Add how prevention reduces likelihood of suicide.	reject	Reject; Pages 234 to 236 discuss how prevention efforts can reduce the likelihood of suicide.
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	698		View Link	needs analyzation added to activity.	reject	Reject; The activities on this page involve analysis.
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	42	Locating Health Information section - first sentence	View Link	Would be good to include social media outlets, podcasts, and YouTube as sources of health information. Most high school students are not reading newspapers, magazines, watching TV, or listening to the radio.	accept	Accept; We will revise "Websites, newspapers, magazines, TV, and radio shows" to read "Websites, social media, magazines, TV, and podcasts."
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	236	236	View Link	Please note the National Suicide Prevention Lifeline.	reject	Reject; The National Suicide Prevention Lifeline is discussed on page 237.
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	543-544	Figure 15.23	View Link	loveisrespect is no longer called The National Teen Dating Abuse Hotline, it's simply loveisrepsect. But it is the best place for young people to go for information and to talk to a professional via phone, chat or text, about healthy, unhealthy and abusive romantic relationships.	accept	Accept; On page 545, we will replace the "National Teen Dating Abuse Hotline" with "loveisrespect."
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	714	Treatment of cardiovascular	View Link	Add Doctor prescribed medication and remove aspirin (OTC) treatment.	accept	Accept; We will revise "Blood-thinning medications and aspirin prevent the formation of blood clots" to read "Blood-thinning and other doctor-prescribed medications prevent the formation of blood clots."
<i>Texas Health Skills for High School -</i>	9781683115335	405	405	View Link	Can you elaborate on the neurotransmitter GABA and how it is enhanced by alcohol. Young teenagers experience fewer of the inhibitory effects that are enhanced by higher levels of GABA in adults.	reject	Reject; We will consider this topic as a focus area for a future content update lesson.

Component Title	ISBN	Page Number	Location	Link	Description of Feedback	Publisher Accept/Reject	Publisher Response
<i>Online Learning Suite</i>					Less inhibition of activity in key brain structures such as the cerebellum means less sedation, less impairment of motor skills, and fewer coordination problems. Less inhibition means greater tolerance, and greater tolerance can result in an incentive to keep drinking and more risky behaviors (The Teenage Brain, Jensen, p130)		
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	588	588-591	View Link	Provide clear examples of social media platforms (e.g., facebook, twitter, tiktok, youtube, etc)	reject	Reject; The text discusses social media platforms in general to be inclusive of all students, regardless of the platforms they are using.
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	429	Add medications on the flush list provided by the FDA:	View Link	Add a flush list table: https://www.fda.gov/drugs/disposal-unused-medicines-what-you-should-know/drug-disposal-fdas-flush-list-certain-medicines	reject	Reject; We will consider this topic as a focus area for a future content update lesson.
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	559	Chapter 15 Skills Assessment, Health and Wellness Skills #19	View Link	Would include "list healthy strategies for preventing sexual abuse" in the pamphlet as part of the activity.	accept	Accept; We will revise "evaluate strategies for managing abuse or neglect in a dating relationship, the family, or household" to read "evaluate strategies for managing and preventing abuse or neglect in a dating relationship, the family, or household."
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	403	403	View Link	Can you elaborate on alcohol's effect on the hippocampus: https://academic.oup.com/alcalc/article/48/4/433/534074	reject	Reject; Alcohol's impact on the hippocampus is discussed on page 401 of the text.
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	543-544	Break the Cycle of Abuse	View Link	The National Domestic Violence Hotline no longer uses the phrase "cycle of abuse" because cycles are predictable and abuse is not. Source: https://www.thehotline.org/resources/is-abuse-really-a-cycle/	accept	Accept; On page 537, we will revise the Essential Question to read "Why is it important to recognize the pattern of power and control in abuse?" and the first Learning Outcome to read "analyze patterns of power and control in abuse;". On page 539, we will revise the first two paragraphs to read "Abusive behavior aims to take power or control over the person experiencing abuse. Abuse can involve many tactics, such as coercion and threats, intimidation, emotional abuse, isolation, denial and blame, using children, using societal privilege, and economic abuse. Abuse sometimes involves four stages, called the cycle of abuse . These stages are tension building, incident, reconciliation, and calm (Figure 15.17). Not all abuse follows this cycle, but these stages can help people recognize abusive behavior." We will revise the Figure 15.17 caption to read "In the cycle of abuse, abuse continues unless someone acts to break the cycle. Not all abuse

Component Title	ISBN	Page Number	Location	Link	Description of Feedback	Publisher Accept/Reject	Publisher Response
							<p>follows this cycle. Abuse can use many tactics to assert power and control.”</p> <p>On page 545, we will revise the heading “Break the Cycle of Abuse” to read “Break the Pattern of Abuse.” We will revise the first paragraph under this heading to read: “Abuse is a pattern of power and control. Because of this, even if abuse seems to stop on its own, it might continue once tension begins to build again. The only way to really stop abuse is to break the pattern of abuse. Strategies for managing abuse or neglect, including in the family or household, include the following:”</p>
<i>Texas Health Skills for High School - Online Learning Suite</i>	9781683115335	661	p. 661	View Link	The document can elaborate on the importance of exercises effects on the immune system: Physical activity may help flush bacteria out of the lungs and airways. This may reduce your chance of getting a cold, flu, or other illness. Exercise causes change in antibodies and white blood cells (WBC). WBCs are the body's immune system cells that fight disease. These antibodies or WBCs circulate more rapidly, so they could detect illnesses earlier than they might have before. However, no one knows whether these changes help prevent infections. The brief rise in body temperature during and right after exercise may prevent bacteria from growing. This temperature rise may help the body fight infection better. (This is similar to what happens when you have a fever.) Exercise slows down the release of stress hormones. Some stress increases the chance of illness. Lower stress hormones may protect against illness. Additionally, the p. 661 notes get plenty of PA. The page can elaborate on the physical activity guidelines for Americans by noting the prescription for children and adults.	reject	Reject; We will consider this topic as a focus area for a future content update lesson.

<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		Scene 2 > Slide 12	View Link	This multiple choice activity is titled as True or False	accept	Thank you, we will change it to be titled 'Multiple Select' instead of 'True/ False.'
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		Slide 61, CDC link	View Link	Better sight to cover the material: https://www.samhsa.gov/	accept	Thank you for sharing this resource. We will link it in the course on slide 1.64.
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		scene 1 slide 40	View Link	The multiple choice activity reads: How will he progress by having long term goals towards improving/ achieving physical activity levels? His muscles/bones will strengthen It will improve his mental health/mood It will reduce his risk of type 2 diabetes/cardiovascular disease It will control his weight All of the above (Correct Answer) These responses would be the result of improving/achieving physical activity levels, NOT as a result of having long term goals. This breakout is specifically intended to address how one can examine the progress one is making towards reaching a goals. Just because the question is worded the same way as the breakout does not mean it is actually addressing it.	accept	Thank you for the feedback. We will adjust the question to align with the breakout: the progress one makes toward having long term goals instead of only addressing improved physical activity levels. New Question: How should Toby make progress toward his long term goal of hiking a 10 mile trail in order to become physically fit? A) Test his stamina by hiking 10 miles every weekend B) Go on a hike each week and see how long he can make it. C) Set interim goals of hiking 2, 5, and 8 mile trails and monitor his progress.

Component Title	ISBN	Page Number	Location	Link	Description of Feedback	Publisher Accept/Reject	Publisher Response
							D) Set a date for his 10 mile hike goal and reflect on how he feels after each interim hike. E) Both C and D (correct)
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		scene 2 slide 25 and option 3 layers 1-3	View Link	The conversation and video seems like an older conversation maybe appropriate for HS.	reject	We have evidence to suggest that middle schoolers, especially 7th and 8th graders, can relate to this type of conversation and the video about love languages.
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		scene 1 slide 41	View Link	It seems that Martin has committed theft in finding \$10. Perhaps, we shouldn't encourage that behavior.		
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		scene 2 slide 9	View Link	This is a good question but I am wondering where the narrative or teaching concept is for them to complete this question?	reject	The narrative is located on slide 1.8 'Eating Healthy Checklist'
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		slide 30, video	View Link	More information about the immediate/short-term effects and consequences needs to be added.	reject	We are open to feedback about what immediate/ short term effects and consequences could be added but also feel the video is comprehensive. It covers short and long term effects of alcohol on the brain, reproductive system, digestive system, and others.
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		scene 2 slide 15	View Link	Not sure if language like "hit/smash" is appropriate for 7th grade students.	reject	Thank you for the feedback. We used these words intentionally, both because we have research to indicate that middle school students have heard or use these words and also as part of the characterization of Dylan, who is treating women like sexual objects. Students should recognize this and reply accordingly.
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		Scene 1 Slide 40	View Link	Making the questions more about the student's personal progress rather than the character's would be beneficial.	reject	We designed our narrative courses so that students can interact with the characters and make choices based on the scenarios the characters are going through. This allows students to both play and take risks in a space free of judgement. They have opportunities to then apply learnings to their own lives and self-reflect.
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062	1.35	Infographic	View Link	Should include information about a variety of drugs.	reject	Thank you, we have provided information about a variety of drugs at another location in the course (scene 1.5). This scene is designed to support the storyline, where Ravi is selling his Adderall, and students should understand the effects of Adderall addiction on the characters.

Component Title	ISBN	Page Number	Location	Link	Description of Feedback	Publisher Accept/Reject	Publisher Response
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		Slide 40	View Link	Be clearer about what the short-term consequences are. Only "getting in trouble" is mentioned.	reject	The text conversation between Roxana and Thea is intended to highlight the long term consequences of alcohol addiction, and Roxana discloses her family's history of alcohol addiction to show evidence of why she made it a point to educate herself. Her cousins 'getting in trouble' as well as her sister's rehab and her uncle's DUIs are examples of her family history of alcohol dependency. The short term consequences of alcohol abuse are shown in an earlier scene, when Thea does research about alcohol abuse and watches the video. (1.30 'Thea Does Research')
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		scene 1 slide 60	View Link	This is only one potential aspect of depression.	reject	This question targets primary cause of Garrett's Binge Eating Disorder (BED), also connected to his feelings of depression.
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		scene 2 slide 2	View Link	Students have to infer much about the relationships listed in the breakout via the conversation about the Grandmother. While the relationships are each loosely touched on, instruction could be more explicit.	accept	We will add to the conversation so that the instruction is more explicit. New chat: Rachel: Well, hey, having a healthy lifestyle doesn't mean you have to give up what you love. I know that if my grandma focused on her nutrition, she could reduce the impact of diabetes and be able to improve her quality of life. A healthy lifestyle leads to doing more of what you love, for my abuela, that's dancing. Liam: Yeah I think you just need a little more balance Rachel: I think we all need a plan to help us with our goals. You guys should try to go to bed earlier for a week and I'll start doing more running practice
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		scene 3 slide 14	View Link	Does not provide enough information on child trafficking	reject	The purpose of this scene is to provide safety tips. At other places in the course, we provide more information about trafficking. See for example the video in scene 3.23 or the information shared during the conversation in scene 4.15.
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		scene 1 slide 53	View Link	"S!@#" - probably isn't appropriate for a middle school setting.	reject	We intentionally used this form instead of the actual word, but we know that middle school students have been exposed to this word.
<i>Lessonbee Adaptive Online Health Education</i>	9780578837062		scene 2 slide 1	View Link	Community resources could be other locations beside just a gym. Listing areas such as a park, cycle club, parks and recreation, local city or government programs.	accept	Thank you, we will add additional community resources, specifically the ones you noted.

Teachers need steps to navigate to through the lesson.	accept	<p>We accept and will add this to our notes:</p> <p>Digestive System</p> <p>Select the Digestive System icon and invite students to examine the screen art and point to different organs and body parts as you explain:</p> <ol style="list-style-type: none"> 1. The human digestive system has many components to it. It begins at the mouth and includes the throat, esophagus, stomach, small intestine, large intestine, and colon. It also includes other organs and glands such as the salivary glands, liver, gallbladder, pancreas, gastric glands and bile duct. 2. Digestion begins in the mouth where the food is mixed with saliva and ground up into a bolus. This bolus then travels down the esophagus where it passes through a valve called the Lower esophageal sphincter and into the stomach. 3. In the stomach the bolus of food will spend about 4 hours in the stomach where your stomach churns and mixes the bolus of food with acidic juices and enzymes to help break it down into a pulpy fluid called chyme. This mixture then passes to the small intestine where it is digested even further using juices from the liver and gallbladder. Nutrients are then absorbed into the bloodstream before the waste products pass to the large intestine where they are eventually eliminated through the rectum and anus. 4. The small intestine is about 22 feet long and the large intestine is about 6 feet long. 5. Food moves through the digestive tract through a wave-like muscular contraction (Smooth Muscle) called peristalsis that pushes the food from the esophagus all the way through the stomach, small intestine, large intestine and out of your body. 6. The acid in the stomach also helps keep us healthy by killing much of the bad bacteria that can get into our body through our food.

							it is tracing in the air (or on the ground). 116.12.b.1.C.i,ii]
Quaver Health Online License	9781642851427	0M11-1.2		View Link	Sorry for the confusion on our notes: I think our issue was this the original breakout strand, "self-toss an object with opposite foot forward". Then when going into the lesson we noticed that there wasn't an reference to "opposite foot". So to clarify I think we actually take issue with the standard itself. So I believe you were correct in leaving OUT the "opposite foot forward" as this was a two handed self toss and we more than likely wouldn't be using that terminology in this specific instance.	accept	We will update these notes when the Texas Essential Knowledge and Skills reflect this language. This is the note we included in our correction submission: *NOTE: the reviewers left mixed reviews here. Originally we did not have an opposite foot forward because you use two hands to toss to yourself. These are the notes from the reviewers: 1. Narrative should not say "opposite foot forward" 2. There's no cue or explanation about stepping with opposition 3. Narrative should not state opposite foot forward. We're unclear how to proceed here, but happy to adjust our resources for the most clarity!
Quaver Health Online License	9781642851427	0M01-2.3		View Link	It's a stretch but still works.	accept	We would love to address this feedback but we can not find a citation or location of error.
Quaver Health Online License	9781642851427	1M11-4.3		View Link	I think I still take issue with what you are describing as a "slide". What you are demonstrating I would consider a "skater" where as the fundamental movement pattern of "slide or sliding" would be closer to a shuffle in basketball or in defensive manner. If the movement is what you want then I recommend changing the name, if a slide is the outcome then I recommend changing the movement.	accept	We will update our photo of "Slide" to better represent the shuffle-like movement as the reviewer recommends to better represent this movement in this screen ("Track & Field (Slide and Skip)"), the Movement Glossary (page 21, middle), and all movement screens that invite students to practice the "slide" movement.
Quaver Health Online License	9781642851427	0M11-1.2		View Link	To me self toss and stepping with opposite foot don't go together. Therefore, if you take out the step you are okay, or if you add the cue for it you are also okay.	accept	We will update these notes when the Texas Essential Knowledge and Skills reflect this language. This is the note we included in our correction submission: *NOTE: the reviewers left mixed reviews here. Originally we did not have an opposite foot forward because you use two hands to toss to yourself. These are the notes from the reviewers: 1. Narrative should not say "opposite foot forward" 2. Quaver Health Online License	9781642851427	2,18,22	Movement Guide under relevant movements	View Link	Use the words "curl" or "curling" in your definitions of what to do with a particular body part to reference the TEK. "Curl" your elbow, "curl" your leg, and even use "curl" for the Crunches and Sit-ups to reference the body curling for abdominal workouts.	accept	
Quaver Health Online License	9781642851427	1M02-1.2	Menu-Notes	View Link	Based on the examples of situations given in the text, the only reference to the word "actions" given in the TEKS is about taking action to speak to someone. Put in a reflective question about what might be the positive or negative consequences based on how the student(s) may react to some of those scenarios given. Covering that reaction would help cover more of the aspect of this TEK.	accept	<p>We will add the following bullets in bold to the teacher notes for this screen activity "Who Can I Talk To?"):</p> <ul style="list-style-type: none"> This screen activity encourages students to think about their actions and feelings and the parents and other trusted adults with whom they can discuss their feelings and thoughts. Discuss with students: "Some of our feelings and thoughts are stronger than others. Recognizing how we feel and respectfully reacting to others in the moment is important; talking about our feelings and making an action plan can help us feel better. For feelings that are not very strong, we might be able to talk to our friends, pets, or our favorite stuffed animal and feel better. When we feel strong feelings, we would need to talk to our parents or another grown up that we trust, like teachers, school counselors, coaches, and so on." There are eight scenarios for students to consider. First, read students the scenario. Next, talk about how students might feel and how they can respectfully treat other people, if applicable. Finally, invite different students to Select and Place who they would talk to about this emotion and thought into the thought bubble. If needed, they may use the Draw tool. Invite students to role play, respectfully telling the person they've chosen about their feelings and consider appropriate action plans for the future. <i>Quaver Health Online License</i>	9781642851427	1M11-1.4	In the teacher notes.	View Link	In the instructional material we have "Underhand" Pass demonstration which then leads to "Forearm Pass" Activity. We recommend keeping those labeling the same. (ie change Underhand to Forearm Pass Demonstration...) Furthermore, later on down at the bottom there is an activity with "Underarm" then again it's changed to "Underhand". We recommend keeping it to Underhand all the way through.	accept	We will replace instances of "Forearm" and "Underarm" with "Underhand" to be consistent throughout the lesson. We will also add this bullet to the teacher notes in the "Volley (Underhand)" screen: <ul style="list-style-type: none"> Explain to students that many volleyball players refer to the underhand pass as simply a "pass" or "dig".
<i>Quaver Health Online License</i>	9781642851427	1M11-1.5	The teacher notes	View Link	The use of "Overhand" instead of "Overhead" needs to be fixed. More of a personal note, however, I still think the word "set" should be included in the lesson, or at least put in the notes as to keep prominent volleyball terminology in minds of students.	accept	We will replace the title onscreen to read "Volley (Overhead)" as well as replace all instances of "Overhand" with "Overhead" in the notes for the "Volley" lesson. <p>Additionally, we will add this bullet to the teacher notes in the "Volley (Overhead)" screen:</p> <ul style="list-style-type: none"> Explain to students that many volleyball players refer to the overhead pass as a "set" while the underhand pass is often referred to as simply a "pass" or "dig".
<i>Quaver Health Online License</i>	9781642851427	rid_3364425	teacher notes	View Link	Would love to see an explanation/definition of "wellness" and "health".	accept	We will add the following (in bold) to teacher notes for "Moving My Body (Play and Physical Activity)": <p>3rd - 5th grade:</p> <ul style="list-style-type: none"> Explain how regular, moderate to vigorous physical activity affects all dimensions of health: physical, social, intellectual, and emotional (including stress management).

Component Title	ISBN	Page Number	Location	Link	Description of Feedback	Publisher Accept/Reject	Publisher Response
							<ul style="list-style-type: none"> Explain that moderate activity, as defined by the Centers for Disease Control, is when an average person expends energy at 3-6 times the energy they spend when sitting quietly. Examples include playing on playground equipment, briskly walking, or dancing to a song. Vigorous activity, on the other hand, is when an average person expends 6 or more times more energy than they do when sitting still. Examples include sprinting to play tag, skipping rope, or performing jumping jacks. In terms of duration, based on physical fitness, the CDC states that “Generally, activities in the moderate-intensity range require 25-50 minutes to expend a moderate amount of activity, and activities in the vigorous-intensity range would require less than 25 minutes to achieve a moderate amount of activity.” When thinking about the difference between “health” and “wellness”, explain to students that “health” is one’s current state of being while “wellness” is the on-going choices you make to help keep yourself well and, in turn, keep your body and mind healthy. Ask students to turn to a partner and list one way regular exercise affects each dimension and overall health and wellness. [116.15.b.8.A.i; 116.16.b.8.A.i,ii; 116.17.b.8.A.i,ii]

Quaver Health Online License	9781642851427	0M11-4.5	The teacher notes.	View Link	It would be helpful to have the cues for dribbling with feet (even if it's understood for the older students) in this lesson. It would be good for a review purpose as well as that's what the breakout is specifying.	accept	<p>We will add the following language to the Teacher Notes of the "Foot Dribble and Pass (Receiving)" screen activity:</p> <ul style="list-style-type: none"> Before presenting new material of receiving a ball from a partner, review Dribbling while Jogging and Passing with demonstrations and a quick refresher round of "Compass: <p>Demonstration: Dribbling While Jogging [116.15.b.3.D.i]</p> <ul style="list-style-type: none"> Materials: 1 ball <ul style="list-style-type: none"> Cue 1: Tap - Tap ball with inside or outside of foot Cue 2: Follow and Tap - Jog forward tap with other foot. Repeat. Cue 3: Trap - Stop ball with foot gently on top <p>Demonstration: Passing</p> <ul style="list-style-type: none"> Materials: 1 ball <ul style="list-style-type: none"> Cue 1: Eyes (on ball) Cue 2: Step (opposite foot to the side of the ball) Cue 3: Turn (kicking foot so instep faces ball) Cue 4: Pass (swing leg and kick with inside of foot) <p>Review Activity: Compass (N, S, W, E)</p> <ul style="list-style-type: none"> Materials: 1 ball per student Establish your directional compass with stopping points. Students dribble the ball in a designated space. Call out a direction. All students begin dribbling in that direction to the designated stopping point. Once most students have made it to the endpoint, call out "Pass!". Students trade balls with a neighbor by gently passing it to them. All students trap ball and then begin dribbling again. <p>Explain to students that today's activities and games will allow them to practice receiving a ball from a partner, both while still and in motion.</p>

View Link	Already left a full citation on a different grade, but just want to acknowledge this doesn't truly hit the criteria for discussing what MVPA is and how it's meant to be used.	accept	<p>We will add this language to teacher notes for screen activities in 3-5th grade that invite students to “differentiate between moderate to vigorous physical activity”:</p> <ul style="list-style-type: none"> • Explain that moderate activity, as defined by the Centers for Disease Control, is when an average person expends energy at 3-6 times the energy they spend when sitting quietly. Examples include playing on playground equipment, briskly walking, or dancing to a song. • Vigorous activity, on the other hand, is when an average person expends 6 or more times more energy than they do when sitting still. Examples include sprinting to play tag, skipping rope, or performing jumping jacks. • In terms of duration, based on physical fitness, the CDC states that “Generally, activities in the moderate-intensity range require 25-50 minutes to expend a moderate amount of activity, and activities in the vigorous-intensity range would require less than 25 minutes to achieve a moderate amount of activity.”

Balance on one foot, point the kicking foot outward and swing straight leg to mimic kicking a ball and warming up leg. In preparation for kicking with both feet fluently, repeat on the other side. • Demonstrate how to pass the ball with a volunteer or two volunteers using the following steps: <p>Demonstration: Passing</p>

Quaver Health Online License	9781642851427	0M11-3.4	Teacher notes	View Link	This is a weak example of discussing "impulsivity" in a lesson. In 5th grade the excitement of a game isn't the type of impulsivity we are wanting to discuss.	accept	<p>We will add the following bullets to the teacher notes for the activity "Hot Potato" on the "Hand Dribble and Pass (Passing)" screen:</p> <ul style="list-style-type: none"> • Recognizing and controlling personal impulses can come into play in a variety of ways in an athletic environment. Discuss when students might have an impulse to do an action that might not be the best choice for the team: <ul style="list-style-type: none"> ○ For example, one impulse might be to pass the ball only to friends, even if they don't have the best positioning for a successful play. ○ Another impulse might be to pass the ball as quickly as possible, without taking the time to survey the field and make a good play. ○ Finally, students might recognize an impulse to pass to the same player repeatedly - knowing that they will most likely catch the ball and make the play. However, opponents will also quickly recognize this as well and guard that player, making it more difficult to complete the play. Encourage students to examine the impulse to always pass to a 'safe bet' and instead practice recognizing opportunities to surprise opponents.
