Acknowledgments

The authors of this report are grateful to Texas Education Agency (TEA) staff from the Charter School Authorizing and Administration and Research and Analysis divisions, who were involved in detailed programmatic and methodological discussions and provided data for analysis and feedback on results. The authors would also like to thank Jeanette Narvaez, Sherri Lowrey, and Diana D'Abruzzo for their assistance throughout the project.

Copyright © Notice: The materials are copyrighted © and trademarked ™ as the property of TEA and may not be reproduced without the express written permission of TEA, except under the following conditions:

1. Texas public school districts, charter schools, and education service centers (ESCs) may reproduce and use copies of the materials and related materials for the districts' and schools' educational use without obtaining permission from TEA.
2. Residents of the state of Texas may reproduce and use copies of the materials and related materials for individual personal use only without obtaining written permission of TEA.
3. Any portion reproduced must be reproduced in its entirety and remain unedited, unaltered, and unchanged in any way.
4. No monetary fee can be charged for the reproduced materials or any document containing them; however, a reasonable fee to cover only the cost of reproduction and distribution may be charged.

Private entities or persons located in Texas that are **not** public school districts, charter schools, or ESCs or any entity, whether public or private, educational or noneducational, located **outside the state of Texas** *MUST* obtain written approval from TEA and will be required to enter into a license agreement that may involve the payment of a licensing fee or a royalty.

Executive Summary

Background

The first charter schools were established in the United States in 1991 to provide students with a tuition-free alternative to traditional public schools. Their purpose: to create additional flexibility and innovation in education. Minnesota was the first state to usher in charter schools, and other states quickly followed; charter schools now operate in 44 states and the District of Columbia. The number of operating charter schools across the nation has more than doubled over the past 14 years—from approximately 3,700 in the 2005–06 academic year to approximately 7,500 in 2019–20. Student enrollment has also experienced marked growth, increasing from about 1 million students in 2005–06 to about 3.5 million students in 2019–20 (National Alliance for Public Charter Schools, 2022).

Texas charter schools were first established in 1995 by the 74th Texas Legislature with the addition of Texas Education Code (TEC) Chapter 12. The state proposed charter schools as a means to improve student learning, increase the choice of learning opportunities within the public school system, create professional opportunities to attract new teachers to the public school system, and encourage different and innovative learning methods (TEC § 12.001, 2022). Texas charter schools are subject to fiscal and academic accountability, though they have fewer regulations than traditional public schools to encourage innovation and flexibility.

Four subchapters within TEC Chapter 12 (2022) codify the different types of charter schools in Texas:

- **Home-rule school district charter schools** (TEC Chapter 12, Subchapter B, 2022), which are not in existence to date;
- **Campus or campus program charter schools** (TEC Chapter 12, Subchapter C, 2022), which are authorized by Texas Independent School District (ISD) school boards and serve students within the district;
- **Open-enrollment charter schools** (TEC Chapter 12, Subchapter D, 2022), which are authorized by the commissioner of education (COE), are operated by 501(c)(3) tax-exempt organizations or governmental entities, and can enroll students from any school districts in their approved geographic boundaries; and
- **College, university, or junior college charter schools** (TEC Chapter 12, Subchapter E, 2022), which are authorized by the COE, are operated by institutions of higher education, and can enroll students from any school districts in their approved geographic boundaries.

Contemporary charter school legislation demonstrates the state’s effort to balance quality with growing charter school demand. In 2013, the 83rd Texas Legislature (regular session) passed Senate Bill (SB) 2, which made significant changes to the state’s charter school legislation. The bill added TEC § 12.115 (a)-(d) (2022)—Charter Revocation or Modification of Governance—to the TEC, which placed charter schools under stricter financial and academic accountability expectations and requires the commissioner to revoke a school’s charter should it fail to meet the stated accountability benchmarks for three consecutive years. Since the passage of SB 2 in 2013, 40 charter schools have closed, and the number of charters granted annually has decreased. SB 2 also increased the cap on the maximum possible number of open-enrollment charter schools granted from 215 to 305 by September 2019 (TEC § 12.101, 2022). Another significant change introduced in SB 2 was the transfer of authority in granting open-enrollment charters from the State Board of Education (SBOE) to the COE (TEC § 12.101 (a), 2022). The commissioner, however, must still submit notification to the SBOE regarding which charters are proposed. The SBOE may veto any new charter proposed by the commissioner within 90 days of the commissioner’s decision (TEC § 12.101(b-0), 2022). Along with this change, the legislature added a requirement (TEC § 12.1013 (a)-(d), 2022) for a report on the performance of open-enrollment charter school campuses by authorizer type that compares results of each with matched traditional public school campuses.

In 2017, the 85th Texas Legislature passed SB 1882, providing incentives to school districts to partner with open-enrollment charter schools and certain eligible entities to open campuses within their district.¹ The bill provided two incentives to promote district partnerships with open-enrollment charter schools and eligible entities. The first was a two-year relief from campus sanctions imposed at schools with low academic performance; the second was access to potentially increased state funding. Both of these benefits incentivized districts to enter into partnerships with outside entities. Also in 2017, the Texas Legislature passed House Bill 21, allowing public charter schools, for the first time in Texas, to receive up to \$60 million in state funding annually for facilities (TEC § 12.106 (d)-(2) 2022).

Overview of Texas Charter School Campuses

In the 2020–21 academic year, 8,840 Texas public school campuses were in operation. Approximately 11% (952) of those campuses were charter school campuses, including ISD-authorized charter school campuses and campuses operated by SBOE-authorized charter schools and COE-authorized charter schools. In 2020–21, most charter school campuses operated under SBOE-authorized charter schools (788).² Additionally, 121 campuses were ISD-authorized, and 43 campuses operated under COE-authorized charter schools. A total of 428,259 students were enrolled in charter school campuses, representing approximately 8% of the 5,371,356 students enrolled in Texas public schools.

The aggregate performance outcomes presented in this report include 737 campuses operated by SBOE-authorized charter schools, 121 ISD-authorized charter school campuses, and 39 campuses operated by COE-authorized charter schools.³

Key Findings for SBOE-Authorized and ISD-Authorized Charter School Campuses

For the purposes of this report, charter schools and their respective campuses are categorized by their authorizer. Campus or campus program charter schools are reported as ISD-authorized charter schools. Open-enrollment and college, university, or junior college charter school campuses are reported as SBOE-authorized or COE-authorized, depending on the year in which the charter schools were authorized; the COE replaced the SBOE as the state charter authorizer for open-enrollment charter schools in 2013. To date, Texas does not have any home-rule school district charter schools on which to report. These findings—comparing SBOE-authorized and ISD-authorized charter school campuses with matched traditional public school campuses—include aggregate outcome measures related to attrition rates; graduation rates; and college, career, and military readiness (CCMR) outcomes. The comparison of SBOE-authorized and ISD-authorized charter school campuses with matched traditional public school campuses does not extend to State of Texas Assessments of Academic Readiness (STAAR®) results, as the COVID-19 pandemic influenced STAAR testing participation differently across the state.

Attrition Rates

For the purposes of this report, the attrition rate is defined as the percentage of students enrolled in the fall of 2020 who did not return to the same campus in the fall of 2021.⁴ The attrition rates for this report were calculated using student-level data provided by the Texas Education Agency (TEA).

The attrition rate for SBOE-authorized charter school campuses was 29%, compared with 23% at their matched traditional public school campuses. When broken down by school level, SBOE-authorized charter school campuses observed the highest level of attrition at the high school level—38% at SBOE-authorized

1 SB 1882 Texas Partnership schools are classified as ISD-authorized charter schools for the purposes of this report.

2 The 788 campuses associated with SBOE-authorized charter schools include campuses approved by the COE through the approval of expansion amendment requests to add new campuses under existing charter schools originally authorized by the SBOE.

3 Residential treatment facilities at charter school campuses (SBOE-authorized charter schools n=51; COE-authorized charter schools n=4), and residential treatment facilities at traditional public school campuses (n=74), as well as traditional public school disciplinary alternative education programs (n=117) and traditional public school juvenile justice alternative education programs (n=99) are not included in the performance outcome reporting.

4 See Appendix A for a detailed description of the attrition analysis.

charter school campuses compared with 25% at their matched traditional public school campuses. The attrition rate was 22% at ISD-authorized charter school campuses and their matched traditional public school campuses. When broken down by school level, ISD-authorized charter school campuses observed the highest level of attrition at the high school level—24% at ISD-authorized charter school campuses, compared with 21% at their matched traditional public school campuses.

STAAR Results

Analyzed in this report are the percentages of students achieving the Approaches Grade Level standard or above and Masters Grade Level standard on STAAR-Reading and STAAR-Mathematics exams taken by elementary and middle school students in Grades 3–8, the STAAR-Algebra I end-of-course (EOC) exam taken by middle and high school students, and the STAAR-English I and English II EOC exams taken by middle and high school students.^{5,6}

At SBOE-authorized charter schools, 55% of students taking the STAAR-Mathematics exams and 62% of students taking the STAAR-Algebra I EOC exam met the Approaches Grade Level standard, while 11% of students taking the STAAR-Mathematics exams and 14% of students taking the STAAR-Algebra I EOC exam met the Masters Grade Level standard. For students taking the Reading/English Language Arts (ELA) exams, 65% taking STAAR-Reading exams, 64% taking the STAAR-English I EOC exam, and 68% taking the STAAR-English II EOC exam met the Approaches Grade Level standard. Eighteen percent of students taking STAAR-Reading exams met the Masters Grade Level standard—the most achieving that level across all tests and grade levels; 9% of students taking the STAAR-English I EOC exam and 8% of students taking the STAAR-English II EOC exam met the Masters Grade Level standard.

At ISD-authorized charter schools, 49% of students taking the STAAR-Mathematics exams and 70% of students taking the STAAR-Algebra I EOC exam met the Approaches Grade Level standard, while 11% of students taking the STAAR-Mathematics exams and 19% of students taking the STAAR-Algebra I EOC exam met the Masters Grade Level standard. For students taking the Reading/ELA exams, 57% taking STAAR-Reading exams, 66% taking the STAAR-English I EOC exam, and 71% taking the STAAR-English II exam met the Approaches Grade Level standard. Fifteen percent of students taking STAAR-Reading exams, 10% of students taking the STAAR-English I EOC exam, and 9% of students taking the STAAR-English II EOC exam met the Masters Grade Level standard.

Graduation Rates

SBOE-authorized charter school campuses evaluated under standard accountability provisions had a four-year longitudinal graduation rate of 97%, compared with matched traditional public school campuses, which had a four-year longitudinal graduation rate of 91%. The four-year longitudinal graduation rate at ISD-authorized charter school campuses was 88%, compared with 91% at matched traditional public school campuses. Additionally, four-year longitudinal graduation rates for Alternative Education Accountability (AEA) campuses were examined; the graduation rate at SBOE-authorized charter school campuses was 72%, compared with 89% at their matched traditional public school campuses. For ISD-authorized charter school AEA campuses, the graduation rate is masked due to the limited number of schools (two) operating under these provisions and eligible for this analysis.

College, Career, and Military Readiness Outcomes

Under TEC § 39.053(c) (2019), for accountability purposes, high school graduates can demonstrate readiness for college, a career, or the military through a number of achievements outlined in detail in Appendix A.

Graduates at SBOE-authorized charter school campuses demonstrated CCMR in several ways, though, for

⁵ The Approaches Grade Level standard is a STAAR performance level descriptor indicating that the student is likely to succeed in the next grade or course with targeted academic intervention. The Approaches Grade Level standard serves as the state passing standard.

⁶ A more difficult achievement level to attain, the Masters Grade Level standard is a STAAR performance level descriptor indicating that the student is expected to succeed in the next grade or course with little or no academic intervention.

the most part, at lower rates than matched traditional public school campuses. The most common way to demonstrate CCMR is by meeting Texas Success Initiative (TSI) criteria in ELA/reading and mathematics: SBOE-authorized charter school campuses and their matched traditional public school campuses had 41% of students demonstrating CCMR through this pathway. Relatively few graduates at SBOE-authorized charter school campuses demonstrated CCMR through earning additional certifications and credits, including earning college prep course credit, an associate's degree, or industry-based and workforce education certifications, both overall and in comparison with matched traditional public schools.⁷

Generally, graduates of ISD-authorized charter school campuses demonstrated CCMR at higher rates than their matched traditional public school campuses. Notably, 40% of graduates satisfied TSI college readiness benchmarks in both ELA/reading and mathematics compared with 35% at matched traditional public school campuses, and 30% earned college credit through the completion of dual credit courses compared with 22% at matched traditional public school campuses. While the percentage of graduates was small, ISD-authorized charter school campuses and matched traditional public school campuses had equal proportions of students completing an industry-based certification (13%), earning a Level I or Level II certificate in any workforce education area (1%), and earning credit for an ELA college prep course (7%).

Key Findings for COE-Authorized Charter School Campuses

Aggregate outcome measures related to attrition were reported for COE-authorized charter school campuses and matched traditional public school campuses. STAAR results were also reported, although without comparisons with matched traditional public school campuses due to differences in testing requirements between schools. Because of the small number of COE-authorized charter school campuses, aggregate outcome measures related to graduation rates and CCMR outcomes were not reported.

Attrition Rates

The attrition rate for COE-authorized charter school campuses was 36%, compared with 25% at their matched traditional public school campuses.

STAAR Results

Analyzed in this report are the percentages of students achieving the Approaches Grade Level standard and Masters Grade Level standard on STAAR-Reading and STAAR-Mathematics exams taken by elementary school and middle school students in Grades 3–8, the STAAR-Algebra I EOC exam taken by middle and high school students, and the STAAR-English I and English II EOC exams taken by middle and high school students.

Fifty-nine percent of students taking the STAAR-Mathematics exams and 71% of students taking the STAAR-Algebra I EOC exam met the Approaches Grade Level standard, while 12% of students taking the STAAR-Mathematics exams and 17% of students taking the STAAR-Algebra I EOC exam met the Masters Grade Level standard. For students taking the Reading/ ELA exams, 70% taking STAAR-Reading exams, 74% taking the STAAR-English I EOC exam, and 75% taking the STAAR-English II EOC exam met the Approaches Grade Level standard. Twenty-two percent of students taking STAAR-Reading exams, 12% of students taking the STAAR-English I EOC exam, and 12% of students taking the STAAR-English II EOC exam met the Masters Grade Level standard.

Study Limitations

This report provides a detailed description of charter school campuses and matched traditional public school campuses intended for comparison of school types. While a combination of sampling techniques

⁷ Per the [TEA Accountability Manual](#) for 2021 (page 10, PDF e-page 16): Due to discrepancies between annual enlistment counts for Texas military enlistees aged 17-19 released by the United States Department of Defense and the Texas Student Data System Public Education Information Management System's military enlistment data for 2017 and 2018 annual graduates, military enlistment data is excluded from accountability calculations until such data can be obtained directly from the United States Armed Forces (TEA, 2021a).

was used to identify demographically similar traditional public school campuses as the matched set for comparison, inferences regarding the performance of charter schools relative to traditional public schools cannot be made using this report. In order to suggest the performance of one type of school is consistently better or worse than another, statistical tools controlling for observed and unobserved characteristics influencing performance would need to be in place and inferential statistical analysis employed. Additionally, careful interpretation of the comparisons with COE-authorized and ISD-authorized charter school campuses provided in this report is necessary because of the small numbers of campuses in each category.

Because of the award of new charters and the expansion of existing charters, this report should be carefully compared with previously published Texas Charter Authorizer Accountability reports. Since 2012, the state of Texas has phased in a new standardized test, STAAR, and performance standards and created a new accountability rating system. The gradual phase-in of the new test and the current accountability system should be taken into consideration when comparing the results of this report to previous reports. Additionally, each year, new charter schools are authorized and new charter school campuses are opened and closed. Thus, Texas Charter Authorizer Accountability reports from two different years contain different subsets of charter schools, and results should be compared with caution. As a final note, although the passage of SB 2 in 2013 resulted in a policy process change in charter school authorization, the reader is cautioned against attributing differences presented in this report solely to this change. Rather, differences may be attributable to other changes occurring over time, such as differences in the charter school applicant makeup, other process changes, and/or changes in leadership at the charter schools—none of which could be accounted for within the scope of this report.

Beginning in the spring of 2020, public health and safety circumstances caused by the coronavirus disease (COVID-19) pandemic led to the closure of schools during the state's testing window and inhibited the state's ability to measure district and campus performance accurately. The COVID-19 pandemic continued to interrupt education into the 2020–21 school year and influenced some participation in STAAR testing. For the 2021 accountability cycle, TEA received approval to waive accountability requirements under the Every Student Succeeds Act. Therefore, all districts and campuses were labeled *Not Rated: Declared State of Disaster for 2021*, and domain scores and overall ratings were not calculated and therefore not included in this report. STAAR performance outcomes are reported for charter schools but not compared with STAAR performance for matched traditional public schools due to possible differences in STAAR test participation. Outcomes available for this report pertaining to attrition, graduation, and CCMR are reported for charter schools and matched traditional public schools.

Section 1: Introduction

National Charter School Overview

The first charter schools were established in the United States in 1991 to provide students with a tuition-free alternative to traditional public schools. Their purpose: to create additional flexibility and innovation in education. Minnesota was the first state to usher in charter schools, and other states quickly followed; charter schools now operate in 44 states and the District of Columbia. The number of operating charter schools across the nation has more than doubled over the past 14 years—from approximately 3,700 in the 2005–06 academic year to approximately 7,500 schools in 2019–20. As shown in Figure 1.1, student enrollment has also experienced marked growth, increasing from about 1 million students in 2005–06 to about 3.5 million students in 2019–20 (National Alliance for Public Charter Schools, 2022).

FIGURE 1.1

Number of Students Enrolled in Charter Schools in the United States, 2005–06 to 2019–20

Source. National Alliance for Public Charter Schools, 2022.

Note. The 2019–20 school year data is the most recent available from the National Alliance for Public Charter Schools.

The literature documenting the contribution of charter schools to the quality of the public school system is mixed (Betts & Tang, 2019; Zimmer et al., 2012). Conducted both nationally and within specific states, there are studies indicating that charter schools are efficient producers of public education outcomes (Wolf et al., 2014), studies that demonstrate the increased learning gains of students enrolled in charter schools (Center for Research on Education Outcomes, 2017; Hoxby & Rockoff, 2004), studies that report the increased performance of nearby traditional public schools following the introduction of charter school competition (Booker et al., 2008; Winters, 2012), and studies that demonstrate improvement in the overall performance of the charter school sector over time (Baude et al., 2020). In contrast, there are also national and state-specific studies that demonstrate little or no significant outcomes for charter school

students (Gleason et al., 2010; Zimmer et al., 2012), studies that show charter school competition has no effect on the performance of traditional public schools (Bifulco & Ladd, 2006), studies that highlight wide variations in effect by different charter schools and different student groups (Sass, 2006), and studies that point to charter school policies and practices as mechanisms of selecting only high-performing or highly motivated students (Angrist et al., 2013; Lubienski et al., 2009). In summary, charter school outcomes and effects, like the state policies that govern them, vary widely.

Texas Charter Schools

Texas charter schools were first established in 1995 by the 74th Texas Legislature with the addition of Texas Education Code (TEC) Chapter 12. The state proposed charter schools as a means to improve student learning, increase the choice of learning opportunities within the public school system, create professional opportunities to attract new teachers to the public school system, and encourage different and innovative learning methods (TEC § 12.001, 2022). Texas charter schools are subject to fiscal and academic accountability, though they have fewer regulations than traditional public schools to encourage innovation and flexibility.

Four subchapters within TEC Chapter 12 codify the different types of charter schools:

- **Home-rule school district charter schools** (TEC Chapter 12, Subchapter B, 2022), which are not in existence to date;
- **Campus or campus program charter schools** (TEC Chapter 12, Subchapter C, 2022), which are authorized by Texas Independent School District (ISD) school boards and serve students within the district;
- **Open-enrollment charter schools** (TEC Chapter 12, Subchapter D, 2022), which are authorized by the commissioner of education (COE), are operated by 501(c)(3) tax-exempt organizations or governmental entities, and can enroll students from any school districts in their approved geographic boundaries; and
- **College, university, or junior college charter schools** (TEC Chapter 12, Subchapter E, 2022), which are authorized by the COE, are operated by institutions of higher education, and can enroll students from any school districts in their approved geographic boundaries.

For the purposes of this report, charter schools and their respective campuses are categorized by their authorizer. Campus or campus program charter schools are reported as ISD-authorized charter schools. Open-enrollment and college, university, or junior college charter school campuses are reported as State Board of Education (SBOE)-authorized or COE-authorized, depending on the year in which the charter schools were authorized; the COE replaced the SBOE as the state charter authorizer for open-enrollment charter schools in 2013. To date, Texas does not have any home-rule school district charter schools, thus none were reported.

Like traditional public schools, charter schools are required to implement the Texas Essential Knowledge and Skills (TEKS) standards, and charter school students take the same State of Texas Assessments of Academic Readiness (STAAR®) exams as traditional public school students. Texas charter schools are also held to the same academic accountability as traditional public schools under Texas's accountability rating system. Though all charter schools and traditional public schools are evaluated similarly, important differences exist between open-enrollment charter schools and traditional public schools: Teachers in open-enrollment charter schools must hold a bachelor's degree but are not required to hold a teaching certificate unless they are a special education or bilingual education/English as a second language teacher or the governing body of a charter school has set the qualifications for teachers at a standard above what state law requires. Also, charter school salary schedules are set by each individual charter school board, and charter schools can establish their own class sizes. Open-enrollment charter schools can enroll students from any district within the geographic boundary approved in their charters, and they can choose to deny enrollment for certain disciplinary reasons, as most of the provisions in TEC Chapter 37 (2022) do not apply.

Texas charter schools grew to serve 428,259 students in 952 campuses in the 2020–21 school year (Tables 2.1 and 2.2). In order to ensure quality in charter schools, the Texas Legislature has increased performance regulations over the years. It has also mandated the closure of charter schools for poor performance and encouraged growth by providing them with access to facilities funding.

Contemporary Texas Charter Legislation

Contemporary charter school legislation demonstrates the state’s effort to balance quality with growing charter school demand. In 2013, the 83rd Texas Legislature passed Senate Bill (SB) 2, which made significant changes to the state’s charter school legislation. The bill added Section 12.115 (a)-(d)—Charter Revocation or Modification of Governance—to the TEC, which placed charter schools under stricter financial and academic accountability expectations and enacted the requirement that the commissioner revoke a school’s charter should it fail to meet the stated accountability benchmarks for three consecutive years. Since the passage of SB 2 in 2013, 45 charter schools have closed, and due to the increased selectivity of the commissioner’s process for awarding charters combined with the SBOE’s veto authority, the number of charters granted annually has decreased.⁸ SB 2 also increased the cap on the maximum possible number of open-enrollment charter schools granted from 215 to 305 by September 2019 (TEC § 12.101, 2022). Another significant change introduced in SB 2 was the transfer of authority to grant open-enrollment charters from the SBOE to the COE (TEC § 12.101 (a), 2022). The commissioner must still submit notification to the SBOE regarding which charters are proposed, and the SBOE may veto any new charter proposed within 90 days of the commissioner’s decision (TEC § 12.101(b-0), 2022). Along with this change, the legislature added a requirement (TEC § 12.1013 (a)-(d), 2022) for a report on the performance of open-enrollment charter school campuses by authorizer type that compares results of each with matched traditional public school campuses.

In 2017, the 85th Texas Legislature (regular session) passed SB 1882, providing incentives to school districts to partner with open-enrollment charter schools and certain eligible entities to open campuses within their district.⁹ The bill provided two incentives to promote district partnerships with open-enrollment charter schools and eligible entities. The first was a two-year relief from campus sanctions imposed at schools with low academic performance; the second was access to potentially increased state funding. Both of these benefits incentivized districts to enter into partnerships with outside entities. Also in 2017, the Texas Legislature passed House Bill 21, allowing public charter schools, for the first time in Texas, to receive up to \$60 million in state funding annually for facilities (TEC § 12.106(d)-(2), 2022).

Purpose of the Report

In accordance with TEC § 12.1013(a)-(d) (2022), the Texas Education Agency (TEA) selected the University of Houston Education Research Center (UH ERC) to prepare a report that compares the performances of the following types of schools: charter school campuses operating under charter schools granted by the SBOE (SBOE-authorized), charter school campuses granted by ISDs (ISD-authorized), charter school campuses operating under charter schools granted by the COE (COE-authorized), and matched traditional public school campuses. This report includes performance data for all charter school campuses operating in the 2020–21 school year, including those operated by charters granted between 1996 and 2012 (Generations 1 through 17) by the SBOE, those granted between 2013 and 2019 (Generations 18 through 24) by the COE, and all charter school campuses authorized by ISDs.¹⁰

Beginning in the spring of 2020, public health and safety circumstances caused by the coronavirus disease (COVID-19) pandemic led to the closure of schools during the state’s testing window and inhibited the state’s ability to measure district and campus performance accurately. The COVID-19 pandemic con-

8 For a detailed list of charters granted and closed, see the [Summary of Charter Awards and Closures](#) report.

9 SB 1882 Texas partnership schools are classified as ISD-authorized charter schools for the purposes of this report.

10 Though charter schools were granted in 2020 and 2021 (Generations 25 and 26), they were not in operation for the 2020–21 school year and thus not included in this report.

tinued to interrupt education into the 2020–21 school year and TEA received approval to waive 2021 accountability requirements under the Every Student Succeeds Act (U.S. Department of Education, April 6, 2021). All districts and campuses were labeled *Not Rated: Declared State of Disaster for 2021*, and domain scores and overall ratings were not calculated and therefore not included in this report. In 2020–21, state-wide STAAR test participation was lower than years before the COVID-19 pandemic and test participation rates varied widely across schools.¹¹ With wide variance in test participation, aggregate campus-level test results could reflect less than the entire student population served at a campus. As such, this report displays STAAR performance outcomes for charter schools but does not display the STAAR performance for matched traditional public schools in order to limit inaccurate comparisons among school types. Outcomes available for this report pertaining to attrition, graduation, and college, career, and military readiness (CCMR) are reported for charter schools and matched traditional public schools.

Data Sources, Definitions, and Research Methods

The data and methods used in this report are intended to present descriptive information for the comparison of charter schools with matched traditional public schools. While the information presented provides the opportunity for comparison, inferences about the effectiveness of charter schools and matched traditional public schools are outside the scope of this report. A description of report data is provided in the sections that follow, and a summary of methods are further detailed in Appendix A.

Data Sources

The following sources and types of data were used in this report:

- **Campus-level data**
 - **Texas Academic Performance Reports:** Publicly available via the TEA website, the Texas Academic Performance Reports disaggregate enrollment and performance results for all Texas public schools by campus, student demographic group, student program, grade level, and subject area. For this report, the 2020–21 campus-level STAAR Assessment Data file, Advanced Data Download reference file, and Profile file were downloaded and combined into one campus-level data file.
 - **Texas Accountability Rating System Reports:** Publicly available via the TEA website, the Texas Accountability Rating System reports provide downloadable data used to identify the residential treatment facilities (RTF), juvenile justice alternative education programs (JJAEP), and disciplinary alternative education program (DAEP) campuses. For this report, the 2021 campus-level Accountability Summary files were downloaded.
 - **Charter School Data:** Data regarding the authorizer type, start date, status, and closure date of all charter school campuses were provided by TEA Charter School Authorizing and Administration Division staff.
- **Student-Level Data:**
 - **Public Education Information Management System:** In order to calculate the attrition rates for charter school campuses and matched traditional public school campuses, TEA provided student-level data regarding campus of enrollment and grade level for students enrolled in the 2020–21 and 2021–22 academic years.

Definitions

This section describes variables in the data and key terms used throughout the report.

School Classification Definitions

- **Alternative Education Accountability (AEA):** The specific provisions by which the performance of alternative education campuses are determined and accountability ratings are assigned. AEA

¹¹ In 2021, 88% of eligible students participated in STAAR assessments, compared with 99% participation in 2019 before COVID-19 ([Texas Education Agency, TAPR 2020–21](#)).

- campuses have a modified graduation rate calculation for accountability ratings.
- **AEA Provisions:** Alternative performance measures for campuses serving at-risk students were first implemented in the 1995–96 academic year. Over time, these measures have expanded to include charter schools that serve large populations of at-risk students. Accountability advisory groups consistently recommend evaluating these types of campuses by separate AEA provisions because of the large number of students served in alternative education programs on campuses and to ensure these unique campus settings are appropriately evaluated for accountability. To register to be considered under AEA provisions, campuses must meet specific criteria listed in the 2021 Accountability Manual (TEA, 2021a) or qualify as community-based dropout recovery campuses established in accordance with TEC § 29.081(e) (2022).¹²
 - **Charter Authorizer Type:** Charter school campuses are reported by the authorizer that granted the original charter school.
 - **SBOE-Authorized Charter School:** From 1995 to 2012, the SBOE served as the authorizer for open-enrollment and university charter schools. All SBOE-authorized charter school campuses in this report exist under charters originally granted between 1996 and 2012.
 - **ISD-Authorized Charter School:** At times referred to as district charters, district campus charters, or campus charters, ISD-authorized charter schools are under the oversight of the district school board that authorized them. Also under this category are the ISD-authorized charter schools associated with the more recent SB 1882 partnerships.
 - **COE-Authorized Charter School:** In 2013, the COE became the authorizer for open-enrollment and university charter schools. All COE-authorized charter school campuses in this report exist under charters granted after 2013.
 - **DAEP:** A system of instruction provided in a setting other than a regular classroom that is located on or off a regular campus, provides for the educational and behavioral needs of students, and provides specialized supervision and counseling for its students.¹³
 - **JJAE:** A campus operated under the authority of a county juvenile justice board.¹⁴
 - **Matched Traditional Public School Campuses:** For the purposes of this report, a combination of sampling techniques was used to identify a set of traditional public school campuses to serve as demographic peers for charter school comparison. The details of the matching procedure are explained in Appendix A.
 - **RTF:** Live-in private centers and programs or detention centers and correctional facilities operated by the Texas Juvenile Justice Department that provide educational services to students who reside in the facilities.¹⁵
 - **School Level:** Maintaining accordance with the prior Texas Charter Authorizer Accountability Report (Templeton et al., 2021), schools were classified as elementary, middle, or high school campuses based on the proportion of students served in each grade level. Schools serving equal proportions of two grade-level types were classified into the higher grade-level category. For example, a school serving 50% of students in kindergarten through fifth grade and 50% of students in sixth through eighth grades was classified as a middle school.
 - **Elementary schools** serve a larger proportion of students in kindergarten through Grade 5,
 - **Middle schools** serve a larger proportion of students in Grades 6 through 8, and
 - **High schools** serve a larger proportion of students in Grades 9 through 12.

Outcome Measure Definitions

- **Attrition Rate:** For the purposes of this report, the attrition rate is defined as the percentage of

¹² Criteria are listed in Chapter 7 of the [TEA 2021 Accountability Manual](#) (TEA, 2021a).

¹³ As defined in 19 Texas Administrative Code (TAC) § 103.1201 (2022).

¹⁴ As defined in 37 TAC § 348.102 (9) (2022).

¹⁵ As defined in 12 Texas Human Resources Code § 221.056 (2022).

students enrolled in the fall of 2020 who did not return to the same campus in the fall of 2021.¹⁶ The attrition rates for this report were calculated using student-level data provided by TEA.

- **STAAR Exams:** These are the standardized exams given in Grades 3–8. STAAR-Reading and STAAR-Mathematics exams are administered in Grades 3–8; STAAR-Science exams are administered in Grades 5 and 8; the STAAR-Social Studies exam is administered in Grade 8; and STAAR-Writing exams are administered in Grades 4 and 7. Specifically, this report analyzed the STAAR exams included in the 2020–21 Texas Academic Performance Reports.
- **STAAR End-of-Course (EOC) Exams:** STAAR EOC exams are standardized exams administered after the completion of Algebra I, English I, English II, U.S. History, and Biology courses. Typically administered in high school grades, these exams can be given to students below Grade 9 if the student has taken the course. It should be noted that some students could have taken both an EOC exam and a STAAR grade-level exam, as local district policy dictates student action. For example, an eighth-grade student taking Algebra I could have taken both the STAAR-Algebra I EOC exam and the STAAR-Mathematics exam for Grade 8. Specifically, this report analyzed the STAAR EOC exams included in the 2020–21 Texas Academic Performance Reports.
- **Approaches Grade Level Standard:** The STAAR performance-level descriptor indicating that the student is likely to succeed in the next grade or course with targeted academic intervention. It serves as the state’s passing standard.¹⁷
- **Masters Grade Level Standard:** The STAAR performance-level descriptor indicating that the student is expected to succeed in the next grade or course with little or no academic intervention.¹⁸
- **Graduation Rate:** The graduation rate in this report is the class of 2020 longitudinal four-year graduation rate calculated for state accountability purposes, which follows a cohort of first-time Grade 9 students into the fall after their expected graduation (or, in cases of extended rates, the fall one or two years after their expected graduation date) (TEA, 2021b).¹⁹ For schools evaluated under the standard accountability system, the total number of graduates is divided by the total number of graduates, continuers, Texas Certificate of High School Equivalency recipients, and dropouts in the class. For schools evaluated under the AEA system, the sum of the total number of graduates, continuers, and Texas Certificate of High School Equivalency recipients is divided by the total number of graduates, continuers, Texas Certificate of High School Equivalency recipients, and dropouts in the class.
- **College, Career, and Military Readiness Outcomes:** Under TEC § 39.053(c) (2019), graduates can demonstrate CCMR for state accountability purposes in several ways. For this report, the following CCMR outcomes are reported for 2020 graduates:²⁰
 - Meeting Texas Success Initiative (TSI) criteria in English Language Arts (ELA)/reading and mathematics
 - Meeting criteria on the Advanced Placement (AP) or International Baccalaureate (IB) examination
 - Earning dual course credits
 - Earning an industry-based certification
 - Earning a Level I or Level II certificate
 - Completing and earning credit for an ELA college prep course
 - Completing and earning credit for a mathematics college prep course
 - Completing an OnRamps dual enrollment course
 - Earning an associate’s degree
 - Completing an Individualized Education Program (IEP) and demonstrating workforce readiness
 - Being identified as a current special education student with an advanced diploma plan

16 See Appendix A for a detailed description of the attrition analysis.

17 See [STAAR Performance Labels and Policy Definitions](#) for more information about the Approaches Grade Level standard.

18 See [STAAR Performance Labels and Policy Definitions](#) for more information about the Masters Grade Level standard.

19 See the [Secondary School Completion and Dropouts in Texas Public Schools 2019–20](#) report for more about the calculation of the class of 2020 longitudinal graduation rate.

20 Appendix A describes CCMR outcome measures in detail.

Research Methods

In order to fulfill the legislative requirements of this report, several analytic methods were employed. Under TEC § 12.1013(a)-(d) (2022), the Texas Charter Authorizer Accountability Report must provide an opportunity for the public to compare the performance of SBOE-authorized, ISD-authorized, and COE-authorized charter schools with the performance of matched traditional public school campuses. Specific performance metrics codified under TEC § 39.053(c) (2019) and attrition rates are required to be included in the report, disaggregated by grade level served. Each method is briefly described below and in detail in Appendix A.

School Matching Procedures

In order to fulfill the statutory requirement of identifying a matched group of traditional public school campuses for charter school performance comparison (TEC § 12.1013(b), 2022), TEA selected a combination of sampling techniques as the preferred matching procedure. By identifying traditional public school campuses similar in size, teaching staff, and student characteristics, the matching technique is intended to eliminate bias in performance comparisons due to observed covariates. Appendix A details the matching procedure variables and specifications, and Appendix D details the performance results for each charter school included in the report. RTFs, JJAEPs, and DAEPs were not included in the matching procedure, nor in the performance analyses. RTFs were excluded because the unique student populations served in instructional settings are far different from other schools. JJAEPs and DAEPs were excluded because the performance of their student populations is attributed back to the students' home campuses.

Attrition Analysis

For the purposes of this report, the attrition rate is defined as the percentage of students enrolled in the fall of 2020 who did not return to the same campus in the fall of 2021. The attrition rates for this report were calculated using student-level data provided by TEA. Those data included a unique identifier, grade level, and the campus for each student enrolled in Texas public schools for the 2020–21 and 2021–22 academic years. Students enrolled in the fall of 2020 were cross-referenced to their fall enrollment in 2021. Students whose fall 2020 campus was different from their fall 2021 campus were considered attrited and counted in the numerator of the attrition rate calculation. The denominator of the attrition rate calculation comprised all students enrolled in the 2020–21 academic year at a particular campus. This calculation was adjusted to account for the grade levels available to students at each campus as well as additional factors. Appendix A details the reasons students were excluded from attrition rate calculations.

Outcome Measure Calculation

For attrition rates, STAAR performance, graduation rates, and CCMR rates, results were calculated using the number of students at each campus in the group that contributed to the outcome measure. Rather than averaging the campus-level rates for all campuses in a group for each metric, numerators and denominators for each metric were summed and then divided to provide an overall rate for the group. This prevents results from being significantly influenced by extreme performance results for very small campuses.

Study Limitations

This report provides a detailed description of charter school campuses and matched traditional public school campuses intended for public comparison of school types. While a combination of sampling techniques was used to identify demographically similar traditional public school campuses as the matched set for comparison, inferences regarding the performance of charter schools relative to traditional public schools cannot be made using this report. In order to suggest the performance of one type of school is consistently better or worse than another, statistical tools controlling for observed and unobserved characteristics influencing performance would need to be in place and inferential statistical analysis employed. Additionally, careful interpretation of the comparisons with COE-authorized and ISD-authorized charter school campuses provided in this report is necessary because of the small numbers of campuses in each category. Interpretation of results for COE-authorized charter school campuses should take into consideration that all COE-authorized charters in this report were authorized between 2013 and 2019 and thus may have been operating for a shorter amount of time compared with other charter school campuses. As a

final note of caution, although the passage of SB 2 in 2013 resulted in the policy process change in charter school authorization, the reader is cautioned against attributing differences presented in this report solely to this change. Rather, differences may be attributable to other changes occurring over time, such as differences in the charter school applicant makeup, other process changes, and/or changes in leadership—none of which could be accounted for within the scope of this report.

Because of the differences in STAAR performance standards, the Texas Accountability Rating System, the award of new charters, and the expansion of existing charters, comparisons with previously published Texas Charter Authorizer Accountability reports should be made with caution. In 2012, the state of Texas began the phase-in of the STAAR standardized test and the associated performance standards. In addition, a new accountability rating system has also developed over the course of the same period. The gradual phase-in of the new test and the current accountability system should be taken into consideration when comparing the results of this report to previous reports. Additionally, each year, new charter school campuses are opened, low-performing charter school campuses are closed, and existing charters are expanded. Thus, Texas Charter Authorizer Accountability reports from two different years contain different subsets of charter schools, and results should be compared with caution.²¹

As previously mentioned, beginning in spring 2020, public health and safety circumstances caused by the COVID-19 pandemic led to the closure of schools during the state’s testing window and inhibited the state’s ability to measure district and campus performance accurately. The pandemic continued to interrupt education into the 2020–21 school year. For the 2021 accountability cycle, TEA received approval to waive accountability requirements under the Every Student Succeeds Act (U.S. Department of Education, April 6, 2021). All districts and campuses were labeled *Not Rated: Declared State of Disaster for 2021*, and domain scores and overall ratings were not calculated and therefore not included in this report. In 2020–21, statewide STAAR test participation was lower than years before the COVID-19 pandemic and test participation rates varied widely across schools.²² With wide variance in test participation, aggregate campus-level test results could reflect less than the entire student population served at a campus. As such, this report displays STAAR performance outcomes for charter schools but does not display the STAAR performance for matched traditional public schools in order to limit inaccurate comparisons among school types. Outcomes available for this report pertaining to attrition, graduation, and college, career, and military readiness (CCMR) are reported for charter schools and matched traditional public schools.

Organization of the Report

The rest of the report is organized into five sections. Section 2 provides a description of the charter school and traditional public school campuses disaggregated by school type and school level. Section 3 presents the aggregate performance of SBOE-authorized and ISD-authorized charter school campuses compared with matched traditional public school campuses. Section 4 disaggregates the performance comparisons presented in Section 3 by school level. Section 5 provides a comparison of COE-authorized charter school campuses and matched traditional public school campuses. Finally, Section 6 discusses the findings of previous sections and presents a summary of results with a review of the limitations of the study.

Following the main body of the report, several appendices provide detailed information. Appendix A describes the analytical methods used in the creation of the report. Appendix B displays tables comparing charter school campuses evaluated under AEA provisions. Performance on STAAR-Writing, STAAR-Science/Biology, and STAAR-Social Studies/U.S. History exams can be found in Appendix C. Appendix D details the performance results for each charter school included in the report. Appendix E, available on the TEA website, includes a list of matched traditional public school campuses included in the report and their outcome measures.

21 See the [Charter School Reports](#) page of the TEA website for more on the award, expansion, and closure of charter schools.

22 In 2021, 88% of eligible students participated in STAAR assessments, compared with 99% participation in 2019 before COVID-19 ([Texas Education Agency, TAPR 2020-21](#)).

Section 2: Description of Charter School Campuses and Traditional Public Schools

This section of the report describes the distribution of Texas public schools by school type and school level. Table 2.1 displays the types of Texas public school campuses that were in operation during the 2020–21 academic year. There were a total of 8,840 public schools in operation during the year, 11% (952) of which were charter school campuses. Among the different charter school authorizers, the SBOE authorized the large majority of charters in operation. For both charter schools and traditional public schools, residential treatment facilities make up a small proportion of the total campuses in operation, and more elementary school campuses were in operation than middle schools and high schools.

TABLE 2.1

Texas Public School Campuses by School Type, 2020–21

Campus Type	Elementary School	Middle School	High School	Total
SBOE-Authorized Charter Not Residential Treatment Facilities	400	151	186	737
ISD-Authorized Charter	72	25	24	121
COE-Authorized Charter Not Residential Treatment Facilities	25	8	6	39
SBOE-Authorized Charter Residential Treatment Facilities	4	5	42	51
COE-Authorized Charter Residential Treatment Facilities	0	1	3	4
Total Charter School Campuses	501	190	261	952
Traditional Public School Campuses	4,605	1,542	1,451	7,598
DAEP Campuses	5	16	96	117
JJAEP Campuses	0	8	91	99
Residential Treatment Facilities	5	5	64	74
Total Traditional Public Schools	4,615	1,571	1,702	7,888
Total Public School Campuses in Texas	5,116	1,761	1,963	8,840

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Note. There are no ISD-authorized charter school campus residential treatment facilities.

Key. SBOE = State Board of Education; ISD = Independent School District; COE = commissioner of education; DAEP = Disciplinary Alternative Education Program; JJAEP = Juvenile Justice Alternative Education Program.

Student Enrollment

Table 2.2 describes enrollment in Texas public schools by school type. In the 2020–21 academic year, 428,259 students were enrolled in charter school campuses, and 4,943,097 students were enrolled in traditional public schools. Charter school enrollment accounted for approximately 8% of the total public school population. Following the same patterns of distribution identified in Table 2.1, SBOE-authorized charter schools enrolled the overwhelming majority of charter school students.

TABLE 2.2

Student Enrollment in Texas Public School Campuses by School Type, 2020–21

Campus Type	Elementary School	Middle School	High School	Total
SBOE-Authorized Charter Not Residential Treatment Facilities	215,411	67,705	67,371	350,487
ISD-Authorized Charter	29,236	13,440	19,653	62,329
COE-Authorized Charter Not Residential Treatment Facilities	8,951	2,265	1,506	12,722
SBOE-Authorized Charter Residential Treatment Facilities	81	286	1,905	2,272
COE-Authorized Charter Residential Treatment Facilities	0	101	348	449
Total Students Enrolled in Charter School Campuses	253,679	83,797	90,783	428,259
Traditional Public School Campuses	2,315,036	1,112,861	1,511,419	4,939,316
DAEP Campuses	21	130	1,349	1,500
JJAEP Campuses	0	15	449	464
Residential Treatment Facilities	282	64	1,471	1,817
Total Students Enrolled in Traditional Public Schools	2,315,339	1,113,070	1,514,688	4,943,097
Total Students Enrolled in Texas Public Schools	2,569,018	1,196,867	1,605,471	5,371,356

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Note. There are no ISD-authorized charter school campus residential treatment facilities.

Key. SBOE = State Board of Education; ISD = Independent School District; COE = commissioner of education; DAEP = Disciplinary Alternative Education Program; JJAEP = Juvenile Justice Alternative Education Program.

Table 2.3 summarizes the demographic characteristics of students enrolled in charter school campuses and traditional public school campuses in 2020–21. In traditional public school campuses, Hispanic students were the largest racial or ethnic group (52%), followed by White students (28%), African American students (12%), Asian students (5%), students identified as two or more races (3%), American Indian or Alaska Native students (<1%), and Native Hawaiian or Pacific Islander students (<1%). Charter school campuses followed the same general distribution of racial or ethnic groups, though SBOE- and ISD-authorized charter school campuses enrolled a larger proportion of Hispanic and African American students and a smaller proportion of White students.

With respect to other student characteristics, traditional public school campuses served a student population that was majority economically disadvantaged (59%) with a smaller representation of students at risk of dropping out of school (49%) and emergent bilingual students/English learners (20%). Both SBOE-authorized and ISD-authorized charter school campuses enrolled larger proportions of economically disadvantaged students (72% and 75%, respectively), and SBOE-authorized charter school campuses served a larger proportion of emergent bilingual students/English learners (30%). COE-authorized charter school campuses served smaller proportions of economically disadvantaged students (48%) and emergent bilingual students/English learners (13%) than traditional public school campuses. Generally, charter schools served smaller populations of students receiving special education services than traditional public school campuses.

Note. There are no ISD-authorized charter school campus residential treatment facilities.

Key. SBOE = State Board of Education; ISD = Independent School District; COE = commissioner of education; DAEP = Disciplinary Alternative Education Program; JJAEP = Juvenile Justice Alternative Education Program.

Section 3: Aggregate Performance of SBOE-Authorized and ISD-Authorized Charter School Campuses Compared with Matched Traditional Public School Campuses

This section of the report presents aggregate academic outcomes of SBOE-authorized and ISD-authorized charter school campuses. For attrition rates, graduation rates, and CCMR, SBOE-authorized and ISD-authorized aggregate outcomes are compared with matched traditional public school campuses. SBOE-authorized and ISD-authorized aggregate outcomes for STAAR exam performance are reported without matched traditional school performance due to possible differences in participation resulting from COVID-19. Campuses that did not have sufficient 2020–21 STAAR data to be included in the analytical sample of charter school campuses were excluded from the aggregate performance analysis.

Campuses Included in the Aggregate Performance Analysis

Table 3.1 summarizes the demographic characteristics of SBOE-authorized and ISD-authorized charter school campuses and the matched traditional public school campuses used in the aggregate performance analysis. After employing the purposive sampling technique described in detail in Appendix A, the population of traditional public schools was narrowed to those most similar in demographic characteristics to charter schools included in the report. Though the traditional public schools matched to SBOE-authorized charter schools generally mimicked the characteristics of the SBOE-authorized charter schools in the study, the matched traditional public schools included smaller proportions of Hispanic students (58% vs. 63%), African American students (17% vs. 18%), and emergent bilingual students/English learners (28% vs. 30%) and larger proportions of White students (16% vs. 12%), students at risk of dropping out of school (56% vs. 50%), and special education students (11% vs. 8%). When the sampling technique was conducted on the sample of traditional public schools matched to ISD-authorized charter schools, the matched traditional public schools served student populations that included smaller proportions of African American (16% vs. 18%) and White students (14% vs. 15%) and larger proportions of students at risk of dropping out of school (59% vs. 55%), emergent bilingual students/English learners (27% vs. 20%), and students receiving special education services (11% vs. 9%).

TABLE 3.1

Demographic Characteristics of Charter School Campuses and Matched Traditional Public School Campuses That Were Included in Performance Analyses, 2020–21

	SBOE-Authorized Charter School Campuses	Traditional Public School Campuses Matched to SBOE-Authorized Charter School Campuses	ISD-Authorized Charter School Campuses	Traditional Public School Campuses Matched to ISD-Authorized Charter School Campuses
Race/Ethnicity				
African American	18%	17%	18%	16%
American Indian or Alaska Native	<1%	<1%	<1%	<1%
Asian	5%	5%	2%	3%
Hispanic	63%	58%	64%	64%

Other Student Characteristics				
At-Risk	50%	56%	55%	59%
Economically Disadvantaged	72%	70%	75%	74%
Emergent Bilingual Student/English Learner	30%	28%	20%	27%
Special Programs				
Special Education	8%	11%	9%	11%
Total Students	350,487	1,303,454	62,329	2,004,271
Number of Schools	737	2,027	121	2,737

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Note. The number of schools includes the total number of traditional public school campuses matched to State Board of Education (SBOE)-authorized charter school campuses and Independent School District (ISD)-authorized charter school campuses, respectively.

Attrition Rates

For the purposes of this report, the attrition rate is defined as the percentage of students enrolled in the fall of 2020 who did not return to the same campus in the fall of 2021. Student attrition rates between the 2020–21 and 2021–22 academic years are displayed for SBOE-authorized and ISD-authorized charter school campuses and matched traditional public school campuses in Figure 3.1. The attrition rate for SBOE-authorized charter school campuses was 29%, compared with 23% at matched traditional public school campuses. The attrition rate for ISD-authorized charter school campuses and their matched traditional public school campuses was the same at 22%.

FIGURE 3.1

Student Attrition Rates Between 2020–21 and 2021–22 for SBOE-Authorized and ISD-Authorized Charter School Campuses and Matched Traditional Public School Campuses

Sources. Texas Academic Performance Reports, Texas Education Agency, 2020–21; Public Education Information Management System, Texas Education Agency, 2020–21 and 2021–22.

Note. A total of 731 State Board of Education (SBOE)-authorized charter school campuses, 2,018 traditional public school campuses matched to SBOE-authorized charter school campuses, 117 Independent School District (ISD)-authorized charter school campuses, and 2,723 traditional public school campuses matched to ISD-authorized charter school campuses were included in this attrition analysis.

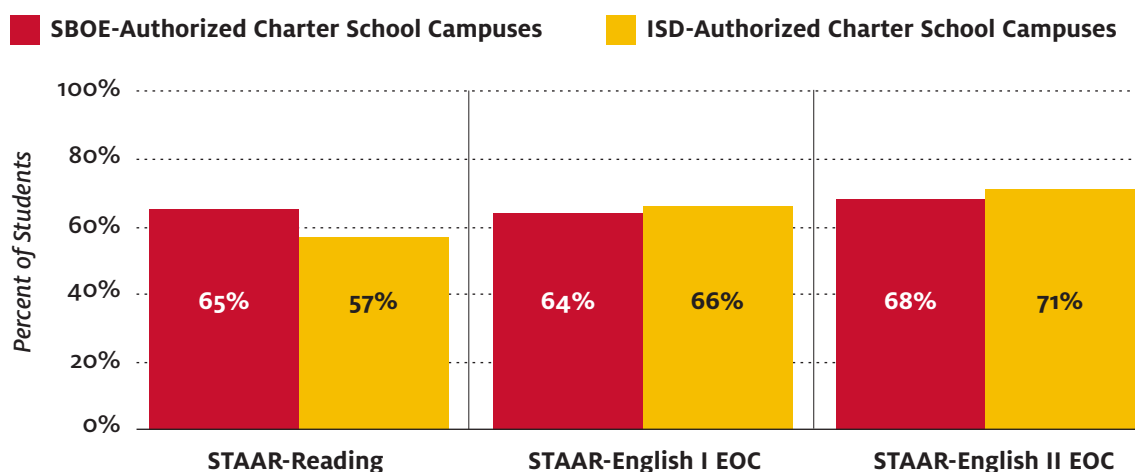

STAAR Results

This subsection of the analysis provides details on 2020–21 STAAR exam performance for SBOE-authorized and ISD-authorized charter school campuses. Figures in this section detail the percentage of students achieving the Approaches Grade Level standard and Masters Grade Level standard on STAAR-Reading and STAAR-Mathematics exams (Grades 3–8) and STAAR-English I, English II, and Algebra I EOC exams. The Approaches Grade Level standard serves as the state’s passing standard.²³ A more difficult achievement level to attain, the Masters Grade Level standard, is a STAAR performance-level descriptor indicating the student is expected to succeed in the next grade or course with little or no academic intervention.²⁴ Performance on STAAR-Writing, STAAR-Science/Biology, and STAAR-Social Studies/U.S. History exams can be found in Appendix C.

Figure 3.2 displays the percentage of students achieving the Approaches Grade Level standard on the STAAR-Reading/ELA exams by charter authorizer type. Approximately two-thirds (65%) of students at SBOE-authorized charter school campuses in Grades 3–8 achieved the Approaches Grade Level standard on the STAAR-Reading exams, and 57% of students in Grades 3–8 at ISD-authorized charter school campuses met the standard. For the STAAR-English I EOC exam, 64% met the Approaches Grade Level standard at SBOE-authorized charter school campuses, and 66% of students at ISD-authorized charter school campuses did so. For the English II EOC exam, 68% of students at SBOE-authorized charter school campuses met the Approaches Grade Level standard, and 71% of students met the standard at ISD-authorized charter school campuses.

FIGURE 3.2

Percent of Students Achieving the Approaches Grade Level Standard on the STAAR-Reading/English Language Arts Exams by Charter Authorizer Type, 2020–21

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Note. A total of 571 State Board of Education (SBOE)-authorized charter school campuses and 88 Independent School District (ISD)-authorized charter school campuses were included in this State of Texas Assessments of Academic Readiness (STAAR®)-Reading analysis. A total of 309 SBOE-authorized charter school campuses and 33 ISD-authorized charter school campuses were included in this STAAR-English I end-of-course (EOC) analysis. A total of 283 SBOE-authorized charter school campuses and 29 ISD-authorized charter school campuses were included in this STAAR-English II EOC analysis.

23 See [STAAR Performance Labels and Policy Definitions](#) for more information about the Approaches Grade Level standard.

24 See [STAAR Performance Labels and Policy Definitions](#) for more information about the Masters Grade Level standard.

Figure 3.3 shows the percentage of students achieving the Approaches Grade Level standard on the STAAR-Mathematics exams by charter authorizer type. In STAAR-Mathematics, 55% of students in Grades 3–8 at SBOE-authorized charter school campuses achieved the Approaches Grade Level standard, and 49% of students achieved the standard at ISD-authorized charter school campuses. For the STAAR-Algebra I EOC exam, 62% of students at SBOE-authorized charter school campuses met the Approaches Grade Level standard, and 70% of students did so at ISD-authorized charter school campuses.

FIGURE 3.3

Percent of Students Achieving the Approaches Grade Level Standard on the STAAR-Mathematics Exams by Charter Authorizer Type, 2020–21

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Note. A total of 571 State Board of Education (SBOE)-authorized charter school campuses and 88 Independent School District (ISD)-authorized charter school campuses were included in this State of Texas Assessments of Academic Readiness (STAAR®)-Mathematics analysis. A total of 398 SBOE-authorized charter school campuses and 56 ISD-authorized charter school campuses were included in this STAAR-Algebra I end-of-course (EOC) analysis.

Figure 3.4 displays the percentage of students achieving the Masters Grade Level standard on the STAAR-Reading/ELA exams by charter authorizer type. For STAAR-Reading, 18% of students in Grades 3–8 at SBOE-authorized charter school campuses met the Masters Grade Level standard, and 15% of students did so at ISD-authorized charter school campuses. For the STAAR-English I EOC exam, 9% of students at SBOE-authorized charter school campuses and 10% at ISD-authorized charter school campuses met the standard. For the STAAR-English II EOC exam, 8% of students at SBOE-authorized charter school campuses and 9% at ISD-authorized charter school campuses met the standard.

FIGURE 3.4

Percent of Students Achieving the Masters Grade Level Standard on the STAAR-Reading/English Language Arts Exams by Charter Authorizer Type, 2020–21

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Note. A total of 571 State Board of Education (SBOE)-authorized charter school campuses and 88 Independent School District (ISD)-authorized charter school campuses were included in this State of Texas Assessments of Academic Readiness (STAAR®)-Reading analysis. A total of 309 SBOE-authorized charter school campuses and 33 ISD-authorized charter school campuses were included in this STAAR-English I end-of-course (EOC) analysis. A total of 283 SBOE-authorized charter school campuses and 29 ISD-authorized charter school campuses were included in this STAAR-English II EOC analysis.

Figure 3.5 shows the percentage of students achieving the Masters Grade Level standard on the STAAR-Mathematics exams by charter authorizer. For STAAR-Mathematics, both SBOE-authorized charter school campuses and ISD-authorized charter school campuses had 11% of students achieve the Masters Grade Level standard. In STAAR-Algebra I, 14% of students at SBOE-authorized charter school campuses and 19% of students at ISD-authorized charter school campuses met the Masters Grade Level standard.

FIGURE 3.5

Percent of Students Achieving the Masters Grade Level Standard on the STAAR-Mathematics Exams by Charter Authorizer Type, 2020–21

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Note. A total of 571 State Board of Education (SBOE)-authorized charter school campuses and 88 Independent School District (ISD)-authorized charter school campuses were included in this State of Texas Assessments of Academic Readiness (STAAR®)-Mathematics analysis. A total of 398 SBOE-authorized charter school campuses and 56 ISD-authorized charter school campuses were included in this STAAR-Algebra I end-of-course (EOC) analysis.

Graduation Rates

The following subsection of this report compares the graduation rates of SBOE-authorized and ISD-authorized charter school campuses with the graduation rates of matched traditional public school campuses for the class of 2020. For the purposes of this report, the graduation rate reported is the four-year longitudinal graduation rate calculated for state accountability purposes.

Figure 3.6 provides a comparison of the four-year longitudinal graduation rates at SBOE-authorized and ISD-authorized charter school campuses and their matched traditional public school campuses evaluated under standard accountability provisions. SBOE-authorized charter school campuses had a 97% four-year longitudinal graduation rate, while the matched traditional public school campuses had a 91% four-year longitudinal graduation rate. ISD-authorized charter school campuses had an 88% four-year longitudinal graduation rate, while matched traditional public school campuses had a 91% four-year longitudinal graduation rate.

FIGURE 3.6

Grade 9 Four-Year Longitudinal Graduation Rates by Charter Authorizer Type and Matched Traditional Public School Campuses, Evaluated Under Standard Accountability Provisions, Class of 2020

Source. Texas Academic Performance Reports, Texas Education Agency, 2019–20.

Note. A total of 119 State Board of Education (SBOE)-authorized charter school campuses, 182 traditional public school campuses matched to SBOE-authorized charter school campuses, 21 Independent School District (ISD)-authorized charter school campuses, and 312 traditional public school campuses matched to ISD-authorized charter school campuses were included in this analysis.

Figure 3.7 shows the four-year longitudinal graduation rates at SBOE-authorized and ISD-authorized charter school campuses and their matched traditional public school campuses evaluated under AEA provisions. (See Table B.4 in Appendix B for the demographic characteristics of students attending campuses evaluated under AEA provisions included in this analysis.) For schools evaluated under AEA provisions, the graduation rate calculation includes graduates, continuing students, and Texas Certificate of High School Equivalency recipients. As shown in the figure, AEA SBOE-authorized charter school campuses had a 72% four-year longitudinal graduation rate, while the matched traditional public school campuses had an 89% four-year longitudinal graduation rate.²⁵

FIGURE 3.7

Grade 9 Four-Year Longitudinal Graduation Rates by Charter Authorizer Type and Matched Traditional Public School Campuses, Evaluated Under Alternative Accountability Provisions, Class of 2020

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Note. A total of 89 State Board of Education (SBOE)-authorized charter school campuses and 40 traditional public school campuses matched to SBOE-authorized charter school campuses were included in this analysis.

²⁵ Throughout this section, where the number of ISD-authorized charter schools reporting performance was less than 10, the performance was masked.

College, Career, and Military Readiness Outcomes

The following subsection compares the percentage of CCMR outcomes at SBOE-authorized and ISD-authorized charter school campuses and their matched traditional public school campuses for graduates in 2020. Table 3.2 displays the performance for each of the CCMR outcomes defined under TEC § 39.053(c) (2019).^{26, 27}

- Meeting TSI criteria in ELA/reading and mathematics
- Meeting criteria on the AP or IB examination
- Earning dual course credits
- Earning an industry-based certification
- Earning a Level I or Level II certificate
- Completing and earning credit for an ELA college prep course
- Completing and earning credit for a mathematics college prep course
- Completing an OnRamps dual enrollment course
- Earning an associate’s degree
- Completing an IEP and demonstrating workforce readiness
- Being identified as a current special education student with an advanced diploma plan

Table 3.2 shows the percentage of CCMR outcomes at SBOE-authorized and ISD-authorized charter school campuses and their matched traditional public school campuses. Forty-one percent of graduates in both SBOE-authorized charter school campuses and matched traditional public school campuses met TSI criteria in ELA/reading and mathematics. At ISD-authorized charter school campuses, 40% of graduates met the TSI college readiness benchmarks in ELA/reading and mathematics compared with 35% at matched traditional public school campuses.

SBOE-authorized charter school campuses had more graduates meeting the criteria on AP or IB exams than matched traditional public school campuses (29% vs. 17%). At ISD-authorized charter school campuses, 17% met the AP or IB criteria compared with 18% at matched traditional public school campuses.

Seventeen percent of graduates at SBOE-authorized charter school campuses earned college credit through the completion of dual credit courses compared with 30% at matched traditional public school campuses. At ISD-authorized charter school campuses, 30% earned college credit through the completion of dual credit courses compared with 22% at matched traditional public school campuses.

The percentage of graduates at SBOE-authorized charter school campuses earning an industry-based certification was 6% compared with 15% at matched traditional public school campuses. ISD-authorized charter school campuses and their matched traditional public school campuses had equal proportions of graduates completing an industry certification (13%).

Less than 1% of graduates earned a Level I or Level II certificate in any workforce education area at SBOE-authorized charter school campuses, compared with 1% at matched traditional public school campuses. ISD-authorized charter school campuses and matched traditional public school campuses had equal proportions of students earning a Level I or Level II certificate in any workforce education area (1%).

At SBOE-authorized charter school campuses, 4% of graduates completed and earned credit for an ELA college prep course compared with 12% at matched traditional public school campuses; 6% completed and earned credit for a mathematics college prep course compared with 15% at matched traditional public school campuses. ISD-authorized charter school campuses and matched traditional public school campuses

²⁶ Appendix A describes CCMR outcome measures in detail.

²⁷ Per the [Accountability Manual for 2021](#) (page 10, PDF e-page 16): Due to discrepancies between annual enlistment counts for Texas military enlistees aged 17-19 released by the United States Department of Defense and the Texas Student Data System Public Education Information Management System’s military enlistment data for 2017 and 2018 graduates, military enlistment data is excluded from accountability calculations until such data can be obtained directly from the United States Armed Forces (TEA, 2021a).

es had equal proportions of students earning credit for an ELA college prep course (7%); 11% completed and earned credit for a mathematics college prep course compared with 10% at matched traditional public school campuses.

At SBOE-authorized charter school campuses, 2% completed an OnRamps dual enrollment course and qualified for at least three hours of college credit compared with 5% at matched traditional public school campuses. At ISD-authorized charter school campuses, 5% completed an OnRamps dual enrollment course and qualified for at least three hours of college credit compared with 4% at matched traditional public school campuses.

The percentage of graduates at SBOE-authorized charter school campuses who earned an associate's degree while in high school was 3% compared with 7% at matched traditional public school campuses. At ISD-authorized charter school campuses, 7% earned an associate's degree while in high school compared with 2% at matched traditional public school campuses.

At SBOE-authorized charter school campuses and ISD-authorized charter school campuses, 1% of graduates completed IEP and workforce readiness compared with 2% at matched traditional public school campuses. At SBOE-authorized charter school campuses and ISD-authorized charter school campuses, 5% graduated as special education students with advanced diploma plans compared with 4% at matched traditional public school campuses.

TABLE 3.2

Percent of College, Career, and Military Ready Graduates at SBOE-Authorized and ISD-Authorized Charter School Campuses and Matched Traditional Public School Campuses, 2020–21

	SBOE-Authorized Charter School Campuses	Traditional Public School Campuses Matched to SBOE-Authorized Charter School Campuses	ISD-Authorized Charter School Campuses	Traditional Public School Campuses Matched to ISD-Authorized Charter School Campuses
Satisfying the Texas Success Initiative College Readiness Benchmarks in Both Reading and Math	41%	41%	40%	35%
Meeting Criterion Score on an Advanced Placement or International Baccalaureate Exam in Any Subject Area	29%	17%	17%	18%
Earning College Credit for at Least 3 Credit Hours in ELA or Mathematics or at Least 9 Credit Hours in Any Subject	17%	30%	30%	22%
Earning an Industry-Based Certification	6%	15%	13%	13%
Earning Level I or Level II Certificate in Any Workforce Education Area	<1%	1%	1%	1%
Completing and Earning Credit for an ELA College Prep Course	4%	12%	7%	7%
Completing and Earning Credit for a Mathematics College Prep Course	6%	15%	11%	10%
Completing OnRamps Dual Enrollment Course and Qualifying for at Least 3 Hours of College Credit	2%	5%	5%	4%
Earning an Associate's Degree While in High School	3%	7%	7%	2%
Completing Individualized Education Program and Workforce Readiness	1%	2%	1%	2%
Under an Advanced Diploma Plan and Identified as a Current Special Education Student	5%	4%	5%	4%

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Key. ELA = English Language Arts

Note. A total of 244 State Board of Education (SBOE)-authorized charter school campuses, 237 traditional public school campuses matched to SBOE-authorized charter school campuses, 26 Independent School District (ISD)-authorized charter school campuses, and 356 traditional public school campuses matched to ISD-authorized charter school campuses were included in this analysis.

Section 4: Aggregate Performance of Charter School Campuses by School Level and Authorizer Type Compared with Matched Traditional Public School Campuses

Presented in this section of the report are aggregate academic outcomes of SBOE-authorized and ISD-authorized charter school campuses by school type. For attrition rates, graduation rates, and CCMR, SBOE-authorized and ISD-authorized aggregate outcomes are compared with matched traditional public school campuses. SBOE-authorized and ISD-authorized aggregate outcomes for performance on STAAR exams are reported without matched traditional school performance due to possible differences in participation resulting from COVID-19.

In accordance with the prior Texas Charter Authorizer Accountability Report (Templeton, et al., 2021), schools were classified as elementary, middle, or high school campuses based on the proportion of students served in each grade level. Schools serving equal proportions of two grade-level types were classified into the higher grade-level category. For example, a school serving 50% of students in kindergarten through fifth grade and 50% of students in sixth through eighth grades was classified as a middle school.

- **Elementary schools** serve a larger proportion of students in kindergarten through Grade 5,
- **Middle schools** serve a larger proportion of students in Grades 6 through 8, and
- **High schools** serve a larger proportion of students in Grades 9 through 12.

This section provides results for aggregate outcome measures related to attrition and STAAR exams.²⁸

²⁸ Graduation and CCMR outcomes are reported for high schools in Section 3.

Attrition Rates Disaggregated by School Level

For the purposes of this report, the attrition rate is defined as the percentage of students enrolled in the fall of 2020 who did not return to the same campuses in the fall of the 2021–22 academic year. In Figure 4.1, student attrition rates between the 2020–21 and 2021–22 academic years are displayed by school level for SBOE-authorized and ISD-authorized charter school campuses and their matched traditional public school campuses. SBOE-authorized elementary schools had a higher attrition rate than matched traditional public schools (27% to 24%), as did middle schools (23% vs. 19%) and high schools (38% vs. 25%). ISD-authorized elementary schools had a lower attrition rate than their matched traditional public schools (23% vs. 24%) and a higher attrition at the middle school (19% vs. 18%) and high school (24% vs. 21%) levels.

FIGURE 4.1

Student Attrition Rates Between 2020–21 and 2021–22 for Charter School Campuses and Matched Traditional Public School Campuses, by Authorizer Type and School Level

Note. The number of State Board of Education (SBOE)-authorized campuses included in these analyses: elementary (n=395); middle (n=149); high (n=186). The number of matched traditional public school campuses for SBOE-authorized charter school campuses included in these analyses: elementary (n=1,405); middle (n=360); high (n=253). The number of Independent School District (ISD)-authorized campuses included in these analyses: elementary (n=69); middle (n=24); high (n=24). The number of matched traditional public school campuses for ISD-authorized charter school campuses included in these analyses: elementary (n=1,804); middle (n=569); high (n=350).

STAAR Results Disaggregated by School Level

When STAAR performance among SBOE-authorized charter school campuses and ISD-authorized charter school campuses is disaggregated at the school level, differences in performance surface. Figure 4.2 displays the percentage of students in elementary schools meeting the Approaches Grade Level standard in STAAR-Reading and STAAR-Mathematics. At SBOE-authorized charter elementary school campuses, 64% of students achieved the Approaches Grade Level standard in STAAR-Reading and 55% achieved the standard in STAAR-Mathematics. At ISD-authorized charter elementary school campuses, 53% of students met the Approaches Grade Level standard in STAAR-Reading and 48% met the standard in STAAR-Mathematics.

Percent of Students Achieving the Approaches Grade Level Standard on the 2020–21 STAAR-Reading and STAAR-Mathematics Exams for SBOE-Authorized and ISD-Authorized Charter School Campuses (Elementary School Campuses)

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Note. A total of 375 State Board of Education (SBOE)-authorized charter school campuses and 56 Independent School District (ISD)-authorized charter school campuses were included in these State of Texas Assessments of Academic Readiness (STAAR®) analyses.

Figure 4.3 displays the percentage of students in middle schools meeting the Approaches Grade Level standard in STAAR-Reading and STAAR-Mathematics. At the middle school level, SBOE-authorized charter school campuses had 65% of students achieving the Approaches Grade Level standard on STAAR-Reading and 54% on STAAR-Mathematics. ISD-authorized charter middle school campuses had 58% of students achieving the Approaches Grade Level standard on STAAR-Reading and 47% on STAAR-Mathematics.

FIGURE 4.3

Percent of Students Achieving the Approaches Grade Level Standard on the 2020–21 STAAR-Reading and STAAR-Mathematics Exams for SBOE-Authorized and ISD-Authorized Charter School Campuses (Middle School Campuses)

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Note. A total of 151 State Board of Education (SBOE)-authorized charter school campuses and 25 Independent School District (ISD)-authorized charter school campuses were included in these State of Texas Assessments of Academic Readiness (STAAR®) analyses.

Figure 4.4 displays the percentage of students in middle schools meeting the Approaches Grade Level standard on the STAAR English I, English II, and Algebra I EOC exams. At SBOE-authorized charter middle school campuses, 70% of students met the Approaches Grade Level standard in English I, 77% in English II, and 66% in Algebra I. At ISD-authorized charter middle school campuses, 88% of students met the Approaches Grade Level standard in Algebra I.

FIGURE 4.4

Percent of Students Achieving the Approaches Grade Level Standard on the 2020–21 STAAR-English I, English II, and Algebra I Exams for SBOE-Authorized and ISD-Authorized Charter School Campuses (Middle School Campuses)

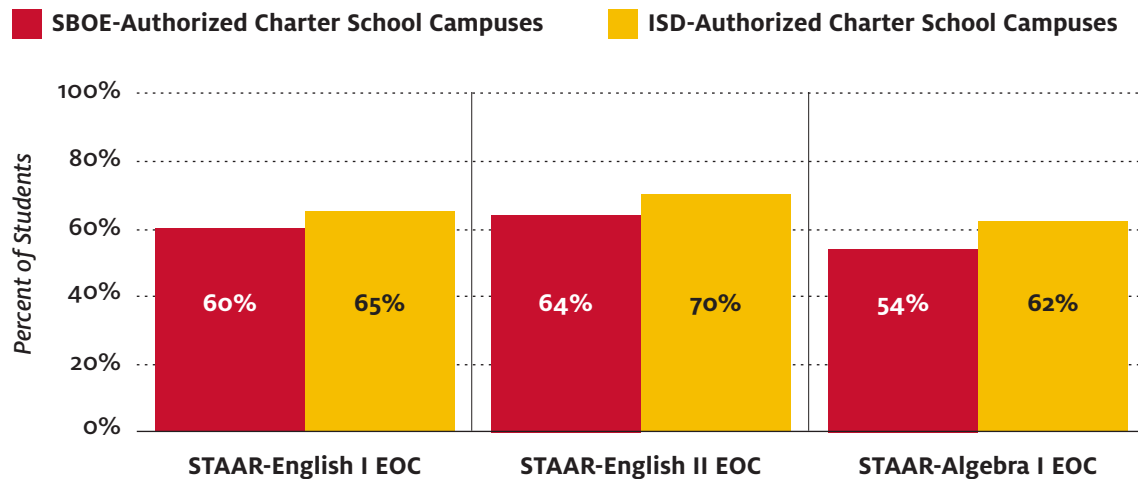

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Note. A total of 57 State Board of Education (SBOE)-authorized charter school campuses were included in these State of Texas Assessments of Academic Readiness (STAAR®)-English I end-of-course (EOC) analyses. A total of 39 SBOE-authorized charter school campuses were included in these STAAR-English II EOC analyses. A total of 116 SBOE-authorized charter school campuses and 20 ISD-authorized charter school campuses were included in these STAAR-Algebra I EOC analyses.

Figure 4.5 displays the percentage of students in high schools meeting the Approaches Grade Level standard on the STAAR English I, English II, and Algebra I EOC exams. At SBOE-authorized charter high school campuses, 60% of students met the Approaches Grade Level standard on the STAAR-English I EOC exam, 64% on the English II EOC exam, and 54% on the Algebra I EOC exam. ISD-authorized charter high school campuses had 65% of students achieving the Approaches Grade Level standard on the STAAR-English I EOC exam, 70% achieving the standard in English II, and 62% achieving the standard in Algebra I.

FIGURE 4.5

Percent of Students Achieving the Approaches Grade Level Standard on the 2020–21 STAAR-English I, English II, and Algebra I Exams for SBOE-Authorized and ISD-Authorized Charter School Campuses (High School Campuses)

Note. A total of 185 State Board of Education (SBOE)-authorized charter school campuses and 24 Independent School District (ISD)-authorized charter school campuses were included in these State of Texas Assessments of Academic Readiness (STAAR®)-English I end-of-course (EOC) analyses. A total of 184 SBOE-authorized charter school campuses and 24 ISD-authorized charter school campuses were included in these STAAR-English II EOC analyses. A total of 185 SBOE-authorized charter school campuses and 23 ISD-authorized charter school campuses were included in these STAAR-Algebra I EOC analyses.

Figure 4.6 shows the percentage of students in elementary schools scoring at the Masters Grade Level in STAAR-Reading and STAAR-Mathematics. At SBOE-authorized charter elementary school campuses, 18% achieved the Masters Grade Level standard in STAAR-Reading, and 12% achieved the Masters Grade Level standard in STAAR-Mathematics. At ISD-authorized charter elementary schools, 15% achieved the Masters Grade Level standard in STAAR-Reading, and 13% achieved the Masters Grade Level standard in STAAR-Mathematics.

Percent of Students Achieving the Masters Grade Level Standard on the 2020–21 STAAR-Reading and STAAR-Mathematics Exams for SBOE-Authorized and ISD-Authorized Charter School Campuses (Elementary School Campuses)

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Note. A total of 375 State Board of Education (SBOE)-authorized charter school campuses and 56 Independent School District (ISD)-authorized charter school campuses were included in these State of Texas Assessments of Academic Readiness (STAAR®) analyses.

Figure 4.7 shows the percentage of students in middle schools scoring at the Masters Grade Level standard in STAAR-Reading and STAAR-Mathematics. At the middle school level, SBOE-authorized charter school campuses had 17% of students meeting the Masters Grade Level standard on STAAR-Reading and 9% meeting the standard on STAAR-Mathematics. ISD-authorized charter middle school campuses had 15% of students scoring the Masters Grade Level standard on STAAR-Reading and 7% on STAAR-Mathematics.

FIGURE 4.7

Percent of Students Achieving the Masters Grade Level Standard on the 2020–21 STAAR-Reading and STAAR-Mathematics Exams for SBOE-Authorized and ISD-Authorized Charter School Campuses (Middle School Campuses)

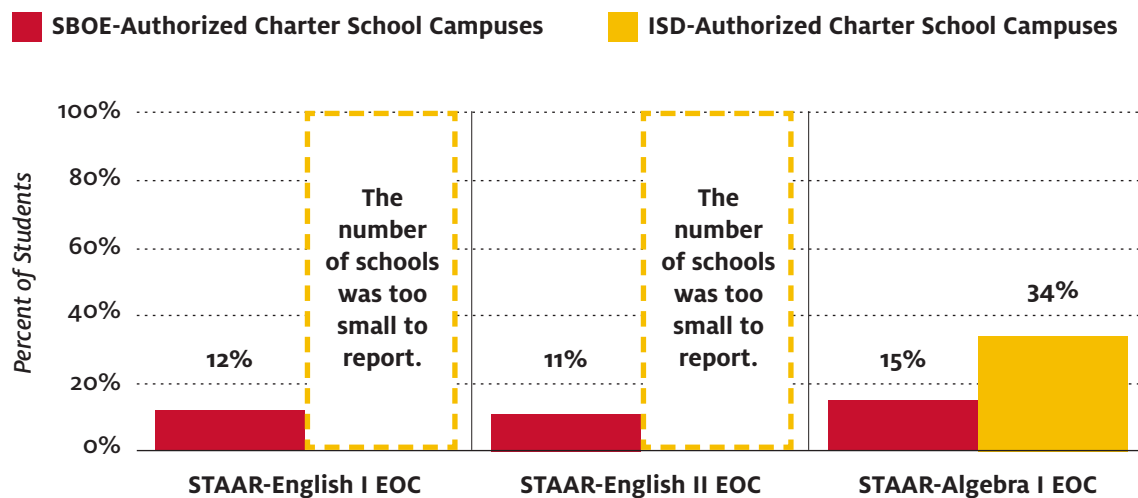

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Note. A total of 151 State Board of Education (SBOE)-authorized charter school campuses and 25 Independent School District (ISD)-authorized charter school campuses were included in these State of Texas Assessments of Academic Readiness (STAAR®) analyses.

Figure 4.8 shows the percentage of students in middle schools scoring at the Masters Grade Level standard on the STAAR English I, English II, and Algebra I EOC exams. At SBOE-authorized charter middle school campuses, 12% achieved the Masters Grade Level standard in English I, 11% in English II, and 15% in Algebra I. At ISD-authorized charter middle school campuses, 34% achieved the Masters Grade Level standard in Algebra I.

FIGURE 4.8

Percent of Students Achieving the Masters Grade Level Standard on the 2020–21 STAAR-English I, English II, and Algebra I Exams for SBOE-Authorized and ISD-Authorized Charter School Campuses (Middle School Campuses)

Note. A total of 185 State Board of Education (SBOE)-authorized charter school campuses and 24 Independent School District (ISD)-authorized charter school campuses were included in these State of Texas Assessments of Academic Readiness (STAAR®-English I end-of-course (EOC) analyses. A total of 184 SBOE-authorized charter school campuses and 24 ISD-authorized charter school campuses were included in these STAAR-English II EOC analyses. A total of 185 SBOE-authorized charter school campuses and 23 ISD-authorized charter school campuses were included in these STAAR-Algebra I EOC analyses.

Section 5: Aggregate Performance of COE-Authorized Charter School Campuses Compared with Matched Traditional Public School Campuses

Presented in this section of the report is a comparison of the aggregate academic outcomes of COE-authorized charter school campuses. For attrition rates, COE-authorized aggregate outcomes are compared with matched traditional public school campuses. COE-authorized aggregate outcomes for STAAR exam performance are reported without matched traditional school performance due to possible differences in participation resulting from COVID-19. Due to the small number of campuses, aggregate outcome measures related to graduation rates are not displayed and performance is not disaggregated by school type.

Campuses Included in the Aggregate Performance Analysis

Table 5.1 shows the demographic characteristics of students enrolled at COE-authorized charter school campuses and matched traditional public school campuses. After application of the purposive sampling technique described in detail in Appendix A to narrow the subset of traditional public schools to those most closely matched to the demographics of COE-authorized charter schools in the study, the demographic characteristics of students in both types of schools were similar. COE-authorized charter schools enrolled a lower percentage of African American (16% vs. 20%), Asian (4% vs. 6%), and Hispanic (46% vs. 49%) students compared with matched traditional public schools and a higher percentage of White students (29% vs. 21%). Additionally, COE-authorized charters had lower proportions of students at risk of dropping out of school (42% vs. 52%), economically disadvantaged students (48% vs. 65%), emergent bilingual students/English learners (13% vs. 27%), and special education students (8% vs. 12%) compared with matched traditional public schools.

TABLE 5.1

Demographic Characteristics of COE-Authorized Charter School Campuses and Matched Traditional Public School Campuses That Were Included in Performance Analyses, 2020–21

	COE-Authorized Charter School Campuses	Traditional Public School Campuses Matched to COE-Authorized Charter School Campuses
Race/Ethnicity		
African American	16%	20%
American Indian or Alaska Native	<1%	<1%
Asian	4%	6%
Hispanic	46%	49%
Native Hawaiian or Pacific Islander	<1%	<1%
Two or more races	4%	3%
White	29%	21%
Other Student Characteristics		
At-Risk	42%	52%
Economically Disadvantaged	48%	65%
Emergent Bilingual Student/English Learner	13%	27%
Special Programs		
Special Education	8%	12%
Total Students	12,722	416,733
Number of Schools	39	800

Source. Texas Academic Performance Reports, Texas Education Agency, 2020–21.

Note. The number of schools includes the total number of traditional public school campuses matched to commissioner of education (COE)-authorized charter school campuses.

Attrition Rates

For the purposes of this report, the attrition rate is defined as the percentage of students enrolled in the fall of 2020 who did not return to the same campus in the fall of 2021. Student attrition rates between the 2020–21 and 2021–22 academic years are displayed for COE-authorized charter school campuses and matched traditional public school campuses in Figure 5.1. COE-authorized charter school campuses had a 36% attrition rate, compared with 25% at matched traditional public school campuses.

FIGURE 5.1

Student Attrition Rates Between 2020–21 and 2021–22 for COE-Authorized Charter School Campuses and Matched Traditional Public School Campuses

Sources. Texas Academic Performance Reports, Texas Education Agency, 2020–21; Public Education Information Management System, Texas Education Agency, 2020–21 and 2021–22.

Note. A total of 39 commissioner of education (COE)-authorized charter school campuses and 798 traditional public school campuses matched to COE-authorized charter school campuses were included in this attrition analysis.

STAAR Performance

Analyzed in this report are the percentages of students achieving the Approaches Grade Level standard and Masters Grade Level standard on STAAR-Reading and STAAR-Mathematics exams taken by elementary school and middle school students in Grades 3–8, the STAAR-Algebra I EOC exam taken by middle and high school students, and the STAAR-English I and English II EOC exams taken by middle and high school students.

Figure 5.2 displays the percentage of students achieving the Approaches Grade Level standard on the STAAR-Reading/ELA exams for COE-authorized charter schools. For the STAAR-Reading exams administered to Grades 3–8 at COE-authorized charter school campuses, 70% of students scored at the Approaches Grade Level standard. For the middle and high school EOC exams, 74% of students in English I and 75% in English II scored at the Approaches Grade Level standard.

FIGURE 5.2

Percent of Students Achieving the Approaches Grade Level Standard on the STAAR-Reading/English Language Arts Exams for COE-Authorized Charter School Campuses, 2020–21

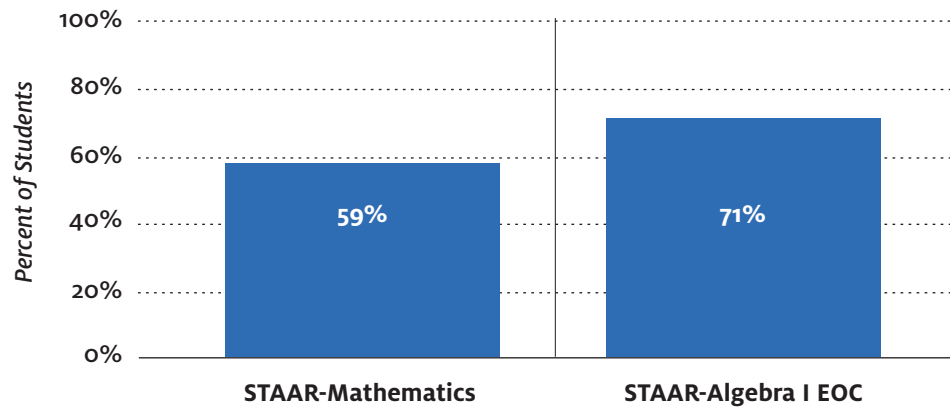

Source. Texas Academic Performance Reports, Texas Education Agency, 2020-21.

Note. A total of 29 commissioner of education (COE)-authorized charter school campuses were included in this State of Texas Assessments of Academic Readiness (STAAR®)-Reading analysis. A total of 15 COE-authorized charter school campuses were included in this STAAR-English I end-of-course (EOC) analysis. A total of 14 COE-authorized charter school campuses were included in this STAAR-English II EOC analysis.

Figure 5.3 displays the percentage of students achieving the Approaches Grade Level standard on the STAAR-Mathematics exams for COE-authorized charter schools. For the STAAR-Mathematics exams administered to Grades 3–8, 59% of students scored at the Approaches Grade Level standard. In the case of the middle school and high school STAAR-Algebra I EOC exam, 71% of students met the Approaches Grade Level standard.

FIGURE 5.3

Percent of Students Achieving the Approaches Grade Level Standard on the STAAR-Mathematics Exams for COE-Authorized Charter School Campuses, 2020–21

Source. Texas Academic Performance Reports, Texas Education Agency, 2020-21.

Note. A total of 29 commissioner of education (COE)-authorized charter school campuses were included in this State of Texas Assessments of Academic Readiness (STAAR®)-Mathematics analysis. A total of 18 COE-authorized charter school campuses were included in this STAAR-Algebra I end-of-course (EOC) analysis.

Figure 5.4 shows the percentage of students achieving the Masters Grade Level standard on the STAAR-Reading/ELA exams for COE-authorized charter schools. The sample included is the same as that in Figure 5.2. For the STAAR-Reading exams administered to Grades 3–8 at COE-authorized charter school campuses, 22% scored at the Masters Grade Level standard. For the middle and high school EOC exams, 12% of students scored at the Masters Grade Level standard in both English I and English II.

FIGURE 5.4

Percent of Students Achieving the Masters Grade Level Standard on the STAAR-Reading/English Language Arts Exams for COE-Authorized Charter School Campuses, 2020–21

Source. Texas Academic Performance Reports, Texas Education Agency, 2020-21.

Note. A total of 29 commissioner of education (COE)-authorized charter school campuses were included in this State of Texas Assessments of Academic Readiness (STAAR®)-Reading analysis. A total of 15 COE-authorized charter school campuses were included in this STAAR-English I end-of-course (EOC) analysis. A total of 14 COE-authorized charter school campuses were included in this STAAR-English II EOC analysis.

Figure 5.5 shows the percentage of students achieving the Masters Grade Level standard on the STAAR-Mathematics exams for COE-authorized charter schools. The sample is the same as in Figure 5.3. For the STAAR-Mathematics exams administered to Grades 3–8, 12% scored at the Masters Grade Level standard. In the case of the middle school and high school STAAR-Algebra I EOC exam, 17% of students met the Masters Grade Level standard.

FIGURE 5.5

Source. Texas Academic Performance Reports, Texas Education Agency, 2020-21.

Note. A total of 29 commissioner of education (COE)-authorized charter school campuses were included in this State of Texas Assessments of Academic Readiness (STAAR®)-Mathematics analysis. A total of 18 COE-authorized charter school campuses were included in this STAAR-Algebra I end-of-course (EOC) analysis.

Section 6: Discussion of Findings

Overview

The number of operating charter schools nationally has increased from about 3,700 to approximately 7,500 between the academic years 2005–06 and 2019–20. Student enrollment in charter schools also experienced substantial growth during that time period, rising from about 1 million students in 2005–06 to 3.5 million students in 2019–20 (National Alliance for Public Charter Schools, 2022). In Texas, 952 charter schools enrolled 428,259 students in the 2020–21 academic year. Approximately 83% of charter school campuses operating in Texas that year (788) were classified as SBOE-authorized charter school campuses; almost 13% (121) were ISD-authorized charter school campuses; and almost 5% (43) were COE-authorized charter school campuses.

Summary of Results

The analyses included in this report compare overall campus-level performance metrics across the three classifications of charter school campuses and, where appropriate, their matched traditional public school campuses. The matching techniques employed in these analyses ensured the selection of traditional public school campuses with similar student enrollment characteristics to examine and compare the descriptive statistics across different measures of campus performance. Appendix A includes a detailed description of the matching process.

The overall campus-level performance results were examined across several outcomes: attrition rates; STAAR performance outcomes; four-year longitudinal graduation rates for schools evaluated under alternative and standard accountability provisions; and CCMR outcomes for ISD- and SBOE-authorized charter schools.

Attrition

COE-authorized and SBOE-authorized charter school campuses had higher attrition rates than their matched traditional public schools. COE-authorized charter school campuses had a 36% attrition rate, compared with 25% at matched traditional public school campuses. SBOE-authorized charter school campuses had an attrition rate of 29%, compared with 23% at matched traditional public school campuses. ISD-authorized charter school campuses and matched traditional public schools both had a 22% attrition rate.

STAAR Results

At SBOE-authorized charter schools, 55% of students taking the STAAR-Mathematics exams and 62% of students taking the STAAR-Algebra I EOC met the Approaches Grade Level standard, while 11% of students taking the STAAR-Mathematics exams and 14% of students taking the STAAR-Algebra I EOC exam met the Masters Grade Level standard. For students taking the Reading/ELA exams, 65% taking the STAAR-Reading exams, 64% taking the STAAR-English I EOC exam, and 68% taking the STAAR-English II EOC exam met the Approaches Grade Level standard. Eighteen percent of students taking STAAR-Reading exams met the Masters Grade Level standard—the most achieving that level across all tests and grade levels; 9% of students taking the STAAR-English I EOC exam and 8% of students taking the STAAR-English II EOC exam met the Masters Grade Level standard.

At ISD-authorized charter schools, 49% of students taking the STAAR-Mathematics exams and 70% of students taking the STAAR-Algebra I EOC exam met the Approaches Grade Level standard, while 11% of students taking the STAAR-Mathematics exams and 19% of students taking the STAAR-Algebra I EOC exam met the Masters Grade Level standard. For students taking the Reading/ELA exams, 57% taking the STAAR-Reading exams, 66% taking the STAAR-English I EOC exam, and 71% taking the STAAR-English II EOC exam met the Approaches Grade Level standard. Fifteen percent of students taking STAAR-Reading exams, 10% of students taking the STAAR-English I EOC exam, and 9% of students taking the STAAR-English II EOC exam met the Masters Grade Level standard.

At COE-authorized charter schools, 59% of students taking the STAAR-Mathematics exams and 71% of students taking the STAAR-Algebra I EOC exam met the Approaches Grade Level standard, while 12% of students taking the STAAR-Mathematics exams and 17% of students taking the STAAR-Algebra I EOC exam met the Masters Grade Level standard. For students taking the Reading/ELA exams, 70% taking the STAAR-Reading exams, 74% taking the STAAR-English I EOC exam, and 75% taking the STAAR-English II EOC exam met the Approaches Grade Level standard. Twenty-two percent of students taking STAAR-Reading exams, 12% of students taking the STAAR-English I EOC exam, and 12% of students taking the STAAR-English II EOC exam met the Masters Grade Level standard at COE-authorized charter schools.

Grade 9 Four-Year Longitudinal Graduation Rates for the Class of 2020

Graduation rates were higher at SBOE-authorized charter school campuses under standard accountability provisions than at matched traditional public school campuses (97% vs. 91%) and lower at SBOE-authorized charter school campuses evaluated under AEA provisions (72% vs. 89%). Graduation rates were lower at ISD-authorized charter school campuses under standard accountability provisions than at matched traditional public school campuses (88% vs. 91%).

College, Career, and Military Readiness Outcomes

Compared with matched traditional public school campuses, the 244 SBOE-authorized charter school campuses had a higher percentage of graduates who demonstrated CCMR in meeting the criterion score on an AP or IB exam in any subject area and graduating as a designated special education student with an advanced diploma plan. The percentage of graduates meeting TSI college readiness benchmarks was the same for SBOE-authorized charter school campuses and matched traditional public school campuses. SBOE-authorized charter school campuses had lower percentages on all other CCMR indicators.

CCMR outcomes for the 26 ISD-authorized charter school campuses were higher than matched traditional public school campuses in TSI college readiness benchmarks; earning college credit through dual credit courses for at least three credit hours in ELA or mathematics or at least nine credit hours in any subject; completing and earning credit for a math college prep course; completing an OnRamps dual enrollment course and qualifying for at least three hours of college credit; earning an associate's degree while in high school; and graduating as a designated special education student with an advanced diploma plan. ISD-authorized charter school campuses had equal percentages as matched traditional public school campuses in earning industry-based certifications; earning Level I or Level II certificates in any workforce education area; and completing and earning credit for an ELA college prep course. ISD-authorized charter school campuses had lower percentages on the two other CCMR indicators.

Study Limitations

This report provides a detailed description of charter school campuses and matched traditional public school campuses intended for public comparison of school types. While a combination of sampling techniques was used to identify demographically similar traditional public school campuses as the matched set for comparison, inferences regarding the performance of charter schools relative to traditional public schools cannot be made using this report. In order to suggest the performance of one type of school is consistently better or worse than another, statistical tools controlling for observed and unobserved characteristics influencing performance would need to be in place and inferential statistical analysis employed. Additionally, careful interpretation of the comparisons with COE-authorized and ISD-authorized charter school campuses provided in this report is necessary because of the small numbers of campuses in each category.

Because of the award of new charter schools, the closure of low-performing charter schools, and the expansion of existing charters, comparison of results should be made with caution. As a final note, although the passage of SB 2 in 2013 resulted in the policy process change in charter school authorization, the reader is cautioned against attributing differences presented in this report solely to this change. Rather, differences may be attributable to other changes occurring over time, such as differences in the charter school applicant makeup, other process changes, and/or changes in leadership—none of which could be accounted for within the scope of this report.

Appendix A: Detailed Methods Description

This appendix provides a detailed description of the different methodological approaches employed to fulfill the statutory requirements of this annual report. Under Texas Education Code (TEC) § 12.1013 (b) (2022), the Texas Charter Authorizer Accountability Report must provide an opportunity for the public to compare the performance of State Board of Education (SBOE)-authorized, Independent School District (ISD)-authorized, and commissioner of education (COE)-authorized charter schools with the performance of matched traditional public school campuses. Specific performance metrics codified under TEC § 39.053(c) (2019) and attrition rates are required to be included in the report, disaggregated by grade level served.

Purposive Sampling

The purpose of creating a matched set of traditional public schools for comparison is to optimize the covariate balance between the two comparison groups. In the education literature, several covariates, or those elements of the population that influence outcomes, are well documented to influence school outcomes (Aitkin & Longford, 1986; Hill & Rowe, 1996; McCaffrey et al., 2004). In order for this study to create matched groups for comparison, the covariate balance between groups is of utmost importance (Greevy et al., 2004; Raudenbush & Willms, 1995). The procedure used to create a matched sample of traditional public schools for comparison to charter schools is described in detail below.

The expansive research conducted in the field of education and the comparative nature of this study allow for the use of purposive sampling to select the matched set of traditional public schools. In purposive sampling, the researcher uses education literature to guide the selection of covariates of the population important to the study (Bryman, 2016). Specifically in the examination of school outcomes, literature has documented several important covariates for consideration: geographic location (Wong et al., 2013), school size (Fowler & Walberg, 1991), grade levels served (Fowler & Walberg, 1991; Heck, 2000), teacher experience (Clotfelter et al., 2007), concentrations of economically disadvantaged students (Fowler & Walberg, 1991; Heck, 2000), special education students served (Heck, 2000; McCaffrey et al., 2004), historically marginalized student group enrollment (Darling-Hammond, 2004), and proportion of English learners served (Abedi & Gándara, 2006). Guided by this vast array of literature, this study creates a systematic sample (Bryman, 2016) of matched traditional public schools by optimizing important covariate balances between the charter and traditional public school groups. The selection of the systematic sample begins with defining the sampling frame.

Sampling Frame

The sampling frame is the subset of the population from which the sample, or in this case, the matched set, is drawn (Bryman, 2016). The sampling frame is defined as the population of traditional public school campuses located within cities with at least one charter school campus. By defining the sampling frame in this way, the study controls for exogenous characteristic influence (Wong et al., 2013) on outcome variables. Texas has public schools in 1,091 cities.²⁹ Of those, 913 cities have only traditional public school campuses, 164 have both traditional public school and charter school campuses, and 15 have only charter school campuses. When the total population of 7,888 traditional public school campuses was narrowed to include only those located in cities with charter school campuses, 4,672 traditional public school campuses remained as the sampling frame.

Stratification

Once the sampling frame was defined, the frame was stratified into three distinct groups (strata) by grade levels served. The school level (elementary, middle, or high school) was assigned to each school based upon the proportion of students served in each grade. Within each of the three strata, the sampling process was

29 The city in which each school was located was reported as the ARC city variable in the Texas school finder ArcGIS data downloaded February 15, 2022: <https://schoolsdata2-tea-texas.opendata.arcgis.com/>

conducted independently to ensure robust matching and to ensure the matched set of traditional public schools were representative of school level.

All schools were categorized as “primarily” elementary school (kindergarten through Grade 5), middle school (Grades 6 through 8), or high school (Grades 9 through 12). Percentages of students served in elementary, middle, and high school grades were calculated for each school. To calculate the percentage of students served in each grade level group, grade level counts for elementary, middle, and high schools were summed and divided by total enrollment. Schools were labeled as an elementary, middle, or high school based upon the highest percentage. Schools with the highest equal proportions of students in two grade-level groups were labeled with the highest option. For example, if a school served equal percentages of elementary and middle school students, the school was labeled as a middle school; if a school served equal percentages of middle and high school students, the school was labeled as a high school.

Independent Sampling

Because this report compares the performance of charter schools by authorizer, matched sets of traditional public schools for SBOE-authorized, ISD-authorized, and COE-authorized charter school campuses were created independently. The sampling techniques described below were conducted three times—once for each of the three authorizer types. The sampling occurred with replacement, meaning that the same sampling frame within each stratum was used for each of the charter school authorizer groups. Sampling each independently ensured that the matched set of traditional public schools was representative of the charter schools by authorizer.

Covariate Balancing

Beginning with the sampling frame for each school-level stratum, covariates not controlled for in the stratification or independent sampling were balanced first using t-tests to determine significant difference (covariates are displayed below). If the t-test revealed no significant difference in the distributions of the variable among charter schools and traditional public schools, the variable was considered balanced. If the t-test yielded a significant difference, outliers in the traditional public school data were trimmed (Ghosh & Vogt, 2012). An outlier was trimmed from the data if the standard deviation from the mean exceeded the standard deviation of the fifth and 95th percentile means. After data were trimmed, t-tests were conducted to evaluate differences between the two groups. The specific order of the covariate balancing was selected based upon the degree of difference in group means. The covariates with the largest differences were trimmed first. T-tests were conducted again, and the process was repeated. In total, eight distinct covariates were balanced:

- Total number of students enrolled
- Average teacher years of experience
- Percentage of African American students enrolled
- Percentage of Hispanic students enrolled
- Percentage of enrolled students receiving special education services
- Percentage of emergent bilingual students/English learners enrolled
- Percentage of enrolled students identified as economically disadvantaged
- Percentage of enrolled students at risk of dropping out of school³⁰

Appendix D details the performance results for each charter school included in the report. Residential treatment facilities (RTFs), juvenile justice alternative education programs (JJAEPs), and disciplinary alternative education programs (DAEPs) were not included in purposive sampling, nor in performance analyses. RTFs were excluded because the unique student populations served in instructional settings are far different from other schools. JJAEPs and DAEPs were excluded because the performance of their student populations is attributed back to the students’ home campuses. The charter school campuses listed in Appendix D are those reported in the academic performance metrics in this report.

30 All covariates are from the Texas Academic Performance Report, Texas Education Agency, 2020-21.

Outcome Measure Calculation

For attrition rates, graduation rates, and college, career, and military readiness (CCMR) indicator rates, results were calculated using the number of students at each campus in the group that contributed to the outcome measure. Rather than averaging the campus-level rates for all campuses in a group for each metric, numerators and denominators for each metric were summed then divided to provide an overall rate for the group. This prevents results from being significantly influenced by extreme performance results for very small campuses.

Attrition Analysis

For the purposes of this report, the attrition rate is defined as the percentage of students enrolled in the fall of 2021 who did not return to the same campus in the fall of 2022. The attrition rates for this report were calculated using student-level data provided by the Texas Education Agency (TEA). Those data included a unique identifier, grade level, and the campus for each student enrolled in Texas public schools for the 2020–21 and 2021–22 academic years. Students enrolled in the fall of 2021 were cross-referenced to their fall enrollment in 2022. Students whose fall 2021 campus was different from their fall 2022 campus were considered attrited and counted in the numerator of the attrition rate calculation. The denominator of the attrition rate calculation comprised all students enrolled in the 2020–21 academic year at a particular campus. This calculation was adjusted to account for the grade levels available to students at each campus.

Students were excluded completely from the attrition rate calculations if the school did not offer the next grade level for the student. For example, students whose 2022 expected grade level was less than the lowest or greater than the highest grade level of students enrolled at their 2021 campus of enrollment were excluded from the attrition rate calculation. Students in Grade 12 in the 2020–21 academic year who were not retained in the 2021–22 school year were excluded from the attrition rate calculation. Students attending campuses in the fall of 2021 that closed in the 2021–22 school year were excluded from attrition rate calculations, as well as students enrolled in the fall of 2022 but not found in the fall 2021 data.

In a few cases, students were reported as enrolled by more than one school in 2020–21 and 2021–22. When students were reported as enrolled by two schools in 2020–21, the duplicate student was left in the data set, and the 2021–22 campus of enrollment reported or lack thereof for the student was matched with both student records. If students were reported by two schools in 2020–21, no duplicate record was created. For both schools of enrollment reported in 2020–21, the school of enrollment in 2021–22 was given preference. If the school of enrollment for 2020–21 was not reported as a school of enrollment in 2021–22, one of the schools was chosen at random.

Attrition rates were calculated for all active campuses of accountability for the 2020–21 school year, with the exception of RTFs, JJAEPs, and DAEPs. To be determined as an “active” campus, the campus had to have a status of active reported in the Public Education Information Management System. In some cases, campuses enrolled no students for the 2021–22 school year but did not report the campus status as “closed.” These campuses have a 100% attrition rate and are labeled as “active zero-enrollment in Year 2” campuses. The 100% attrition rates are reported for the active zero-enrollment in Year 2 campuses in Appendices D and E, though the attrition rates of these campuses were excluded from the aggregate reporting throughout the report.

Graduation Rate

The graduation rate reported is the class of 2020 longitudinal four-year graduation rate calculated for state accountability purposes, which follows a cohort of first-time students in Grade 9 through the fall after their expected graduation date (TEA, 2021b).³¹ For schools rated under standard accountability provisions, the graduation rate calculation is the number of graduates divided by the sum of the number of graduates, continuers, Texas Certificate of High School Equivalency recipients, and dropouts in the cohort.

³¹ See the [Secondary School Completion and Dropouts in Texas Public Schools 2019–20](#) report for more about the calculation of the class of 2020 longitudinal graduation rate.

For schools rated under alternative accountability provisions, the rate is the sum of graduates, continuers, and Texas Certificate of High School Equivalency recipients divided by the sum of the number of graduates, continuers, Texas Certificate of High School Equivalency recipients, and dropouts in the cohort (TEA, 2021b). Students are excluded from this graduation rate for state accountability purposes for a multitude of reasons, all specified in state statute:

- **Students are excluded** if they meet one of the following criteria listed under TEC §39.053(g-1) (2019): a) ordered by a court to attend a high school equivalency certificate program but has not yet earned a high school equivalency certificate; b) previously reported to the state as a dropout; c) in attendance but not in average daily attendance membership; d) enrolled initially in Grades 7–12 as an unschooled refugee or asylee as defined by TEC § 39.027(a-1) (2019); e) is in the district exclusively as a function of having been detained at a county detention facility but is otherwise not a student of the district, or is being provided services by an open-enrollment charter school exclusively as the result of having been detained at the facility; f) is incarcerated in a state jail or federal penitentiary as an adult or as a person certified to stand trial as an adult; or g) has suffered a condition, injury, or illness that requires substantial medical care and leaves the student unable to attend school and assigned to a medical or residential treatment facility.
- **Students can also be excluded** per TEC § 39.053(g-1) (2019) if they a) are at least 18 years of age as of September 1 and have met the credit requirements for high school graduation; b) have not fulfilled the requirements of their individualized education program; and c) are enrolled and receiving individual education program services.
- **Students failing to enroll in school** after leaving an RTF or pre- or post-adjudication facility are excluded from the calculation for the district serving the facility under TEC § 39.053(g-3) (2019).
- **TEC § 39.055 (2019) permits students** in a Texas juvenile justice department facility or residential facility served by a Texas public school district to be excluded.

College, Career, and Military Readiness Outcomes

Under TEC § 39.053 (2019), graduates have several ways to demonstrate CCMR. For this report, the following CCMR outcomes are reported for 2020 annual graduates:^{32, 33}

- **Meet Texas Success Initiative (TSI) Criteria in English Language Arts (ELA)/Reading and Mathematics.** This is done specifically by meeting the college-ready criteria on the TSI assessment, SAT, or ACT or by successfully completing and earning credit for a college prep course in both ELA/reading and mathematics as defined in TEC § 28.014 (2019). The assessment results considered include TSI assessments through October 2020, SAT through the June 2020 administration, ACT through the July 2020 administration, and course completion data via Texas Student Data System in the Public Education Information Management System. A graduate must meet the TSI requirement for both ELA/reading and mathematics but does not necessarily need to meet them on the same assessment.
- **Meet Criteria on Advanced Placement (AP) or International Baccalaureate (IB) Examination.** A graduate can accomplish this by meeting the criterion score on an AP or IB examination in any subject area. The criterion score is 3 or higher for AP and 4 or higher for IB.
- **Earn Dual Course Credits.** To achieve this, a graduate must complete and earn at least three credit hours in ELA or mathematics or at least nine credit hours in any subject. See Appendix H of the 2021 Accountability Manual (TEA, 2021a) for additional information.
- **Earn an Industry-Based Certification.** To achieve this, a graduate must earn an industry-based certification under Title 19 of the Texas Administrative Code § 74.1003 (2019), adopted to be effective January 3, 2018, prior to graduation from high school.
- **Earn a Level I or Level II Certificate.** To achieve this, graduates are awarded Level I or Level II certificates by institutions of higher education after satisfactory completion of a higher education

³² For more information, see Appendix H of the [TEA 2021 Accountability Manual](#) (TEA, 2021a).

³³ See the [2020–21 Texas Academic Performance Report Glossary](#) for more information on the CCMR postsecondary readiness indicators.

program.³⁴

- **Complete and Earn Credit for an ELA College Prep Course.** To achieve this, a graduate must earn credit for an ELA college preparatory course defined in TEC § 28.014 (2019).
- **Complete and Earn Credit for a Mathematics College Prep Course.** To achieve this, a graduate must earn credit for a mathematics college preparatory course defined in TEC § 28.014 (2019).
- **Complete an OnRamps Dual Enrollment Course.** To achieve this, a graduate must complete an OnRamps dual enrollment course and qualify for at least three hours of university or college credit in any subject area.
- **Earn an Associate's Degree.** This means a graduate has earned an associate's degree prior to their graduation from high school.
- **Graduate with Completed Individualized Education Program (IEP) and Workforce Readiness.** To achieve this, a graduate must complete his/her IEP and demonstrate either self-employment with self-help skills to maintain employment or mastery of specific employability and self-help skills that do not require public school services.
- **Graduate Under an Advanced Diploma Plan and Identified as a Current Special Education Student.** To achieve this, a student graduates under an advanced diploma plan and is identified as a current special education student.

34 See Appendix D of the [TEA 2021 Accountability Manual](#) for more information about Level I and Level II certificates (TEA, 2021a).

Appendix B: Description of Charter School Campuses Evaluated Under Alternative Education Accountability Provisions

TABLE B.1

Texas Public School Campuses Evaluated Under Alternative Education Accountability Provisions, by School Type, 2020–21

Campus Type	Elementary School	Middle School	High School	Total
SBOE-Authorized Charter, Not Residential Treatment Facilities	0	6	93	99
ISD-Authorized Charter	0	0	3	3

Appendix D: Charter School Campus-Level Performance Results

Appendix D includes individual charter school campus outcome measures presented in the report. Detailed information regarding outcome measures and charter school authorizer categorization can be found in Section 1, and Appendix A details report methodology. Matched traditional public school campus outcome measures can be found in Appendix E (web only). Because matched comparison sets are intended for comparisons made in the aggregate, readers are cautioned from making direct campus-to-campus comparisons between the individual charter schools in the analysis and any single campus in the matched comparison set (Appendix E).
