Citation. Texas Education Agency. (2017). *List of Texas public school campuses on year-round education calendars, 2016–17* (Document No. GE18 601 02). Austin, TX: Author.

Abstract. The Texas Education Agency (TEA) is required by Rider 58 (General Appropriations Act, Article III, 85th Texas Legislature) to provide a list of schools operating on a year-round system. This report contains a list of the 2016–17 campuses operating on a Year-Round Education (YRE) calendar as determined through analyzing district-reported data related to the specific calendar days a campus was in session throughout the academic year.

Keywords. *Year-Round Education, year-round calendars, instructional days.*

Section 1: Introduction

Year-Round Education Overview

Although there is no single definition of year-round education (YRE), in a review of research on best practices in education, the National Education Association (NEA) noted that under a year-round system, schools typically stretch the traditional 10-month, 180-day calendar across the calendar year, including either more frequent breaks or shorter breaks between terms (NEA, 2017). The intent of year-round attendance calendars is not necessarily to increase the total number of days of instruction, but instead to provide districts the flexibility to restructure their academic calendars to meet local education needs. Proponents for YRE contend that longer academic periods and shorter breaks may help students receive remediation more frequently and retain knowledge that otherwise may be lost over an extended break. Opponents note, however, that year-round schedules can interfere with extracurricular activities and burden parents, particularly if their children attend schools that adopt different schedules (NEA, 2017).

YRE calendars characteristically have earlier start and end dates compared to the traditional calendar and divide the traditional three-month summer holiday into multiple breaks throughout the year. Common examples of YRE calendars include the 45/15 plan (i.e., 45 days of instruction followed by 15 days of intersession), the 60/20 plan (i.e., 60 days of instruction followed by 20 days of intersession), and the 90/30 plan. YRE schools may operate on a single- or multi-track schedule, in which students are either all on the same schedule or follow different schedules.

In 1995, the 74th Texas Legislature added language to the Texas Education Code (TEC) allowing Texas public school districts the opportunity to modify their campuses' calendars to operate on a year-round system (TEC § 25.084, 2016).

According to TEC § 25.084 (2016), districts with campuses operating on YRE calendars may modify any of the following:

- The number of contract days of employees and the number of days of operation, including any time required for staff development, planning and preparation, and continuing education, otherwise required by law;
- Testing dates, data reporting, and related matters;¹
- The date of the first day of instruction of the school year under TEC § 25.0811 for a school that was operating year-round for the 2000–01 school year; and

¹ The TEA Student Assessment Division did not receive any requests for a modified testing calendar for the 2015–16 and 2016–17 school years.

- A student’s eligibility to participate in extracurricular activities when the student’s calendar track is not in session.

Texas public school districts and campuses that operate on a YRE schedule are not required to follow a particular calendar structure (e.g., 45/15 plan or 60/20 plan) and can instead tailor their calendars to meet the needs of relevant stakeholders (e.g., students, faculty, families, community members). Texas public school districts that operate on a traditional calendar can also tailor their calendars, but are limited by statutory restrictions. For example, the first day of instruction cannot be scheduled for earlier than the fourth Monday in August, and the last day cannot be earlier than May 15th, except under certain conditions.² Most notably, House Bill (HB) 1842 (84th Texas Legislature) added Chapter 12A to the TEC allowing for the creation of Districts of Innovation. This designation gives districts additional flexibilities in structuring their academic calendars.³ Districts are eligible for this designation if certain performance requirements are met and the district follows specific procedures for adoption as outlined in statute. As part of this procedure, districts are required to develop a Local Innovation Plan that provides for a comprehensive program for the district that may include innovative curriculum and instruction as well as modifications to the school day or year, allowing Districts of Innovation flexibility in terms of scheduling the first and last days of instruction (Title 19 of the Texas Administrative Code [TAC] § 102.1307, 2017 adopted to be effective September 12, 2016). As of the 2017–18 school year, the commissioner of education had been notified of 654 Districts of Innovation operating in the state.⁴

Purpose of Report

Rider 58 (General Appropriations Act, Article III, 85th Texas Legislature) requires the Texas Education Agency (TEA) to maintain a list of schools operating on a year-round system under TEC § 25.084 (2016). TEA shall provide these lists of schools by January 1, 2018 and January 1, 2019.⁵

This report presents a list of schools operating on a year-round calendar in 2016–17 as determined through an analysis of the specific calendar days in which a campus was in session using Public Education Information Management System (PEIMS) data as reported by districts through the Texas Student Data System (TSDS).

² Per TEC § 25.0811 (2016), campuses operating on a traditional calendar may not begin instruction for a school year before the fourth Monday in August, except as provided by TEC § 7.056(f) (2016), TEC §§ 25.0811–12 (2016), or a designated District of Innovation’s Local Innovation Plan developed under TEC § 12A.003 and 19 TAC § 102.1307, 2017, amended to be effective September 12, 2016.

³ See https://tea.texas.gov/Texas_Schools/District_Initiatives/Districts_of_Innovation/ for more information.

⁴ Unlike Districts of Innovation, districts with campuses operating on a year-round calendar are not required to report their YRE campus(es) to TEA.

⁵ During the 2016–2017 biennium Rider 69 (General Appropriations Act, Article III, 84th Texas Legislature), TEA was required to annually report a list of schools operating on a year-round system. To meet this requirement, TEA conducted an online survey of districts each year.

The passage of HB 2610 (84th Texas Legislature), necessitated an adjustment in the way that TEA collects data from schools to document instructional time for school funding purposes. TEA now requires districts to report the number of instructional minutes per calendar day a campus is in operation instead of only the number of days a campus was in operation. This collection is limited to the days students are planned to attend school. Holidays, weekends, or other times that students or staff are not expected to be at school are not reported. Per TEC § 25.081, unless exempted, districts and charter schools are required to operate for a minimum of 75,600 minutes a year or 420 minutes per day. Districts may, with approval from the commissioner of education, reduce the number of minutes in a day or, without approval, add additional minutes to the end of a district’s normal hours as needed to compensate for minutes of instruction lost due to school closures. Because of the possible variation across campuses, the number of minutes each day a campus is in operation is needed in order for school funding formulas to be correctly calculated across the state.

With this change in data collection, instructional calendar day data are now available to TEA through PEIMS and can be used to identify campuses operating on a year-round schedule beginning with the 2016–17 school year. Prior published lists of schools operating on a year-round schedule, including those operating in 2016–17, were based on results from a statewide survey.⁶ The purpose of the analysis for this report is to use existing agency data to employ a new methodology based on the calendar data in PEIMS to determine the list of campuses operating on a year-round schedule in 2016–17.⁷ This methodology provides for a more systematic approach that results in replicable information than can be obtained through annual surveys, eliminates the burden on districts to provide the year-round status of each of their campuses to TEA annually, and avoids duplication in data collection by using existing data in PEIMS.

Organization of Report

The remainder of the report is organized as follows: Section 2 provides details regarding the sources of data compiled for this report and the methodological techniques used to determine whether a campus appears to be operating on a year-round schedule. A discussion of these findings is presented in Section 3, along with a discussion of methodological limitations that should be considered when interpreting results.

Appendix A is the list of YRE campuses for the 2016–17 school year as determined through an analysis of calendar data available in PEIMS.

⁶ Prior lists of YRE schools for 2015–16 and 2016–17 obtained through survey methodology are available here. https://tea.texas.gov/Reports_and_Data/Program_Evaluations/Other_Initiatives/Program_Evaluation_Other_Initiatives/

⁷ Year-round status of campuses operating in 2017–18 could not yet be determined through this methodology because the 2017–18 calendar data were not available in PEIMS in time to meet the legislative reporting requirement of January 1, 2018 for this report. Data for campuses operating in 2017–18 will be available in September of 2018 and will be used to report the list of 2017–18 YRE campuses on January 1, 2019.

Section 2: Data and Methods

Data Sources

To determine year-round status for Texas public school campuses, the specific calendar days each campus was in operation were obtained through PEIMS. Calendar days were determined based on the days in which districts reported operational minutes for the purposes of student instruction. The data file included information from 8,956 campuses from 1,193 districts in Texas that had reported calendar data to TEA.

Identifying Year-Round Education Campuses

In order to identify which campuses were operating on a year-round calendar, a voluntary survey was disseminated to all public districts and charter schools in Texas in the fall of 2015 and again in the fall of 2016.⁸ Although the response rates were relatively high (96% of districts responded each year), the survey collection method was labor-intensive and prone to potential errors as the information was self-reported and dependent on the knowledge of the person(s) completing the survey. Additionally, because the state does not provide a standard definition of year-round status, several respondents reported confusion over determining a campus' year-round status based only on information included under TEC § 25.084 (2016) which only provides guidance on what may be modified by a district under a year-round system but does not give a definition of what constitutes year-round operation. At the time, therefore, a survey of districts was the best means by which to collect information regarding whether districts had campuses operating on a year-round system.

Beginning in the fall of 2017, TEA was able to use PEIMS data to identify specific patterns of instructional days that are characteristic of YRE campuses. Nevertheless, districts in Texas are not required to follow a particular calendar structure for year-round operation; a year-round calendar can be implemented by districts in various ways. For example, some YRE calendars may consist of four 9-week sessions with two 2-week intersession breaks between the first and second and the second and third 9-week sessions. A longer (4-week) break, typically over the summer, separates the end of one school year from the following school year. Other YRE campuses may adopt a trimester schedule with three 12-week sessions separated by breaks throughout the year. One commonality of YRE campuses is the absence of a long (8-10 week) summer break in instructional time and the presence of more frequent breaks.

⁸ These lists were required in the 2016–2017 biennium by Rider 69 (General Appropriations Act, Article III, 84th Texas Legislature).

Given the lack of statutorily prescribed year-round calendar structures in Texas, a method of estimation based on calendar commonalities was employed for this report. To estimate the list of campuses that appear to be operating on a year-round calendar in the 2016–17 school year, campuses that reported instructional minutes on days in all twelve calendar months or that recorded frequent breaks (spans where no instructional minutes were recorded) were selected. Frequent breaks were defined by selecting schools that began in July and had school calendar days in 11 of the 12 months, or schools that had more than ten percent of their total days in August and September, but less than ten percent of their days in October when intersession breaks commonly occur in YRE schools.

Section 3: Discussion of Findings

Overview of Results

In the 2016–17 school year, as determined through an analysis of available data described in the previous section, 25 public school districts in Texas were determined to have campuses that appear to operate on a year-round schedule (121 campuses total). The list of YRE campuses by district can be found in Appendix A, page 8.

To judge the accuracy of the methodology used to generate this list of YRE campuses, this list was compared to the list of 2016–17 YRE campuses identified through survey methodology. Although the list of YRE campuses generated through this methodology differs slightly from the list of 2016–17 YRE campuses published on January 1, 2017, the data analytic methodology was determined to be reasonably accurate.⁹

Study Limitations

The 2016–17 list of YRE campuses, presented in Appendix A (see page 8), was created from data that are expected to be available in the coming years through PEIMS data reporting. The data source, while still self-reported, is less prone to error than data collected through an online survey because of the system of controls for data reporting that are in place in TSDS.¹⁰ Several analytical techniques were used to determine schools likely operating on a YRE calendar including the distribution of instructional days throughout a twelve-month period and patterns of breaks that are common in YRE calendars.

The primary limitation to estimation of year-round status using this methodology or the prior survey methodology is the lack of a clear definition of YRE in Texas or nationally which hinders TEA from using a single clearly-defined set of parameters to determine whether a campus is operating on a YRE calendar. To estimate the list, the current analyses included schools with recorded instructional days in all twelve calendar months, or schools with more than ten percent of their total days in August and September, but less than ten percent of their days in October. These criteria were set based on an examination of the data and knowledge of common patterns of instructional days in YRE campuses in Texas, but may not be fully representative of how all YRE campuses in Texas implement a YRE calendar. Additionally, given districts have the authority to modify school calendars within certain statutory limitations, particularly campuses within Districts of Innovation, the current analyses may have categorized some campuses inaccurately as YRE or missed some campuses that would have self-identified as a YRE campus on a survey. Future analyses

⁹ See <https://tea.texas.gov/WorkArea/DownloadAsset.aspx?id=51539612979> for the list of 2016-17 YRE campuses collected through an survey in the fall of 2016.

¹⁰ Although PEIMS data reporting controls are provided through TSDS it is still possible that districts may erroneously report data, or not report any data at all, particularly the first year of a new data collection.

will continue to refine the set of methodological criteria, including examining consistency and change over time, to improve the accuracy of the published campus lists.
