Abstract. This report provides information on enrollment in the Texas public school system from the 2011-12 through 2021-22 school years, based on data collected through the Texas Student Data System. Enrollment data are provided by grade, race/ethnicity, gender, and economically disadvantaged status, and for instructional programs, nontraditional school models, and special populations. Data also are reported by education service center region and for state- and district-authorized charter school campuses.

Additional copies of this document may be purchased using the order form in the back of this publication. Also, the report is available in PDF format on the agency website at <https://tea.texas.gov/reports-and-data/school-performance/accountability-research/enrollment-trends>. Additional information about this report may be obtained by contacting the Texas Education Agency Division of Research and Analysis by phone at (512) 475-3523 or by e-mail at Research@tea.texas.gov.

Overview

This report provides enrollment data for students attending Texas public schools in the 2021-22 school year and updates 10-year trends in state enrollment. Enrollment data are provided by the following student characteristics: race/ethnicity, economic status, gender, and grade level. Data are also provided by student participation in the following special instructional programs: bilingual or English as a second language (ESL), gifted and talented, Section 504, special education, and Title I. In addition, data are provided for the following special populations: students identified as at risk of dropping out of school, as having dyslexia, as emergent bilingual students/English learners (EB students/ELs), as in foster care, as homeless, as immigrants, as migrants, and as military-connected. Data are also provided for students identified as EB students/ELs by special language program instructional model. Additionally, data are provided for students enrolled in nontraditional school models such as Early College High Schools (ECHS), Pathways in Technology Early College High Schools (P-TECH), and Texas Science, Technology, Engineering, and Mathematics (T-STEM) Academies.

Enrollment data for the 20 regional education service centers (ESCs) throughout the state are presented, as are data for state- and district-authorized charter school campuses. In addition, national enrollment trends are examined, and enrollment data for the four most populous states in the United States (California, Florida, New York, and Texas) are compared.

Highlights

- In the 2021-22 school year, 5,427,370 students were enrolled in Texas public schools, an increase of 55,784 students, or 1.0 percent, from the 2020-21 school year. While student enrollment increased between 2020-21 and 2021-22, it remained lower than it was before the COVID-19 pandemic began. Previously, enrollment in the 2020-21 school year had decreased from the 2019-20 school year, the first decrease since TEA began collecting enrollment data in the Public Education Information Management System (PEIMS).
- Over the 10-year period between 2011-12 and 2021-22, total enrollment in Texas public schools increased by 428,791 students, or by 8.6 percent.
- Enrollment increased between 2020-21 and 2021-22 for all of the five largest racial/ethnic groups.
- Across the five largest groups, Hispanic students accounted for the largest percentage of total enrollment in Texas public schools in 2021-22 (52.7%), followed by White (26.3%), African American (12.8%), Asian (4.8%), and multiracial (2.9%) students.
- Between 2020-21 and 2021-22, the number of students identified as economically disadvantaged increased by 56,003, or by 1.7 percent. The overall percentage of students identified as economically disadvantaged increased slightly, to 60.6 percent.
- Between 2011-12 and 2021-22, the percentage increase in the number of students identified as economically disadvantaged (9.2%) was greater than the percentage increase in the student population overall (8.6%).
- In 2021-22, Grade 9 had the highest enrollment, at 475,746 students, followed by Grade 8, at 424,544 students.
- The percentage of students identified as emergent bilingual students/English learners grew from 16.8 percent in 2011-12 to 21.7 percent in 2021-22.
- The percentage of students served in special education programs increased from 11.3 percent in 2020-21 to 11.7 percent in 2021-22.
- Between 2020-21 and 2021-22, enrollment increased in fourteen ESC regions and decreased in six regions. Region 6 (Huntsville) had the largest percentage increase in enrollment, at 5.7 percent (11,629 students), while Region 1 (Edinburg) had the largest percentage decrease in enrollment, at 3.5 percent (15,538 students).
- In the 2021-22 school year, there were 185 state-authorized charter schools and 878 state-authorized charter school campuses that served 377,375 students. Students enrolled in state-authorized charter schools accounted for 7.0 percent of the total Texas public school population.
- In 2021-22, enrollment in state-authorized charter schools increased from the previous year by 3.1 percent, while overall statewide enrollment increased by 1.0 percent.
- In the 2021-22 school year, there were 128 district-authorized charter school campuses within 28 districts that served 65,200 students. Students enrolled in district-authorized charter school campuses accounted for 1.2 percent of the total Texas public school population.
- In 2021-22, enrollment in district-authorized charter school campuses increased from the previous year by 4.6 percent, while overall statewide enrollment increased by 1.0 percent.
- According to national figures, between 2010 and 2020, public school enrollment in Texas increased by 8.9 percent, while enrollment in the United States decreased by 0.2 percent. The increase in Texas was the seventh-highest percentage increase in statewide public school enrollment in the nation,

behind the District of Columbia (26.1%), North Dakota (19.3%), Utah (16.2%), Idaho (11.6%), South Dakota (10.7%), and Nevada (10.3%).

- According to national figures, from 2010 to 2020, the proportion of public school enrollment accounted for by Hispanic students increased from 50.3 percent to 52.9 percent in Texas and from 23.1 percent to 28.0 percent nationwide. During the same period, the proportion of enrollment accounted for by White students decreased from 31.2 percent to 26.5 percent in Texas and from 52.4 percent to 45.8 percent nationwide.
- National figures indicate the majority of students in Texas (60.2%) were eligible for free or reduced-price meals in the 2019-20 school year, 8.1 percentage points higher than the national average (52.1%). Between 2010-11 and 2019-20, the percentage of eligible students increased by 9.9 percentage points in Texas and by 4.0 percentage points nationwide.

Enrollment in Texas

Reporting of Enrollment Data

Enrollment is typically defined as the number of students registered in a school at a designated time in the school year. In this report, enrollment refers to the number of students enrolled in early education through Grade 12 in the Texas public school system as of the last Friday in October. This designated day is called the "snapshot date" in the Public Education Information Management System (PEIMS). Enrollment counts are available for all campuses, school districts, charter schools, counties, education service center regions, and the state.

Enrollment data in Texas include student demographic information, such as race/ethnicity, gender, and economically disadvantaged status, and information on student participation in special programs. Data on student characteristics and program participation are essential for monitoring educational progress and planning educational programs at all levels of the education system.

Financial planners and civic leaders use enrollment data to monitor the educational needs of a community. For example, a growing community will consider current enrollment data when making decisions to add teachers or adjust school programs in the short term. For long-term planning purposes, districts use enrollment trend data to predict and respond to changing needs in areas such as school facilities.

Texas public school enrollment data are used at the regional and state levels for education policy planning, administration, and research. Because enrollment trends reflect changes in society as a whole, the Texas Education Agency (TEA), state legislature, and research organizations use enrollment data to prepare for the future educational needs of Texas. Enrollment data allow the computation of many vital statistics about the Texas public education system, such as student/teacher ratios.

Since 1994, accountability ratings for Texas public schools and districts have been based on legislatively mandated indicators that draw from enrollment data collected by TEA. Texas law provides that "Performance on the achievement indicators adopted ... must be based on information that is disaggregated by race, ethnicity, and socioeconomic status ..." (Texas Education Code [TEC] §39.053, 2022). As a result, performance is reported by total student population and by student group categories, such as race/ethnicity and economically disadvantaged status.

Enrollment data also are required by federal education legislation. For example, the Every Student Succeeds Act (ESSA, 2015) obliges states to submit data for all students by the following categories: economically disadvantaged students; students from major racial and ethnic groups; students with disabilities; and students identified as emergent bilingual students/English learners. Likewise, ESSA requires state report cards to be submitted annually with information on student achievement disaggregated by race, ethnicity, gender, disability status, migrant status, English language proficiency, status as economically disadvantaged, homeless status, foster care status, and status as a student with a parent who is a member of the U.S. armed forces on active duty.

In the 2021-22 school year, a broad range of information, such as student characteristics and program participation, was collected through the Texas Student Data System on more than 1,200 school districts and state-authorized charter schools; more than 9,100 campuses; more than 369,000 teachers; and over 5.4 million students. Texas public school students are served in markedly diverse school settings. Districts ranged in size from less than one square mile to nearly five thousand square miles. The district with the smallest enrollment in the state, San Vicente Independent School District (ISD), had a total enrollment of 9 students. In contrast, more than 194,000 students received instruction at 275 campuses in Houston ISD.

Data for state-administered school districts are not included in this report. State-administered districts are created by legislative act and funded and administered by state government agencies, such as the Texas Juvenile Justice Department and the Texas Department of Aging and Disability Services.

This report provides an overview of Texas enrollment trends, including diversity of the student population by grade, by education service center region, and within state- and district-authorized charter school campuses (Table 1 on page 4). Historical data on Texas public school enrollment are included with discussion of changes over time.

Reporting of Race/Ethnicity

In 2009-10, TEA began collecting data on race and ethnicity in compliance with a new federal standard (TEA, 2009). For that year only, as a transitional measure, the data also were collected using the old standard. The current standard requires that race and ethnicity be collected separately using a specific two-part question, presented in a specific order, and that both parts of the question be answered (TEA, 2021).

Part 1. Ethnicity: Is the person Hispanic/Latino? Choose only one.

- Hispanic/Latino
- Not Hispanic/Latino

Part 2. Race: What is the person's race? Choose one or more, regardless of ethnicity.

- American Indian or Alaska Native
- Asian
- Black or African American
- Native Hawaiian/Other Pacific Islander
- White

The racial/ethnic categories are defined as follows. Hispanic/Latino includes students of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race. American Indian or Alaska Native includes students having origins in any of the original peoples of North and South America (including Central America), and who maintain a tribal affiliation or community attachment. Asian includes students having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent. Black or African American includes students having origins in any of the black racial groups of Africa. Native Hawaiian/Other Pacific Islander includes students having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands. White includes students having origins in any of the original peoples of Europe, the Middle East, or North Africa.

Adoption of the current standard results in several important changes: (a) the combined racial category Asian/Pacific Islander is now separated into two categories; (b) students once identified exclusively as "Hispanic/Latino" must now report their race; (c) students may report more than one race; and (d) the definition for one of the racial categories—American Indian or Alaska Native—differs from that used in years past. Prior to 2009-10, American Indian or Alaska Native included students having origins in any of the original peoples of North America only.

Throughout the rest of this report, students classified in PEIMS as Hispanic/Latino are referred to as Hispanic; students classified as American Indian or Alaska Native are referred to as American Indian; students classified as Black or African American are referred to as African American; students classified as Native Hawaiian/Other Pacific Islander are referred to as Pacific Islander; and students classified as having two or more races are referred to as multiracial.

For purposes of reporting Texas public school enrollment data, TEA combines the answers to the two-part question to create seven mutually exclusive racial/ethnic categories. A student identified as Hispanic is included only in the count for Hispanics. A student not identified as Hispanic is included in the count for only one of the following six racial categories: African American, American Indian, Asian, Pacific Islander, White, or multiracial. A student identified as having two or more races is included only in the count for multiracial students, not in the count for any single racial category.

Because rates for smaller groups can be less stable over time, comparisons of rates across racial/ethnic groups can be misleading when one group is small compared to other groups. The non-Hispanic American Indian and Pacific Islander student populations are small in number, compared to other racial/ethnic populations. Similarly, within the overall Hispanic student population, the Asian and Pacific Islander populations are small in number, compared to other racial populations. Therefore, discussions of results in this report, including comparisons across racial/ethnic groups, do not include these populations.

Reporting of Enrollment in Instructional Programs

Calculations used in preparing this report account for students enrolled in early education through Grade 12, with one exception: participation in instructional programs. Data for special education, gifted and talented, and Title I exclude students in early education. In prior reports, data for career and technical education (CTE) students were presented in this section of the report. Beginning in 2020-21, districts no longer reported CTE data to TEA. Instead, the agency began to use course completion data reported during the summer to determine CTE participation. Therefore, CTE enrollment information are no longer presented in this report.

Reporting of Enrollment in State- and District-Authorized Charter School Campuses

Throughout this report, enrollment data for Texas public schools overall include students attending state-authorized charter schools (previously referred to as open-enrollment charter schools) and district-authorized charter school campuses (previously referred to as in-district charter school campuses). Enrollment data for state-authorized charter schools only are presented in the section of the report titled "Enrollment in State-Authorized Charter Schools" on page 54. Enrollment data for district-authorized charter school campuses only are presented in the section of the report titled "Enrollment in District-Authorized Charter School Campuses" on page 64.

Table 1
Enrollment Summary, Texas Public Schools, 2020-21 and 2021-22

| Group | Enrollment 2020-21 | Enrollment 2021-22 | Group | Enrollment 2020-21 | Enrollment 2021-22 |
|---------------------------------------|-----------------------|-----------------------|--|-----------------------|-----------------------|
| Texas public school enrollment | | | Instructional program or special population^a | | |
| All students | 5,371,586 | 5,427,370 | At-risk | 2,636,849 | 2,901,015 |

^aStudents may be counted in more than one category. ^bEnglish as a second language. ^cBeginning with the 2019-20 school year, bilingual and English as a second language program data reflect the number of students who were reported as participating in state-approved instructional program models or alternative language programs. ^dEmergent bilingual student/English learner. ^eState-authorized. ^fDistrict-authorized.

Statewide Enrollment

In recent years, public school enrollment steadily increased, particularly in the southern and western United States, until the fall of 2020, when enrollment dropped by 2.8 percent nationwide (National Center for Education Statistics [NCES], n.d.-b). Between the fall of 2019 and the fall of 2020, public school enrollment decreased in each of the 50 states and increased very slightly in the District of Columbia. In 2013, nationwide public school enrollment reached 50 million for the first time and reached 50.8 million in 2019. However, by the fall of 2020, enrollment decreased to 49.4 million students. For the 10-year period from 2020 to 2030, NCES projects a decrease of 4.3 percent nationwide in public elementary and secondary school enrollment. The method used by NCES to project school enrollments "... assumes that future trends in factors affecting enrollments will be consistent with past patterns. It implicitly includes the net effect of factors such as dropouts, deaths, nonpromotion, transfers to and from public schools, and state level migration" (NCES, 2020; p. 2). Nationwide, despite the drop in enrollment from 2019 to 2020, Texas experienced the seventh-largest increase (after the District of Columbia, North Dakota, Utah, Idaho, South Dakota, and Nevada) in public school enrollment between 2010 and 2020, at 8.9 percent. Between 2020 and 2030, Texas is expected to experience a decrease in enrollment (-1.1%), along with 37 other states. During the same period, the District of Columbia and 12 states are expected to have increases in public school enrollment (NCES, n.d.-b).

Total enrollment in Texas public schools surpassed 5 million for the first time in 2012-13 and was above 5.4 million in 2021-22. With the exception of the 2020-21 school year, between 1987-88 and 2021-22, enrollment in Texas public schools increased each year, with year-to-year change ranging from a low of 0.6 percent to a high of 3.7 percent (Table 2 on page 6). In 2020-21, during the COVID-19 pandemic, statewide enrollment decreased from the previous year for the first time since TEA began collecting enrollment data in the Public Education Information Management System (PEIMS). Enrollment between 2019-20 and 2020-21 decreased by 122,354 students, or by 2.2 percent. Enrollment increased in the 2021-22 school year by 55,784 students, or by 1.0 percent, but still remained lower than it was before the pandemic.

Between 1987-88 and 2021-22, the racial/ethnic composition of the student population served by Texas public schools changed. In the 2001-02 school year, the number of Hispanic students surpassed the number of White students for the first time (Texas Education Agency [TEA], 2003). Furthermore, between 2001-02 and 2021-22, the percentage of total enrollment represented by White students steadily decreased, whereas the percentage of total enrollment represented by Hispanic students steadily increased, with the exception of the 2021-22 school year, when the percentage decreased slightly (Table 4 on page 8) (see also TEA, 2005). In addition, the percentages of total enrollment represented by Asian and multiracial students steadily increased by 0.1 to 0.2 percentage points each year between the 2009-10 and 2021-22 school years (Table 4 on page 8) (see also TEA, 2020).

Each year between 2011-12 and 2021-22, the majority of students met the state criteria for economic disadvantage (Figure 2 on page 10 and Table 7 on page 11). In the 2021-22 school year, 60.6 percent of students were identified as economically disadvantaged. Under TEA guidelines, students were identified as economically disadvantaged if they were eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program (TEA, 2021).

- In the 2021-22 school year, 5,427,370 students were enrolled in Texas public schools, an increase of 55,784 students, or 1.0 percent, from the 2020-21 school year. While student enrollment increased between 2020-21 and 2021-22, it remained lower than it was before the COVID-19 pandemic began. Previously, enrollment in the 2020-21 school year had decreased from the 2019-20 school year, the first decrease since TEA began collecting enrollment data in the Public Education Information Management System (PEIMS).
- Over the 10-year period between 2011-12 and 2021-22, total enrollment in Texas public schools increased by 428,791 students, or by 8.6 percent (Table 3).
- Over the 34-year period between 1987-88 and 2021-22, total enrollment in Texas public schools increased by 2,202,454 students, or 68.3 percent.

Table 2
Statewide Enrollment, Texas Public Schools, 1987-88 Through 2021-22

| Year | Number | Annual change (%) | Year | Number | Annual change (%) |
|---------|-----------|-------------------|---------|-----------|-------------------|

Table 3
Change in Statewide Enrollment, Texas Public Schools

| Period | Number | Percent |
|---------------------------------------|-----------|---------|
| 10-year change, 2011-12 to 2021-22 | 428,791 | 8.6 |
| 34-year change, 1987-88 to 2021-22 | 2,202,454 | 68.3 |

Enrollment by Race/Ethnicity

- Because rates for smaller groups can be less stable over time, discussions of results in this section are restricted to the five largest racial/ethnic groups: African American, Asian, Hispanic, White, and multiracial. See the section "Reporting of Race/Ethnicity" on page 2 for additional information.
- Enrollment increased between the 2020-21 and 2021-22 school years for all of the five largest racial/ethnic groups (Figure 1 on this page and Table 4 on page 8). Hispanic students had the largest increase in enrollment, increasing by 19,772 students, or 0.7 percent.
- The percentages of Texas public school enrollment accounted for by African American, Asian, and multiracial students increased between 2020-21 and 2021-22 (Table 4 on page 8). During the same period, the percentages of enrollment accounted for by Hispanic and White students decreased.
- In 2021-22, Hispanic students accounted for the largest percentage of total enrollment (52.7%), followed by White (26.3%), African American (12.8%), Asian (4.8%), and multiracial (2.9%) students.
- Between 2011-12 and 2021-22, Hispanic enrollment increased by 319,531 students (12.6%). White students, whose enrollment fell by 99,962 students, or 6.5 percent, over the same period, had the only decrease in enrollment.

Table 6
Non-Hispanic Multiracial Students by Most Common Racial Combinations, Texas Public Schools, 2020-21 and 2021-22

| Group | 2020-21 (N) | 2020-21 (%) | 2021-22 (N) | 2021-22 (%) |
|----------------------------|------------------------|------------------------|------------------------|------------------------|
| White and African American | 69,729 | 48.5 | 74,939 | 47.8 |
| White and Asian | 33,576 | 23.4 | 36,437 | 23.2 |
| White and American Indian | 13,682 | 9.5 | 14,299 | 9.1 |
| All multiracial | 143,763 | 100 | 156,780 | 100 |

Note. Numbers for race do not sum to the "All multiracial" total because all possible racial combinations are not presented.

Enrollment by Economically Disadvantaged Status

- Between 2020-21 and 2021-22, the number of students identified as economically disadvantaged increased by 56,003, or 1.7 percent. The overall percentage of students identified as economically disadvantaged increased slightly to 60.6 percent.
- The percentage of students identified as economically disadvantaged in 2021-22 (60.6%) was higher than the percentage identified in 2011-12 (60.3%) (Figure 2 and Table 7).
- Between 2011-12 and 2021-22, the percentage increase in the number of students identified as economically disadvantaged was greater than the percentage increase in the student population overall. The number of students identified as economically disadvantaged rose by 275,978, or 9.2 percent, whereas the total public school population rose by 428,791, or 8.6 percent (Table 7 on page 11 and Table 3 on page 6).

Figure 2
Enrollment of Economically Disadvantaged Students, Texas Public Schools, 2011-12
Through 2021-22

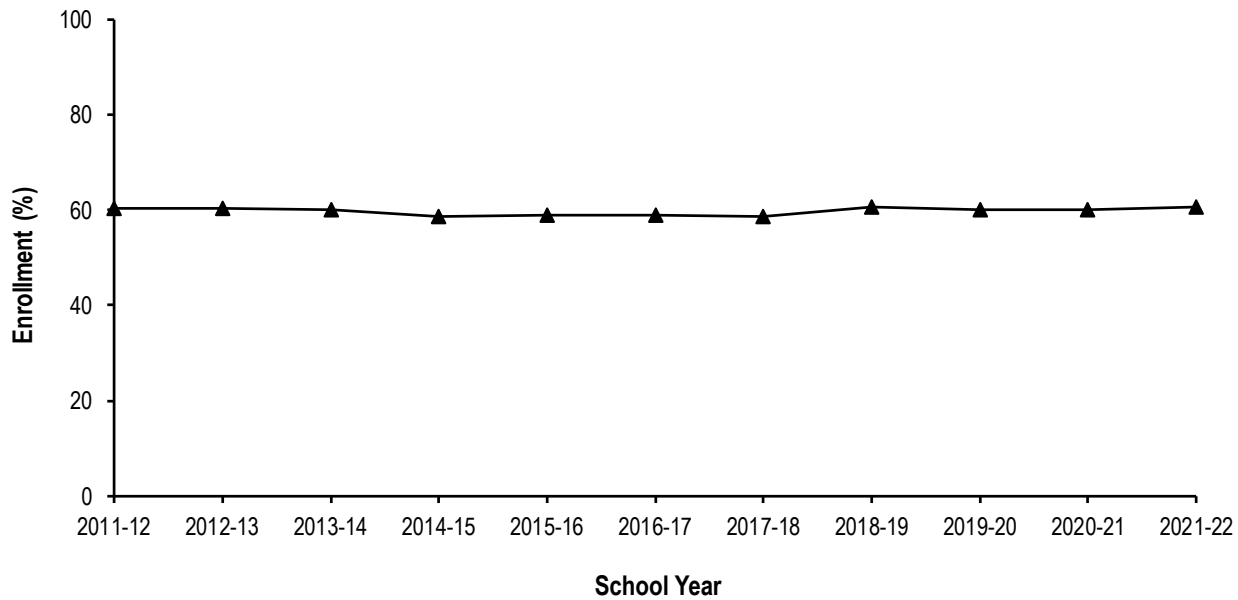

Table 7
Enrollment of Economically Disadvantaged
Students, Texas Public Schools, 2011-12
Through 2021-22

| Year | Number | Percent |
|----------------|---------------|----------------|
| 2011-12 | 3,013,442 | 60.3 |
| 2012-13 | 3,058,894 | 60.3 |
| 2013-14 | 3,096,050 | 60.1 |
| 2014-15 | 3,073,300 | 58.7 |
| 2015-16 | 3,122,903 | 58.9 |
| 2016-17 | 3,159,327 | 59.0 |
| 2017-18 | 3,168,294 | 58.7 |
| 2018-19 | 3,289,468 | 60.6 |
| 2019-20 | 3,309,610 | 60.2 |
| 2020-21 | 3,233,417 | 60.2 |
| 2021-22 | 3,289,420 | 60.6 |
| 10-year change | 275,978 | 9.2 |

Enrollment by Economically Disadvantaged Status and Race/Ethnicity

- Because rates for smaller groups can be less stable over time, discussions of results in this section are restricted to the five largest racial/ethnic groups: African American, Asian, Hispanic, White, and multiracial. See the section "Reporting of Race/Ethnicity" on page 2 for additional information.
- In 2021-22, the percentages of students identified as economically disadvantaged increased for all of the five largest racial/ethnic groups (Figure 3 and Table 8).
- The percentages of individual group enrollment accounted for by students identified as economically disadvantaged were larger for Hispanic (75.5%) and African American (73.8%) students than for multiracial (46.7%), White (31.7%), and Asian (28.9%) students in 2021-22 (Table 8).
- In 2021-22, Hispanic students accounted for the largest percentage of all students in Texas public schools and of all students identified as economically disadvantaged (Table 8 on page 13 and Table 4 on page 8). Between 2011-12 and 2021-22, the percentage increase in enrollment of Hispanic students identified as economically disadvantaged (8.1%) was lower than the percentage increase in enrollment of Hispanic students overall (12.6%).

Note. Parts may not add to 100 percent because of rounding.

Enrollment by Gender

- In the 2021-22 school year, 51.2 percent of all students were male, and 48.8 percent of students were female (Table 9). Although male and female enrollment increased over the 10-year period (by 8.2% and 9.0%, respectively), the proportions of males and females in Texas public schools remained stable between 2011-12 and 2021-22.

Table 9
Enrollment by Gender, Texas Public Schools, 2011-12 Through 2021-22

| Year | Female (N) | Female (%) | Male (N) | Male (%) |
|----------------|-----------------------|-----------------------|---------------------|---------------------|
| 2011-12 | 2,432,216 | 48.7 | 2,566,363 | 51.3 |

| 10-year change | 218,347 | 9.0 | 210,444 | 8.2 |

Enrollment by Grade

In Texas, children are required to attend school beginning at age six (Texas Education Code [TEC] §25.085, 2022). A child younger than six years of age must attend school if he or she has previously been enrolled in first grade. All children who are five years old on or before September 1 are eligible, but not required, to attend kindergarten (TEC §29.151, 2022). With a few exceptions, such as receiving a high school diploma or high school equivalency certificate, children must attend school until they reach the age of 19 (TEC §§25.085 and 25.086, 2022). Students through age 25 may be admitted by school districts to complete the requirements for a high school diploma (TEC §25.001, 2022). Additionally, an adult high school and industry certification charter school program allows students who are at least 18 years of age and no more than 50 years of age to complete: (a) a high school program that can lead to a diploma and (b) career and technology education courses that can lead to industry certification (TEC §29.259, 2022).

Student learning during the early education and prekindergarten years is linked to future academic accomplishments, particularly for children identified as emergent bilingual students/English learners, disabled, or economically disadvantaged (National Research Council, 2001). In early education and pre-kindergarten programs, children develop skills necessary for success in the regular public school curriculum in the areas of language, mathematics, and social skills. Early education in Texas is a diverse set of programs designed for children who meet certain eligibility criteria. For example, Early Childhood Intervention is a coordinated system of services for children from birth to age three with disabilities, developmental delays, or certain medical diagnoses (Texas Health and Human Services, n.d.). Texas public school districts are required to offer free full-day prekindergarten to eligible children at least four years of age and may offer free half-day prekindergarten to eligible children under the age of four. A child is eligible for free prekindergarten if the child (a) is unable to speak and comprehend English; (b) is educationally disadvantaged; (c) is homeless; (d) is the child of an active duty member of the U.S. armed forces; (e) is the child of a member of the U.S. armed forces who was injured or killed while serving on active duty; (f) is or has ever been in the conservatorship of the Department of Family and Protective Services; (g) is or has ever been in foster care in another state or territory and currently resides in Texas; or (h) is the child of a person eligible for the Star of Texas Award (TEC §29.153, 2022).

A variety of factors affect enrollment trends at all grade levels, including grade-level retention, migration into the state, and decisions about private and home schooling. Funding for early childhood and kindergarten programs affects enrollment trends in the elementary grades, whereas student decisions to graduate early, transfer into high school equivalency programs, or drop out of school affect enrollment trends in the secondary grades.

- Between 2020-21 and 2021-22, although overall enrollment increased, enrollment only increased for some grades (Figure 4 and Table 10). Across Grades K-6, all grades except Grades 5 and 6 had increases in enrollment. Across Grades 7-12, enrollment increased in Grades 8, 9, and 11. Across Grades K-12, Grade 9 had the largest increase in enrollment (9.0%) while Grade 6 had the largest decrease (3.4%).
- Prekindergarten enrollment is reported separately for three-year-old and four-year-old programs. Enrollment for both programs increased between 2020-21 and 2021-22.
- Across Grades K-12 in 2021-22, the percentages of total enrollment accounted for by grade ranged from a low of 6.7 percent in Grade 12 to a high of 8.8 percent in Grade 9 (Table 10).
- In 2021-22, across Grades K-12, Grade 9 had the highest enrollment, at 475,746 students, followed by Grade 8, at 424,544 students. Grade 12 had the lowest enrollment, at 362,157 students.

| Grade 12 | 364,600 | 6.8 | 362,157 | 6.7 |
| All grades | 5,371,586 | 100 | 5,427,370 | 100 |

Note. Parts may not add to 100 percent because of rounding.

Enrollment by Grade and Age

- In 2021-22, the majority of students in Grades 9-12 were within the expected age ranges for their grades (Figure 5 and Table 11).
- A total of 490 students in Grades 9-12 were between 22 and 25 years old. Of these, 40.4 percent were in Grade 12.

Figure 5
Enrollment of Students in Grades 9-12 by Age, Texas Public Schools, 2021-22

Table 11
Enrollment of Students in Grades 9-12 by Age, Texas Public Schools, 2021-22

| Age in Years | Grade 9 | Grade 10 | Grade 11 | Grade 12 |
|--------------|----------------------------|----------------|----------------|----------------|
| 12 to 13 | 6,911 | 69 | 11 | 5 |
| 14 | 355,459^a | 7,307 | 109 | 5 |
| 15 | 90,509 | 311,223 | 7,531 | 139 |
| 16 | 17,387 | 72,668 | 302,997 | 8,697 |
| 17 | 4,078 | 13,894 | 66,847 | 288,352 |
| 18 | 722 | 2,557 | 9,485 | 53,528 |
| 19 to 21 | 276 | 703 | 2,195 | 11,198 |
| 22 to 25 | 79 | 87 | 126 | 198 |

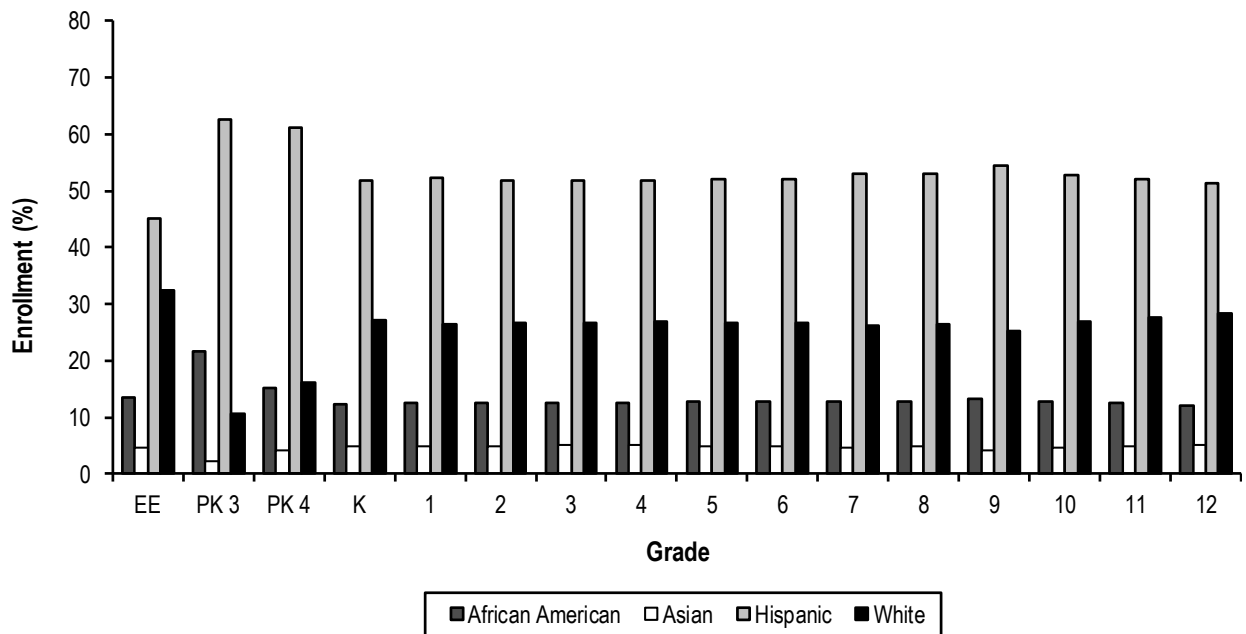

Note. Some students enrolled in Grades 9-12 were outside the age ranges shown. As a result, grade-level enrollment totals are slightly lower than those in Table 10 on page 17.

^aEnrollment counts for students within the expected age range for each grade are shown in bold.

Enrollment by Grade and Race/Ethnicity

- Because rates for smaller groups can be less stable over time, discussions of results in this section are restricted to the five largest racial/ethnic groups: African American, Asian, Hispanic, White, and multiracial. See the section "Reporting of Race/Ethnicity" on page 2 for additional information.
- In each of Grades K-12, Hispanic students accounted for the largest proportion of enrollment, followed by White, African American, Asian, and multiracial students (Figure 6 on this page and Table 12 on page 20).
- As outlined on page 15, prekindergarten classes are designed to serve children three years of age and older who have specified educational disadvantages, including being unable to speak and comprehend English. Hispanic students, who made up 52.7 percent of total enrollment in the 2021-22 school year, made up 62.6 percent of three-year-old prekindergarten students, and 61.1 percent of four-year-old prekindergarten students (Table 4 on page 8, Figure 6 on this page, and Table 12 on page 20). In contrast, White students, who made up 26.3 percent of total enrollment, made up 10.7 percent of three-year-old prekindergarten students, and 16.2 percent of four-year-old prekindergarten students.

Note. Parts may not add to 100 percent because of rounding.

Enrollment by Grade and Economically Disadvantaged Status

- In the 2021-22 school year, the percentages of students identified as economically disadvantaged in Grades K-12 ranged from 51.4 percent of students in Grade 12 to 63.5 percent of students in Grade 1 (Figure 7 and Table 13).

Figure 7
Enrollment of Economically Disadvantaged Students Within Grades, Texas Public Schools, 2021-22

Note. EE=Early education. PK=Prekindergarten.

Table 13
Enrollment of Economically Disadvantaged Students Within Grades, Texas
Public Schools, 2020-21 and 2021-22

| Grade | 2020-21 (N) | 2020-21 (%) | 2021-22 (N) | 2021-22 (%) |
|-------------------------|------------------------|------------------------|------------------------|------------------------|
| Early education | 10,366 | 49.4 | 10,471 | 49.0 |
| Prekindergarten – Age 3 | 23,933 | 90.2 | 30,123 | 87.9 |
| Prekindergarten – Age 4 | 143,211 | 84.0 | 156,642 | 82.7 |
| Kindergarten | 229,715 | 63.6 | 231,893 | 62.4 |
| Grade 1 | 239,833 | 62.9 | 245,373 | 63.5 |
| Grade 2 | 236,669 | 62.3 | 239,831 | 62.5 |
| Grade 3 | 235,344 | 61.7 | 238,235 | 61.9 |
| Grade 4 | 236,109 | 61.3 | 237,304 | 61.5 |
| Grade 5 | 241,817 | 61.1 | 238,087 | 61.1 |
| Grade 6 | 252,044 | 60.8 | 242,795 | 60.6 |
| Grade 7 | 252,778 | 60.0 | 253,721 | 60.6 |
| Grade 8 | 249,321 | 59.0 | 253,852 | 59.8 |
| Grade 9 | 254,645 | 58.3 | 285,940 | 60.1 |

| Grade 11 | 206,844 | 53.2 | 210,007 | 53.9 |
| Grade 12 | 184,862 | 50.7 | 186,251 | 51.4 |
| All grades | 3,233,417 | 60.2 | 3,289,420 | 60.6 |

Enrollment for Instructional Programs, Nontraditional School Models, and Special Populations

Texas public schools offer instructional programs designed to meet students' needs. Not all students are enrolled in one of these programs, and some students are enrolled in more than one. Gifted and talented programs offer eligible students a continuum of learning experiences that leads to advanced accomplishments. Special education offers instructional and related services for eligible students with cognitive, physical, and/or emotional disabilities who meet the criteria under the Individuals with Disabilities Education Act (IDEA) (Title 20 of the United States Code [U.S.C.] §1400, 2022; Title 34 of the Code of Federal Regulations [C.F.R.], Part 300, 2022). Students with disabilities who do not meet the IDEA criteria may qualify to receive educational accommodations or services under Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. §794, 2022; 34 C.F.R. Part 104, 2022). Students identified as emergent bilingual students/English learners (EB students/ELs), who do not speak English as their primary language and have a limited ability to read, speak, write, or understand English, may participate in bilingual or English as a second language (ESL) programs. There are four state-approved bilingual instructional program models and two state-approved ESL instructional program models that districts can implement (Title 19 of the Texas Administrative Code [TAC] §89.1210, 2022, amended to be effective April 14, 2020). A school district that is unable to provide a state-approved bilingual or ESL program because of an insufficient number of appropriately certified teachers must request from the commissioner of education an exception to the bilingual education program or a waiver for the ESL program and approval of an alternative language program (19 TAC §89.1207, 2022, amended to be effective April 14, 2020). Beginning with the 2019-20 school year, districts were required to submit data through the Texas Student Data System specifying whether students receiving bilingual or ESL services received them through state-approved programs or through alternative language programs. Although most students who receive bilingual or ESL services are EB students/ELs, native English speakers may also participate in these programs.

Title I is the largest federal aid program for elementary and secondary schools. The goal of Title I is to improve teaching and learning for students attending schools with high percentages of economically disadvantaged students, particularly those students most at risk of not meeting the state's academic achievement standards. Students are counted as participating in Title I programs if they are provided Title I, Part A services at non-Title I-funded campuses, are participating in Title I-funded programs, or are enrolled in campuses that receive school-wide Title I assistance.

Students identified as at risk of dropping out of school are under age 26 and meet one or more specified criteria, including not advancing from one grade level to the next for one or more school years, being pregnant or a parent, or being a student of limited English proficiency. Students with dyslexia are identified as having dyslexia or a related disorder under TEC §38.003. Students identified as in foster care are currently under the conservatorship of the Texas Department of Family and Protective Services, are in prekindergarten and have previously been in the conservatorship of the Department of Family and Protective Services, or are in prekindergarten and are or have ever been in foster care in another state or territory and currently reside in Texas. Students identified as homeless are those who lack a fixed, regular, and adequate nighttime residence. In 2017-18, the number of homeless students increased substantially, as over 46,000 students identified as homeless were affected by hurricanes. Students identified as immigrants are between 3 and 21 years old, have not been attending school in the United States for more than three full academic years, and were not born in any state in the United States, Puerto Rico, or the District of Columbia. U.S. citizenship is not a factor when identifying students as immigrants for the purpose of public school enrollment data collection. A student identified as a migrant is one who: (a) is aged 3 through 21; (b) is (or whose parent, spouse, or guardian is) a migratory agricultural worker; and (c) in the preceding 36 months, to obtain temporary employment in agriculture or fishing, or to accompany a parent, spouse,

or guardian to obtain such employment: (1) has moved from one school district to another; or (2) resides in a school district of more than 15,000 square miles and migrates a distance of 20 miles or more to a temporary residence to engage in a fishing activity. A student identified as military-connected is a dependent of an active duty or former member of the United States military, the Texas National Guard, or a reserve force of the United States military, or who is a dependent of a member of the United States military, the Texas National Guard, or a reserve force of the United States military who was killed in the line of duty.

Students in Texas can enroll in schools implementing nontraditional school models, including state-authorized and district-authorized charter school campuses and Texas College and Career Readiness School Models (CCRSM) campuses. State-authorized charter schools, previously referred to as open-enrollment charter schools and discussed later in this report, and district-authorized charter school campuses, previously referred to as in-district charter school campuses, are intended to promote local initiative and capitalize on creative approaches to meet the educational needs of students. State-authorized charter schools and district-authorized charter school campuses are exempt from many of the laws governing traditional school models (TEC §12.001, 2022). A school district can convert a campus to a charter school campus to have additional flexibility granted to state-authorized charter schools; however, district-authorized charter school campuses remain under the authority of the local school board and, therefore, are subject to more requirements than state-authorized charter schools. District-authorized charter school campuses, like traditional campuses in a district but unlike state-authorized charter school campuses, must give priority to students within their attendance zones. In addition, district-authorized charter school campuses are subject to teacher-certification requirements and class-size limits, among other requirements that do not apply to state-authorized charter schools.

The Texas CCRSM network, made up of Early College High Schools (ECHS), Texas Science, Technology, Engineering, and Mathematics (T-STEM), and Pathways in Technology Early College High Schools (P-TECH), are open-enrollment programs that blend high school and college coursework to help historically underserved and at-risk students develop technical skills, earn college credentials and degrees, and pursue in-demand career paths. ECHS are innovative high schools (201 campuses) that allow students least likely to attend college an opportunity to earn a high school diploma and either an associate's degree or at least 60 college credit hours toward a baccalaureate degree. T-STEM Academies (29 middle school campuses and 91 high school campuses) are rigorous secondary schools focused on improving instruction and academic performance in science- and mathematics-related subjects and increasing the number of students who study and enter STEM careers. P-TECH (120 campuses) is an open-enrollment program that provides students an opportunity to receive a high school diploma and a credential and/or an associate's degree through a focus on work-based education.

- In the 2021-22 school year, 53.5 percent of students were identified as at risk of dropping out of school compared to 49.1 percent in 2020-21 (Table 14).
- The number of students identified as EB students/ELs increased by 336,915, or 40.2 percent, between 2011-12 and 2021-22. In the 2021-22 school year, 21.7 percent of students were identified as EB students/ELs, compared to 16.8 percent in 2011-12.
- Between 2020-21 and 2021-22, the number of students with dyslexia increased by 12.3 percent, or by 29,769 students.
- The percentage of students served in special education programs increased from 11.3 percent in 2020-21 to 11.7 percent in 2021-22 (Figure 8 and Table 14). The percentage of students receiving Section 504 services increased from 7.2 percent to 7.4 percent during the same period.
- In 2021-22, 82.3 percent of EB students/ELs participated in state-approved bilingual or ESL instructional program models, and 13.6 percent of EB students/ELs participated in alternative bilingual or ESL language programs (Table 15 on page 29). ESL/pull-out (37.1%) and dual immersion/one-way (15.0%) were the most common special language program instructional models among EB students/ELs receiving bilingual or ESL services.

Figure 8
Enrollment in Instructional Programs, Texas Public Schools, 2011-12 Through 2021-22

Note. Students may be counted in more than one category. ESL=English as a second language. Beginning with the 2019-20 school year, bilingual/ESL program data reflect the percentage of students who were reported as participating in state-approved instructional program models or alternative language programs.

Enrollment for Instructional Programs and Special Populations by Race/Ethnicity

- Because rates for smaller groups can be less stable over time, discussions of results in this section are restricted to the five largest racial/ethnic groups: African American, Asian, Hispanic, White, and multiracial. See the section "Reporting of Race/Ethnicity" on page 2 for additional information.
- Analysis of program participation reveals that the racial/ethnic compositions of some instructional programs tend to differ from that of the student population as a whole (Figure 9 and Table 17).
- In 2021-22, Hispanic students accounted for 52.7 percent of the total student population but 65.9 percent of students identified as at-risk (Table 17).
- In 2021-22, White students accounted for larger proportions of students with dyslexia, students receiving special education services, and students receiving Section 504 services (38.6%, 27.4%, and 41.9%, respectively) than of the overall student population (26.3%).
- African American and Hispanic representation was smaller in gifted and talented programs (6.5% and 41.5%, respectively) and larger in Title I programs (13.6% and 62.7%, respectively) than in the overall student population (12.8% and 52.7%, respectively) in 2021-22. Conversely, Asian, White, and multiracial representation was larger in gifted and talented programs (11.8%, 36.4%, and 3.4%, respectively) and smaller in Title I programs (2.2%, 18.7%, and 2.3%, respectively) than in the overall student population (4.8%, 26.3%, and 2.9%, respectively).

Enrollment for Instructional Programs and Special Populations by Economically Disadvantaged Status

- The percentage of students identified as economically disadvantaged in 2021-22 was lower than the percentage identified in 2011-12 for students identified as at-risk, EB students/ELs, and immigrants and students participating in bilingual/ESL programs (Table 18 on page 36).
- In 2021-22, representation of students identified as economically disadvantaged was lowest among students identified as military-connected (34.9%) and highest among students identified as migrants (99.1%).
- Whereas economically disadvantaged students made up 60.6 percent of students overall in 2021-22, they made up larger percentages of students in the following special populations and instructional programs: students identified as migrants (99.1%), homeless (97.0%), EB students/ELs (83.6%), in foster care (82.5%), at-risk (74.8%), and immigrants (67.2%); and students participating in bilingual/ESL programs (82.4%), Title I programs (74.5%), and special education programs (66.7%) (Figure 10 on this page and Table 18 on page 36).

Enrollment for Instructional Programs and Special Populations by Gender

- Within each instructional program and among each special population for which data were available, the percentages of enrollment accounted for by female and male students were similar in 2011-12 and 2021-22, with the exception of gifted and talented (Table 19 on page 38).
- Males and females, who made up 51.2 percent and 48.8 percent, respectively, of total public school enrollment in 2021-22, accounted for similar proportions of each special population except students with dyslexia, and of each instructional program except Section 504 and special education. Males were overrepresented in each of these three groups.
- In 2021-22, males made up 55.9 percent of students with dyslexia, whereas females made up 44.1 percent.
- In special education programs in 2021-22, males made up 65.5 percent of enrollment, whereas females made up 34.5 percent (Figure 11). Similarly, males made up 56.9 percent of students receiving Section 504 services, whereas females made up 43.1 percent.

Enrollment by Education Service Center

Regional education service centers (ESCs) are nonregulatory, public institutions created and authorized by the Texas Legislature. Their associations with school districts are collaborative and supportive. Texas is divided into 20 service center regions, and each region has its own ESC. An ESC serves districts within the geographic boundaries of its service center region. A district may choose to work with an ESC outside of its service center region. This report presents regional results based on the districts served by each ESC, including any districts the ESC serves that are located outside its geographic boundaries.

Some of the primary goals of ESCs are to work with the Texas Education Agency and districts to improve student achievement, to help districts become more cost-effective and efficient, and to assist in the implementation of laws passed by the Texas Legislature and regulations adopted by the commissioner of education and State Board of Education.

Fourteen of the twenty ESC regions in Texas had gains in enrollment between the 2011-12 and 2021-22 school years, and six had losses (Figure 12 on page 41 and Table 20 on page 42). Three ESC regions experienced increases of 15 percent or more. Region 6 (Huntsville), located north and northwest of Houston, grew by 23.9 percent during the period. Region 14 (Abilene), located west of the Dallas/Fort Worth area, grew by 19.1 percent and Region 10 (Richardson), which includes the city of Dallas, grew by 15.6 percent, respectively. Of the six ESC regions that had decreases in enrollment, Region 2 (Corpus Christi) and Region 3 (Victoria) are along the Gulf Coast, Region 8 (Mt. Pleasant), Region 9 (Wichita Falls) and Region 16 (Amarillo) are in North Texas, and Region 19 (El Paso) is in West Texas.

- Between 2020-21 and 2021-22, enrollment increased in fourteen ESC regions and decreased in six regions. Region 6 (Huntsville) had the largest percentage increase in enrollment, at 5.7 percent (11,629 students), while Region 1 (Edinburg) had the largest percentage decrease in enrollment, at 3.5 percent (15,538 students).
- Across ESC regions in 2021-22, Region 4 (Houston) continued to serve the largest proportion of total state enrollment (22.7%).
- Region 9 (Wichita Falls), with 0.7 percent of total state enrollment, served the smallest student population in 2021-22, as it did in each of the preceding 10 years.
- Region 6 (Huntsville) had the greatest percentage gain in enrollment between 2011-12 and 2021-22, increasing by 23.9 percent (Figure 12 on this page and Table 20 on page 42). Region 2 (Corpus Christi) had the greatest percentage loss, decreasing by 10.0 percent during the same period.

Enrollment by Education Service Center and Race/Ethnicity

- Because rates for smaller groups can be less stable over time, discussions of results in this section are restricted to the five largest racial/ethnic groups: African American, Asian, Hispanic, White, and multiracial. See the section "Reporting of Race/Ethnicity" on page 2 for additional information.
- In the 2021-22 school year, Hispanic students accounted for more than 65 percent of enrollment in five ESC regions: Region 1 (Edinburg), Region 2 (Corpus Christi), Region 18 (Midland), Region 19 (El Paso), and Region 20 (San Antonio) (Figure 13 on page 45 and Table 21 on page 46).
- In the 2021-22 school year, African American student enrollment ranged from 1.3 percent of overall enrollment in Region 1 (Edinburg) to 24.0 percent in Region 5 (Beaumont).
- In the 2021-22 school year, White student enrollment ranged from 2.2 percent of overall enrollment in Region 1 (Edinburg) to 56.5 percent in Region 9 (Wichita Falls). From 2020-21 to 2021-22, the percentage of enrollment accounted for by White students increased in 7 ESC regions and decreased in 13 ESC regions.

Enrollment by Education Service Center and Economically Disadvantaged Status

- From 2011-12 to 2021-22, the percentages of students identified as economically disadvantaged increased in 13 ESC regions and decreased in 7 ESC regions (Table 22 on page 52).
- In the 2021-22 school year, with the exception of Region 13 (Austin), all ESC regions served populations in which at least 50 percent of students were identified as economically disadvantaged.
- Across ESC regions in 2021-22, the percentages of students identified as economically disadvantaged ranged from 42.9 percent in Region 13 (Austin) to 84.6 percent in Region 1 (Edinburg).
- From 2011-12 to 2021-22, the number of students identified as economically disadvantaged increased in 15 ESC regions and decreased in 5 (Figure 14 on this page and Table 22 on page 52).

Enrollment in State-Authorized Charter Schools

In 1995, the 74th Texas Legislature authorized establishment of state-authorized charter schools, previously referred to as open-enrollment charter schools, in the state (Texas Education Code [TEC], Chapter 12, Subchapter D, 1996). State-authorized charter schools are intended to promote local initiative and capitalize on creative approaches to meet the educational needs of students (TEC §12.001, 2022). Although considered public schools, they are exempt from many state regulations that apply to traditional public schools. Generally, state-authorized charter schools are subject to laws and rules that ensure fiscal and academic accountability but do not unduly regulate instructional methods or pedagogical innovation. Some state-authorized charter schools target students at risk of dropping out or those who have already dropped out and use the latitude afforded under statute to accommodate the needs of students who have had limited success in traditional public schools.

In 2013, the 83rd Texas Legislature amended statute to: (a) transfer authority to grant charters from the State Board of Education (SBOE) to the commissioner of education; (b) give the SBOE authority to veto charters the commissioner proposes to grant; and (c) provide for a graduated increase in the cap on the number of state-authorized charters available for award, from 225 beginning September 1, 2014, to 305 beginning September 1, 2019 (TEC §12.101, 2013). Previously, the cap on the number of active, state-authorized charters was 215, and that number was reached for the first time in November 2008. Charter holders may operate more than one campus under a charter, and the cap does not limit the number of state-authorized charter school campuses that can be operated by a charter holder.

In the 2021-22 school year, there were 185 state-authorized charter schools and 878 state-authorized charter school campuses that served 377,375 students. State-authorized charter school enrollment increased every year between 1996-97 and 2021-22 (Table 23). During that period, year-to-year change in statewide enrollment in state-authorized charter campuses ranged from a low of 3.1 percent to a high of 217.0 percent. In 2021-22, statewide enrollment in state-authorized charter campuses increased from the previous year by 3.1 percent.

Each year between 2011-12 and 2021-22, state-authorized charter school enrollment increased for African American, Hispanic, and multiracial students (Figure 15 on page 56 and Table 24 on page 57). Enrollment for White students increased each year between 2011-12 and 2021-22 with the exception of the 2018-19 and 2021-22 school years. During that same period, with the exception of 2012-13 to 2013-14, enrollment for Asian students also increased each year. Across the five largest racial/ethnic groups in 2021-22, Hispanic students accounted for the largest percentage of total enrollment in state-authorized charter schools, followed by African American, White, Asian, and multiracial students.

Each year between 2011-12 and 2021-22, the majority of state-authorized charter school students met the state criteria for economic disadvantage (Figure 16 and Table 25 on page 58). In the 2021-22 school year, 71.2 percent of students were identified as economically disadvantaged.

Across Grades K-12 in 2021-22, the percentages of total enrollment in state-authorized charter schools accounted for by grade ranged from a low of 4.5 percent in Grade 12 to a high of 8.7 percent in Grade 6 (Table 26 on page 60). It is important to note that grade-level enrollment in state-authorized charter schools is affected by the grade levels available to serve students in charter schools. Unlike traditional school districts, state-authorized charter holders do not consistently serve traditional grade spans. For example, a charter holder may only have campuses that serve select elementary grades (e.g., Grades K-4), or a charter holder may open a new campus that initially serves only one grade and, over time, expand the number of grades that campus serves.

- In 2021-22, enrollment in state-authorized charter schools increased from the previous year by 3.1 percent, while overall statewide enrollment increased by 1.0 percent.
- In the 2011-12 school year, 154,584 students were enrolled in Texas state-authorized charter schools (Table 23). By 2021-22, enrollment had risen to 377,375 students.
- In 2021-22, students enrolled in state-authorized charter schools accounted for 7.0 percent of the total Texas public school population.

Table 23
Statewide Enrollment, Texas State-Authorized
Charter Schools, 1996-97 Through 2021-22

| Year | Number | Annual change (%) | Representation in public school enrollment (%) |
|---------|---------|-------------------|--|
| 1996-97 | 2,426 | — | 0.1 |

| 2019-20 | 336,900 | 6.3 | 6.1 |
| 2020-21 | 365,930 | 8.6 | 6.8 |
| 2021-22 | 377,375 | 3.1 | 7.0 |

Enrollment in State-Authorized Charter Schools by Race/Ethnicity

- Because rates for smaller groups can be less stable over time, discussions of results in this section are restricted to the five largest racial/ethnic groups: African American, Asian, Hispanic, White, and multiracial. See the section "Reporting of Race/Ethnicity" on page 2 for additional information.
- Between the 2020-21 and 2021-22 school years, enrollment in state-authorized charter schools increased for all racial/ethnic groups with the exception of White students (Figure 15 and Table 24).
- Between 2020-21 and 2021-22, the percentages of total enrollment in state-authorized charter schools accounted for by Hispanic and multiracial students increased by 0.4 percentage points each (Table 24). During the same period, the percentages accounted for by White and African American students decreased by 0.5 and 0.3 percentage points, respectively. The percentage accounted for by Asian students remained the same.
- In 2021-22, Hispanic students accounted for the largest percentage of total enrollment in state-authorized charter schools (62.8%), followed by African American (17.3%), White (12.3%), Asian (4.9%), and multiracial (2.3%) students.

Enrollment in State-Authorized Charter Schools by Economically Disadvantaged Status

- The number of students identified as economically disadvantaged in state-authorized charter schools increased by 9,221 students, or 0.3 percentage points, to 71.2 percent between the 2020-21 and 2021-22 school years (Figure 16 and Table 25).

Enrollment in State-Authorized Charter Schools by Grade

- In 2021-22, Grade 6 had the highest enrollment in state-authorized charter schools, at 33,017 students, followed by Grade 1, at 31,967 students (Figure 17 on this page and Table 26 on page 60).
- Across Grades K-12 in 2021-22, the percentages of total enrollment in state-authorized charter schools accounted for by grade ranged from a low of 4.5 percent in Grade 12 to a high of 8.7 percent in Grade 6 (Table 26 on page 60).
- Across Grades K-12, between 2020-21 and 2021-22, enrollment in state-authorized charter schools increased at every grade level except Grades 5 and 6, which had slight decreases.

Figure 17
Enrollment by Grade, Texas State-Authorized Charter Schools, 2020-21 and 2021-22

Note. EE=Early education. PK=Prekindergarten.

Note. Parts may not add to 100 percent because of rounding.

Enrollment in State-Authorized Charter Schools for Instructional Programs and Special Populations

- In the 2021-22 school year, 54.8 percent of students in state-authorized charter schools were identified as at risk of dropping out of school, an increase of 5.0 percentage points from the previous year (Table 27 on page 62).
- Between 2020-21 and 2021-22, the number of state-authorized charter school students identified as emergent bilingual students/English learners (EB students/ELs) increased by 9,335, or 8.8 percent. In the 2021-22 school year, 30.4 percent of students were identified as EB students/ELs, compared to 28.8 percent in 2020-21.
- In the 2021-22 school year, 118,876 students in state-authorized charter schools participated in bilingual or ESL programs. Of these students, 73,003 students (61.4%) participated in alternative language programs.
- The number of state-authorized charter school students participating in Title I programs increased by 8,611 students, or 2.8 percent, between 2020-21 and 2021-22 (Figure 18 on this page and Table 27 on page 62).
- The percentage of students served in special education programs in state-authorized charter schools increased from 8.0 percent in 2020-21 to 8.4 percent in 2021-22.

Figure 18
Enrollment in Instructional Programs, Texas State-Authorized Charter Schools, 2011-12 Through 2021-22

Note. Students may be counted in more than one category. ESL=English as a second language. Beginning with the 2019-20 school year, bilingual/ESL program data reflect the percentage of students who were reported as participating in state-approved instructional program models or alternative language programs.

Enrollment in District-Authorized Charter School Campuses

In 1995, the 74th Texas Legislature authorized establishment of district-authorized charter school campuses, previously referred to as in-district charter school campuses, in the state (Texas Education Code [TEC], Chapter 12, Subchapter C, 1996). District-authorized charter school campuses, like state-authorized charter schools, are intended to promote local initiative and capitalize on creative approaches to meet the educational needs of students (TEC §12.001, 2022). A school district can convert a campus to a charter school campus to have additional flexibility granted to state-authorized charter schools; however, district-authorized charter school campuses remain under the authority of the local school board and, therefore, are subject to more requirements than state-authorized charter schools. District-authorized charter school campuses, like traditional campuses in a district, but unlike state-authorized charter school campuses, must give priority to students within their attendance zones. In addition, district-authorized charter school campuses are subject to teacher-certification requirements and class-size limits, among other requirements that do not apply to state-authorized charter schools. In 2017, the 85th Texas Legislature passed Senate Bill 1882, which created incentives for districts to contract to partner with state-authorized charter schools, institutions of higher education, nonprofits, or government entities to operate district-authorized charter school campuses. The incentives include the potential for the district to receive additional state funding for the partnership campus and a two-year exemption from specific accountability interventions for partnership campuses with unacceptable state accountability ratings.

District-authorized charter school campuses were not identified in PEIMS until the 2002-03 school year. In 2002-03, there were 8 district-authorized charter school campuses within 3 districts that served 2,621 students. In the 2021-22 school year, there were 128 district-authorized charter school campuses within 28 districts that served 65,200 students. District-authorized charter school campus enrollment increased most years between 2002-03 and 2021-22 (Table 28). Between 2016-17 and 2021-22, year-to-year change in statewide enrollment in district-authorized charter school campuses ranged from a 24.1-percent decrease to a 52.9-percent increase. In 2021-22, statewide enrollment in district-authorized charter school campuses increased from the previous year by 4.6 percent.

Between 2011-12 and 2021-22, across the five largest racial/ethnic groups, Hispanic students consistently accounted for the largest percentage of total enrollment in district-authorized charter school campuses, typically followed by African American and White students; Asian and multiracial students consistently accounted for the smallest percentages of enrollment. In 2021-22, Hispanic students made up 64.1 percent of total enrollment, followed by African American (17.5%), White (13.7%), multiracial (2.2%), and Asian (2.1%) students.

Each year between 2011-12 and 2021-22, the majority of district-authorized charter school campus students met the state criteria for economic disadvantage (Figure 16 on page 58 and Table 30 on page 68). In the 2021-22 school year, 75.8 percent of students were identified as economically disadvantaged.

- In 2021-22, enrollment in district-authorized charter school campuses increased from the previous year by 4.6 percent, while overall statewide enrollment increased by 1.0 percent.
- In the 2011-12 school year, 33,979 students were enrolled in district-authorized charter school campuses (Table 28). By 2021-22, enrollment had risen to 65,200 students.
- In 2021-22, students enrolled in district-authorized charter school campuses accounted for 1.2 percent of the total Texas public school population.

| 2019-20 | 44,820 | 52.9 | 0.8 |
| 2020-21 | 62,329 | 39.1 | 1.2 |
| 2021-22 | 65,200 | 4.6 | 1.2 |

Enrollment in District-Authorized Charter School Campuses by Race/Ethnicity

- Because rates for smaller groups can be less stable over time, discussions of results in this section are restricted to the five largest racial/ethnic groups: African American, Asian, Hispanic, White, and multiracial. See the section "Reporting of Race/Ethnicity" on page 2 for additional information.
- Between the 2020-21 and 2021-22 school years, enrollment in district-authorized charter school campuses increased for all racial/ethnic groups with the exception of White students (Figure 19 and Table 29).
- Between 2020-21 and 2021-22, the percentages of total enrollment in district-authorized charter school campuses accounted for by Asian, Hispanic, and multiracial students increased (Table 29). During the same period, the percentages accounted for by African American and White students decreased.
- In 2021-22, Hispanic students accounted for the largest percentage of total enrollment in district-authorized charter school campuses (64.1%), followed by African American (17.5%), White (13.7%), multiracial (2.2%), and Asian (2.1%) students.

Enrollment in District-Authorized Charter School Campuses by Economically Disadvantaged Status

- The number of students identified as economically disadvantaged in district-authorized charter school campuses increased by 2,682 students, or 0.9 percentage points, to 75.8 percent between the 2020-21 and 2021-22 school years (Figure 20 and Table 30).

Enrollment in District-Authorized Charter School Campuses by Grade

- In 2021-22, Grade 7 had the highest enrollment in district-authorized charter school campuses, at 7,121 students, followed by Grade 8, at 6,987 students (Figure 21 on this page and Table 31 on page 70).
- Across Grades K-12 in 2021-22, the percentages of total enrollment in district-authorized charter school campuses accounted for by grade ranged from a low of 5.2 percent in Grade 12 to a high of 10.9 percent in Grade 7 (Table 31 on page 70).
- Across Grades K-12, between 2020-21 and 2021-22, enrollment in district-authorized charter school campuses increased at every grade level, except Grade 10 which had a slight decrease.

Enrollment in District-Authorized Charter School Campuses for Instructional Programs and Special Populations

- In the 2021-22 school year, 56.1 percent of students in district-authorized charter school campuses were identified as at risk of dropping out of school, an increase of 1.2 percentage points from the previous year (Table 32 on page 72).
- Between 2020-21 and 2021-22, the number of students in district-authorized charter school campuses identified as emergent bilingual students/English learners (EB students/EL) increased by 1,396, or 11.0 percent. In the 2021-22 school year, 21.7 percent of students were identified as EB students/ELs, compared to 20.4 percent in 2020-21.
- In the 2021-22 school year, 15,288 students in district-authorized charter school campuses participated in bilingual, ESL, or alternative language programs. Of these students, 1,873 students (12.3%) participated in alternative language programs.
- The number of students in district-authorized charter school campuses participating in Title I programs increased by 9,171 students, or 17.4 percent, between 2020-21 and 2021-22 (Figure 22 on this page and Table 32 on page 72).
- The percentage of students served in special education programs in district-authorized charter school campuses increased from 9.3 percent in 2020-21 to 9.6 percent in 2021-22.

Figure 22

^aEnglish as a second language. ^bBeginning with the 2019-20 school year, bilingual/ESL program data reflect the number and percentage of students who were reported as participating in state-approved instructional program models or alternative language programs. ^cEmergent bilingual student/English learner. ^dNot available.

National Enrollment Trends

Reporting of National Enrollment Trends

Using enrollment data drawn from the Digest of Education Statistics, published by the National Center for Education Statistics (NCES), this section of the report compares population and enrollment numbers for Texas, other states, and the nation as a whole. Reporting the most current national data available, the section highlights population characteristics and program participation, as well as changes in these populations over many years.

The NCES has different data processing and reporting requirements than the Texas Education Agency (TEA). As a result, the data reported using NCES figures do not match TEA results in prior sections of this report. In addition, TEA releases some data sooner than NCES; consequently, school years reported in this section do not correspond to school years reported in prior sections. Finally, states may have different criteria for determining student eligibility for certain programs, which can influence enrollment numbers. These factors should be taken into consideration when making direct comparisons across states.

When discussing rates by race/ethnicity, because rates for smaller groups can be less stable over time, discussions of results in this section are restricted to the five largest racial/ethnic groups: African American, Asian, Hispanic, White, and multiracial. See the section "Reporting of Race/Ethnicity" on page 2 for additional information.

Population Trends

According to national figures, Texas ranked second, behind California, in overall population as well as school-age population (children ages 5-17) in 2020 (NCES, n.d.-a). Between 2000 and 2020, the rate of growth in the overall population in Texas was more than twice the rate in the United States as a whole. The estimated overall population rose to 29.4 million in Texas and to 329.5 million in the United States, increases of 40.2 percent and 16.8 percent, respectively. Over the same period, the estimated school-age population increased to 5.5 million in Texas and to 53.5 million in the United States, increases of 27.8 percent and 0.6 percent, respectively.

Enrollment Trends

National figures indicate that Texas, with nearly 5.4 million students, ranked second, behind California, with nearly 6.1 million students, in public school enrollment in 2020 (NCES, n.d.-b). Of the four most populous states in the country, Texas had the largest percentage increase in public school enrollment between 2010 and 2020 (8.9%), followed by Florida (5.5%) (Table 33 on page 75). Public school enrollment in New York and California decreased by 4.9 and 3.6 percent, respectively. Across all 50 states and the District of Columbia, Texas had the seventh-highest percentage increase in public school enrollment over the 10-year period, behind the District of Columbia (26.1%), North Dakota (19.3%), Utah (16.2%), Idaho (11.6%), South Dakota (10.7%), and Nevada (10.3%) (NCES, n.d.-b). Nationwide, public school enrollment decreased at a rate of 0.2 percent.

Enrollment by Race/Ethnicity

In fall of 2020, according to national figures, Texas public school enrollment was 12.7 percent African American, 4.7 percent Asian, 52.9 percent Hispanic, 26.5 percent White, and 2.7 percent

Table 33

multiracial (Table 34 on page 76). By comparison, overall U.S. public school enrollment was 15.0 percent African American, 5.4 percent Asian, 28.0 percent Hispanic, 45.8 percent White, and 4.5 percent multiracial.

Between 2010 and 2020, the percentage of public school enrollment accounted for by Hispanic students increased in every state in the United States and in the District of Columbia (NCES, n.d.-c). In the four most populous states, the percentage-point increases in enrollment of Hispanic students were the largest for any racial/ethnic group (Table 34 on page 76). The proportion of public school enrollment accounted for by Hispanic students rose from 50.3 percent to 52.9 percent (2.6 percentage points) in Texas and from 23.1 percent to 28.0 percent (4.9 percentage points) nationwide. Across all 50 states and the District of Columbia, New Mexico had the highest proportion of Hispanic student enrollment (63.1%) in 2020, followed by California (55.4%) and Texas (52.9%) (NCES, n.d.-c).

The percentages of public school enrollment accounted for by African American and White students decreased in each of the four most populous states, as well as in the United States as a whole, between 2010 and 2020 (Table 34 on page 76). The proportion of enrollment accounted for by African American students decreased from 12.9 percent to 12.7 percent (0.2 percentage points) in Texas and from 16.0 percent to 15.0 percent (1.0 percentage points) nationwide. The proportion of enrollment accounted for by White students decreased from 31.2 percent to 26.5 percent (4.7 percentage points) in Texas and from 52.4 percent to 45.8 percent (6.6 percentage points) nationwide.

Enrollment of Students Identified as Economically Disadvantaged

Eligibility for the National School Lunch and Child Nutrition Program, which provides free and reduced-price meals to students from low-income families, is used as an indicator of student economic status. In 2010-11, across all 50 states and the District of Columbia, the percentages of students identified as eligible ranged from a low of 25.2 percent in New Hampshire to a high of 73.0 percent in the District of Columbia (NCES, n.d.-d). National figures indicate that 50.3 percent of students in Texas were identified as eligible in 2010-11 (Table 35 on page 77).

In 2019-20, the percentages of students identified as eligible for free or reduced-price meals ranged from a low of 24.7 percent in New Hampshire to a high of 76.4 percent in the District of Columbia (NCES, n.d.-d). The four most populous states—California, Florida, New York, and Texas—had higher percentages of eligible students than the country as a whole (Table 35 on page 77). National figures indicate that 60.2 percent of students in Texas were eligible for the program, 8.1 percentage points higher than the national average of 52.1 percent. From 2010-11 to 2019-20, the percentages of students identified

as eligible for free or reduced-price meals increased in California, New York, and Texas and decreased in Florida. Nationwide, 21 states had decreases in the percentages of eligible students between 2010-11 to 2019-20 (NCES, n.d.-d).

Enrollment of Students Participating in Special Education Programs

According to national figures, a higher percentage of public school students participated in special education programs in the United States as a whole (13.0%) than in Texas (9.0%) during the 2010-11 school year (Table 36). By 2020-21, participation in special education had increased to 14.5 percent in the United States overall and to 11.3 percent in Texas. All of the four most populous states in the country had percentage-point increases in special education participation between 2010-11 and 2020-21. Nationwide in 2020-21, New York had the highest percentage of public school students participating in special education (20.5%), followed by Maine and Pennsylvania (20.0% and 19.9%, respectively); Texas and Hawaii had the lowest percentages (11.3% each) (NCES, n.d.-f).

Enrollment of Students Identified as Emergent Bilingual Students/English Learners

Students identified as emergent bilingual students/English learners (EB students/ELs) are eligible to participate in bilingual or English as a second language programs. National figures indicate that the percentage of public school students who participated in programs for students identified as EB students/ELs

in 2010 was higher in Texas (16.8%) than in the United States overall (9.2%) (Table 37). In 2019, the percentage of students participating in programs for students identified as EB students/ELs in Texas (19.6%) remained higher than the national percentage (10.4%). Across the four most populous states in the country, California had the highest percentages of public school students participating in programs for students identified as EB students/ELs in 2010 (23.3%), and Texas had the highest percentage in 2019 (19.6%); New York had the smallest percentages in both 2010 (7.3%) and 2019 (8.9%). Nationwide in 2019, Texas had the second-highest rate of participation in EB student/EL programs (NCES, n.d.-e).

Compliance Statement

Title VI, Civil Rights Act of 1964, the Modified Court Order, Civil Action 5281, Federal District Court, Eastern District of Texas, Tyler Division.

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

1. acceptance policies on student transfers from other school districts;
2. operation of school bus routes or runs on a nonsegregated basis;
3. nondiscrimination in extracurricular activities and the use of school facilities;
4. nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;
5. enrollment and assignment of students without discrimination on the basis of race, color, or national origin;
6. nondiscriminatory practices relating to the use of a student's first language; and
7. evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

Title VII, Civil Rights Act of 1964 as Amended by the Equal Employment Opportunity Act of 1972; Executive Orders 11246 and 11375; Equal Pay Act of 1964; Title IX, Education Amendments; Rehabilitation Act of 1973 as Amended; 1974 Amendments to the Wage-Hour Law Expanding the Age Discrimination in Employment Act of 1967; Vietnam Era Veterans Readjustment Assistance Act of 1972 as Amended; Immigration Reform and Control Act of 1986; Americans With Disabilities Act of 1990; and the Civil Rights Act of 1991.

The Texas Education Agency shall comply fully with the nondiscrimination provisions of all federal and state laws, rules, and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any educational programs or activities which it operates on the grounds of race, religion, color, national origin, sex, disability, age, or veteran status (except where age, sex, or disability constitutes a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency is an Equal Opportunity/Affirmative Action employer.
