Introduction

Introduction

District and Campus Listings by County

This report provides SAT I and ACT participation and performance results by campus, district, district characteristic, and state as a supplement to *College Admissions Testing of Graduating Seniors in Texas High Schools, Class of 2004* (Texas Education Agency [TEA], 2006). The first three listings display summary data for each Texas public school campus and district, organized by county.

Table 1 includes, for each district and campus: (a) the total number of graduates in the class of 2004; (b) the number and percentage of graduates who took the SAT I; (c) the mean SAT I Mathematics, Verbal, and combined scores of SAT I examinees; and (d) the number and percentage of examinees with SAT I combined scores that meet TEA's Academic Excellence Indicator System (AEIS) criterion score. Table 2 contains the same information for the ACT, with mean English, Mathematics, Reading, Science, and Composite scores. The AEIS criterion scores are 1110 for the SAT I and 24 for the ACT.

Table 3 contains information for the AEIS indicators based on results for either the SAT I or ACT. Included in Table 3 are: (a) the total number of graduates; (b) the number and percentage of graduates who took the SAT I and/or ACT; and (c) the number and percentage of SAT I- and/or ACT-tested graduates scoring at or above the criterion score on either test.

In Tables 1-3, SAT I and ACT participation and performance data for districts and campuses with fewer than five graduates are removed to protect student confidentiality. This precaution ensures that single sets of scores cannot be identified or linked with any individual. In these cases "<5t" appears in place of the actual value, with "t" referring to a small number of students tested. In addition, districts and campuses with five or more examinees but fewer than five scores of 1110 or above for SAT I or 24 or above for ACT receive the note, "<5h." When it is possible for these score data to be arithmetically inferred from other district- or campus-level data, additional masking is employed using intervals of five students, and a note such as the following appears: "<10m," "<15m," "<20m," etc.

College Admissions Examinations by District Characteristic

In the final table, SAT I and ACT results have been summarized by a variety of district characteristics. For each of 25 district characteristics, Table 4 shows: (a) the mean SAT I combined score; (b) the mean ACT Composite score; (c) the percentage of graduates tested on the SAT I and/or the ACT; and (d) the percentage of examinees scoring at or above criterion in 2004. In addition, these four values are presented for the state as a whole and provided at the bottom of each page.

Information on the 25 district characteristics is based on data from TEA's Public Education Information Management System (PEIMS). Characteristics include student enrollment, district type, the percentage of students passing the Texas Assessment of Knowledge and Skills (TAKS), and the percentage of teachers with an advanced degree. Although the number of subcategories within each

characteristic is consistent from year to year, the range represented by a subcategory may change. All data on Table 4 are for the 2004 graduating class, with the exception of college admissions data, which lag one year behind.

Note. 't' indicates masking is applied because of the small number of students tested.

'h' indicates masking is applied because of the small number of examinees scoring at or above criterion.

'm' indicates masking is applied because small numbers can be imputed from other district or campus counts.

'—' indicates masking is applied because of the small number of students tested or scoring at or above criterion.

Texas Education Agency

District Characteristic Descriptions, 2003-04

Cost of Education Index

The Cost of Education Index (CEI) reflects geographic variations in costs beyond the control of districts. This category classifies districts into five groups, each with approximately the same number of districts. The CEI has a minimum value of 0.0 and a maximum of 1.2. Most districts have a CEI value of at least 1.0. Districts with a CEI value of 0.0 are primarily charter school districts.

District Type

Districts are grouped into one of eight subcategories ranging from major urban to rural. Charter school districts are in a separate subcategory. Factors such as enrollment, growth rates, economically disadvantaged status, and proximity to urban areas are used to group districts into the appropriate subcategory. The subcategories are:

Major Urban

The largest districts in the state that serve the six metropolitan areas of Houston, Dallas, San Antonio, Fort Worth, Austin, and El Paso. A district is major urban if it is the largest district in a county with a population of 650,000 or over, and at least 35 percent of students in the district are economically disadvantaged. If a district is not the largest district in the county, it may also be major urban if its enrollment is 75 percent of the largest district, and at least 35 percent of the students are economically disadvantaged.

Major Suburban

Other districts in and around the major urban areas. A district is major suburban if it is contiguous to a major urban district, and its enrollment is at least 3 percent of the major urban district or at least 4,500. If a district is not contiguous to a major urban area, it must be within the same county and have an enrollment of 15 percent of the major urban district or have an enrollment of at least 4,500 to be major suburban.

Other Central City

The major districts in other large Texas cities. If a district is not contiguous to one of the major urban districts but the county population is between 100,000 and 650,000, and it is the largest district in the county or its population is 75 percent of the largest district, then it is other central city.

Other Central City Suburban

Other districts in and around the other large, but not major, Texas cities. If a district is in a county with a population between 100,000 and 650,000, and its enrollment is at least 15 percent of the largest district in the county, then it is other central city suburban. A district can also be other central city

suburban if it is contiguous to a central city district, its population is greater than 3 percent of that district, and its enrollment exceeds the state median of 698 students.

Independent Town

A district is designated as independent town if it is the largest district in a county with a population of 25,000 to 100,000, or if its enrollment is greater than 75 percent of the largest district.

Non-Metropolitan: Fast Growing

A district not designated in any of the above subcategories is non-metropolitan: fast growing if it has a 5-year growth rate of at least 20 percent and at least 300 students enrolled.

Non-Metropolitan: Stable

A district not designated in any of the above subcategories is non-metropolitan: stable if its enrollment exceeds the state median of 698 students.

Rural

A district not designated in any of the above subcategories is rural. These districts either have a growth rate of less than 20 percent and an enrollment between 300 and the state median of 698 students, or have an enrollment of less than 300 students.

Charter Schools

The 190 open-enrollment schools granted a charter by the State Board of Education for operation during the 2003-04 school year. Open-enrollment charter schools operate in a facility of a commercial or nonprofit entity or a school district.

Education Service Center Regions

The state is divided into 20 geographic regions, each served by an Education Service Center (ESC). The ESC region used in this category is the region from which the district receives services, not the geographically assigned ESC region. For the vast majority of districts, these are the same.

Enrollment

Districts are grouped by size into nine subcategories. Size is determined by the total number of students in membership in the district on a day in late October of each year. It does not include students served by a district but not in membership in the serving district.

Highest Property Value

Property is grouped into four subcategories based on how it is used. The subcategory with the greatest total property value for a district determines the subcategory in which the district is placed.

The 6 special statutory and 190 charter school districts are in a separate subcategory because they have no taxable property wealth. The four subcategories are:

- Residential — Single-family and multi-family residential, and residential inventory
- Land — Vacant lots and taxable rural real
- Oil and Gas — Oil, gas, and minerals
- Business — Commercial and industrial real, commercial and industrial personal, and utilities

Operating Cost Per Pupil

Operating costs are the sum of all actual expenditures for a district's operation, for all reported funds. The operating expenditures are a subset of the total expenditures; they do not include debt service, capital outlay, or ancillary services expenditures. Per-student amounts equal the prior school year expenditures divided by the current number of students. Districts are grouped into five subcategories, each with approximately the same number of districts.

Property Wealth: Average, Equal Pupil Groups, and Median

Property wealth is the total taxable property value divided by the total number of students and is used as an indicator of a district's ability to raise local funds on a per pupil basis. The property value used is for the last completed calendar year, i.e., 2003. The taxable value is the traditional measure of value, not the alternative value used in state funding formulas. The total number of students is for the current school year, i.e., 2003-04. The property wealth: average category shows districts above and below state average wealth. The property wealth: equal pupil groups category classifies districts into 20 subcategories, each with approximately the same number of students. The property wealth: median category groups districts into 10 subcategories, each with approximately the same number of districts. In all 3 categories, the 6 special statutory and 190 charter school districts are in a separate subcategory because they have no taxable property wealth.

Pupil Change: 2002-03 – 2003-04

This category reports the variation in student enrollment over a one-year period. One subcategory designates districts with declining enrollment, while the remaining subcategories designate districts with growth rates ranging from "0%-3%" to "10% and over."

Pupil Density

Pupil density is the number of students per square mile. Subcategories range from "fewer than 5 students per square mile" to "100 or more students per square mile." The 6 special statutory and 190 charter school districts form a separate subcategory because they do not have mileage information.

Pupils: Percent African American, Hispanic, and Nonwhite

These categories group districts according to the ethnic composition of their student enrollments. Each category has 6 subcategories ranging from "under 5%" to "50 percent and over." Nonwhite is the sum of all nonwhite populations — Native American or Alaskan Native; Asian or Pacific Islander; African American, not of Hispanic origin; and Hispanic — expressed as a percent of the total population.

Pupils: Percent Economically Disadvantaged

This category groups districts by the number of students reported as economically disadvantaged, expressed as a percentage of the total number of students. Districts fall into 6 subcategories ranging from "under 20%" to "80% and over." Districts report students as economically disadvantaged if they meet any of the following conditions:

- eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program;
- from a family with an annual income at or below the federal poverty line;
- eligible for Temporary Assistance to Needy Families (TANF) or other public assistance;
- recipients of a Pell Grant or comparable state program of need-based financial assistance;
- eligible for programs assisted under Title II of the Job Training Partnership Act; or
- eligible for benefits under the Food Stamp Act of 1977.

SAT I/ACT: Percent Scoring At or Above Criterion

Districts are grouped into five subcategories based on the percentage of examinees in the prior year who scored at or above the criterion score for either the SAT I or ACT. The SAT I Total criterion score is 1110 and the ACT Composite criterion score is 24. The percentage equals examinees meeting the criterion divided by all examinees. A sixth subcategory designates districts with no test takers.

SAT I/ACT: Percent Taking

Districts are grouped into three subcategories based on the percentage of non-special education graduates who took the SAT I, ACT, or both in the prior year. A fourth subcategory designates districts with no graduates.

Small/Sparse Adjustment

Districts are grouped into four small/sparse subcategories, each with approximately the same number of districts. This category shows small/sparse adjustments as a percent of total adjusted basic allotment amounts, a measure of the extent to which state funding is adjusted to compensate for small

and/or sparsely populated districts. A fifth subcategory contains all districts receiving no small/sparse adjustment.

TAKS: Percent Passing All Tests Taken

The percentage of students in grades 3-11 who passed all TAKS sections taken out of the number of students in those grades taking one or more tests. The percentages include only students enrolled in the district in October of the school year. Districts are grouped into 5 subcategories, ranging from "under 53.9%" to "76.1% and over," with a 6th subcategory for districts that did not administer the test.

Tax: Local Adopted Rate

This category shows the total locally adopted tax rate. Districts are grouped into four subcategories, each with approximately the same number of districts. The 6 special statutory and 190 charter school districts are in a separate subcategory because they do not levy property taxes.

Tax: Local Maintenance & Operations Rates

This category shows the maintenance and operation (M&O) adopted tax rate. The M&O levy includes money generated by districts for equalizing wealth. Districts are grouped into four subcategories. The 6 special statutory and 190 charter school districts are in a separate subcategory because they do not levy property taxes.

Teacher Experience

Each teacher's FTE count is multiplied by years of experience. These figures are summed for all teachers within a district and then divided by the district's total teacher FTE count, resulting in the average years of teacher experience. This category groups districts into four subcategories, each with approximately the same number of districts.

Teacher Salary

A district's average teacher salary is calculated by dividing the total salary of teachers by the total FTE count of teachers. Salaries reflect regular duties only and do not include pay for supplemental duties. This category groups districts into four subcategories, each with approximately the same number of districts.

Teachers: Percent Nonwhite

This category groups districts based on the number of teachers of selected ethnicities. This percent is calculated by dividing nonwhite — Native American or Alaskan Native; Asian or Pacific

Islander; African American, not of Hispanic origin; and Hispanic — teacher FTEs by total teacher FTEs. The category has 6 subcategories ranging from "under 5%" to "50% and over."

Teachers: Percent with Advanced Degrees

The percent of teachers with advanced degrees is calculated by dividing the FTE count of teachers with a master's degree or doctorate by the FTE count for all teachers. This category groups districts into four subcategories, each with approximately the same number of districts.

Compliance Statement

Title VI, Civil Rights Act of 1964, the Modified Court Order, Civil Action 5281, Federal District Court, Eastern District of Texas, Tyler Division.

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

1. acceptance policies on student transfers from other school districts;
2. operation of school bus routes or runs on a nonsegregated basis;
3. nondiscrimination in extracurricular activities and the use of school facilities;
4. nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;
5. enrollment and assignment of students without discrimination on the basis of race, color, or national origin;
6. nondiscriminatory practices relating to the use of a student's first language; and
7. evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

Title VII, Civil Rights Act of 1964 as Amended by the Equal Employment Opportunity Act of 1972; Executive Orders 11246 and 11375; Equal Pay Act of 1964; Title IX, Education Amendments; Rehabilitation Act of 1973 as Amended; 1974 Amendments to the Wage-Hour Law Expanding the Age Discrimination in Employment Act of 1967; Vietnam Era Veterans Readjustment Assistance Act of 1972 as Amended; Immigration Reform and Control Act of 1986; Americans With Disabilities Act of 1990; and the Civil Rights Act of 1991.

The Texas Education Agency shall comply fully with the nondiscrimination provisions of all federal and state laws, rules, and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any educational programs or activities which it operates on the grounds of race, religion, color, national origin, sex, disability, age, or veteran status (except where age, sex, or disability constitutes a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency is an Equal Opportunity/Affirmative Action employer.
