

## How Was My District Selected for Data Validation Monitoring-Discipline Intervention Activities?

Data validation monitoring for discipline records (DVM-D) staging determinations and interventions are based upon district performance on eight discipline data validation indicators.

The 2016 discipline data validation analysis for the indicators listed above is based on discipline data from the 2015-2016 school year which were submitted by districts in June 2016. Indicator #8 includes an analysis of discipline data from the 2013-2014 and 2014-2015 school years.

Additional information on DVM-D indicators is provided in the [2016 Discipline Records Data Validation Manual](#), and information on district performance on individual indicators is found in the [Accountability](#) application within the TEA Secure Environment (TEASE).
