Texas Title I Priority Schools Grant		
Schedule #4—Program Summary and Application Requirements		
Part 1: Grant Program Information;		
Summary of Program: Purpose and Goals		
<p>School Improvement Grants, authorized under section 1003(g) of Title I of the Elementary and Secondary Education Act of 1965 (Title I or ESEA) as amended by ARRA, are grants, through the Texas Education Agency, to local educational agencies (LEAs) for use in Title I schools identified for improvement, corrective action, or restructuring and other eligible campuses that demonstrate the greatest need for the funds and the strongest commitment to use the funds to provide adequate resources in order to raise substantially the achievement of their students so as to enable the schools to make adequate yearly progress and exit improvement status. Under the final requirements, as amended through the interim final requirements published in the Federal Register in January 2010 school improvement funds are to be focused on each State's "Tier I" and "Tier II" schools.</p> <p>Tier I schools are a State's persistently lowest-achieving Title I schools in improvement, corrective action, or restructuring and certain Title I eligible elementary schools that are as low achieving as the State's other Tier I schools. Tier II schools are a State's persistently-lowest achieving secondary schools that are eligible for, but do not receive, Title I, Part A funds and certain additional Title I eligible secondary schools that are as low achieving as the State's other Tier II schools or that have had a graduation rate below 60 percent over a number of years. An LEA may also use school improvement funds in Title I schools in improvement, corrective action, or restructuring that are not identified as persistently lowest-achieving schools and certain additional Title I eligible schools ("Tier III schools").</p> <p>In the Tier I and Tier II schools an LEA chooses to serve, the LEA must implement one of four school intervention models: turnaround model, restart model, school closure, or transformation model.</p>		
Allowable Activities		
<p>Tier I and Tier II Grantees</p> <ul style="list-style-type: none"> ■ Grantees must expend grant funds for the required activities delineated for the selected intervention model as defined in the final federal regulations. ■ Grantees may expend grant funds for the permissible activities delineated for the selected intervention model as defined in the final federal regulations. ■ Grantees may expend grant funds for other school improvement activities deemed needed to address identified needs not addressed by the intervention model selected. <p>Tier III Grantees</p> <ul style="list-style-type: none"> ■ Tier III grantees may select one of the four intervention models in the federal regulations or the state's Tier III Transformation Model. ■ If selecting one of the four models in the federal regulations, grantees must expend grant funds for the required activities delineated for the selected intervention model as defined in the final federal regulations. Grantees may expend grant funds for the permissible activities delineated for the selected intervention model as defined in the final federal regulations. ■ Grantees may expend grant funds for other school improvement activities deemed needed to address identified needs not addressed by the intervention model selected. <p>In addition, a Tier I, Tier II, Tier III grantee campus that has implemented, in whole or in part, either the Turnaround, Restart, or Transformation models within the last two years may continue or complete the implementation of the intervention model with the TTIPS grant funds. For example, if a grantee campus has replaced its principal within the last two years, the LEA/campus will not be required to hire another new principal. An LEA/campus that receives TTIPS SIG funds in accordance with this flexibility must fully implement the selected model as required by the final federal requirements. In other words, if the school had been implementing the model only in part, it must use the funds it receives to expand its implementation so that it fully complies with the federal regulatory requirements.</p> <p>The detailed required and permissible activities for each Intervention model, as defined in the final federal regulations are listed on Schedule #4—Program Requirements and are incorporated by reference herein.</p>

<p>C. E. King High School is committed to meeting the academic needs of all students. The campus is currently in stage three, year two of school improvement. The campus goal is to improve the academic performance for all students in all content areas to meet all requirements for AYP as well as to establish an educational system for students providing the opportunity to accomplish future goals and endeavors beyond high school. The data reviewed by the campus site-based team clearly identified mathematics and science as areas requiring improvement measures to be implemented. Historically, the C. E. King High School has had the greatest challenge of improving student performance; however, gains in student performance have been noted over the past two years. The 10th grade students showed a 7% gain in mathematics during the 2008-2009 school year. Sheldon ISD continues to close gaps with all students making gains on TAKS reading and math during the 2008-2009 school year. We anticipate even higher gains on the 2009-2010 TAKS. Currently, the campus has implemented an extended day program providing tutorials before and after school. C. E. King High School had 168 students recover credits as a result of students participating in after school programs. In order to ensure students are successful, an Opportunity Academy was established to assist students in the ninth grade to recover lost credits to get them back on track before the concept of failure becomes an issue within the minds of the students. Because this program has been initiated, it has been a positive avenue for dropout prevention.</p> <p>Sheldon ISD is committed to providing tutorial assistance to students from low-income families, Bilingual/ESL, students with disabilities, and struggling students to ensure their success. These supplemental, academic enrichment, and intervention services will be provided in addition to instruction provided during the school day. Students participating in the program will focus on skills and objectives in the areas of Reading, Mathematics, Science, and Social Studies. The instruction provided to each student is specifically designed to increase the academic achievement of eligible students on the Texas Assessment of Knowledge and Skills (TAKS) and to assist students in attaining proficiency in meeting the Texas Essential Knowledge and Skills (TEKS) academic standards. Individual Academic Plans will drive the instruction provided to each student. An eighth period will be created to provide tutoring after school from 1 1/2 to 2 hours four days a week. Campus facilities are being utilized to ensure that all students will have the opportunity to benefit from these services. Transportation will be provided to students participating in the program after school hours. This will eliminate the barrier of parents making additional arrangements for after school transportation. The program will extend during the month of June and July.</p> <p>The instructors to assist with the delivery of instruction are highly qualified teachers employed by the Sheldon Independent School District. The instructors will complete an application process requiring a minimum of three (3) years teaching experience in the content area in which instruction is to be delivered. The teacher must exhibit excellent classroom/time management skills, communication skills, and success in overall student academic performance during their teaching career. The teachers will attend additional training to enhance the academic program.</p> <p>Campus administrators, principals, and assistant principals, will participate in professional development to increase their skills in the areas of building leadership capacity, using technology to support curriculum and instruction, teacher observation and support systems, coaching, and facilitation training. This process will assist in building leadership capacity that will create learning organizations that promote student achievement and sustain educational outcomes.</p>

Texas Title I Priority Schools Grant Schedule #4B—Program Description		
Part 1: Comprehensive Needs Assessment Cont.		
Section C: Process Responses are limited to the space provided, front side only, with a font size no smaller than 9 point (Arial or Verdana).		
Describe, in detail, the process the LEA and campus followed/will follow to identify the needs of the campus.		
<p>To guide the improvement of student performance, the campus annually develops and/or revises the campus improvement plan through the means of the campus site-based team known as the "Representative Council." The site-based team includes teachers, staff, principal, parent(s), and a community member. The site-based team helps to develop, review, and revise the campus improvement plan for the purpose of improving student performance for all student populations, including all special needs populations, low socio-economic students, Bilingual/ESL, etc. based on the Academic Excellence Indicators System (AEIS). The planning process is guided by established board policy. The site-base team collaborates throughout the school year to discuss the goals, objectives, and strategies included in the campus improvement plan. Data is collected to assist in determining the strengths and weaknesses based on the information reviewed. The programs/strategies listed in the campus plan were reviewed using an evaluation process to determine its effectiveness toward academic improvement. The efforts of this process assesses the academic achievement of all students, determine which goals were met, identifies resources and staff needed to implement the plan, sets timelines for reaching the goals, measures progress, provides activities to encourage parental involvement, includes goals and methods for violence and intervention on campus, and establishes the performance goals for the following year. An end of the year survey was completed by staff, students, and parents to solicit their views and expectations of the campus program. As a result of this process, the campus goals and expectations are revised and shared with the entire staff for additional feedback prior to finalizing the plan. The final plan is submitted to the Assistant Superintendent of Curriculum and Instruction for review. Upon the approval from the Assistant Superintendent, the Campus Improvement Plan will be presented to the Sheldon ISD School Board for final approval. Since the Campus Improvement Plan is a living document, the campus site-based team will continue to meet throughout the school year to review and revise the strategies and activities to ensure all goals are achieved.</p> <p>Currently, a mentoring program is in place to support the needs of new teachers as they embark upon the process of the teaching learning process. This program will support the grant in an effort to ensure that new teachers are provided the necessary support for their first two years of teaching in Sheldon ISD. This program supports the concept of recruiting and retaining teachers at the high school level. The lead mentor on campus will participate in collective dialogue with the new teachers on a monthly basis to determine if their needs are met and to identify concerns that need to be addressed to increase their ability to improve student acquisition of knowledge among the students within their class. Based on the collected data, the campus administrators and the lead mentor will discuss the concerns of the newest teachers to campus. These teachers are usually the ones who experience the greatest challenges during their first year. This process will identify professional development needs and/or topics of discussion to take place within team and subject planning meetings. This process will assist in establishing a healthy environment that can create a positive climate among teachers and administrators which can have an impact on students.</p> <p>Implementing the Transformation model requires the evaluation of the current principal and to determine if the principal needs to be replaced. The campus faced restructuring two years ago while in school improvement. The principal was removed at that time. The current principal has been in place for two years as of June 2010. The campus has achieved significant gains as a result of his leadership and his ability to work with campus teams to promote academic success. The challenge the high school faces now is sustaining the current system to continue to achieve academic improvement.</p>

Part 2: Project Management		
Section A: LEA (District) Capacity Responses are limited to <i>one page each</i> , front side only, with a font size no smaller than 9 point (Arial or Verdana).		
Capacity -- Describe the LEA's capacity to use grant funds to provide adequate resources and related services/support to the campus to implement, fully and effectively, the required activities of the school intervention model.		
<p>Currently, the district has the capacity to support the requirements and established parameters to implement the required activities and components of this grant application. The Assistant Superintendent of Curriculum and Instruction and the Coordinator of Compliance and Grants will assist in monitoring and evaluating the implementation of the grant over the three year implementation period. Support will be provided to ensure all guidelines and provisions are adhered to as established by the grantor in a timely manner.</p>		
<p>There is a formal and informal process in place to support and evaluate the effectiveness of quality instruction on campus. Also, instructional coaches are present on campus to ensure that the campus meets the instructional goals outlined in the campus plan as well as denoted in the grant and to assist teachers with the delivery of instruction.</p>		
<p>Measures to improve student performance are currently in place such as a data-disaggregation process and C-Scope which is a comprehensive aligned curriculum for grades K-12. These elements are used to evaluate student results and to determine viable courses of action to correct and adjust errant student performance.</p>		
<p>The district currently implements an ongoing professional development program to ensure quality instruction. For example, one of the recurring sessions entails cultural diversity training to ensure that each educator is aware of the most effective methods to deliver quality instruction to the student population. Additionally, each educator receives training in the use of new technology and how to implement it in the classroom. Moreover, strategies to differentiate instruction to meet the individual needs of each student are also offered. Some of the technology resources available to support the teaching process are LCD projectors, document cameras, student computers, student response systems, and audio enhancement systems.</p>		
<p>The district purchased software to provide educators with the necessary resources to evaluate student data. Once data analysis has been completed, instructional coaches meet with instructional staff to ensure pacing and schedules are aligned with critical student needs. This flexibility allows for collaborative staff planning and implementation. This data-analysis is used to drive effective instructional planning.</p>		
<p>Parent coaching meetings are facilitated throughout the school year to inform parents about the most effective means of assisting their children at home with their academic needs. We utilize a variety of media to communicate with parents about available academic resources such as an automated telephone response system, notes, and postings on district and campus web sites in both English and Spanish.</p>		
<p>Organized student and community activities are available such as Student Council and the Superintendent's Cabinet of Student Leaders which serve as a student advisory committee to the superintendent on matters concerning the student body.</p>

Part 2: Project Management Cont.		
Section A: LEA (District) Capacity Responses are limited to <i>one page each</i> , front side only, with a font size no smaller than 9 point (Arial or Verdana).		
Partnership/Involvement of Others – Describe how the LEA/campus consulted with relevant stakeholders (students, staff, parents, community) regarding this application and proposed implementation of a school intervention model.		
First of all, the Assistant Superintendent of Curriculum and Instructional consulted with the Superintendent soliciting the support of the school board about the implementation of this grant. Next, the campus site-based team consisting of all stakeholders met and conferred about the potential of employing the parameters of this grant application and the proposed program acknowledged by the grantee.		
The following data was shared to justify the need for the TTIPS grant:		
AYP Data for the last 3 years has shown the math scores for 10 th grade have been low.		
<ul style="list-style-type: none"> • The 2008-2009 report states 60% of 10th grade students passed math; 60% of African American students passed math; 59% of Hispanic students passed math; 65% of White students passed math and 61% of Economically Disadvantage students passed math. The data for this year indicates that all demographic populations met the standard. • TPM data results for 2008-2009 indicate 75% of tenth grade students met the standard; 73% of African Americans met the standard, 75% of Hispanic students met the standard, 77% of White students met the standard and 78% of Economically Disadvantage students met the standards. • The 2007-08 report states 52% of 10th grade math students passed math; 46% of African American students passed math; 52% of Hispanic students passed math; 58% of White students passed math. 		
The 2006-07 report states 52% of the 10 th grade students passed math; the report also indicated that 47% of Hispanic students met standard. Both sets of data indicate that all demographic populations are not meeting the state standard.		
AEIS data indicates low math trends over several previous years with data among the demographic populations falling below the 50% standard. The 2008-2009 report indicates significant improvement in math scores among all demographic populations.		
The data presented clearly identifies a need to provide additional assistance to ensure continuous student performance at the high school campus.

This committee will consist of at least one school board member, parent, student, campus principal or designee, community member, and district representatives (Assistant Superintendent of Curriculum and Instruction and the Coordinator of Compliance and Grants). The committee will meet a minimum of twice each semester to review the decision-making process of the campus site-based team regarding components of the grant that are included in the campus plan. Part 2: Project Management Cont.		
Section A: LEA (District) Capacity Responses are limited to one page each , front side only, with a font size no smaller than 9 point (Arial or Verdana).		
Resource Management – Describe how the LEA/campus will align other resources (federal, state, local, and community) with the school improvement intervention.		
<p>The instruction provided to each student is specifically designed to increase the academic achievement of eligible students on the Texas Assessment of Knowledge and Skills (TAKS) and to assist students in attaining proficiency in meeting the Texas Essential Knowledge and Skills (TEKS) academic standards. The plan will also help improve student performance for all student populations, including all special needs populations, based on the Academic Excellence Indicators System (AEIS). The campus will continue to receive Title I funds (federal funds) and state compensatory funds to support intervention activities conducted during the regular school day. These funds will support the efforts of the campus in meeting all expectations established by the campus site-based and the TTIPS Grant committee. Title II funds (federal funds) will support the campus by continuing to provide professional development for administrators and teachers in the areas of technology applications and strategies for improving teaching and learning.</p> <p>Furthermore, the district has established a Response To Intervention Model to assist in identifying students in need of assistance regarding academic and/or behavioral concerns.</p> <p>One of the major focuses of RtI is to intervene early in a child's education in order to prevent failure. RtI is a systemic approach to address the needs of all students. It is a process by which a continuum of services is provided and includes:</p> <ul style="list-style-type: none"> • High quality instruction and scientific, research-based, tiered intervention strategies aligned with individual student need; • Frequent monitoring of student progress to make results-based academic or behavioral decisions; • Data-based school improvement; • The application of student response data to important educational decisions; and • A coordinated effort between general and special educators in developing and implementing the process. <p>This model is being extended to all campuses. C. E. King High School campus student body is divided into four academies. An Assistant Principal, known as the "Academy Principal" is assigned to each academy with the responsibility of monitoring the academic progress of the students assigned to their academy from ninth grade through twelfth grade. The philosophy of the academies is to create a school within a school where the needs of teachers and students are closely monitored in an effort to achieve overall goals and expectations. Through this approach, the RtI progress becomes more seamless. Conversations regarding student progress is tracked and monitored by the Academy Principal and documented year after year allowing the opportunity to visit data over time for each student to meet their individual needs. The goal is not to allow a student to "fall between the cracks." This process also allows the Academy Principals to improve their skills as a leader as it improves the overall communication among all stakeholders.</p> <p>In order to improve this process at this high school, the district Coordinator of Special Education Instructional Services is continually monitoring the implementation process of RtI on each campus. The recommendation for the high school teams is to expand the data collection process so that students in need of assistance are identified before failure is experienced.</p> <p>This is an on-going process that will be continuously monitored to improve student performance.</p>

Part 3: Intervention Model		
Section B: Model Selection Process –Describe in detail: 1. The process the LEA and campus followed/will follow to select a school intervention model that aligns to the identified needs of the campus. 2. The timeline delineating the steps the campus will take to implement the selected intervention.		
Responses are limited to five pages , front side only, with a font size no smaller than 9 point (Arial or Verdana).		
<p>The district is committed to providing alternative programs and instructional strategies to supplement instruction provided by the general curriculum and to assist students in meeting the state learning standards. This additional support will be provided utilizing a variety of strategies. This district selection regarding an intervention model must provide assistance to students who are at risk of not achieving the state standards and/or district designated performance levels in English Language Arts, Mathematics, Science, and/or Social Studies. The intervention model shall be made available to all students experiencing academic difficulties which include students with disabilities, English Language Learners, etc. The model must include processes for on-going monitoring and supportive feedback, parental involvement opportunity, time set aside for collaboration for teachers and administrators, sustain support from identified staff at the central office level, and external technical support. An external program evaluation process will be expected to be conducted yearly during the three year implementation process.</p> <p>Sheldon ISD is a small district with an enrollment is approximately 6,570 students. The demographic population is 64% Hispanic, 22% African American, 12% White, and 2% other. This district believes the single most important factor for student success is direct classroom instruction. However, students who struggle should be afforded appropriate and targeted opportunities for academic assistance and intervention. The plan of action for each student in need of assistance should be based on data analysis of multiple measures to they may be successful in meeting state and district standards.</p> <p>The Student Intervention Model (SIM) will be the model established by the district based on the following criteria:</p> <ol style="list-style-type: none"> 1. Differentiated instruction that supplements the general curriculum (regular classroom instruction); and/or 2. Student support services needed to address barriers to improved academic performance. <p>The services provided by the SIM will be provided to students in grades 9-12 in all four content areas listed above. Students in grades 9-12 will be considered for SIM if:</p> <ol style="list-style-type: none"> 1. They do not pass TAKS in any designated content area for a given grade level; 2. They score below the required standards on a given curriculum based assessment (CBA). <p>The district will review the following data to determine which students will participate in SIM as well as to monitor and track student overall performance on a quarterly basis:</p> <ol style="list-style-type: none"> 1. Pre-post assessments 2. Report Card Grades less than 75% in reading, mathematics, science, and/or social studies 3. Formative assessments 4. TAKS assessments 5. Other valid, reliable assessments necessary to monitor student progress and overall performance <p>Data reviewed based on classroom performance:</p> <ol style="list-style-type: none"> 1. Participation and Class Work 2. Report Card Grades 3. Authentic Assessments 4. Student Records 		

5. Teacher input regarding student needs

Student entrance criterion:

A student will be considered for entrance into SIM if a review of data indicates that a student is at risk of not meeting state standards.

Student exit criterion:

A student will be considered not in need of SIM assistance if a review of data indicates a student is likely to meet state standards.

The SIM will offer additional time for focused instruction and staff/scheduling to increase student-teacher instructional contact time. Intervention strategies to enhance student performance will include differentiated instructional methods, modified student performance products, and progress monitoring. This model will provide support services for students through interaction with the campus counselors. The student support services will include establishing study skills, attendance improvement, referral for community agency support as eligible, guidance, etc.

Through the SIM, a range of academic intervention processes will be available such as extended day instructional time. This additional time is a mandatory eighth period providing transportation for all students, co-teaching, individualized instruction, small group instruction during the regular school day and after school, computer assisted instruction, and reduced student to teacher ratio. Laptop computers will be purchased to support the implementation of the software programs.

The primary focus for the SIM is to increase the use of academic vocabulary, active student engagement, grouping, and problem-solving. Other strategies will include flexible grouping, assisted note-taking, data analysis, common assessments, using grading rubrics, graphic organizers, and other manipulatives for learning. Professional development will be on-going for all instructional staff to increase the quality of teaching and learning.

Graphing calculators will be provided to prepare at risk students for the Math exam. Transition programs will be implemented to support incoming ninth graders from the middle school. The Sheldon SIM will provide academic intervention as an additional summer program to afford students the opportunity to gain credit for courses failed during the regular school year.

The district/campus will monitor attendance and discipline data to improve the overall climate on the campus as well as to address individual concerns in each area. Additional support will be provided through the use of a Truancy Officer for four hours a day to assist in following up on attendance issues.

The SIM will identify academic deficiencies in the areas of English Language Arts, mathematics, science, and social studies. Decisions related to the frequency, intensity, duration, and method of service will be based upon individual student needs. Administrators, classroom teachers, support personnel, and parents will work collaboratively to make appropriate educational decision for all students. The TTIPS committee will be responsible for the on-going monitoring and review process of the SIM. Quarterly reports will be provided by the TEA technical support team. The Assistant Superintendent of Curriculum and Instruction will be responsible for communicating all report findings to the Superintendent.

A Sheldon SIM coordinator will be made available to facilitate all components of the program, monitor progress of the program, maintain documentation of student progress, assist in facilitating TTIPS committee meetings, and consult twice a month with the District Shepherd in an effort to maintain the integrity of the program as designed.

The Sheldon SIM will be a means of decreasing the number of students referred to the Response to Intervention (RTI) committee for academic and/or behavioral concerns.

Student progress reports will document the progress of all students receiving services by the Sheldon SIM. A copy of these reports will be sent home to parents, at least quarterly, to describe the nature and intensity of the service provided, how the service was delivered, who provided the instruction, and the reason for continuation or discontinuation of the Sheldon SIM. The student(s) will no longer be required to receive services by the Sheldon SIM when they have successfully attained the district standards according to state and/or district criteria. Parent conferences will be requested for students not demonstrating adequate progress within an appropriate time period while participating in the Sheldon SIM. The program coordinator and the teachers participating in the SIM will work together to ensure all communication with parents is conducted in a timely manner.

The principal and/or program coordinator will be responsible for parent notification indicating a need for their child to participate in the Sheldon SIM. This notification will be made in writing and will include a summary of the services to be provided to the student and where and when it will be provided. The letter will also include the consequences of their student not achieving the state/district standards.

Goals will be established by the TTIPS committee based on TAKS data from the past three years such as

- Eighty percent of all students in all student populations will pass Math TAKS (2010-2011).
- Ninety-five percent of all students in all student populations will pass English TAKS (2010-2011).
- Eighty percent of all students in all student populations will pass Science TAKS (2010-2011)
- Maintain ninety-five plus percent for all students in all student populations passing the Social Studies TAKS (2010-2011)
- Increase graduation rate by three percent each school year during the duration of the grant.

Staff incentives and rewards will be disseminated to all qualifying staff members based on overall goals met by the campus. Incentive pay for staff members will be disseminated based on the following:

If all goals are achieved as stated above all certified professional staff members will receive a bonus amount of \$6,000, Instructional Para-professional staff will receive \$2,000, and Managerial Para-professional staff (included the nurse) will receive \$1,000.00. The funds will be awarded yearly during the duration of the grant period.

On-going professional development will be provided in the following areas:

- Cultural Diversity
- Using technology in the classroom
- Intervention strategies
- Differentiated instruction
- Co-teaching
- Implementing C-Scope
- Using data to drive instruction
- Improving Student Engagement

Part 2: Process for Development of Performance Goals		
Describe the process to be implemented to develop the campus' performance goals. Include the groups participating in the development of the goals.		
Responses are limited to two pages , front side only, with a font size no smaller than 9 point (Arial or Verdana).		
<p>Sheldon ISD is a small district with an enrollment of approximately 6,500 students. The demographic population consists of 64% Hispanic, 22% African American, 12% White, and 2% other. This district believes the single most important factor for student success is direct classroom instruction. However, students who struggle should be afforded appropriate and targeted opportunities for academic assistance and intervention. The plan of action for each student in need of assistance should be based on data analysis of multiple measures so they may be successful in meeting state and district standards.</p> <p>Sheldon has only one high school servicing all students 9-12. For the past five years, the campus has been in school improvement striving to identify reform strategies to improve student performance. The campus has had four different principals over the past ten years reflecting a lack of consistence in program implementation and the absence of systemic planning. The current principal has been leading the high school for two years including the 2009-2010 school year. Under the current principal's leadership, significant gains were identified in certain areas. The goal is to continue to implement strategies that have proven successful for the past two years. As a result, the campus site-based team collaborates regularly to review the campus plan and the activities identified to improve student performance.</p> <p>The campus site-based team assist in the development of campus goals that are measurable in order to ensure an increase in student performance on a yearly basis. The site-based team meets at least four times during the school year to review goals and expectations in order to identify the strengths and weaknesses of programs and strategies identified for school improvement. Once the team reviews qualitative and quantitative data, student performance goals are established matching appropriate activities and strategies to assist in accomplishing the desired goal of improving the instructional program on campus. The implementation of the plan is monitored throughout the year by the site-based team and adjustments are made and executed in an effort to promote positive results among all demographic populations. A final draft copy of the plan is submitted to the Assistant Superintendent of Instructional Services for final review and approval prior to seeking the school board's approval.</p> <p>Goals were established using the following process:</p> <ol style="list-style-type: none"> 1. Review testing data over a period of two years such as TAKS data, report card data, attendance, discipline, graduation rate, dropout rate, etc. 2. Revisit activities listed in campus plan to determine if positive results were attained. 3. Recommendation from the site-based team on which activities to keep, remove, or tweak. 4. The team works in groups to review the data and develop some overall conclusions. 5. The information is shared with the administrative team on campus and recommendations are made as a result of the data analysis process. 6. Goals are established with activities and resources identified to assist in attaining the desired goals. 7. A timeline is created to monitor implementation and progress 8. The revised plan is developed and sent to the Assistant Superintendent of Curriculum and Instruction for final review prior to submitting to the school board.

- L. Financial Management and Accounting:** Grantee assures it will maintain a financial management system that complies with federal standards established in 34 CFR 80.20 and 74.21 and that provides for accurate, current, and complete disclosure of the financial results of each grant project. The financial management system records will identify adequately the source and application of funds and will contain information pertaining to grant awards, authorizations, obligations, unobligated balances, assets, outlays (i.e., expenditures), income, and interest. Fiscal control and accounting procedures will permit the tracing of funds to a level of expenditure adequate to establish that funds have been used in accordance with the approved grant application. The applicant agrees to maintain effective control over and accountability for all funds, property, and other assets. Public school districts, open enrollment charter schools, and regional education service centers in Texas must comply with the accounting requirements in the Financial Accounting and Reporting (FAR) module of the *Financial Accountability System Resource Guide*, Texas Education Agency (34 CFR 74.21; 34 CFR 80.20; TEA *Financial Accountability System Resource Guide*).

- O. Records Retention:** Contractor shall maintain its records and accounts in a manner which shall assure a full accounting for all funds received and expended by Contractor in connection with the contract project. These records and accounts shall be retained by Contractor and made available for programmatic or financial audit by Agency and by others authorized by law or regulation to make such an audit for a period of not less than five years from the date of completion of the contract project or the date of the receipt by Agency of Contractor's final claim for payment or final expenditure report in connection with this contract, whichever is later. If an audit has been announced, the records shall be retained until such audit has been completed.

Contractor further agrees to cooperate fully with the State Auditor's Office or its successor in the conduct of the audit or investigation, including providing all records requested. Contractor will ensure that this clause concerning the authority to audit funds received indirectly by subcontractors through Contractor and the requirements to cooperate is included in any subcontract it awards.

- R. Intellectual Property Ownership:** Contractor agrees that all Works are, upon creation, works made for hire and the sole property of TEA. If the Works are, under applicable law, not considered works made for hire, Contractor hereby assigns to TEA all worldwide ownership of all rights, including the Intellectual Property Rights, in the Works, without the necessity of any further consideration, and TEA can obtain and hold in its own name all such rights to the Works. Contractor agrees to maintain written agreements with all officers, directors, employees, agents, representatives and subcontractors engaged by Contractor for the Contract Project, granting Contractor rights sufficient to support the performance and grant of rights to TEA by Contractor. Copies of such agreements shall be provided to TEA promptly upon request.

For Colleges and Universities: The foregoing Intellectual Property Ownership provisions apply to any colleges and universities and their employees, agents, representatives, consultants, and subcontractors; provided, that for all Works and derivative works created or conceived by colleges or universities under the Contract, they are granted a non-exclusive, non-transferable, royalty-free license to use the Works for their own academic and educational purposes only. The license for academic and educational purposes specifically excludes advertising, offering for sale, selling, distributing, publicly displaying, publicly performing, or reproducing the Works, or making derivative works from the Works that are created or conceived under this Contract and colleges and universities and their employees, agents, representatives, consultants, and subcontractors are prohibited from engaging in these uses and activities with regard to the Works unless the prior express written permission of the TEA Copyright Office is obtained.

T. Subcontracting: Contractor shall not assign or subcontract any of its rights or responsibilities under this contract, except as may be otherwise provided for in this application, without prior formal written amendment to this contract properly executed by both Agency and Contractor.

U. Use of Consultants: Notwithstanding any other provision of this application, Applicant shall not use or pay any consultant in the conduct of this application if the services to be rendered by any such consultant can be provided by Applicant's employees.

V. Capital Outlay: If Contractor purchases capital outlay (furniture and/or equipment) to accomplish the objective(s) of the project, title will remain with Contractor for the period of the contract. - AA. Submission of Audit Reports to TEA:** Grantees which are public school districts and open enrollment charter schools agree to submit the required annual audit report, including the reporting package required under OMB Circular A-133, if an audit is required to be conducted in accordance with OMB Circular A-133, to the TEA Division of School Financial Audits in the time and manner requested by the Agency.

- A **nonprofit organization or university/college** grantee shall provide written notification to TEA that an audit was conducted in accordance with OMB Circular A-133 when the schedule of findings and questioned costs disclosed no audit findings related to any federal awards provided by TEA or when the summary schedule of prior audit findings did not report on the status of any prior audit findings related to any federal awards provided by TEA. Nonprofit organizations (other than charter schools) and universities/colleges shall submit the audit report to the TEA Division of Discretionary Grants. Audit reports must be submitted to TEA within 30 days of receipt of the report from the auditor.
