

Experience of Math and Science Teachers 2010-2014

The tables below present the number of employed Mathematics and Science teachers, as reflected in the PEIMS data, with years of experience in the Texas public school system. The first table shows the number of teachers and average years of experience. It breaks experience into 9-year ranges and provides the percentage of teachers within each range. The second table breaks the 0-9 year range into individual numbers of years.

Definition. Experience is number of years in the Texas public school system.

Results for all teachers

- Experience results were very similar for the two subject areas.
- A majority of Mathematics and Science teachers had 0 to 9 years of experience.
- In academic year 2013-14, teachers with 10 to 19 years experience showed a small increase over academic year 2009-10; teachers with 0 to 9 years experience showed a small decline, as did those with 30 to 39 years of experience.
- Percentages declined with greater experience.

Year	Number Employed	Average Experience	Percentage by Years of Experience					
			0-9	10-19	20-29	30-39	40-49	50-59
Mathematics								
2013-14	113,292	10.35	56.22	27.90	11.94	3.50	0.42	0.013
2012-13	110,763	10.69	55.18	28.01	12.37	4.00	0.42	0.014
2011-12	106,917	10.83	55.03	27.65	12.53	4.37	0.40	0.014
2010-11	99,020	10.46	57.28	25.61	12.15	4.56	0.38	0.007
2009-10	62,297	10.40	57.48	25.08	12.25	4.81	0.38	0.006
Science								
2013-14	104,062	10.16	57.06	27.62	11.62	3.34	0.35	0.011
2012-13	101,892	10.49	56.03	27.68	12.15	3.76	0.35	0.015
2011-12	98,548	10.66	55.80	27.35	12.35	4.14	0.34	0.017
2010-11	91,021	10.22	58.45	24.96	11.95	4.29	0.34	0.007
2009-10	54,595	10.06	58.87	24.43	12.03	4.35	0.32	0.007

Notes. Results may include experience in other roles, such as Educational Aide. Columns for lowest and highest years of experience were not included, as teachers new to the public school system cause all lowest experience results to be 0, and a few highly experienced teachers can cause misleading changes in the results.

Experience of Math and Science Teachers 2010-2014

Results for teachers with nine years of experience or less

- As above, results were very similar for the two subject areas.
- Percentages were highest at 1 year of experience in academic year 2008-09, but at 4 years of experience by academic year 2011-12.
- In academic year 2013-14, the 0-year group showed the highest percentage, with a smaller peak at 6 years.

Year	Percentage by Years of Experience										
	All 0-9	0	1	2	3	4	5	6	7	8	9
Mathematics											
2013-14	56.2	8.7	6.8	4.6	5.2	5.1	5.4	5.8	5.4	4.8	4.5
2012-13	55.2	7.0	4.7	5.5	5.5	5.9	6.3	5.9	5.2	5.0	4.1
2011-12	55.0	4.7	5.6	5.8	6.4	6.6	6.3	5.6	5.3	4.5	4.3
2010-11	57.3	6.5	6.3	6.7	7.0	6.8	5.8	5.5	4.4	4.3	4.0
2009-10	57.5	6.9	7.5	7.6	7.1	5.9	5.8	4.6	4.5	4.1	3.6
Science											
2013-14	57.1	8.9	6.9	4.6	5.3	5.2	5.6	5.9	5.4	4.7	4.5
2012-13	56.0	7.2	4.7	5.6	5.7	6.1	6.4	6.0	5.2	5.0	4.1
2011-12	55.8	4.7	5.8	5.9	6.6	6.9	6.4	5.6	5.3	4.5	4.2
2010-11	58.5	6.8	6.5	7.0	7.2	6.8	5.9	5.4	4.5	4.3	4.1
2009-10	58.9	7.3	8.1	8.1	7.1	5.9	5.8	4.5	4.4	4.1	3.5

Notes. The 0-year experience group includes all teachers with less than one year of experience. A line graph like that shown in *Administrator Experience 2010-2014* was not presented because the two subject areas produced nearly identical lines.

Summary of methodology: Number Employed and Average Experience. Five tables were extracted containing identification numbers, subject areas, and years of experience for all Mathematics and Science teachers employed in academic years 2009-10 through 2013-14. From each of these tables, a new table was computed containing the total numbers and average years of experience of the two groups of teachers. The new tables were combined, and the resulting table was reformatted so that the results for each academic year could be combined with the percentages.

Summary of methodology: Percentages by Years of Experience (9-year ranges and other percentages). A table was extracted containing identification numbers, subject areas, and years of experience of all employed Mathematics and Science teachers for each academic year shown. To eliminate errors, teachers showing more than 80 years of experience were excluded. From each table, a second table was computed in which experience was grouped into 9-year ranges: 0 to 9 years, 10 to 19 years, and so on. From each of these second tables, a third table was computed containing a count of teachers for each range and subject area, and a sum of all counts for each subject area. The third table was reformatted so that the counts appeared in rows rather than columns. Then, each count was taken as a percentage of the applicable sum, and the percentages were combined with the numbers and averages. Finally, counts and percentages by years of experience were obtained for the 0 to 9 year group. The percentages were reformatted to appear in rows for the second table.
