## K-12 Educational Outcomes for Texas Children w/ Particular Focus on Poverty

How Do We As a State Scale Those Efforts That Are Working and Change Incentives/Reduce Barriers?

## What the Commit! Partnership Is

Education collective impact backbone, the largest of its kind among 60+ members of the StriveTogether national network, serving the 750,000+ students (PreK thru College) across Dallas County

## Key Facts:

- Independent 501(c)(3) founded in 2012 out of initiative by Dallas Regional Chamber and Dallas Mayor Rawlings
- Staff of $\sim 20$ dedicated FTEs and $\sim \$ 3 \mathrm{M}$ annual budget singularly focused on helping move biggest levers driving systemic change affecting outcomes
- 5 initial programmatic focuses:
o Early Childhood Education
o Middle Grades Success
o Postsecondary Attainment
o Educator Pipelines
o Data "Democratization"
- Work with ~185 partners across sectors including ISD's, higher ed, foundations, nonprofits, businesses, and civic entities

The Texas 60-by-30 State Goal Is At Risk; We Need Nearly 1M More Young Adults with a Postsecondary Credential

Educational Attainment of Texas 25-34 Year-Olds

## ...Which Result in a Challenged Cradle-To-Career Pipeline for Texas Reflecting Inadequate Educational Outcomes

State of Texas Educational Pipeline, 2015

## The Education Pipeline Is Falling Short Of The Demand253,000 High School Graduates Are Not College Ready

Texas, 2015: 5.3M public PK-12 students, 59\% Economically Disadvantaged

And TX Public PK-12 Enrollment Growth Accounts for 70\% of the U.S. Growth... What Happens Here Matters

## Public Pre-K-12 Enrollment

# Solving the Pre-K Enrollment and Pre-K Thru $3^{\text {rd }}$ Quality Gaps 

 Only 39\% of TX Students Answer ~75\% of Questions Correctly on $3^{\text {rd }}$ Grade Reading Assessment
## Early Childhood

## Fewer Than 50\% of Students Are on a Postsecondary Ready Pace in Algebra I

Middle Grades

Subsequent academic achievement in math and science never materially exceeds that seen in early grades math, with over 200,000 students annually failing to meet postsecondary pace proficiency levels (63\% of questions answered correctly)
~ \# of

## TX is Near the Top of U.S. in High School Graduation Rates-Nearly 90\% Do So—But Are Our Graduates Ready?

## Postsecondary Readiness

Just 17\% of Texas public high school students graduating annually now achieve a college ready SAT or ACT score, based on TX
state criterion, with over 250,000 students annually inadequately prepared for their postsecondary education...often requiring subsequent remediation which the student must pay for but receives no college credit for doing so

## And We Will Need To Alleviate the Negative Effects of Child Poverty, With 4 TX Cities in the Top 20

Child poverty rates among 25 largest cities:

| City | Percent |  |
| :---: | :---: | :---: |
| 1. Cleveland | 58\% |  |
| 2. Detroit | 57\% |  |
| 3. Memphis | 47\% |  |
| 4. Milwaukee | 42\% | Poverty is growing significantly |
| 5. Fresno | 41\% |  |
| 6. Atlanta | 38\% |  |
| 6. Dallas | 38\% |  |
| 8. Miami | 37\% | concentrated; Dallas, Houston, |
| 8. Philadelphia | 37\% | San Antonio and El Paso |
| 10. Houston | 35\% | currently place 6th, 10th, 20th |
| 10. Tucson | 35\% | and 20th among the 50 |
| 12. Nashville | 34\% | largest U.S. cities in child |
| 12. Phoenix | 34\% | poverty rankings, with |
| 14. Baltimore | 33\% | continued weak postsecondary |
| 14. Boston | 33\% | outcomes likely to only |
| 14. Chicago | 33\% | exacerbate problem |
| 14. Indianapolis | 33\% |  |
| 14. Los Angeles | 33\% |  |
| 19. Minneapolis | 32\% |  |
| 20. Columbus | 31\% |  |
| 20. El Paso | 31\% |  |
| 20. San Antonio | 31\% |  |
| 23. New York City | 30\% |  |
| 23. Tulsa | 30\% | 10 |
| 25. Long Beach | 29\% |  |

## Progress in Reducing No. of Bottom 5\% Schools Dallas County Has Led the Way Over the Last 2 Years

2014-2016 Difference in Students Attending IR Campus (Two Year Variance)

Dallas ISD Has Led the State's Six Major Urban Districts in Reducing the Number of Students Attending an IR Campus, Cutting Their IR Enrollment by 47\% in Two Years

In 2014 Both Dallas ISD and Houston ISD Had 43 IR Campuses...
Dallas ISD Has Since Cut Its Number of IR Campuses and Corresponding Students in HALF

## Expanding Access to Quality Early Childhood to Create Solid Foundation 100\% Kinder Readiness Could More Than Double 3rd Grade Literacy Rate

## District wants to serve incremental $\sim 15,000$ low income/ELL 3 and 4 year olds both directly and in partnership with quality private providers

- Not Kindergarten Ready Per ISIP
- Kindergarten Ready per ISIP

Fall 2015 Kindergarteners Who Attended DISD PK in 2014-2015 School Year Were Kindergarten Ready at More Than Twice a Greater Rate Than Those Who Did Not

- 3rd Grade Reading Not on Grade Level
- 3rd Grade Readng on Grade Level

Students Assessed as K-Ready in 2011 Read at Grade Level in 3 rd Grade Four Years Later at More Than $3 x$ a Greater Rate Than Those Not K-Ready in 2011

# Progress in Growing Pre-K Enrollment and K Readiness DISD Board Has Mandated Serving All 3's and 4's by 2025 

## Growing Number of Eligible Four-Year Olds Enrolling in Pre-K....

...Translating to Increased Levels of Kindergarten Readiness

Pre-K Source: Texas Academic Performance Reporting system, 2012-2015. To calculate \% of eligible children enrolled in Pre-K, actual Pre-K students are calculated as a percentage of estimated Pre-K need. Pre-K need is determined by using the free or reduced lunch 1st grade population to determine the number of 4 -year olds in need of Pre-K.
KR Source: Dallas ISD. The percent of students deemed Kindergarten Ready based on the early literacy Istation assessment administered at the beginning of the year in Kindergarten. The values presented are based on criterion data, not normed tier data.

## Looking Only at Poorer Students, Tremendous Dispersion in

 Achievement Among Campuses w/ Similar Teacher Experience Levels
## Average Teacher Experience Compared to

Pct. of EcoDis Students Meeting Phase-In Passing Standard

Average Teacher Experience Compared to

Principal and Teacher Effectiveness is Key in Turning Around Struggling Schools. Mirroring National Statistics, DISD's Improvement Required Campuses in 2014 Reflected the Smallest Percentage of Distinguished Educators ("DTR")

- Magnet School Students 3.5x More Likely Than Students Attending IR Campus to Have a Distinguished Educator (Students Attending Met Std. Campuses Were 2x More Likely)

The students reflecting the MOST need were receiving the lowest percentage of well prepared/effective educators

# Dallas ISD ACE Program <br> Pilot of 7 Perpetually Improvement Required Schools 

1. Determine most effective educators through multiple principal evaluations, student achievement growth and student survey
2. Provide financial incentives averaging $\$ 8 \mathrm{k}$ to $\$ 10 \mathrm{k}$ to better educators to relocate to most challenged schools
3. Longer school day with enrichment and after school tutoring, led by leader with high expectations
4. Measure data constantly and alter instruction accordingly

Dallas ISD ACE Program - Equitable Distribution of Effective Teachers Average Double-Digit Gains for 13 of 14 Subjects Tested, Substantially Outperforming Changes in State Performance

All ACE Students
\% Gain in Passing STAAR (2015 vs. 2016)

State of Texas
\% Gain in Passing STAAR (2015 vs. 2016)

## Dallas ISD ACE Program - Equitable Distribution of Effective Teachers

Even More Encouraging, 30\% + More Students in Early Grades Reading on Grade Level per ISIP Results Across All ACE Elementary Schools in Year 1 of ACE Program

Key Fundamental Levers for Change
Two Fundamental Plays We Instead Try to Remediate Around

1. Every child shall arrive at Kindergarten prepared and ready for school
2. Every child shall be placed in front of an effective, well prepared educator

## Detailed Recommendations

1. Full Day Funding to Increase Pre-K Enrollment
2. Increase EC Quality Thru EC-3rd Teacher Certification
3. Remove Rating Incentives to Place Better Teachers in Later Grades (Make $3^{\text {rd }}$ Grade More Heavily Weighted)
4. Determine Better Educators, Then Incent Them to Relocate En Masse to Turnaround More Challenged Schools
5. Increase Rigor of Current Educator/Principal Preparation Pipelines and Increase Public Transparency of Results
6. Make a Career in Education More Aspirational
