PEDAGOGY AND PROFESSIONAL RESPONSIBILITIES (6–12) STANDARDS FOR TRADE AND INDUSTRIAL EDUCATION

Standard I. Instructional Design: The T&I teacher designs instruction appropriate for all students (Grades 6–12) that reflects an understanding of relevant content and is based on continuous and appropriate assessment.

Standard II. Instructional Management and Safety: The T&I teacher creates a classroom environment of respect and rapport that fosters a positive climate for learning, equity, and excellence.

Standard III. Instructional Delivery: The T&I teacher promotes student learning by providing responsive instruction that makes use of effective communication techniques, instructional strategies that engage students in the learning process, and timely, high-quality feedback.

Standard IV. Professional Responsibilities: The T&I teacher exhibits professional roles and responsibilities and adheres to legal and ethical requirements of the profession.

Standard V. Work-Based Learning: The T&I teacher understands work-based learning approaches and incorporates relevant experiences into the Trade and Industrial curriculum (Texas Essential Knowledge and Skills [TEKS]).

Standard VI. Collaborative Relationships: The T&I teacher understands the significant role of external and internal partnerships and enters into collaborative relationships with industry, organized labor, parents/guardians, agencies, proprietary and postsecondary institutions, and the community in delivering the Trade and Industrial curriculum (Texas Essential Knowledge and Skills [TEKS]).

Standard VII. Entrepreneurship: The T&I teacher understands the importance of essential entrepreneurial skills and incorporates these skills into the Trade and Industrial curriculum (Texas Essential Knowledge and Skills [TEKS]).

Standard VIII. Integration of Employability Skills: The T&I teacher understands and integrates employability skills into the Trade and Industrial curriculum (Texas Essential Knowledge and Skills [TEKS]).

Standard IX. Leadership: The T&I teacher understands and fosters the development of appropriate leadership skills through the delivery of the Trade and Industrial curriculum (Texas Essential Knowledge and Skills [TEKS]) and the implementation of the T&I student organization.

Standard X. Technology: The T&I teacher understands and integrates relevant technology in delivering the Trade and Industrial curriculum (Texas Essential Knowledge and Skills [TEKS]).
Pedagogy and Professional Responsibilities for Trade and Industrial Education Standards — FINAL

Approved on October 5, 2001

Standard I. Instructional Design: The T&I teacher designs instruction appropriate for all students (Grades 6–12) that reflects an understanding of relevant content and is based on continuous and appropriate assessment.

Teacher Knowledge: What Teachers Know

Teachers of Students in Grades 6–12

The beginning teacher knows and understands:

1.1 the developmental characteristics of students in grades 6 through 12;

1.2 the implications of students’ learning styles, diverse backgrounds, skills, interests, and abilities and their impact on planning appropriate instruction;

1.3 the importance of integrating academics into trade and industrial education;

1.4 the content and performance standards as outlined in the Texas Essential Knowledge and Skills (TEKS) for Trade and Industrial Education;

1.5 pedagogical practices that are designed to maximize student learning;

1.6 the importance of developing a program vision and instructional goals and objectives that are clear, relevant, and assessed according to current workplace standards;

1.7 the importance of aligning instructional goals with campus goals, district goals, and current industry standards;

1.8 how to locate, develop, and use materials and resources for preparing instruction, presenting lessons, and assessing student learning;

1.9 how to conduct an occupational/task analysis and to validate it with a local advisory committee;

1.10 how to plan lessons and structure units that progress in a logical sequence and are based on industry standards and procedures;

1.11 how to monitor and assess instructional effectiveness;

Texas State Board for Educator Certification

Teacher Knowledge: What Teachers Know

Teachers of Students in Grades 6–12 (continued)

Application: What Teachers Can Do

Teachers of Students in Grades 6–12

The beginning teacher is able to:

1.1s plan lessons that reflect an understanding of students’ social and developmental characteristics;

1.2s create lessons to address students’ diverse backgrounds, skills, interests, and abilities;

1.3s plan and use a variety of techniques to motivate students and to address their learning styles and preferences;

1.4s incorporate into the curriculum the Texas Essential Knowledge and Skills (TEKS) for Trade and Industrial Education;

1.5s plan instruction that makes connections across disciplines;

1.6s develop a program vision and instructional goals and objectives that are clear, relevant, and assessed according to industry standards;

1.7s locate, develop, and use materials and industry resources to design instruction that enhances student achievement;

1.8s design and use cognitive- and performance-based assessments;

1.9s analyze assessment results to determine students’ strengths and needs and to plan instruction;

1.10s plan instructional activities that progress sequentially, support stated instructional goals based on the Texas Essential Knowledge and Skills (TEKS), and are validated by a local advisory committee;

Application: What Teachers Can Do

Teachers of Students in Grades 6–12 (continued)
Standard II. Instructional Management and Safety: The T&I teacher creates a classroom environment of respect and rapport that fosters a positive climate for learning, equity, and excellence.

Teacher Knowledge: What Teachers Know

### Teachers of Students in Grades 6–12

The beginning teacher knows and understands:

- **2.1k** the importance of creating a learning environment in which diversity and individual differences are respected;
- **2.2k** how to establish a positive classroom climate that fosters active engagement in learning among students;
- **2.3k** the importance of communicating enthusiasm for learning;
- **2.4k** the necessity of communicating expectations for student learning;
- **2.5k** how classroom and laboratory procedures affect student learning and achievement;
- **2.6k** how to utilize flexible grouping to facilitate cooperation and productivity;
- **2.7k** the importance of time management for effective classroom functioning;
- **2.8k** routines and procedures for managing and using instructional resources;
- **2.9k** current local, state, and federal safety regulations (e.g., OSHA, wage and hour, EPA, HAZMAT, child labor laws);
- **2.10k** teacher liability issues related to the classroom and the laboratory;
- **2.11k** discipline management techniques in a classroom and laboratory setting;
- **2.12k** relevant safety practices in the classroom and laboratory;

### Application: What Teachers Can Do

### Teachers of Students in Grades 6–12

The beginning teacher is able to:

- **2.1s** use strategies to ensure that classroom interactions are polite, respectful, and professional;
- **2.2s** establish instructional goals, tasks, interactions, assessments, and other elements of the classroom and laboratory environment that convey high expectations for student achievement and meet industry standards;
- **2.3s** communicate and implement classroom rules and procedures, including an effective discipline management plan to promote a safe and effective learning environment;
- **2.4s** organize and manage groups to ensure that students work together, and promote students’ ability to assume responsible roles and develop collaborative skills and individual accountability applicable to industrial practice;
- **2.5s** schedule activities and manage class time to maximize student learning and safety;
- **2.6s** implement routines and procedures for the safe and effective management of instructional resources;
- **2.7s** coordinate the performance of noninstructional duties with instructional activities;
- **2.8s** apply local, state, and national safety regulations to provide a safe learning environment for students;
**Standard III. Instructional Delivery:** The T&I teacher promotes student learning by providing responsive instruction that makes use of effective communication techniques, instructional strategies that engage students in the learning process, and timely, high-quality feedback.

### Teacher Knowledge: What Teachers Know

#### Teachers of Students in Grades 6–12

The beginning teacher knows and understands:

- 3.1k principles and strategies for communicating effectively in various teaching and learning contexts, including work-based learning and laboratory;
- 3.2k spoken and written language appropriate to students’ backgrounds, technical skills levels, and work experience;
- 3.3k strategies for engaging in effective questioning and facilitation of effective student discussions;
- 3.4k the effective use of instructional materials, resources, and technologies that are appropriate and engaging for students in varied learning situations;
- 3.5k strategies and techniques for using instructional groupings to promote student learning in classroom and work-based learning settings;
- 3.6k strategies and factors affecting student motivation;
- 3.7k techniques for structuring and pacing lessons to promote student participation and learning;
- 3.8k how to use constructive feedback to guide student learning;
- 3.9k how to monitor and modify instruction (e.g., the importance of encouraging independent study, work-based learning, cooperative learning and management of learning activities); and
- 3.10k the use of technology for enhancing the teaching and learning environment.

### Application: What Teachers Can Do

#### Teachers of Students in Grades 6–12

The beginning teacher is able to:

- 3.1s communicate directions and procedures clearly, accurately, and with an appropriate level of detail (e.g., procedures, manuals, technical publications);
- 3.2s use effective interpersonal skills (including both verbal and nonverbal skills) to actively engage learners;
- 3.3s use effective communication techniques that enable students to understand content (including questioning and student-led discussions and instructor-led small group discussions);
- 3.4s select and use instructional materials, resources, and technologies that are suitable for instructional goals and actively engage students in the instructional process;
- 3.5s deliver content that capitalizes on students’ prior knowledge, skills, and experiences;
- 3.6s pace lessons in response to student learning needs;
- 3.7s use strategies that encourage self-motivation, creativity, and active engagement in learning;
- 3.8s use appropriate trade terminology and language to enhance student learning;
- 3.9s provide each student with timely feedback that is accurate, constructive, and specific;
- 3.10s adjust instruction based on ongoing cognitive- and performance-based assessments of student knowledge and skills;

---

*Texas State Board for Educator Certification*
Standard IV. Professional Responsibilities: The T&I teacher exhibits professional roles and responsibilities and adheres to legal and ethical requirements of the profession.

Teacher Knowledge: What Teachers Know

**Teachers of Students in Grades 6–12**

The beginning teacher knows and understands:

4.1 *k* the appropriate ways of working and communicating effectively with educational partners (i.e., parents/guardians, business, other professionals, school boards, community organizations);

4.2 *k* how to identify and seek the support of resource persons;

4.3 *k* the benefits of participating in program, school, and community activities;

4.4 *k* the importance of participating in professional development activities to enhance trade, technical knowledge, and pedagogical skills related to trade and industrial education;

4.5 *k* the characteristics, goals, and procedures associated with teacher appraisal systems;

4.6 *k* the legal requirements for educators (e.g., those related to special education, Section 504 of the Rehabilitation Act, child labor laws, OSHA, students’ and families’ rights, student discipline, equity, child abuse, Office of Civil Rights);

4.7 *k* ethical guidelines, policies, and procedures for educators in Texas (e.g., in relation to confidentiality, interactions with students and others in the school and workplace, code of ethics);

4.8 *k* the procedures and requirements for maintaining accurate student records (e.g., grades, career portfolios, work records, transition plans);

4.9 *k* the importance of adhering to required procedures for administering state- and district-mandated assessments;

**Application: What Teachers Can Do**

**Teachers of Students in Grades 6–12**

The beginning teacher is able to:

4.1 *s* interact appropriately with families and educational partners that have diverse characteristics, backgrounds, needs, skills, and abilities;

4.2 *s* conduct parent/guardian, teacher, and industrial advisory committee meetings;

4.3 *s* maintain supportive and cooperative relationships with educational partners (internal and external);

4.4 *s* engage in collaborative decision making and problem solving with educational partners to support students’ learning and well-being;

4.5 *s* perform professional responsibilities and duties outside the classroom, laboratory, and work-based learning settings (e.g., serve on committees, volunteer to participate in events and project work with technical advisory committees);

4.6 *s* maintain membership in professional associations and actively participate in various types of professional development opportunities (e.g., conferences, workshops, work with mentors and other support systems);

4.7 *s* update occupational specialization and pedagogical knowledge and skills;

4.8 *s* use self-assessment to identify strengths, challenges, and potential problems; improve teaching performance; and achieve instructional and professional development goals;

4.9 *s* use knowledge of legal, ethical, and workplace guidelines to develop behaviors in education and work-based situations;
Standard V. Work-Based Learning: The T&I teacher understands work-based learning approaches and incorporates relevant experiences into the Trade and Industrial curriculum (Texas Essential Knowledge and Skills [TEKS]).

Teacher Knowledge: What Teachers Know

Teachers of Students in Grades 6–12

The beginning teacher knows and understands:

5.1k the connections between classroom learning and work-based learning experiences;

5.2k work-based learning models (e.g., mentoring, job shadowing, career preparation co-op experiences, internships/externships and capstone experiences);

5.3k required education and training associated with career concentrations;

5.4k how to identify and evaluate work-based performance standards to meet individual student needs;

5.5k how to develop an individualized training plan for paid and unpaid work-based learning experiences; and

5.6k the importance of collecting student follow-up data to determine program effectiveness.

Application: What Teachers Can Do

Teachers of Students in Grades 6–12

The beginning teacher is able to:

5.1s incorporate teaching strategies unique to work-based models;

5.2s assist students in the transition from program completion to employment and/or higher education (e.g., employment opportunities, career preparation requirements, career development resources, career concentrations);

5.3s match work-based learning activities with student needs and goals;

5.4s comply with the requirements of work-based training;

5.5s evaluate student progress based on work-based standards; and

5.6s analyze follow-up data to determine program effectiveness.
**Standard VI. Collaborative Relationships:** The T&I teacher understands the significant role of external and internal partnerships and enters into collaborative relationships with industry, organized labor, parents/guardians, agencies, proprietary and postsecondary institutions, and the community in delivering the Trade and Industrial curriculum (Texas Essential Knowledge and Skills [TEKS]).

### Standard VII. Entrepreneurship

The T&I teacher understands the importance of essential entrepreneurial skills and incorporates these skills into the Trade and Industrial curriculum (Texas Essential Knowledge and Skills [TEKS]).

#### Teacher Knowledge: What Teachers Know

**Teachers of Students in Grades 6–12**

The beginning teacher knows and understands:

7.1k  state and federal laws and regulations related to establishing and operating a business;

7.2k  business systems and processes for the delivery of goods and services;

7.3k  the importance of human and public relations in managing businesses;

7.4k  how to establish and organize a business;

7.5k  common business and management practices (e.g., inventory control, hiring and termination procedures);

7.6k  resources necessary for business startups and financing;

7.7k  how to identify, serve, and maintain internal and external customers; and

7.8k  basic organizational structures for business.

#### Application: What Teachers Can Do

**Teachers of Students in Grades 6–12**

The beginning teacher is able to:

7.1s  conduct a market analysis and develop a business plan;

7.2s  use labor market information to analyze future workforce opportunities; and

7.3s  utilize marketing and advertising procedures.
**Standard VIII. Integration of Employability Skills: The T&I teacher understands and integrates employability skills into the Trade and Industrial curriculum (Texas Essential Knowledge and Skills [TEKS]).**
