Secondary Submitter: Person who approves requests for
access to a specific TEA application only for an organization.
Submit TEASE Requests
Quick Reference
Submit TEASE Requests
Requests for access to many TEA web applications are
completed and submitted online via the Texas Education
Agency Security Environment (TEASE). The protection of
records in TEA systems depends on the critical role of the
person who is the TEASE Submitter, usually the head of an
organization, who reviews staff requests and submits correct
and appropriate requests to TEA.
The online form to request access to a TEA application can be
completed by anyone with access to a computer connected
to the Internet. As the submitter, you are the first and most
important line of review and approval of requests.
Submitter’s Responsibilities
Each organization (district, charter school, ESC, TEA division)
that uses TEA web applications must have a TEASE Submitter
who can review and approve requests entered by other users
in the organization for access to TEA applications. Each
organization must have one Primary Submitter but may also
have multiple Secondary Submitters.
Primary Submitter: Superintendent or Executive Director
listed in TEA’s AskTed directory, or the Legal Authority listed
in TEA’s Business Partner Directory (BPD); has authority to
approve requests for all TEASE applications for the
organization.
Primary Submitter Designee: Person acting on behalf of the
Primary Submitter with the same rights and responsibilities to
review requests for all TEASE applications (requires board
approval). Recommended when the organization head needs
another person to take primary responsibility for all or most
access requests.
Secondary Submitter: Person who approves requests for
access to a specific TEA application only for an organization.
Recommended for organizations with large numbers of users
for specific web applications when a person other than the
Primary Approver will take responsibility for reviewing those
requests.
When you submit a request for a TEASE account or access to
a TEA application, you confirm that:
• You have verified the identity of the person for whom
access is requested.
• You agree this person needs access to the application
and its data (including confidential data).
• You agree that the role requested is appropriate to tasks
this person must perform.
• You have reviewed the information (including email
address, name, county-district or ESC number, etc.), and
role requested for accuracy and appropriateness.
• The person for whom access is requested is informed of
his or her responsibilities regarding data access,
protecting user name and password information, and
confidentiality.
• The superintendent or head of your organization
approves of this request.
In addition to reviewing staff requests for access, the Primary
Approver must conduct periodic reviews of TEAL access for
the organization’s users and remove access for users who are
no longer employed there or no longer need the access.
Request Access to User Administration+
To review account requests submitted by staff in your
organization, you will need to be set up with a TEASE user
name and password and access to the User Administration+
application. To request access:
If you already have a TEASE account:
1. Open Internet Explorer and log in at
https://seguin.tea.state.tx.us/apps/logon.asp/ (or log in via
your TEAL account if you have linked accounts).
2. Click Add/Modify Application Access at the top right.
3. Select User Administration+ from the drop down menu.
4. From the list of roles, select the Primary Request
Submitter role.
5. In the field for Organization Scope, enter your County
District Number (or other TEA-assigned organization
number if not a district/charter school/ESC).
6. Click Submit.
Your request will be reviewed at TEA and the system will send
an email notification to you when all reviews have are complete.
If you do not yet have a TEASE account, or you do not have
one for the organization in which you now work:
1. Open Internet Explorer and go to
2. Select User Administration+ from the drop down menu.
3. From the list of roles, select the Primary Request
Submitter role.
4. In the field for Organization Scope, enter your County
District Number (or other TEA-assigned organization
number if not a district/charter school/ESC).
5. Click Submit.
Your request will be reviewed at TEA and the system will send
email notification to you when all reviews have are complete.
Requests for the TEASE account (user name and password)
and access to User Administration+ are reviewed separately,
and so you will receive three separate email notifications.
Log On to User Administration+
After you have been set up with a user name and password
and access to the User Administration+ application, you can
log on to:
• Submit requests for access to TEA for approval and
setup.
• View the status of requests and lists of active users in
your organization.
• Request a TEASE account for a new user in your
organization.
To log on:
1. Open Internet Explorer and go to
https://seguin.tea.state.tx.us/apps/logon.asp/.
2. At the log on page, type your user name and password
and click Continue.
When you log on for the first time, the system prompts
you to choose a new password and to enter a question
at the top right.
3. Select User Administration+ from the drop down menu.
4. From the list of roles, select the Primary Request
Submitter role.
5. In the field for Organization Scope, enter your County
District Number (or other TEA-assigned organization
number if not a district/charter school/ESC).
6. Click Submit.
Your request will be reviewed at TEA and the system will send
email notification to you when all reviews have are complete.
Requests for the TEASE account (user name and password)
and access to User Administration+ are reviewed separately,
and so you will receive three separate email notifications.
Log On to User Administration+
After you have been set up with a user name and password
and access to the User Administration+ application, you can
log on to:
• Submit requests for access to TEA for approval and
setup.
• View the status of requests and lists of active users in
your organization.
• Request a TEASE account for a new user in your
organization.
To log on:
1. Open Internet Explorer and go to
https://seguin.tea.state.tx.us/apps/logon.asp/.
2. At the log on page, type your user name and password
and click Continue.
When you log on for the first time, the system prompts
you to choose a new password and to enter a question
and answer known only to you - to be used if you forget your password.

3. From the list of the applications to which you have access, click User Administration+. The system displays the main menu.

**The Request Process for Your Staff**

In most cases, the person who needs a TEASE account (user name and password) and/or access to an application completes the form online (at https://seguin.tea.state.tx.us/appsgn/um/apply.aspx) and the system sends it to the submitter’s list of requests to review. However, if necessary, you can complete the request form for a person in your organization as part of the process to submit it.

When requests are submitted, TEASE forwards them to appropriate TEA program staff, TEASE Approvers. The TEA approver may approve the request as is, modify it, or deny it. The system notifies the person for whom access was requested at the email address supplied in the online request. Requests for TEASE accounts (user names and passwords) and access to an online application are approved separately, and the user is notified with separate email messages. The user name and password do not permit access until all related requests for application access have been approved.

To verify at a later time whether or not access was granted by TEA, you can log on to User Administration+ and click View Decisions Made, or look up the user. Organization submitters are not notified by email but can log on to User Administration+ and confirm decisions.

**Submit Completed Requests to TEA**

When a requestor in your organization completes and sends an online form, it is routed to your list of requests to review and submit in User Administration+.

IMPORTANT: A new user’s account request must be submitted before the request for application access can be viewed in the list and selected for review.

To review and submit requests to TEA:

1. Log on to User Administration+.
2. At the main menu, select filtering options if you want to narrow the list of requests to review.
3. Click the Submit Requests for Approval button. The system displays a list of requests waiting for review.
4. Select a request and click on the user name. Since new users do not have user names assigned until and if their requests are approved, they are listed with the temporary user name unknown.
5. Carefully review the request to verify the identity of the requestor and the appropriateness of the request. Since all notifications are sent to the email address on the form, please verify the address is correct and is specific to the requestor (not a group address).
6. To submit the request to TEA for approval, click Submit Request. If you decide to deny the request, select a reason from the drop list below the request and then click Deny Request. If you deny a request, it is never forwarded to TEA.

As confirmation, the system displays the request with submitter information and the request status updated. When the request is processed by TEA staff, the system sends email notification to the person for whom access was requested.

**Modify User Information or Revoke Access**

For security purposes, a user can make limited modifications only to his or her TEASE account information. Changes to user information, including name, address, birthday, organization, or application role, must be made by the submitter and approved by TEA.

To update information for a user in your organization:

1. Log on to User Administration+.
2. From the main menu, click View Active Users or Look Up Users to find the user’s existing information.
3. From the list, click the user name.
4. To expand and view details, click the plus signs or links.
5. Select the information you need to modify for the user: To modify details about the user, mark the circle to the right of the user name and then click Modify Selected.
   To modify the role or parameters that define access to an application, click to mark the circle to the right of the application name and then click Modify Selected. Enter changes and check to affirm the information is correct.
   To revoke access to one application, click to mark the circle to the right of the application name and then click Revoke Selected.
6. Click Submit Request. The system submits the modified request to TEA for approval and displays a generic confirmation.

When the request is processed by TEA staff, the system sends email notification to the person for whom access was requested.

IMPORTANT: When someone in your organization leaves or changes jobs, revoking user privileges to any TEA applications is crucial. Submit a revocation request as soon as possible. Failure to do so could result in unauthorized access of your network resources or sensitive information.

**View Decisions Made**

To view the status of requests you have submitted:

1. Log on to User Administration+ and, if you want to narrow your list of search results, select filtering options.
2. Click the View Decisions Made button.
3. From the list, click the user name for the request you want to view. The status is noted in the upper right corner.

Each request to add, modify, or revoke an application is processed individually, so some users are associated with multiple requests.
**View Active Users or Look Up Users**

You can view a list of all active users for your organization or search for a single user. Results do not include users whose privileges to all applications have been revoked.

To view a list of users:
1. Log on to User Administration+.
2. Select from the filtering options on the right or, to view all users for all applications, leave options blank.
3. Click the View Active Users button.
4. To sort users, click a column heading. To view details for any user, click the corresponding user name.

To look up a user:
1. Log on to User Administration+ and click the Look Up Users button.
2. Select desired search criteria. To list only users with active access to a specific application, select the application.
3. Click Search. If you click a user name the system displays details for that user.

**Request a New Account for a Staff Member**

To request a TEASE account for someone in your organization:
1. Log on to User Administration+ at https://seguin.tea.state.tx.us/apps/logon.asp/.
2. To verify the person does not already have a TEASE account, click Look Up Users and search using last name and “having applications” set to Any.
   If the person is already listed as a user, you do not need to request a new account. Instead, submit a request to add another application to the person’s access list (see below).
3. If you verify the person does not have a TEASE account, return to the main menu and click the Request New Account button.
4. From the drop list, select the application needed by the person for whom you are requesting access and click Continue.

**NOTE:** If the application is not listed, see the list of applications at TEA Secure Applications Information to see if the application requires a different request process.

5. Enter all required information. Complete the form as if you were the person requesting access and then click Continue.

**IMPORTANT:** Notification of approval or denial is sent to the email address entered here, so accuracy is crucial; for security reasons, do not use a group address.

6. Add address information if needed and verify other information is correct. If you need to make corrections on the final form, click Back and enter corrections. Then click Continue.
7. Verify, add comments or special instructions if needed, and click to affirm information is correct.

**IMPORTANT:** Your affirmation is required and is recorded in system records.

To print this page for your records, right-click and select Print.

8. Click Continue.

9. Select the role appropriate to the tasks you need to perform, (for details, click Role Descriptions), and select or enter any additional information needed. Then click Continue.

10. Verify, add comments or special instructions if needed, and click to affirm information is correct.

11. Click Submit Request. **Your request is converted into two requests** – one for a TEASE account (user name and password) and one for access to the specific application needed.

The system submits your request to TEA for approval. Notification of TEA’s decision is sent by email to the person for whom you have requested changes.

**Request New Application Access for a Staff Member**

If a user in your organization needs access to another TEA application, you or the user can request the additional access.

If you request access for him or her:
1. Log on to User Administration+.
2. At the main menu, click Look Up Users and search using last name and “having applications” set to Any OR click View Active Users to list all users.
3. Click the user name to view details. Verify the user is the person for whom you want to make a request.
4. Review the user information for accuracy. If the information needs to be updated, modify and submit corrections, and then return to the main menu and look up the (corrected) user again to complete the new request.
5. On the User Details screen, click New Request.
6. Complete and submit the forms for the person (as if you were the person) to request the additional application. On the final step, be sure to affirm information is correct and click Submit Request.
7. At the confirmation message, click Continue to return to the main menu.

The system submits your request to TEA for approval. Notification of TEA’s decision is sent by email to the person for whom you have requested changes.

**Designate All Submitter Responsibilities**

In large organizations, or under special circumstances such as an organization head’s extended absence, designating alternate staff to review and approve access requests can be helpful. This may enhance security as the designated alternate may have more direct oversight of programs or staff involved.

A Primary Request Submitter Designee can act on behalf of the Primary Submitter with the same approver rights to all TEA web applications. In addition to the online request, which must be approved by the Primary Approver and TEA, this
responsibility requires board approval. This designation must be renewed when there is a change in staffing for either the Primary Submitter or the designee.

To set up a Primary Request Submitter Designee for your organization:

1. Arrange for the designated alternate to be considered for approval by the board.
2. After the meeting, send a copy of the board meeting minutes showing approval to TEA at teahelpdesk@tea.texas.gov.
3. Have the person who is the designated alternate go through the steps above to request access to User Administration+ as a Primary Request Submitter Designee.
4. The Primary Submitter logs on to TEASE and approves the online request at the organization level.
5. TEA reviews the request and meeting minutes. If approved, the system sends email notification to the designee.

Designate Submitter Responsibility for a Specific Application

Secondary Request Submitters review requests for access to one specific TEA application, such as EDIT+ or eGrants, for an organization. This is helpful when a staff member other than the superintendent or director is knowledgeable about the program and the application involved. This responsibility requires online approval by the Primary Submitter and TEA. Only requests for a specific application are routed to the Secondary Submitter; all others are routed to the Primary Submitter, or Submitter Designee if one is in place.

To set up a Secondary Request Submitter for a TEA application used by your organization:

1. Have the person who is the designated alternate go through the steps above to request rights to approve, selecting “Secondary Request Submitter” and the desired application.
2. The Primary Submitter (or Designee, if one exists) logs on to TEASE and approves the online request at the organization level.
3. TEA reviews the request. If approved, the system sends email notification to the alternate.

Security Assurance

If your role in a TEA application involves viewing confidential data, TEASE prompts you periodically to affirm that you understand and will adhere to laws and policies designed to protect this data.
