Section I: Introduction
The Performance-Based Monitoring Analysis System (PBMAS)

The PBMAS is a district-level, data-driven monitoring system developed and implemented annually by Performance-Based Monitoring (PBM) staff in coordination with other Texas Education Agency (TEA) divisions and departments. The PBMAS 2016 Manual is intended to serve as a comprehensive technical resource for the PBMAS, which is used by TEA as one part of its annual evaluation of school districts’ performance and program effectiveness.

Guiding Principles of the PBMAS

The PBMAS is based on the following guiding principles:

School District Effectiveness. PBMAS is intended to assist school districts in their efforts to improve local performance.

Statutory Requirements. PBMAS is designed to meet statutory requirements.

Indicator Design. PBMAS indicators reflect critical areas of student performance, program effectiveness, and data integrity.

Maximum Inclusion. PBMAS evaluates a maximum number of school districts by using appropriate alternatives to analyze the performance of districts with small numbers of students.

Individual Program Accountability. PBMAS is structured to ensure low performance in one program area cannot be offset by high performance in other program areas or lead to interventions in program areas where performance is high.

High Expectations. PBMAS promotes high expectations for all students in all school districts. PBMAS cut points will be adjusted over time to ensure continued student achievement and progress.

Annual Statewide Evaluation. PBMAS ensures the annual evaluation of all school districts in the state.

Public Input and Accessibility. The design, development, and implementation of the PBMAS are informed by public input received through meetings with school districts and education service centers, the public comment period included in the annual rule adoption of PBMAS manuals, and ongoing Texas Education Telecommunications Network (TETN) sessions. The performance information PBMAS generates is available to the public.

System Evolution. PBMAS is a dynamic system in which indicators are added, revised, or deleted in response to changes and developments that occur outside of the system, including new legislation and the development of new assessments.

Coordination. PBMAS is part of an overall agency coordination strategy for the performance-based evaluation of school districts.

Changes to the PBMAS in 2016

The 2016 PBMAS includes several key changes from the 2015 system. Many of these changes are marked in the manual as “New!” for easy reference.

Revisions to the State of Texas Assessments of Academic Readiness (STAAR) are reflected in the 2016 PBMAS with the incorporation of STAAR performance standards in accordance with the Texas Administrative Code (19 TAC §101.3041). Any STAAR mathematics data from the 2015 PBMAS used in the 2016 PBMAS for aggregation or required improvement purposes reflect the new grades 3-8 STAAR mathematics performance standards. Additionally, the 2016 PBMAS includes STAAR data based on the Student Success Initiative (SSI) grade-advancement requirements that were reinstituted for mathematics in the 2015-2016 school year. New cut points are being implemented for the STAAR end-of-course (EOC) indicators, and performance level (PL) assignments are added to the STAAR EOC English language arts (ELA, i.e., English I and English II) indicators. New cut points are being implemented for the annual dropout rate and graduation rate indicators in all four program areas. The Recommended High School Program (RHSP) and Distinguished Achievement Program (DAP) indicators in all four program areas were deleted. Other changes unique to each PBMAS program area are summarized below.

Bilingual Education and English as a Second Language (BE/ESL)

In addition to the new cut points for the graduation rate indicators referenced above, the graduation rate in the BE/ESL program area will be determined based on students identified as English Language Learners (ELLs) at any time while attending Grades 9-12 in a Texas public school rather than determined only based on students identified as ELLs in their last year in a Texas public school. This change provides a more comprehensive evaluation of ELL graduation rates and increases the number of students included in the indicator, thereby increasing the number of districts meeting minimum size requirements and evaluated under the indicator.

Career and Technical Education (CTE)

For the 2015 PBMAS, special PL provisions were added to CTE Indicator #4(i-iv) (CTE SPED STAAR EOC Passing Rate). These provisions were designed to address the inclusion of STAAR A and STAAR Alternate 2 results. For the 2016 PBMAS, the targeted hold harmless component of those provisions will be discontinued, and PL assignments will be based on the new cut points applicable to the other CTE EOC indicators.

No Child Left Behind (NCLB)

For the 2016 PBMAS, there are no changes specific to the NCLB program area. However, indicators in this program area are being implemented based on the overall changes described in this manual that affect all PBMAS program areas in 2016.

Special Education (SPED)

For the 2015 PBMAS, special PL provisions were added to SPED Indicator #1(i-v) (SPED STAAR 3-8 Passing Rate) and SPED Indicator #3(i-iv) (SPED STAAR EOC Passing Rate). These provisions were designed to address the inclusion of STAAR A and STAAR Alternate 2 results. For the 2016 PBMAS, the targeted hold harmless component of those provisions will be discontinued. However, the PL 4 assignment added in the 2015 PBMAS will continue to be assigned in the 2016 PBMAS. Additionally, PL 3 and PL 4 assignments for SPED Indicator #1(i-v) will be based on adjusted cut points.

STAAR® is a registered trademark of the Texas Education Agency.
The 6-11 and 12-21 age groups that were used for the SPED Regular Class ≥80% Rate and SPED Regular Class <40% Rate indicators have been combined into one 6-21 age group, resulting in the deletion of two indicators. To meet federal requirements under 20 U.S.C. 1418(d) and 34 Code of Federal Regulations (CFR) §300.646, the two remaining 6-21 age group indicators will include Report Only designations of significant disproportionality based on race or ethnicity.

Additionally, the 2016 PBMAS marks the beginning of a transition to a new PL structure for SPED Indicator #11 (SPED African American [Not Hispanic/Latino] Representation), SPED Indicator #12 (SPED Hispanic Representation), and SPED Indicator #13 (SPED LEP Representation). This new structure will, beginning with the 2017 PBMAS, replace the current percentage point difference with a disproportionality rate. More detailed information on these changes can be found in the SPED section of this manual.

Planning for the Future: 2017 and Beyond

Ongoing implementation of the PBMAS will include the addition of new indicators, revision of current indicators, and deletion of indicators that are no longer necessary. Factors independent from the PBMAS itself are also likely to have an impact on the future versions of PBMAS. These factors include the following:

- legislatively required changes to the statewide assessment program, STAAR;
- reauthorizations of federal statutes, including the Elementary and Secondary Education Act;
- results of any state or federal reviews, guidance, and regulations;
- changes to data collection definitions and processes; and
- legislation from a regular or special legislative session.
Section II: Components of the 2016 PBMAS
Data Sources

Data used in the PBMAS come from a variety of sources. Student assessment data are obtained from data files provided by TEA’s test contractor. Data obtained from areas within TEA include dropout and longitudinal graduation data from the Research and Analysis Division and Public Education Information Management System (PEIMS) data from the Statewide Education Data Systems Division. On rare occasions, a data source used in the PBMAS may be unintentionally affected by unforeseen circumstances, including natural disasters or test contractor administration issues. Should those circumstances occur, TEA will consider how or whether that data source will be used to ensure PBMAS calculations, performance level assignments, and interventions are implemented appropriately and in alignment with the system’s guiding principles. Specific information about data sources is included in the description of each indicator in Section III of this manual.

The calculations for each indicator are based on the most current data available and, for ease of understanding, are presented in this manual as single-year calculations. In certain instances, however, multiple years of data are combined in order to meet minimum size requirements. (See Minimum Size Requirements and Special Analysis section.)

Data Exclusions

Students described under Texas Education Code, §39.054(f) are excluded from the computation of annual dropout rates. In addition, the results of students assessed with STAAR L in one or more subject areas are excluded from PBMAS STAAR performance indicators. Any other exclusions that have been applied to a specific indicator are identified in the description of the indicator in Section III of this manual.

No Data Available for an Indicator

A district with no data available for evaluation receives a designation of No Data, meaning the district cannot be evaluated because of an absence of data. For example, if a district had no migrant students to report in a particular year’s data collection, then for any migrant indicator based on that data collection, the PBMAS report for the district will indicate a performance level (PL) of No Data. Districts with one or more PL designations of No Data should examine their local data collection and submission procedures as well as the Data Source section for each PBMAS indicator to confirm the accuracy of the No Data designation. It is the ongoing responsibility of districts to ensure students are coded correctly for both PEIMS and student assessment data. In addition, data validation analyses and reviews are conducted by the agency as part of its performance-based monitoring activities.

Accountability Subset

Students who are enrolled in a district on October 30, 2015 (fall snapshot date) and test in the same district in the fall of 2015 or spring of 2016 are considered to be in the “accountability subset” while students who are enrolled in a district on October 30, 2015 but not enrolled in the same district for fall 2015 or spring 2016 testing are not in the accountability subset. The accountability subset for students who test in the summer of 2015 is based on the 2014 fall snapshot date. Whether the accountability subset is used for a particular indicator is noted in the description of the indicator.

Rounding

All PBMAS calculations are rounded to one decimal place. For example, 79.877% is rounded to 79.9%.

Masking

District data are released to each school district as allowed under the Family Educational Rights and Privacy Act (FERPA). PBMAS data released to the public are masked to protect student confidentiality.
Performance Levels

A performance level (PL) is the result that occurs when a standard is applied to a district’s performance on an indicator. The PLs available for indicators in the 2016 PBMAS include Not Assigned (NA) (including Not Assigned through SA or DI), 0, 0 SA, 0 RI, 1, 1 SA, 2, 2 SA, 3, and 3 SA. SA refers to special analysis, which is described in the Minimum Size Requirements and Special Analysis section. RI refers to Required Improvement, which is also described in a separate section. DI refers to data integrity and is used in combination with the NA performance level to address situations where compromised data render any other performance level impossible to determine. Beginning with the 2016 PBMAS, Significant Disproportionality (SD) will be noted for certain Report Only indicators in the special education program area. (See Report Only Indicators section.)

PBMAS indicators include a range of PLs, and each PL range has an established set of cut points. Throughout the PBMAS indicators, the higher the PL is, the lower the district’s performance is.

Changes to PBMAS Cut Points

As part of the annual PBMAS development cycle, the cut points for each PBMAS indicator are evaluated. A decision to adjust cut points for one or more indicators is based on a careful consideration of the following:

- whether a state or federal goal has been identified for the indicator;
- performance of the state on each indicator at the time cut points are set;
- expected and actual improvement on the indicator over time;
- amount of improvement that is reasonable for the indicator;
- overall impact on the PBMAS of adjustments to cut points;
- the PBMAS system’s guiding principles;
- other considerations that could affect performance on particular indicators;
- appropriate cut points across similar indicators; and
- internal and external input.

Report Only Indicators

Some PBMAS indicators are reported for district information and planning purposes. For these indicators, the district performance will be reported along with the overall state rate for the indicator. Minimum size requirements, cut points, and PLs are not typically applied to these indicators.

Generally after a period of one or two years, PLs are assigned to Report Only indicators, and district performance on these indicators will be evaluated. The inclusion of Report Only indicators in PBMAS provides districts with an opportunity to review current performance and plan ahead.
Minimum Size Requirements and Special Analysis

A minimum size requirement (MSR) is incorporated into all indicators that are assigned a PL. In general, districts must have at least thirty (30) students in the relevant segment of the student population denominator to be evaluated on an indicator using the standard PBMAS analysis. In addition, for certain PBMAS indicators, districts must have at least five (5) or thirty (30) students in the relevant segment of the student population numerator to be evaluated using the standard PBMAS analysis. The minimum size requirements are noted in the description of each indicator.

Minimum size requirements can be met either in the current year or through the aggregation of numerators and denominators over the most recent two years when the previous year’s data are available. If the minimum size requirement is met for a particular performance indicator, then a district is evaluated using the standard PBMAS analysis. Under standard analysis, when minimum size requirements are met with the current year’s data, a PL is assigned based on that data in relation to the cut points for the indicator. When minimum size requirements are met based on the most recent two years of data, the numerator and denominator for the current and prior years are aggregated, the indicator is calculated, and a PL is assigned based on the current year’s cut points for the indicator. Depending on the particular indicator, there may be one or two prior years of data that are aggregated with the current year’s data to assign a PL. If the minimum size requirement is not met, then the district is evaluated under a process called “special analysis,” which is described below.

There is one exception to the minimum size requirement. If a district does not meet the minimum size requirement for an indicator, but the performance of the district meets the criteria to earn a PL of 0, then the district receives a PL of 0, regardless of the number of students in the relevant segment of the student population.

Special analysis is a tool used to analyze the performance of districts that do not meet the minimum size requirements. Performance levels established using the special analysis process will have “SA” appended (NA SA, 0 SA, 1 SA, 2 SA, 3 SA) and will be included on PBMAS reports to districts, along with the district’s numerators, denominators, and rates considered in the special analysis process.

The flowcharts on the following pages depict the process for determining whether standard or special analysis is applied in the PBMAS.
Using the most recent year’s data, does the student group meet the PL 0 cut points for the indicator?

(If no current year data are available, then PL = No Data.)

Apply Standard Analysis:
PL 0, 1, 2, 3, or 4* is assigned based on current year’s numerator and denominator if MSR met in current year OR if MSR can be met over most recent two years, PL is assigned based on aggregation of numerators and denominators for the most recent two (or three) years, depending on how many years of data are available for the indicator. The number of years of data available for analysis is noted in the description of each indicator.

* For indicators with only one year of data available for analysis, MSR must be met in current year or PL = Not Assigned.

Does the student group meet minimum size requirements (MSR) for the indicator in the current year or over the most recent two years?

Apply Special Analysis:

If the student group’s size equals between 15-29 over the most recent two years, refer to the special analysis process for group size of 15-29 (page 13).

If the student group’s size equals between 1-14 over the most recent two years, then PL = Not Assigned.

Does the prior year’s PL = No Data?

Does the student group meet minimum size requirements (MSR) for the indicator in the current year or over the most recent two years?

PL 0 is assigned.

PL = Not Assigned

Note: For indicators eligible for the PBMAS special analysis process that have minimum size requirements in both the denominator and the numerator, a district’s group size is determined by the smallest denominator or numerator over the most recent two years.
PBMAS Performance Level Assignment and Special Analysis Process for Group Size of 15-29

Are the PLs the same over two (or three) years? (i.e., 1/1 or 1/1/1, 2/2 or 2/2/2, 3/3 or 3/3/3)

YES

PL assigned
(1 SA, 2 SA, 3 SA)

NO

Are the PLs different over two years but not more than one level apart and no year's PL = 3? (e.g., 1/0, 1/2, 2/1, etc.)
Or
Are PLs different over three years and no year's PL = 3? (e.g., 1/0/1, 1/0/2, 1/2/1, 2/1/1)

YES

If two years of data are available for the indicator, the better of the two PLs is assigned. If three years of data are available for the indicator, the rounded average of the three PLs is assigned.

NO

Any other combination of PLs over two (or three) years = PL of Not Assigned.

Note: Group size is based on the sum of the most recent two years. Previous years’ PLs are determined based on the relevant years’ numerators, denominators, and rates presented on the district’s 2016 PBMAS report.
**Required Improvement**

The PBMAS, by design, has a built-in improvement component. Because the system includes a range of PLs, districts that demonstrate improvement from one year to the next can progress from one PL to another. For example, a district with 74% of its migrant students graduating with a high school diploma in four years received a PL 1 in the 2015 PBMAS. If that same district is able to improve its migrant graduation rate to 80% in 2016, it would receive a PL 0 because its performance meets the 2016 PL 0 cut point.

In addition to the system’s built-in improvement component, the 2016 PBMAS will again include a “required improvement” component for certain indicators. The indicator descriptions in Section III of this manual will indicate if required improvement is available for an indicator. Examples of the PBMAS required improvement calculations are provided below.

**Required Improvement Calculations**

For the indicators where increases in rates are measured in positive numbers and required improvement is available, the following calculation will be used for districts that meet minimum size requirements in both the current and previous year and have an initial PL result that is not equal to 0:

\[
\text{Actual Change: } \quad \text{Required Improvement:} \\
\text{performance in 2016 } - \text{ performance in 2015} \geq \frac{\text{minimum PL 0 cut point for 2016 } - \text{ performance in 2015}}{\text{number of years to reach minimum PL 0 cut point}}
\]

**EXAMPLE OF REQUIRED IMPROVEMENT USING NCLB INDICATOR #8: Migrant Graduation Rate**

1. Calculate the **Actual Change** for the district's migrant graduation rate:

   \[
   \text{Actual Change:} \\
   \quad 72.0\% - 60.0\% = 12.0 \\
   \quad \text{(2016)} \quad \text{(2015)}
   \]

2. Calculate the **Required Improvement** for the district's migrant graduation rate:

   \[
   \text{Required Improvement:} \\
   \quad \frac{80.0\% - 60.0\%}{2 \text{ (2017-2015)}} = 10.0
   \]

Note: The 2017 target year allows districts one year beyond 2016 to reach the 2016 minimum PL 0 cut point of 80.0%.

3. Compare the two numbers to see if the **Actual Change** is greater than or equal to the **Required Improvement**: 12.0 > 10.0. (Gains in graduation rates are measured in positive numbers.)

4. Result: the district meets **Required Improvement** and receives a performance level of 0 RI.
For indicators where reductions in rates are measured in negative numbers and required improvement is available, the following calculation will be used for districts that meet minimum size requirements in both the current and previous year and have an initial performance level result that is not equal to 0. Note that for these types of indicators, actual change needs to be less than or equal to Required Improvement for the PL 0 cut point to be met.

\[
\text{Actual Change:} \quad \text{Required Improvement:}
\]

\[
\text{performance in 2016} - \text{performance in 2015} \leq \frac{\text{maximum PL 0 cut point for 2016} - \text{performance in 2015}}{\text{number of years to reach maximum PL 0 cut point}}
\]

**EXAMPLE OF REQUIRED IMPROVEMENT USING SPECIAL EDUCATION INDICATOR #10: SPED Representation**

1. Calculate the **Actual Change** for the district's SPED representation rate:

   \[
   \text{Actual Change:} \quad \frac{15.0\% - 25.0\%}{\text{(2016)} - \text{(2015)}} = -10.0
   \]

2. Calculate the **Required Improvement** for the district's SPED representation rate:

   \[
   \text{Required Improvement:} \quad \frac{8.5\% - 25.0\%}{2(2017-2015)} = -8.25
   \]

   Note: The 2017 target year allows districts one year beyond 2016 to reach the 2016 maximum PL 0 cut point of 8.5%.

3. Compare the two numbers to see if the Actual Change is less than or equal to the Required Improvement: -10.0 < -8.25. (Reductions in representation rates are measured in negative numbers.)

4. Result: the district meets Required Improvement and receives a performance level of 0 RI.
System Safeguards

System safeguard activities are conducted by the agency to ensure the integrity of the performance-based monitoring system. These activities include data validation analyses of leaver data, student assessment data, and discipline data. Random or other means of selection are also implemented to verify system effectiveness and districts’ implementation of monitoring requirements.

Monitoring Interventions

The Program Monitoring and Interventions (PMI) Division will notify each district selected for a 2016 PBMAS intervention via the Intervention Stage and Activity Manager (ISAM) on the Texas Education Agency Secure Environment (TEASE). The PMI Division will inform districts that intervention stages have been posted to ISAM by posting a “To the Administrator Addressed” letter on the TEA web page for correspondence or sending a “To the Administrator Addressed” letter via electronic mail or first-class mail. It is the district’s obligation to access the correspondence from the PMI Division by (a) subscribing to the listserv for “To the Administrator Addressed” correspondence; and (b) accessing the ISAM system as directed to retrieve intervention instructions and information.

Performance-based monitoring interventions are based on PBMAS performance levels and other criteria as well as results of the data validation analyses described above. For the special education program, State Performance Plan compliance indicators 9, 10, 11, 12, and 13; data integrity; uncorrected non compliance; and audit findings are also evaluated and used to assign a district an integrated stage of intervention/determination status. Sanctions are applied as necessary and according to state and federal law and the Texas Administrative Code (TAC).

Additional information related to performance-based monitoring interventions, including additional monitoring activities required of districts that serve students with disabilities who reside in residential facilities located within the districts’ geographic boundaries and/or jurisdictions, is reflected in 19 TAC §97.1071, Special Program Performance; Intervention Stages, available at http://tea.texas.gov/About_TEA/Laws_and_Rules/Commissioner_Rules_(TAC)/Commissioner_of_Education_Rules_-_Texas_Administrative_Code/. Also available on this rules link is the text of 19 TAC §97.1055, Accreditation Status, which describes how deficiencies in a district’s programs monitored under the PBMAS may affect a district’s accreditation status.

- A student is counted as a special education student in the first denominator if (a) any 405 Record was submitted for the student; (b) Element E0940 on any 400 Record submitted for the student contains anything but 0000; (c) any 505 Record was submitted for the student; or (d) Element E1049 on any 500 Record submitted for the student contains anything but 000.
- An ISS placement is counted as a special education ISS placement in the first numerator if the student has a matching record for the same reporting period (a) on the 400 Record with Element E0041 containing anything but 00 and Element E0937 not equaling zero; or (b) on the 500 Record with Element E0041 containing anything but 00 and Element E1046 not equaling zero.
- Discretionary placements to ISS are defined using the PEIMS 425 Record – Disciplinary Action Codes and Disciplinary Action Reason Codes as follows: Action Code (Element E1005) = 06 and 26 and Reason Code (Element E1006) = All Codes. Only one action per incident number is counted under this indicator.
Performance Level Assignment

Each district’s difference value is compared to the PBMAS cut points\(^{10}\) for the indicator, and performance levels are assigned as follows:

<table>
<thead>
<tr>
<th>SPED Indicator</th>
<th>PL 0</th>
<th>PL 1</th>
<th>PL 2</th>
<th>PL 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>15</td>
<td>MIN  - 10.0 percentage point difference</td>
<td>10.1 - 19.9</td>
<td>20.0 - 29.9</td>
<td>30.0 - MAX</td>
</tr>
</tbody>
</table>

In addition, each district’s disproportionality rate will be reported based on the percentage ranges below:

<table>
<thead>
<tr>
<th>Disproportionality Rate</th>
<th>PL 0 (RO)</th>
<th>PL 1 (RO)</th>
<th>PL 2 (RO)</th>
<th>PL 3 (RO)</th>
</tr>
</thead>
<tbody>
<tr>
<td>MIN - 10.0%</td>
<td>10.1% - 29.9%</td>
<td>30.0% - 49.9%</td>
<td>50.0% - MAX</td>
<td></td>
</tr>
</tbody>
</table>

Disproportionality Rate Calculation:

\[
\text{percentage point difference} = \frac{\text{all students' discretionary ISS placement rate}}{} 
\]

\textit{New!} Districts should anticipate that performance levels for this indicator will be assigned solely based on disproportionality rates beginning with the 2017 PBMAS.

\(^{10}\) MIN = minimum and denotes values less than 0. MAX = maximum and denotes values greater than 100.
SPED Indicator #16: SPED Discretionary OSS Placements

This indicator compares the discretionary out-of-school suspension (OSS) placements of students served in special education to the discretionary placements of all students in OSS.

Calculation

1. Special education discretionary OSS placement rate:
   \[
   \frac{\text{number of discretionary OSS placements of students served in special education}}{\text{number of students served in special education in attendance}}
   \]

2. All students’ discretionary OSS placement rate:
   \[
   \frac{\text{number of discretionary OSS placements for all students}}{\text{number of all students in attendance}}
   \]

3. Difference:
   \[
   \text{special education discretionary OSS placement rate} - \text{all students’ discretionary OSS placement rate}
   \]

Data Source

The data for this indicator’s denominators are based on the number of students (all students versus special education students) reported by the district on the PEIMS 400 Record, 405 Record, 500 Record, and 505 Record as in attendance. The data for this indicator’s numerators are based on the number of incidents of discretionary placements to OSS (all students versus special education students) reported by the district on the PEIMS 425 Record.

- Minimum Size Requirements: 
  - Numerator ≥ 30 (New!)
- Year(s) of Data Available for Analysis: 3
- Special Analysis: No (New!)
- Required Improvement: Yes
- Accountability Subset: No
- Applicable PEIMS Collections: Summer 2015
- Section II of this manual includes detailed information on these and other PBMAS components.

Notes

- The minimum size requirements for this indicator are evaluated at the first step of the indicator’s calculation.
- Discretionary OSS placements are for the 2014-2015 school year and are the most current data available for use in the 2016 PBMAS.
- A student is counted as a special education student in the first denominator if (a) any 405 Record was submitted for the student; if (b) Element E0940 on any 400 Record submitted for the student contains anything but 0000; if (c) any 505 Record was submitted for the student; or (d) Element E1049 on any 500 Record submitted for the student contains anything but 000.
- An OSS placement is counted as a special education OSS placement in the first numerator if the student has a matching record for the same reporting period (a) on the 400 Record with Element E0940 containing anything but 00 and Element E0937 not equaling zero; or (b) on the 500 Record with Element E0041 containing anything but 00 and Element E1046 not equaling zero.
- Discretionary placements to OSS are defined using the PEIMS 425 Record – Disciplinary Action Codes and Disciplinary Action Reason Codes as follows: Action Code (Element E1005) = 05 and 25 and Reason Code (Element E1006) = All Codes. Only one action per incident number is counted under this indicator.
**Performance Level Assignment**

Each district’s difference value is compared to the PBMAS cut points\(^\text{11}\) for the indicator, and performance levels are assigned as follows:

<table>
<thead>
<tr>
<th>SPED Indicator</th>
<th>PL 0</th>
<th>PL 1</th>
<th>PL 2</th>
<th>PL 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>16 percentage point difference</td>
<td>MIN - 6.0</td>
<td>6.1 - 10.5</td>
<td>10.6 - 14.9</td>
<td>15.0 - MAX</td>
</tr>
</tbody>
</table>

In addition, each district’s disproportionality rate will be reported based on the percentage ranges below:

<table>
<thead>
<tr>
<th>Disproportionality Rate</th>
<th>Report Only (RO)</th>
</tr>
</thead>
<tbody>
<tr>
<td>MIN - 10.0%</td>
<td>PL 0 (RO)</td>
</tr>
<tr>
<td>10.1% - 29.9%</td>
<td>30.0% - 49.9%</td>
</tr>
</tbody>
</table>

Disproportionality Rate Calculation:

\[
\frac{\text{percentage point difference}}{\text{all students' discretionary OSS placement rate}}
\]

**New!** Districts should anticipate that performance levels for this indicator will be assigned solely based on disproportionality rates beginning with the 2017 PBMAS.

\(^{11}\) MIN = minimum and denotes values less than 0. MAX = maximum and denotes values greater than 100.
Section IV: Appendices
Appendix: A – Career and Technical Education Nontraditional Courses (2014-2015 School Year)

The federal Carl D. Perkins law requires states to measure participation in nontraditional courses. Nontraditional courses are defined as occupations or fields of work, including careers in computer science, technology, and other emerging high skill occupations, for which individuals from one gender comprise less than 25 percent of the individuals employed in each such occupation or field of work. The courses below were selected because, generally, they are occupationally specific courses in which the enrollment of one gender falls below 25 percent. Gender enrollments in the courses are reviewed annually at the state and local levels as part of the Carl D. Perkins reporting process.

Appendix: B – Comments, Questions, and Review of Incorrect Performance Level Assignments

The Texas Education Agency welcomes comments and questions concerning PBMAS district performance levels. In addition, if a district determines that one or more 2016 PBMAS performance level assignments were based on a data or calculation error attributable to the agency or one of the agency’s data contractors, the district should submit specific information about the error, no later than September 16, 2016, to the address below. Requests based on disagreement with the 2016 PBMAS indicators, cut points, and methodologies adopted in rule or requests based on districts’ data errors will not be considered.
