2017 Confidential Student Report

Meeting with Your Child’s Teacher

Things to do before the conference:

- Check your child’s grades and relevant test scores.
- Ask your child if there are any questions he/she would like you to ask the teacher.
- Write down any special notes you want to make sure to mention that could impact your child at school (ex. major changes at home, special interests, allergies, etc.).
- Talk to any other parents, guardians, or caregivers about questions they would like to have asked.
- Pre-write your questions so you don’t forget any, and make sure to bring a way to take notes!

Sample questions you can ask your teacher:

- Is my child reading at or above grade level?
- What can I do at home to help my child be better at mathematics?
- What does my child seem to be the most interested in at school?
- Does my child have good friends in class and at school?
- What is the most important thing that I can do to prepare my child for middle school?
- How much time should my child be spending on your class per night?
- Are there any extracurricular activities that you think my child would be interested in that they offer at this school?

2017 Confidential Student Report

STAAR Results

STATE OF TEXAS ASSESSMENTS OF ACADEMIC READINESS

From The Commissioner

Tests are a part of life. Our kids will take tests to get a driver’s license, to get into college, and even to get certain jobs. As a parent of two myself, I know that no one test can tell me everything about my children. But the STAAR tests have been designed to provide useful information about how much our children have learned academically and how well prepared they are for what comes next.

Students who meet or exceed grade level by high school graduation have more than a 60% chance of passing their college classes, substantially increasing their lifetime earnings and prospects for success. This report is intended to give you information on how well your child learned this year’s academic material in school and how you can help them learn even more.

About the STAAR Test

Your child took the STAAR in Spring 2017. This test asks students to answer questions that measure the knowledge and skills they need to be prepared for college or a career. If you have questions about this report, please talk to your child’s teacher or principal, or learn more by visiting www.texasassessment.com.

STAAR Results

Masters Grade Level

Mastery of the course knowledge and skills is shown — student is on-track for college and career readiness.

Meets Grade Level

Strong knowledge of course content, but may be missing critical elements — student needs additional support in the coming year.

Approaches Grade Level

Some knowledge of course content, but may be missing critical elements — student needs additional support in the coming year.

Did Not Meet Grade Level

No basic understanding of course expectations is shown — student may need significant support in the coming year.
