ESSA State Plan Proposal
Final decisions from USDE are expected by the end of February. As currently proposed, the ESSA state plan

- uses the Closing the Gaps domain to identify comprehensive, targeted, and additional targeted support
- includes adjusted targets
  - Stakeholder feedback indicated targets were too ambitious.
Comprehensive Support Identification

The Closing the Gaps score will be computed based on:

- A weighted average of the indicators computed from the number of items meeting targets divided by the number of items evaluated
- The weighted average will be scaled to grades A (90-100), B (80-89), C (70-79), D (60-69), and F (0-60) by creating grade cut points based on 2017 data.
- The scaled score will be used to determine the comprehensive schools (lowest five percent)
- The agency will identify at least the lowest five percent scoring campuses that receive Title I, Part A funds for comprehensive support.
- Campuses that do not rank in the bottom five percent of the Closing the Gaps domain for two consecutive years and have increased a letter grade (for example, from F to D or from D to C) on the Closing the Gaps domain will be considered as having successfully exited comprehensive support status.
- If a campus does not obtain a 67 percent four-year graduation rate for the All Students group, the campus will be automatically identified for comprehensive support and improvement.
- Any Title I campus identified for targeted support and improvement for three consecutive years will be identified for comprehensive support and improvement the following school year.
- TEA will annually identify campuses for comprehensive support and intervention beginning with the August 2018 accountability release, which is based on School Year 2017-18 performance data.
Targeted Support Identification

- Student group achievement will be monitored annually through the Closing the Gaps domain.
- Any campus that has one or more achievement gap(s) between individual student groups and the interim goals will be identified for targeted support and improvement.
- TEA defines “consistently underperforming” as a school having one or more student groups that do not meet interim benchmark goals for three consecutive years.
Additional Targeted Support Identification

- Any campus that is not identified for comprehensive or targeted support will be identified for additional targeted support if an individual student group’s overall percentage, based on the weighting and methodology outlined on above, is at or below the percentage for comprehensive support campuses in that rating year.

- For example, if the scaled score for a campus to be identified for comprehensive support is 25, then any campus with a student group that has an overall percentage of 25 or less will be identified for additional targeted support.

- Identification will begin with the August 2018 school ratings and will occur on an annual basis.

- In order to exit additional targeted support status, a student group must meet at least 50 percent of the indicators evaluated and meet the targets for the Academic Achievement indicator in both reading and mathematics.
