Inadequate Education Prevents Young Americans From Serving

Proportion Who Score Too Low
Out of those who do graduate and try to join the Army, over one in five cannot join because they score too low on the military’s entrance exam.

Proportion Who Do Not Graduate
Nationwide, more than one in five young Americans does not graduate on time. In some states it is even worse:

Note: Due to reporting issues, another Department of Education data source for the 2009-10 school year was used for Kentucky.
Over a thirteen-year period, the number of states with 40 percent or more of their young adults who were overweight or obese went from 1 to 40.

*Source: Centers for Disease Control and Prevention (CDC), Behavioral Risk Factor Surveillance System. If states were missing data for one or more years, data from 1998, 1999, 2005, 2006 or 2007 were used to generate a pooled average for three years in order to have large enough samples. Only states with enough data in both periods were included. Alaska did not have data for either period and Arizona did not have data for the later period.
• “Depending on what article you read, the number of potential applicants that would successfully qualify for our services range somewhere from 25 to 30 percent,”

– United States Secretary of the Navy, Richard Spencer

Texas Received a “D” on Citizen-Readiness Index

Measures citizen-readiness along three indicators to demonstrate whether today’s young adults are contributing to a **strong citizenry:**

- Prepared for the workforce
- No criminal record
- Qualified for the military
