WHAT IS THE STAAR PROGRESS MEASURE?
The State of Texas Assessments of Academic Readiness (STAAR®) progress measure gives you information about how much your child has improved in a subject area. This measure is based on a comparison of your child's test score from last school year with his or her score from this school year.

WHICH GRADES AND SUBJECTS HAVE A STAAR PROGRESS MEASURE?
In 2019, the STAAR progress measure will be reported for the tests listed below:

- grades 4–8 reading (English)
- grades 4–5 reading (Spanish)
- grades 4–8 mathematics
- English II
- Algebra I

The progress measure is reported for STAAR and STAAR Spanish.

DID MY CHILD RECEIVE A STAAR PROGRESS MEASURE?
Your child received a STAAR progress measure if he or she met the requirements listed below:

- Your child must have taken a higher grade-level test in the 2018–2019 school year than he or she did in the 2017–2018 school year. For example, he or she took the English II test in the 2018–2019 school year and the English I test in the 2017–2018 school year.
- For STAAR reading tests, your child must have taken the lower grade-level and higher grade-level tests in the same language (English or Spanish) in the 2017–2018 school year and the 2018–2019 school year, respectively.
- For STAAR mathematics tests, the lower grade-level and higher grade-level tests can be in either language (English or Spanish) in the 2017–2018 school year and the 2018–2019 school year, respectively.
- Students taking the STAAR Algebra I or English II test in the 2018–2019 school year must be first-time test takers.

Part of a STAAR Report Card for grade 5 reading is shown below:

The STAAR progress measure is reported on your child's STAAR Report Card. Your child will receive one progress measure for each applicable test. This information can also be found in the student data portal at http://www.texasassessment.com/students.

The performance levels give you information about how well your child performed on the test this year.
A Parent’s Guide to the STAAR Progress Measure

HOW ARE THE STAAR PERFORMANCE LEVELS DIFFERENT FROM THE STAAR PROGRESS MEASURE?

The STAAR performance levels (labeled B on the Report Card image) give you information about how well your child performed on the test this school year. If your child achieves Approaches Grade Level performance, this category indicates that students are likely to succeed in the next grade or course with targeted academic intervention. If your child achieves Meets Grade Level performance, this category indicates that students have a high likelihood of success in the next grade or course but may still need some short-term, targeted academic intervention. If your child achieves Masters Grade Level performance, this category indicates that students are expected to succeed in the next grade or course with little or no academic intervention.

It is possible that your child made progress even if he or she did not pass the test (Did Not Meet Grade Level). This progress can be measured and is reported as the STAAR progress measure. The STAAR progress measure helps you view your child’s academic achievement in a different way. The progress measure tells you two things: whether your child improved from the previous school year to this school year and if he or she did improve, how much improvement there was.

The amount of improvement your child made from last school year to this school year is classified as: Limited Progress, Expected Progress, or Accelerated Progress. If your child's progress measure is Expected, he or she has shown expected academic improvement from the previous school year to this school year. If your child’s progress measure is Accelerated, your child has shown an amount of academic improvement from the previous school year to this school year that was much larger than expected.

Progress measures are reported within a content area (mathematics, reading, and high school English). The progress measure is not available for all tests, so students may receive a progress measure for some tests but not for others.

IS PROGRESS MEASURED THE SAME WAY FOR ALL STUDENTS IN TEXAS?

Progress is measured in the same way for all students including English learners (ELs) who take STAAR or STAAR Spanish in the 2018–2019 school year.
