Chapter 4—Closing the Gaps Domain

Overview
The Closing the Gaps domain uses disaggregated data to demonstrate differentials among racial/ethnic groups, socioeconomic backgrounds, and other factors. The indicators included in this domain, as well as the domain’s construction, align the state accountability system with the Every Student Succeeds Act (ESSA).

Components
There are four components evaluated in the Closing the Gaps domain.

- Academic Achievement: STAAR Performance Status at the Meets Grade Level or above standard in English language arts (ELA)/reading and mathematics
- Growth or Graduation
  - Academic Growth Status: The School Progress, Part A domain data in reading and mathematics for elementary and middle schools
  - Federal Graduation Status: The four-year federal graduation rate (without exclusions) for high schools, K–12s, and districts with graduation rates. If a high school, K–12, or district does not have graduation data, Academic Growth Status is used, if available.
- English Language Proficiency
- School Quality or Student Success
  - STAAR component of the Student Achievement domain for elementary and middle schools
  - College, Career, and Military Readiness (CCMR) Performance Status component for high schools, K–12s, and districts. If a high school, K–12, or district does not have CCMR data, STAAR component is used, if available.

Minimum Size
A district or campus must have 10 reading and 10 mathematics assessment results for the all students group in the Academic Achievement component to be evaluated on the Closing the Gaps domain. If a district or campus does not meet minimum size, the Closing the Gaps domain is not evaluated.

Students Evaluated
The Closing the Gaps domain evaluates performance of fourteen student groups.

- All students
- Seven racial/ethnic groups: African American, American Indian, Asian, Hispanic, Pacific Islander, white, and two or more races
- Economically disadvantaged
- Students receiving special education services
- Students formerly receiving special education services
- Current and monitored English learners (through year 4 of monitoring)
- Continuously enrolled
- Non-continuously enrolled
Current and Former Special Education Students
A student is identified as a current special education student if the student receives special instruction and related developmental, corrective, supportive, or evaluative services for the current school year as reported in TSDS PEIMS and on STAAR answer documents.

Students are identified as formerly receiving special education services if in any of the preceding three years, they were reported in TSDS PEIMS as receiving special instruction and related developmental, corrective, supportive, or evaluative services, but in the current year, as reported through TSDS PEIMS and on STAAR answer documents, are no longer participating in a special education program.

Current and Monitored English Learners (ELs)
A student is identified as current EL if the student is reported as Limited English Proficient (LEP) on either TELPAS or STAAR answer documents. A student is identified as monitored EL if the student is reported in TSDS PEIMS as having met the criteria for exiting a bilingual/ESL program and is being monitored as required by 19 Texas Administrative Code, §89.1220(l).

Both current and monitored ELs, through year 4, are included in performance rates for the Closing the Gaps domain. Exclusions for EL students are detailed in this chapter.

Continuously Enrolled and Non-Continuously Enrolled Students

District
For grades 4–12, a student is identified as continuously enrolled if the student was enrolled in the district on the fall snapshot during the current school year and each of the three preceding years. For grade 3, a student is identified as continuously enrolled if the student was enrolled in the same district on the current year fall snapshot and each of the preceding two years.

If the enrollment requirement is not met, then the student is considered non-continuously enrolled.

Campus
For grades 4–12, a student is identified as continuously enrolled if the student was enrolled in the campus on the fall snapshot during the current school year and in the same district each of the three preceding years. For grade 3, a student is identified as continuously enrolled if the student was enrolled in the campus on the current year fall snapshot and in the same district each of the preceding two years.

Example Campus Continuously Enrolled Determination (Grade 4–8)

Inclusion of English Learners
English learners (ELs) who are year one in U.S. schools are excluded from accountability calculations. ELs who are in their second year in U.S. schools are included in accountability for 2019. The EL performance measure is used to include ELs in their second year in U.S schools in the Academic Achievement and Student Achievement Domain Score: STAAR Component Only.
components. ELs who are in their second year in U.S. schools who have a parental denial for EL services do not receive an EL performance measure. STAAR Alternate 2 assessment results are included regardless of an EL’s years in U.S. schools.

Unschooled asylees, unschooled refugees, and students with interrupted formal education (SIFEs) are not included in state accountability until their sixth year of enrollment in U.S. schools.

**Academic Achievement Component**
The Academic Achievement component measures STAAR performance in ELA/reading and mathematics at the Meets Grade Level or above standard.

**Academic Achievement—Assessments Evaluated**
The Academic Achievement component evaluates STAAR (with and without accommodations), STAAR Alternate 2 assessment, and EL performance measure results for grades 3–8 and end-of-course (EOC) in ELA/reading and mathematics at the Meets Grade Level or above standard.

**Academic Achievement—Substitute Assessments**
Qualifying results on substitute assessments are included in this component at the Meets Grade Level standard.

**Academic Achievement—Minimum Size Criteria and Small Numbers Analysis**
- All students are evaluated if there are 10 or more assessments in the subject area, considered separately.
- Student groups are evaluated if there are 25 or more assessments in the subject area, considered separately.
- Small numbers analysis is not used.

**Academic Achievement—Methodology**
Each student group is evaluated by subject area on the percentage of assessment results that are at the Meets Grade Level or above standard. Each student group’s performance is then compared to the 2019 Academic Achievement performance targets. The performance targets are provided at the end of this chapter.

The Academic Achievement calculation is expressed as a percentage, rounded to the nearest whole number. For example, 59.87% is rounded to 60%; 79.49% is rounded to 79%; and 89.5% is rounded to 90%.

**Academic Growth Status or Federal Graduation Status**

**Academic Growth Components**
For elementary and middle schools, the Academic Growth Status component provides an opportunity to receive credit for STAAR results in ELA/reading and mathematics that either meet the student-level criteria for the STAAR progress measure or maintain performance. For high schools, K–12s, and districts without a federal four-year graduation rate, the Academic Growth Status is used, if available.

**Academic Growth Status—Assessments Evaluated**
The Academic Growth Status component evaluates STAAR (with and without accommodations) and STAAR Alternate 2 assessment results and progress measures for grades 4–8 and EOC in English II and Algebra I, disaggregated by student group.
Substitute assessments and EL performance measures are not included in the Academic Growth Status component. EL students are evaluated using the STAAR progress measure.

**Academic Growth Status—Minimum Size Criteria and Small Numbers Analysis**

- All students are evaluated if there are 10 or more STAAR progress measures in ELA/reading and mathematics, considered separately.
- Student groups are evaluated if there are 25 or more STAAR progress measures in ELA/reading and mathematics, considered separately.
- Small numbers analysis, as described below, applies to all students if the total number of STAAR progress measures is fewer than 10.
  - A two-year-average academic growth score is calculated for all students. The calculation is based on an aggregated two-year uniform average using the district’s or campus’s 2019 academic growth data and 2018 academic growth data.
  - The all students group is evaluated if the two-year sum has at least 10 STAAR progress measures.

**Academic Growth Status—Methodology**

Each student group is evaluated by subject area on the percentage of assessment results that maintained performance from the prior year to the current year or meets the *Expected* or *Accelerated* STAAR progress measure expectation. Each student group’s performance is then compared to the 2019 Academic Growth Status performance targets. Please see “Chapter 3—School Progress Domain” for details on how points are awarded for growth. The performance targets are provided at the end of this chapter.

The Academic Growth Status calculation is expressed as a percentage, rounded to the nearest whole number. For example, 59.87% is rounded to 60%; 79.49% is rounded to 79%; and 89.5% is rounded to 90%.

**Federal Graduation Status**

The Federal Graduation Status component measures the federal four-year graduation rate of the Class of 2018 for high schools, K–12s, and districts. Texas uses the National Center for Education Statistics (NCES) dropout definition and the federal calculation for graduation rate. For high schools, K–12s, and districts without a federal four-year graduation rate, the Academic Growth Status is used, if available.

**Four-Year Graduation Rate Target**

For the Class of 2018, the four-year graduation target is 90 percent of students graduate with a regular high school diploma in four years. Student groups that are at or above 90 percent are required to exceed that rate by at least a tenth of a percent in the following year(s). The targets are provided at the end of this chapter.

**Federal Graduation Status—Minimum Size Criteria and Small Numbers Analysis**

- The all students group is evaluated if there are at least 10 students in the class.
- Small numbers analysis, as described below, applies to all students if the number of students in the Class of 2018 (4-year) is fewer than 10. The total number of students in the class consists of
graduates, continuing students, Texas certificate of high school equivalency (TxCHSE) recipients, and dropouts.

- A three-year-average graduation rate is calculated for all students. The calculation is based on an aggregated three-year uniform average.
- The all students group is evaluated if the three-year sum has at least 10 students.

**Student Groups**
- A student group is evaluated if there are at least 25 students from the group in the class.
- Small numbers analysis is not applied to student groups.
- The continuously enrolled, non-continuously enrolled, and former special education student groups are not evaluated.

**Federal Graduation Status—Methodology**
The Federal Graduation Status component is calculated using the four-year federal graduation rate without state exclusions. The four-year federal graduation rate follows a cohort of first-time students in grade 9 through their expected graduation three years later. A cohort is defined as the group of students who begin grade 9 in Texas public schools for the first time in the same school year plus students who, in the next three school years, enter the Texas public school system in the grade level expected for the cohort. Students who transfer out of the Texas public school system over the four years for reasons other than graduating, receiving a TxCHSE, or dropping out are removed from the class.

The four-year federal graduation rate measures the percentage of graduates in a class. The graduation rates are expressed as a percentage rounded to one decimal place. For example, 74.875% rounds to 74.9%, not 75%.

\[
\text{Number of Graduates in the Class} \\
\text{Number of Students in the Class} \\
(\text{Graduates + Continuers + TxCHSE Recipients + Dropouts})
\]

**Inclusion of English Learners**
Ever ELs (EL [Ever HS]) are evaluated for the EL student group in the federal graduation rates. Ever ELs are students reported in TSDS PEIMS as ELs at any time while attending grades 9–12 in a Texas public school. The EL student group is evaluated if there are at least 25 current EL students.

**Inclusions to the Four-Year Federal Dropout Definition**
The definition of dropout that is used for the Student Achievement domain differs slightly from the NCES definition of dropout that is required for federal accountability. For Closing the Gaps domain calculations, the 2017–18 dropouts reported during the fall 2018 TSDS PEIMS data submission are processed using the NCES dropout definition so that certain students can be counted as dropouts. For additional information on dropout inclusions, please see Appendix G.

**English Language Proficiency Component**
The English Language Proficiency component measures an EL’s progress towards achieving English language proficiency. Current ELs are the only students evaluated in this component.

**English Language Proficiency—Assessments Evaluated**
The English Language Proficiency component evaluates the TELPAS results for grades K–12. For 2019, current year TELPAS results are compared to the prior year to determine if the students made progress. In order to be included in the denominator, a student must have either a current year Advanced High TELPAS composite rating or a non-zero 2018 TELPAS composite rating.
TELPS results prior to 2018 are not evaluated. TELPS Alternate results are not evaluated in 2019.

**English Language Proficiency—Minimum Size Criteria and Small Numbers Analysis**
- The EL student group is evaluated if there are at least 25 current EL students.
- Small numbers analysis is not used.

**English Language Proficiency—Methodology**

A student is considered having made progress if

- the student advances by at least one score of the composite rating from the prior year to the current year, or
- the student’s result is Advanced High.

The current EL student group’s performance is compared to the 2019 English Language Proficiency target. The performance targets are provided at the end of this chapter.

The English Language Proficiency component calculation is expressed as a percentage, rounded to the nearest whole number. For example, 59.87% is rounded to 60%; 79.49% is rounded to 79%; and 89.5% is rounded to 90%.

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>Number of 2018–19 TELPAS assessments with Advanced High rating or non-zero prior year composite ratings</td>
</tr>
</tbody>
</table>

**School Quality or Student Success Component**

For elementary and middle schools, the Student Achievement Domain Score: STAAR Component Only evaluates disaggregated student performance on the STAAR. For high schools, K–12s, and districts with annual graduates, the College, Career, and Military Readiness Performance Status component measures disaggregated students’ preparedness for college, the workforce, or the military. If a high school, K–12, or district does not have CCMR data, the Student Achievement Domain Score: STAAR Component Only is used, if available.

**Student Achievement Domain Score: STAAR Component Only—Assessments Evaluated**

The Student Achievement Domain Score: STAAR Component Only evaluates STAAR (with and without accommodations), STAAR Alternate 2 assessments, and EL performance measure results for grades 3–8 and EOC in all subject areas at the Approaches Grade Level or above, Meets Grade Level or above, and Masters Grade Level standard. The performance rates calculated in this component are the disaggregated results used in the Student Achievement domain.

**Student Achievement Domain Score: STAAR Component Only—Substitute Assessments**

Qualifying results on substitute assessments are included in this component at the Meets Grade Level standard.

**Student Achievement Domain Score: STAAR Component Only—Minimum Size Criteria and Small Numbers Analysis**

- All students are evaluated if there are 10 or more assessments.
• Student groups are evaluated if there are 25 or more assessments.
• Small numbers analysis is not used.

**Student Achievement Domain Score: STAAR Component Only—Methodology**
Each student group is evaluated on the average percentage of assessment results that are at the Approaches Grade Level or above, Meets Grade Level or above, and Masters Grade Level standard. Each student group’s performance is then compared to the 2019 Student Achievement Domain Score: STAAR Component Only performance targets. The performance targets are provided at the end of this chapter.

The Student Achievement Domain Score: STAAR Component Only calculation is expressed as a percentage, rounded to the nearest whole number. For example, 59.87% is rounded to 60%; 79.49% is rounded to 79%; and 89.5% is rounded to 90%.

**College, Career, and Military Readiness Performance Status**
The College, Career, and Military Readiness Performance Status component measures students’ preparedness for college, the workforce, or the military. This component differs from the CCMR component in the Student Achievement domain. The denominator used here is 2018 annual graduates plus students in grade 12 who did not graduate. These grade 12 students are those who were in attendance during the last six weeks of school year 2017–18 as reported in TSDS PEIMS attendance records. Grade 12 students reported in TSDS PEIMS as individualized education program (IEP) continuers will be excluded from the Closing the Gaps CCMR denominator.

Students demonstrate college, career, or military readiness in any one of the following ways:

• **Meet Texas Success Initiative (TSI) Criteria in ELA/Reading and Mathematics.** A student meeting the TSI college readiness standards in both ELA/reading and mathematics; specifically, meeting the college-ready criteria on the TSI assessment, SAT, ACT, or by successfully completing and earning credit for a college prep course as defined in TEC §28.014, in both ELA and mathematics. The assessment results considered include TSI assessments through October 2018, SAT and ACT results through the June 2018 administration, and course completion data via TSDS PEIMS. See Appendix H for additional information.

A student must meet the TSI requirement for both ELA/reading and mathematics but does not necessarily need to meet them on the same assessment. For example, a student may meet the TSI criteria for college readiness in ELA/reading on the SAT and complete and earn credit for a college prep course in mathematics.

• **Meet Criteria on Advanced Placement (AP)/International Baccalaureate (IB) Examination.** A student meeting the criterion score on an AP or IB examination in any subject area. Criterion score is 3 or more for AP and 4 or more for IB.

• **Earn Dual Course Credits.** A student completing and earning credit for at least three credit hours in ELA or mathematics or at least nine credit hours in any subject. See Appendix H for additional information.

• **Enlist in the Armed Forces.** A graduate enlisting in the U.S. Army, Navy, Air Force, Coast Guard, or Marines.

• **Earn an Industry-Based Certification.** A graduate earning an industry-based certificate under 19 TAC, §74.1003.'
• **Earn an Associate’s Degree.** A graduate earning an associate’s degree prior to graduation from high school.

• **Graduate with Completed IEP and Workforce Readiness.** A graduate receiving a graduation type code of 04, 05, 54, or 55 which indicates the student has completed his/her IEP and has either demonstrated self-employment with self-help skills to maintain employment or has demonstrated mastery of specific employability and self-help skills that do not require public school services.

• **CTE Coherent Sequence Coursework Aligned with Industry-Based Certifications.** A CTE coherent sequence student completing and receiving credit for at least one CTE course aligned with an industry-based certification. This indicator awards one-half point only for students who meet no other CCMR indicator. These students receive one-half point credit for coursework completed toward an industry-based certification. See Chapter 2 for additional information.

• **Complete an OnRamps Dual Enrollment Course.** A student completing an OnRamps dual enrollment course and qualifying for at least three hours of university or college credit in any subject area. See Appendix H for additional information.

• **Graduate Under an Advanced Degree Plan and be Identified as a Current Special Education Student.** A graduate who is identified as receiving special education services during the year of graduation and whose graduation plan type is identified as a Recommended High School Plan (RHSP), Distinguished Achievement Plan (DAP), Foundation High School Plan with an Endorsement (FHSP-E), or Foundation High School Plan with a Distinguished Level of Achievement (FHSP-DLA).

• **Earn a Level I or Level II Certificate.** A graduate earning a Level I or Level II certificate in any workforce education area. See Appendix D or H for additional information.

**College, Career, and Military Readiness Performance Status—Minimum Size Criteria and Small Numbers Analysis**

• All students are evaluated in the CCMR component if there are 10 or more annual graduates plus students in grade 12 who did not graduate.

• Student groups are evaluated if there are 25 or more annual graduates plus students in grade 12 who did not graduate.

• Small numbers analysis, as described below, applies to all students if the number of annual graduates plus students in grade 12 who did not graduate is fewer than 10.

  o A three-year-average CCMR rate is calculated for all students. The calculation is based on an aggregated three-year uniform average using the district’s or campus’s 2019 CCMR data, 2018 CCMR data, and the 2017 modeled CCMR data.

  o The all students group is evaluated if the three-year sum has at least 10 annual graduates plus students in grade 12 who did not graduate.

**College, Career, and Military Readiness Performance Status—Methodology**

Each student group is evaluated on the percentage of students who meet the 2019 College, Career, and Military Readiness Performance Status targets. The performance targets are provided at the end of this chapter.
The College, Career, and Military Readiness Performance Status calculation is expressed as a percentage, rounded to the nearest whole number. For example, 59.87% is rounded to 60%; 79.49% is rounded to 79%; and 89.5% is rounded to 90%.

**Participation Status**
The target for Participation Status is 95 percent of students taking a state-administered assessment. Participation measures are based on STAAR and TELPAS assessment results.

- Students taking substitute assessments are included as participants.
- STAAR Alternate 2 students with No Authentic Academic Response (NAAR) designation are included as participants.
- Students with the medical exception or medically exempt designations are not included in the participation rate calculation. This includes both STAAR and STAAR Alternate 2 students.

Should the participation status for the all students group or any student group fall below 95 percent, rounded to the whole number, the denominator used for calculating the Closing the Gaps Academic Achievement component is adjusted to include the necessary number of assessments to meet the 95 percent threshold.

**Example Adjusted Academic Achievement Performance Calculation**
A campus had 100 students with STAAR answer documents in ELA/reading. Five answer documents were marked A (Absent), and two answer documents were marked O (Not Scored - Other). The campus's participation rate for ELA/reading was 93 percent.

\[
\frac{93 \text{ scored answered documents}}{100 \text{ scored, absent, or other answer documents}}
\]

Since the campus did not meet the 95 percent Participation Status target for ELA/reading, adjustments were made when calculating the ELA/reading performance for the Academic Achievement component. The performance denominator had to be adjusted to include enough assessments to meet the 95 percent target, rounded to the nearest whole number.

**Original ELA/Reading Academic Achievement Performance Calculation**

\[
\frac{53 \text{ assessments at Meets Grade Level or above standard}}{93 \text{ scored assessments that meet accountability subset (out of 100 total answer documents)}} = 57\%
\]

**Adjusted ELA/Reading Academic Achievement Performance Calculation**

\[
\frac{53 \text{ assessments at Meets Grade Level or above standard}}{95 \text{ assessments (93 scored plus 2 absent/other)}} = 56\%
\]

The campus's ELA/reading performance denominator was increased by two assessments to meet the 95 percent threshold. The Academic Achievement calculation used the updated denominator to determine the new performance outcome. The performance rates used in the Academic Achievement Performance component are the disaggregated results at the Meets Grade Level or above standard used in the Student Achievement domain.

**Limits on Use of Alternative Assessments**
Federal limitations require that the number of students assessed using STAAR Alternate 2 not exceed one percent of total assessment participation. While this measure is reported for regions, districts, and campuses on the federal report card, monitoring only applies at the state level—the number of students assessed throughout the state using STAAR Alternate 2 must not exceed one percent of the state’s total participation on STAAR and STAAR Alternate 2.
Calculating Component Scores

To calculate a score for each of the Closing the Gaps components, determine the percentage of evaluated indicators met for each component. Divide the number of indicators met by the number of indicators evaluated (those that met minimum size).

\[
\text{Number of indicators that met the performance target} \div \text{Total number of indicators evaluated}
\]

Closing the Gaps component scores are rounded to the nearest whole number.

### Minimum Number of Evaluated Indicators

The following components must have a minimum of five indicators that meet minimum size to be included in the Closing the Gaps calculation:

- Academic Achievement,
- Academic Growth Status, and
- Student Achievement Domain Score: STAAR Component Only

The remaining components, Federal Graduation Status and CCMR Performance Status, only require one evaluated indicator.

Total Evaluated Indicators 4

Academic Growth Status Included? No

*While 14 student groups are evaluated in the Closing the Gaps domain, this example has seven groups with Academic Growth data.

Calculating a Closing the Gaps Domain Score

To calculate the Closing the Gaps domain score, weight each component for which the district or campus has at least the minimum number of evaluated indicators based on the following table. Component points are rounded to one decimal place. Total points for each component are determined by multiplying the percentage of evaluated indicators met by the corresponding weight and rounding to one decimal place. The Closing the Gaps domain score is the sum of the total points rounded to the nearest whole number.

### Closing the Gaps Component Weights

<table>

Closing the Gaps Domain Score 78

**Example Calculation: Middle School**

Example: The sample middle school has met the minimum number of evaluated indicators in two components. The campus does not have five evaluated indicators in the Student Achievement Domain Score: STAAR Component Only for inclusion in the overall domain calculation. It does not meet minimum size for the English Language Proficiency component. The weight of the Student Achievement Domain Score: STAAR Component Only and English Language Proficiency components are distributed proportionally among the two remaining components.

Closing the Gaps Domain Score 78

**Closing the Gaps Domain Rating Calculation**

See “Chapter 5—Calculating 2019 Ratings” for the methodology to calculate the Closing the Gaps domain rating.
### 2019 Closing the Gaps Performance Targets

#### Academic Achievement (Percentage at Meets Grade Level or above)

</thead>
</table>

1 Ever ELs (EL [Ever HS]) are evaluated in the federal graduation rates. Ever ELs (EL [Ever HS]) are students reported in TSDS PEIMS as ELs at any time while attending grades 9–12 in a Texas public school.
2 English Language Proficiency Status evaluates current ELs only.
