Employed Principal Demographics 2009-2013

The table below presents the number of Principals employed in the Texas public school system, with breakdowns by gender and by race or ethnicity.

Overall results and gender

- The number of employed Principals increased each academic year until 2011-12, when it showed a small decline.
- The number of female Principals continued to increase somewhat in academic years 2011-12 and 2012-13.
- The number of male Principals declined in academic year 2011-12.

Race and ethnicity

- The ethnic breakdown was largely consistent over time.
- Nearly two-thirds of Principals were white.
- About one-fifth of Principals were Hispanic/Latino, and just over one-tenth were black/African American.
- Few Principals were Asian, American Indian/Alaska Native, and Pacific Islander.

Summary of methodology. Five tables were extracted containing identification numbers, gender codes, and races or ethnicities of individuals employed as Principals in academic years 2008-09 through 2012-13. From each table, a total of all Principals was obtained. Sums by gender and race or ethnicity were then computed, and each sum was taken as a percentage of the total. Finally, all results were combined into one table.
