

Early Childhood Education Learning Centers

Dramatic Play Center

Children use life-like furniture and materials to learn and pretend using their own imaginative schemas.

Library/ABC Center

Children use a diverse set of reading materials, puppets, and story-telling props to build their motivation to read and write.

Construction Center

Children engage with a variety of construction materials to build structures using instructional themes and imaginative schemas.

Math Center

Children use a variety of math materials to engage in number sense, geometry, measurement, and classification activities.

Science/Discovery Center

Children use a variety of science and/or nature materials to engage in discovery and inquiry with the world around them.

Writing Center

Children use writing tools and fine-motor experiences to practice drawing and writing.

Art/Creativity Center

Children use a variety of art materials and tools to express themselves through creative, open-ended means.

Sensory Center

Children interact with tactile materials (e.g., sand, water, pasta, beans, paper, light box, etc.) to learn through sensory experiences.
