<b>Subject</b>	<b>Chapter 117. Texas Essential Knowledge and Skills for Fine Arts</b>	
<b>Subchapter</b>	<b>Subchapter D. Elementary, Adopted 2013</b>	
<b>Course</b>	<b>§117.105. Art, Grade 1, Adopted 2013.</b>	
<b>(a) Introduction</b>		
<p>(1) The Fine Arts incorporate the study of dance, music, theatre, and the visual arts to offer unique experiences and empower students to explore realities, relationships, and ideas. These disciplines engage and motivate all students through active learning, critical thinking, and innovative problem-solving. The Fine Arts develop cognitive functioning and increase student academic achievement, higher order thinking, communication, and collaboration skills, making the fine arts applicable to college readiness, career opportunities, workplace environments, social skills, and everyday life. Students develop aesthetic and cultural awareness through exploration, leading to creative expression. Creativity, encouraged through the study of the Fine Arts, is essential to nurture and develop the whole child.</p>		
<p>(2) Four basic strands— foundations: observation and perception; creative expression; historical and cultural relevance; and critical evaluation and response--provide broad, unifying structures for organizing the knowledge and skills students are expected to acquire. Each strand is of equal value and may be presented in any order throughout the year. Students rely on personal observations and perceptions, which are developed through increasing visual literacy and sensitivity to surroundings, communities, memories, imaginings, and life experiences, as sources for thinking about, planning, and creating original artworks. Students communicate their thoughts and ideas with innovation and creativity. Through art, students challenge their imaginations, foster critical thinking, collaborate with others, and build reflective skills. While exercising meaningful problem-solving skills, students develop the lifelong ability to make informed judgments.</p>		
<p>(3) Statements that contain the word "including" reference content that must be mastered, while those containing the phrase "such as" are intended as possible illustrative examples.</p>

<p>(1) Foundations: observation and perception. The student develops and expands visual literacy skills using critical thinking, imagination, and the senses to observe and explore the world by learning, understanding, and applying the elements of art and principles of design. The student uses what the student sees, knows, and has experienced as sources for examining, understanding, and creating artworks. The student is expected to:</p>	<p>(A) identify similarities, differences, and variations among subjects in the environment using the senses</p>	<p>(i) identify similarities among subjects in the environment using the senses</p>
