

SPPI 11A Calculation and Example

SPPI 11A Calculation

$$\left(\frac{\text{\# of children whose full and individual initial evaluations (FIEs) were completed within 45 school days with specified exceptions}}{\text{\# of children for whom parental consent to evaluate was received}} \right) \times 100$$

Notes

Indicate the delay reason for each child whose FIE was completed beyond the timeline.
SPPI 11A data are submitted to the Texas Student Data System (TSDS) Child Find collection.

SPPI 11A Example

a. # of children for whom parental consent to evaluate was received	100
b. # of children whose full and individual initial evaluations (FIEs) were completed within 45 school days with specified exceptions	96

Percent Completed Within Timeline Calculation

$$\begin{aligned}\text{Percentage} &= (b/a) \times 100 \\ &= (96 / 100) \times 100 \\ &= .96 \times 100 \\ &= 96\%\end{aligned}$$
