

District Processing Documentation for the Five-Year Graduation, Completion, and Dropout Rates, Class of 2008

Introduction

This document describes the steps taken by the Texas Education Agency (TEA) to build the class of 2008 Grade 9 cohort and compute the five-year longitudinal graduation, completion, and dropout rates for the class of 2008 used in agency publications and for federal accountability. The processing decisions in the document are final. For more detailed information on the longitudinal rates, the dropout definition, and the annual dropout rates, please see: www.tea.state.tx.us/index4.aspx?id=4080.

Definitions

The five-year graduation rate for the class of 2008 is the percentage of students from a class of beginning ninth graders who graduate within 5 years or by August 31, 2009. Student statuses are determined based on records submitted to TEA. The methodology used to calculate five-year rates is similar to the methodology used to calculate four-year rates, with the exception that students are tracked for an additional year. Thus, whereas the four-year rates for the class of 2008 are based on the tracking of students into the fall of 2008, the five-year rates are based on the tracking of students into the fall of 2009. The definition for federal accountability is as follows:

Federal accountability:

Five-year graduation rate

$$\frac{\text{graduates}}{\text{graduates} + \text{continuers} + \text{GED recipients} + \text{dropouts}}$$

For further information on state accountability, please see: <http://www.tea.state.tx.us/perfreport/account/>.

For further information on federal accountability, please see: <http://www.tea.state.tx.us/ayp/>.

Processing

Five-year graduation, completion, and dropout rate processing for the class of 2008 is comprised of three steps: 1) gathering all data, including: a) attendance records from the first four years of the cohort that establishes who is in the cohort, as well as demographic and leaver records from the first four years, b) attendance, leaver, and demographic records from the fifth year of the cohort, c) enrollment records from the sixth year of the cohort, and d) General Educational Development (GED) records; 2) determining each student's accountable district and final status in that district; and 3) calculating five-year graduation, completion, and dropout rates at campus and district levels.

Who is in the cohort and what records are gathered for these students?

The 2008 cohort was established when four-year rates were calculated for the class of 2008 and consists of the same students. Although no students are added to the five-year cohort, a student in a district's four-year cohort may be removed from the district's five-year cohort, and a student not in the district's four-year cohort may be added to the five-year cohort, if the student left one district and enrolled in another. The records used to calculate the five-year rates for the class of 2008 are based on six years of data. Records from the first four years are identical to those gathered in the four-year rates, whereas records from Years 5 and 6 are different:

Cohort year	School year	Cohort
Year 1	2004-05	First-time 9 th graders in Texas public schools (TPS)
Year 2	2005-06	Students from Year 1 still in TPS in Year 2, regardless of grade, and students new to TPS in Grade 10 in Year 2
Year 3	2006-07	Students from Years 1 and 2 still in TPS in Year 3, regardless of grade, and students

		new to TPS in Grade 11 in Year 3
Year 4	2007-08	Students from Years 1, 2, and 3 still in TPS in Year 4, regardless of grade, and students new to TPS in Grade 12 in Year 4
Year 5	2008-09	Students from Years 1, 2, 3, and 4 still in TPS in Year 5, regardless of grade
Year 6	2009-10	Students from Years 1, 2, 3, and 4 still in TPS in Year 6, regardless of grade

Year 1: 2004-05

The 2008 cohort is based on first-time ninth graders from the 2004-05 PEIMS Submission 3 attendance data. A student who first attended ninth grade in a Texas public school for any length of time at any time during the school year becomes part of the cohort. PEIMS Submission 3 attendance data from the previous five school years are used to exclude repeaters, because a student who had Grade 9 attendance in previous years belongs to an earlier cohort. Once the 2008 cohort is established, program participation and student characteristic information such as gifted and talented participation or special education participation is added to each student record. See Table 1 for the sources of this information. In addition, 2004-05 dropout, graduate, and other leaver information, if any, is added to the student's record. The last district attended in 2004-05 becomes the accountable district for the student for this year. If the student leaves Texas public school in Year 1 and does not return or earn a GED, the student's leaver status in Year 1 becomes the student's final status in the cohort.

Year 2: 2005-06

Now that the initial cohort is determined, PEIMS attendance records from the 2005-06 school year are gathered for these students. By now, most students are in Grade 10, but students who began Grade 9 in Year 1 remain part of the cohort regardless of grade level. For example, a student who began Grade 9 in 2004-05 and was still in Grade 9 in 2005-06 is still in the cohort. Similarly, a student who skipped a grade and is now in Grade 11 is still in the cohort. Thus, students who attended the same district in 2005-06 as they did in 2004-05 remain in the district's cohort, regardless of grade level. In addition to gathering data on students already in the cohort, students who enter Texas public schools in Grade 10, the grade expected for the cohort, are added. Program participation and student characteristic information is added to each student's record. Dropout, graduate, and other leaver information for 2005-06, if any, is added to the student's record. The last district attended in 2005-06 becomes the accountable district for the student for this year. If the student leaves Texas public school in Year 2 and does not return or earn a GED, the student's leaver status in Year 2 becomes the student's final status in the cohort. See *Transfers In* for how students not already in a district's cohort are added to a district's cohort.

Year 3: 2006-07

Attendance records from the 2006-07 school year are added to the students' records. Again, students already in the cohort remain in the cohort regardless of grade level. Students who enter Texas public schools in Grade 11 are added. Program participation and student characteristic information is added to each student's record. Dropout, graduate, and other leaver information for 2006-07, if any, is added to the student's record. The last district attended in 2006-07 becomes the accountable district for the student for this year. If the student leaves Texas public school in Year 3 and does not return or earn a GED, the student's leaver status in Year 3 becomes the student's final status in the cohort. See *Transfers In* for how students not already in a district's cohort are added to a district's cohort.

Year 4: 2007-08

Attendance records from the 2007-08 school year are added to the students' records. Again, students already in the cohort remain in the cohort regardless of grade level. Students who enter Texas public schools in Grade 12 are added. Program participation and student characteristic information is added to each student's record. Dropout, graduate, and other leaver information for 2007-08, if any, is also added. The last district attended in 2007-08 becomes the accountable district for the student for this year. If the student leaves Texas public school in Year 4 and does not return or earn a GED, the student's leaver

status in Year 4 becomes the student's final status in the cohort. See *Transfers In* for how students not already in a district's cohort are added to a district's cohort.

Year 5: 2008-09

Data from Year 5 of the five-year rates is gathered in the same manner as data from Years 1 through 4, with one exception: students who enter Texas public schools in Year 5 are not added to the cohort because they are in a later cohort. Again, attendance, program participation, student characteristic, dropout, graduate, and other leaver information for 2008-09 are added to the students' records, and, again, students already in the cohort remain in the cohort regardless of grade level. The last district attended in 2008-09 becomes the accountable district for the student for this year. If the student leaves Texas public school in Year 5 and does not return or earn a GED, the student's leaver status in Year 5 becomes the student's final status in the cohort. See *Transfers in* for how students not already in a district's cohort are added to a district's cohort.

Year 6: 2009-10

PEIMS Submission 1 enrollment records for the fall one year after the cohort's expected graduation date, in this case fall 2009, are used to determine if students are continuing in high school. This includes students reported as enrolled in the school-start window in 2009-10, as well as migrant students who return by the January 2010 PEIMS resubmission date. No students are added to the statewide cohort, as students new to Texas public school in Year 6 belong to a later cohort. The last district enrolled in becomes the accountable district for the student for this year. If the student continues in Texas public school in fall 2009 and did not graduate by 2008-09, the student's final status in the cohort is continuer. See *Transfers in* for how students not already in a district's cohort are added to a district's cohort.

GED assignment

Students listed in the agency's GED database as having received a GED on or before August 31, 2009 are identified.

Transfers in

Students who did not begin Grade 9 in the district can be added to a district's cohort in one of two ways: 1) A student who entered the cohort in another Texas public school district, whether as a Grade 9 student in Year 1 or a student who transferred into Texas public schools in Years 2, 3 or 4, is added to a district's cohort when the student moves from one Texas public school district and enrolls in another. The student is removed from the sending district's cohort. 2) A student who transferred into Texas public schools and enrolls in a district in Years 2, 3, or 4 in the expected grade level of the cohort is added to the district's cohort. For example, a student who moves to Texas from out of state and enrolls in Texas public school in Grade 11 in 2006-07, when the 2008 cohort is expected to be in Grade 11, is added to the district's cohort.

How are graduation, completion, and dropout rates calculated?

Once all attendance, demographic, leaver, and GED data for the students are gathered and the accountable district determined, each student is assigned a final status in the accountable district based on the tracking of a student into the fall one year after expected graduation, or fall 2009. Statuses are graduate, dropout, other leaver, GED recipient, or continued in high school. Statuses are based on PEIMS and GED records submitted to the agency and may be the status a student was assigned several years before fall 2009. For example, a student who dropped out of Texas public school in 2006-07 and did not return or earn a GED will have a status of dropout. See the table below to determine how TEA sets final statuses and whether a status is included in the calculation of the longitudinal rates.

Status	Definition	Status included in final calculation of longitudinal rates?
Graduate	Student graduated by August 31, 2009.	Yes
Continuer	The above status does not apply and student was enrolled in the fall 2009 school-start window or by January 2010 if student is a migrant.	Yes
Other leaver	The above statuses do not apply and student left school for a reason other than graduating or dropping out. See below for a list of the leaver reason codes for 2004-05 through 2008-09 associated with this status.	No
GED recipient	The above statuses do not apply and student received a GED by August 31, 2009.	Yes
Dropout	The above statuses do not apply and student dropped out. See below for a list of the leaver reason codes for 2004-05 through 2008-09 associated with this status.	Yes
Underreported	The above statuses do not apply. Status of the student was not reported.	No
Student identification error	The above statuses do not apply. Records could not be matched because of a student identification error.	No

Type of leaver	Year	LEAVER-REASON-CODEs
Other leaver	2004-05	03, 16, 19, 21, 22, 24, 30, 31, 60, 61, 63, 64, 66, 72, 78, 80, 81, 82, 83
	2005-06	03, 16, 24, 60, 66, 78, 81, 82, 83, 85, 86
	2006-07	03, 16, 24, 60, 66, 78, 81, 82, 83, 85, 86, 87
	2007-08	03, 16, 24, 60, 66, 78, 81, 82, 83, 85, 86, 87
	2008-09	03, 16, 24, 60, 66, 78, 81, 82, 83, 85, 86, 87
Dropout	2004-05	02, 04, 08, 09, 10, 14, 15, 79, 84, 99
	2005-06	98
	2006-07	98
	2007-08	98
	2008-09	98

Is the student's status in the last district attended always the final status?

A student's status in the last district attended becomes the final status, with two exceptions:

1. If a student has a status of graduated in any year, the student's final status is graduate.
2. If a student dropped out of the last district attended but also earned a GED, the final status is GED.

Examples:

Student	School year	Leaver status	Final status	Explanation
A	2004-05	-	dropout	Student's last status was dropout, and student did not earn GED.
	2005-06	-		
	2006-07			
	2007-08	other leaver		
	2008-09	dropout		
	2009-10	-		
	Earned GED?	no		
B	2004-05	-	graduate	Student was a graduate. No other status is relevant.
	2005-06	-		
	2006-07			
	2007-08	-		
	2008-09	graduate		
	2009-10	continuer		
	Earned GED?	no		
C	2004-05	-	other leaver	Student's last status was other leaver. Student earned GED, but GED only replaces the last status if the last status is dropout.
	2005-06	-		
	2006-07			
	2007-08	-		
	2008-09	other leaver		
	2009-10	-		
	Earned GED?	yes		

How are graduation, completion, and dropout rates calculated for campuses and districts?

Data are aggregated to campus and district levels, based on the students' final statuses and last campuses attended. For example, a student with a final status of graduate is counted in the graduation rate of both the campus and the district from which he or she graduated. Similarly, a student with a final status of dropout is counted in the dropout rate of the campus and district from which he or she dropped out. The following rates are calculated: graduation, completion I, completion II, longitudinal dropout, continuation, and GED.

Not all members of a campus's or district's cohort are included in the rates because the calculation includes only students with a final status of graduate, continuer, GED recipient, or dropout. Students with these statuses represent the class of 2008. Students with final statuses of other leaver, underreported, and student identification error are members of the cohort but are not part of the class. Thus, for each rate calculated, the denominator is the same: graduates, continuers, GED recipients, and dropouts. The graduation rate, for example, reflects the total number of students who graduated divided by the total number in the class.

Completion I and II rates are calculated by combining final statuses. The completion I rate equals the total number of graduates and continuers divided by the total number in the class. The completion II rate equals the total number of graduates, continuers, and GED recipients divided by the total number in the class. Rates are also calculated for population subsets such as ethnicity, gender, and program participation. Student characteristics and program participation are assigned based on the student's final year in the cohort. For example, a student who graduated in the fourth year of the cohort and who was in the gifted and talented program the first three years but not the fourth year is not included in the gifted and talented graduation rate. In addition, new in 2010 are graduation, completion, and dropout rates for students who were ever limited English proficient (LEP) at any time in K-12 in Texas public schools. Rates for ever-LEP students are being calculated in addition to the traditional method of calculating LEP rates, i.e. students who were LEP in their final year in the cohort. See Table 2 for the sources of information for ever LEP.

Longitudinal rates are only calculated for campuses and districts that served Grade 9 and either Grade 11 or Grade 12 in both the first year of the cohort and in the fall of the sixth year, that is, in 2004-05 and the fall of 2009 for the class of 2008 five-year rates.

The table below shows the cohort build steps using PEIMS data elements.

Table 1

Year	Step	PEIMS Record	PEIMS Data Element
2004-05	1. Build Cohort	400	E0017 Grade Level Code E0934 Reporting Period Indicator Code
	2. Add corresponding student characteristics and program participation.	101	E0005 Ethnicity Code E0004 Sex Code E0984 Migrant Indicator Code E1027 Campus ID of Accountability
