# Introduction

## Introduction

### ***District and Campus Listings by County***

This report provides SAT and ACT participation and performance results by campus, district, district characteristic, and state as a supplement to *College Admissions Testing of Graduating Seniors in Texas High Schools, Class of 2005* (Texas Education Agency [TEA], 2006). The first three listings display summary data for each Texas public school campus and district, organized by county.

Table 1 includes, for each district and campus: (a) the total number of graduates in the class of 2005; (b) the number and percentage of graduates who took the SAT; (c) the mean SAT Mathematics, Verbal, and combined scores of SAT examinees; and (d) the number and percentage of examinees with SAT combined scores that meet TEA's Academic Excellence Indicator System (AEIS) criterion score. Table 2 contains the same information for the ACT, with mean English, Mathematics, Reading, Science, and Composite scores. The AEIS criterion scores are 1110 for the SAT and 24 for the ACT.

Table 3 contains information for the AEIS indicators based on results for either the SAT or ACT. Included in Table 3 are: (a) the total number of graduates; (b) the number and percentage of graduates who took the SAT and/or ACT; and (c) the number and percentage of SAT- and/or ACT-tested graduates scoring at or above the criterion score on either test.

In Tables 1-3, SAT and ACT participation and performance data for districts and campuses with fewer than five graduates are removed to protect student confidentiality. This precaution ensures that single sets of scores cannot be identified or linked with any individual. In these cases "<5t" appears in place of the actual value, with "t" referring to a small number of students tested. In addition, districts and campuses with five or more examinees but fewer than five scores of 1110 or above for SAT or 24 or above for ACT receive the note, "<5h." When it is possible for these score data to be arithmetically inferred from other district- or campus-level data, additional masking is employed using intervals of five students, and a note such as the following appears: "<10m," "<15m," "<20m," etc.

### ***College Admissions Examinations by District Characteristic***

In the final table, SAT and ACT results have been summarized by a variety of district characteristics. For each of 25 district characteristics, Table 4 shows: (a) the mean SAT combined score; (b) the mean ACT Composite score; (c) the percentage of graduates tested on the SAT and/or the ACT; and (d) the percentage of examinees scoring at or above criterion in 2005. In addition, these four values are presented for the state as a whole and provided at the bottom of the last page.

Information on the 25 district characteristics is based on data from TEA's Public Education Information Management System (PEIMS). Characteristics include student enrollment, district type, the percentage of students passing the Texas Assessment of Knowledge and Skills (TAKS), and the percentage of teachers with an advanced degree. Although the number of subcategories within each characteristic is consistent from year to year, the range represented by a subcategory may change. All

data on Table 4 are for the 2005 graduating class, with the exception of college admissions data, which lag one year behind.

Note. 't' indicates masking is applied because of the small number of students tested.  
'h' indicates masking is applied because of the small number of examinees scoring at or above criterion.  
'm' indicates masking is applied because small numbers can be imputed from other district or campus counts.  
'—' indicates masking is applied because of the small number of students tested or scoring at or above criterion.

Note. 't' indicates masking is applied because of the small number of students tested.  
'h' indicates masking is applied because of the small number of examinees scoring at or above criterion.  
'm' indicates masking is applied because small numbers can be imputed from other district or campus counts.  
'-' indicates masking is applied because of the small number of students tested or scoring at or above criterion.

Note. 't' indicates masking is applied because of the small number of students tested.

'h' indicates masking is applied because of the small number of examinees scoring at or above criterion.

'm' indicates masking is applied because small numbers can be imputed from other district or campus counts.

'—' indicates masking is applied because of the small number of students tested or scoring at or above criterion.

Note. 't' indicates masking is applied because of the small number of students tested.

'h' indicates masking is applied because of the small number of examinees scoring at or above criterion.

'm' indicates masking is applied because small numbers can be imputed from other district or campus counts.

'—' indicates masking is applied because of the small number of students tested or scoring at or above criterion.

## **District Characteristic Descriptions, 2004-05**

### ***Cost of Education Index***

The Cost of Education Index (CEI) reflects geographic variations in costs beyond the control of districts. The CEI has a minimum value of 0.0 and a maximum of 1.2. Most districts have CEI values of at least 1.0. Districts with CEI values of 0.0 are primarily charter school districts. Districts are grouped into five subcategories, each with approximately the same number of districts.

### ***District Type***

Districts are grouped into eight subcategories, ranging from major urban to rural, based on factors such as enrollment, growth in enrollment, economic status, and proximity to urban areas. Charter school districts make up a ninth subcategory. The subcategories are as follows.

#### **Major Urban**

A district is classified as major urban if: (a) it is located in a county with a population of at least 700,000; (b) its enrollment is the largest in the county or at least 75 percent of the largest district enrollment in the county; and (c) at least 35 percent of enrolled students are economically disadvantaged. A student is reported as economically disadvantaged if he or she is:

- eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program;
- from a family with annual income at or below the federal poverty line;
- eligible for Temporary Assistance to Needy Families or other public assistance;
- a recipient of a Pell Grant or comparable state program of need-based financial assistance;
- eligible for programs assisted under Title II of the Job Training Partnership Act; or
- eligible for benefits under the Food Stamp Act of 1977.

#### **Major Suburban**

A district is classified as major suburban if: (a) it does not meet the criteria for classification as major urban; (b) it is contiguous to a major urban district; and (c) its enrollment is at least 3 percent that of the contiguous major urban district or at least 4,500 students. A district also is classified as major suburban if: (a) it does not meet the criteria for classification as major urban; (b) it is not contiguous to a major urban district; (c) it is located in the same county as a major urban district; and (d) its enrollment is at least 15 percent that of the nearest major urban district in the county or at least 4,500 students.

### **Other Central City**

A district is classified as other central city if: (a) it does not meet the criteria for classification in either of the previous subcategories; (b) it is not contiguous to a major urban district; (c) it is located in a county with a population of between 100,000 and 699,999; and (d) its enrollment is the largest in the county or at least 75 percent of the largest district enrollment in the county.

### **Other Central City Suburban**

A district is classified as other central city suburban if: (a) it does not meet the criteria for classification in any of the previous subcategories; (b) it is located in a county with a population of between 100,000 and 699,999; and (c) its enrollment is at least 15 percent of the largest district enrollment in the county. A district also is other central city suburban if: (a) it does not meet the criteria for classification in any of the previous subcategories; (b) it is contiguous to an other central city district; (c) its enrollment is greater than 3 percent that of the contiguous other central city district; and (d) its enrollment exceeds the median district enrollment for the state of 701 students.

### **Independent Town**

A district is classified as independent town if: (a) it does not meet the criteria for classification in any of the previous subcategories; (b) it is located in a county with a population of 25,000 to 99,999; and (c) its enrollment is the largest in the county or greater than 75 percent of the largest district enrollment in the county.

### **Non-Metropolitan: Fast Growing**

A district is classified as non-metropolitan: fast growing if: (a) it does not meet the criteria for classification in any of the previous subcategories; (b) it has an enrollment of at least 300 students; and (c) its enrollment has increased by at least 20 percent over the past five years.

### **Non-Metropolitan: Stable**

A district is classified as non-metropolitan: stable if: (a) it does not meet the criteria for classification in any of the previous subcategories; and (b) its enrollment exceeds the median district enrollment for the state.

### **Rural**

A district is classified as rural if it does not meet the criteria for classification in any of the previous subcategories. A rural district has either: (a) an enrollment of between 300 and the median district enrollment for the state and an enrollment growth rate over the past five years of less than 20 percent; or (b) an enrollment of less than 300 students.

## **Charter School Districts**

Charter school districts are open-enrollment school districts chartered by the State Board of Education. Established by the Texas Legislature in 1995 to promote local initiative, charter school districts are subject to fewer regulations than other public school districts. Generally, charter school districts are subject to laws and rules that ensure fiscal and academic accountability but that do not unduly regulate instructional methods or pedagogical innovation. Like other public school districts, charter school districts are monitored and accredited under the statewide testing and accountability system.

## ***Education Service Center Regions***

The state is divided into 20 geographic regions, each served by an education service center (ESC). Although not usually the case, an ESC may serve districts outside its geographic boundaries. For this category, districts are grouped by the ESC regions that serve them, not by the ESC regions in which they are located geographically.

## ***Enrollment***

Districts are grouped into nine subcategories based on number of students enrolled. Enrollment counts are taken on a specified date in late October of each year.

## ***Highest Property Value***

Each district is placed into one of four subcategories of taxable property based on type of property with the highest value for the district. Special statutory school districts and charter school districts make up a fifth subcategory, labeled "non-taxing entities," because they do not have taxable property. The four subcategories of taxable property are:

- residential: single-family and multi-family residential, and residential inventory;
- land: vacant lots and taxable rural real property;
- oil and gas: oil, gas, and minerals; and
- business: commercial and industrial real property, commercial and industrial personal, and utilities.

## ***Operating Cost Per Student***

Operating costs are the sum of actual expenditures for a district's operation. Note that the number shown is not the amount actually spent on each student, but rather a per-student average of the total. Per-student amounts are calculated as expenditures for the prior school year divided by the current number of students. Districts are grouped into five subcategories, each with approximately the same number of districts.

### ***Property Wealth: Average, Equal Student Groups, and Median***

Property wealth is used as an indicator of a district's ability to raise local funds on a per-student basis. It is calculated as total taxable property value for the last completed calendar year divided by total enrollment for the current school year. Taxable value is the traditional measure of value, not the alternative value used in state funding formulas. The "property wealth: average" category classifies districts as either under or over the state average for district property wealth. The "property wealth: equal student groups" category groups districts by property wealth into 20 subcategories, each accounting for approximately the same number of students. The "property wealth: median category" groups districts by property wealth into 10 subcategories, each with approximately the same number of districts. In each of the three categories, special statutory school districts and charter school districts make up a separate subcategory, labeled "non-taxing entities," because they do not have taxable property wealth.

### ***SAT/ACT: At or Above Criterion, Percentage***

Districts are grouped into five subcategories based on percentage of examinees in the prior year who scored at or above the criterion score on either the SAT or ACT. Districts that did not have test takers make up a sixth subcategory. Criterion on the SAT is a combined score of 1110, and criterion on the ACT is a composite score of 24.

### ***SAT/ACT: Participation, Percentage***

Districts are grouped into three subcategories based on percentage of non-special education graduates who took the SAT, ACT, or both in the prior year. Districts that did not have graduates make up a fourth subcategory.

### ***Small/Sparse Adjustment***

Districts are grouped into four subcategories, each with approximately the same number of districts, based on adjustments to state funding to compensate for small and/or sparsely populated districts. Districts receiving no small/sparse adjustment make up a fifth subcategory. Small/sparse adjustments are shown as percentages of total adjusted basic allotment amounts.

### ***Student Change: 2003-04 – 2004-05***

Districts are grouped into five subcategories based on change in enrollment from the prior school year to the current school year.

## ***Student Density***

Districts are grouped into four subcategories based on number of students per square mile. Special statutory school districts and charter school districts make up a fifth subcategory, labeled "non-taxing entities," because they do not have mileage information.

## ***Students: African American, Hispanic, and Non-White, Percentage***

In each of these three categories, districts are grouped into six subcategories based on racial/ethnic composition of enrollment. The term "Non-White" is used to designate the following groups combined: African American, not of Hispanic origin; Asian or Pacific Islander; Hispanic; and Native American or Alaskan Native.

## ***Students: Economically Disadvantaged, Percentage***

Districts are grouped into six subcategories based on percentage of enrollment reported as economically disadvantaged. A student is reported as economically disadvantaged if he or she is:

- eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program;
- from a family with annual income at or below the federal poverty line;
- eligible for Temporary Assistance to Needy Families or other public assistance;
- a recipient of a Pell Grant or comparable state program of need-based financial assistance;
- eligible for programs assisted under Title II of the Job Training Partnership Act; or
- eligible for benefits under the Food Stamp Act of 1977.

## ***TAKS: Passing All Tests Taken, Percentage***

Districts are grouped into five subcategories based on percentage of Texas Assessment of Knowledge and Skills (TAKS) examinees in Grades 3-11 who passed all TAKS sections taken. Districts that did not administer TAKS make up a sixth subcategory. The percentages include only examinees who were enrolled in the same districts in October of the school year.

## ***Tax: Local Adopted Rate***

Districts are grouped into four subcategories, each with approximately the same number of districts, based on total locally-adopted tax rate. Special statutory school districts and charter school districts make up a fifth subcategory, labeled "non-taxing entities," because they do not levy property taxes. The total locally-adopted tax rate is made up of a maintenance and operation rate and a debt service rate (sometimes referred to as the Interest and Sinking fund rate). Rates are expressed per \$100 of taxable value.

### ***Tax: Local Maintenance & Operation Rate***

Districts are grouped into four subcategories based on locally-adopted maintenance and operation (M&O) tax rate. Special statutory school districts and charter school districts make up a fifth subcategory, labeled "non-taxing entities," because they do not levy property taxes. The M&O rate includes money generated by districts for equalizing wealth.

### ***Teacher Experience***

Districts are grouped into four subcategories, each with approximately the same number of districts, based on average years of teacher experience. The average for a district is calculated by multiplying the full-time-equivalent (FTE) count for each teacher by years of experience. Results are summed, then divided by the FTE count for all teachers.

### ***Teacher Salary***

Districts are grouped into four subcategories, each with approximately the same number of districts, based on average teacher salary. The average for a district is calculated by dividing the salary for all teachers by the full-time-equivalent (FTE) count for all teachers. Salaries reflect pay for regular duties only; they do not include pay for supplemental duties.

### ***Teachers: Non-White, Percentage***

Districts are grouped into six subcategories based on percentage of non-White teachers. The term "Non-White" is used to designate the following groups combined: African American, not of Hispanic origin; Asian or Pacific Islander; Hispanic; and Native American or Alaskan Native. The percentage for a district is calculated by dividing the full-time-equivalent (FTE) count for non-White teachers by the FTE count for all teachers.

### ***Teachers: With Advanced Degrees, Percentage***

Districts are grouped into four subcategories, each with approximately the same number of districts, based on percentage of teachers with advanced degrees. The percentage for a district is calculated by dividing the full-time-equivalent (FTE) count for teachers with master's or doctorate degrees by the FTE count for all teachers.

# Compliance Statement

## **Title VI, Civil Rights Act of 1964, the Modified Court Order, Civil Action 5281, Federal District Court, Eastern District of Texas, Tyler Division.**

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

1. acceptance policies on student transfers from other school districts;
2. operation of school bus routes or runs on a nonsegregated basis;
3. nondiscrimination in extracurricular activities and the use of school facilities;
4. nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;
5. enrollment and assignment of students without discrimination on the basis of race, color, or national origin;
6. nondiscriminatory practices relating to the use of a student's first language; and
7. evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

## **Title VII, Civil Rights Act of 1964 as Amended by the Equal Employment Opportunity Act of 1972; Executive Orders 11246 and 11375; Equal Pay Act of 1964; Title IX, Education Amendments; Rehabilitation Act of 1973 as Amended; 1974 Amendments to the Wage-Hour Law Expanding the Age Discrimination in Employment Act of 1967; Vietnam Era Veterans Readjustment Assistance Act of 1972 as Amended; Immigration Reform and Control Act of 1986; Americans With Disabilities Act of 1990; and the Civil Rights Act of 1991.**

The Texas Education Agency shall comply fully with the nondiscrimination provisions of all federal and state laws, rules, and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any educational programs or activities which it operates on the grounds of race, religion, color, national origin, sex, disability, age, or veteran status (except where age, sex, or disability constitutes a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency is an Equal Opportunity/Affirmative Action employer.
