Auditors should use the most recent Compliance Supplement published by the OMB. (This regulation was formerly known as OMB Circular A-133 Compliance Supplement.)
Revision Module 1	<p>1.1.3 Budget Requirements</p> <p>The notice of a district’s school board meeting at which a budget will be discussed or adopted must include a physical copy of the proposed budget or ensure the proposed budget is clearly accessible on the district’s website. The notice of the meeting must also include a taxpayer impact statement that compares the property tax bill for the current fiscal year to the upcoming fiscal year in accordance with Government Code, §551.043. In addition, your district must post the adopted budget on the district’s website, and the adopted budget, including amendments, must remain in a prominent place on the website for three years from the date the budget was originally adopted.</p>
Revision Module 1	<p><i>1.2.4.3 Capitalization of Assets</i></p> <p>Purchased capital assets must always be capitalized if:</p> <ul style="list-style-type: none"> the unit cost of the asset is \$10,000 or more, and the useful life of the capital asset is estimated at one year or more. <p>However, your school district may wish to establish accounting policies with a lower capitalization limit for items recorded as capital assets. A district may capitalize assets whose individual acquisition costs are less than the threshold for an individual asset if those assets in the aggregate are “significant.”¹ In addition, your district may wish to maintain accountability for certain assets even if they do not meet the district’s capitalization policy. For example, certain audiovisual or computer equipment may not be capitalized (i.e., not recorded as a capital asset), but a listing of such assets and their location may be maintained for control and accountability purposes.</p>

	<p>The total net position of a district represents what the district owns and what it owes (the resources the district can use to provide services and operate the district versus the district's liabilities or obligations to others). A positive net position demonstrates that the district is financially solvent. A negative net position may imply financial vulnerability for the district or demonstrates that the district is financially insolvent. In some situations, net position may be significantly affected by the recognition of a deferred inflow or outflow of resources, or the recognition of a large net pension liability (NPL) and other postemployment benefits (OPEB) liability. The district may provide an explanation of the effect on its net position in the notes to the financial statements. A negative net position also demonstrates a lack of financial prudence. A district's total net position can be tracked overtime to assess whether a district's financial health is improving or deteriorating.</p>

Revision Module 1	<p><i>1.3.4.2 Definition of Terms Related to Pension Accounting for GASB 68 and 75</i></p> <p>Measurement date—the end of the fiscal year of the pension plan and the period for which pension expense is calculated by the TRS. For example, if the TRS uses a measurement date of August 31, 2024, and a district has a fiscal year end of August 31, 2025, then that district must use the measurement date of August 31, 2024, because the audited financial statements of the 2025 pension plan will not be available in time for the district’s financial reporting for 2025. Items that occur after the measurement date but before the district’s fiscal year end that would normally be pension expense/(revenue) during the plan fiscal year will be recorded as deferred outflows/(inflows) of resources.</p>

	<p>To ensure compliance with FSP special allotment programs' spending, TEA policy provides maximum flexibility to school districts by averaging costs over a three-year period. Additionally, TEA will integrate the general fund with the ESSER fund codes 266, 281, 282, and 283 in compliance calculations. The inclusion of ESSER funds is for state compliance requirements only and does not apply to federal fiscal compliance requirements. While your district uses unallocated amounts in compliance calculations, TEA uses allocated amounts in its calculations for compliance purposes. From a budgeting perspective, your district can budget to meet the minimum spending requirements using unallocated. Consequently, when TEA uses allocated amounts, your district would meet the spending requirements.</p>

Revision Module 3	3.6.2.1 Compliance Monitoring—Organization Codes There are two types of Juvenile Justice Alternative Education Programs (JJAEP):			

Financial Accountability System Resource Guide v. 20

Change Document

Type of Change	Changes to FASRG v. 20
	<p>(1) The TEC, Chapter 37, authorizes assignment of students to a JJAEP approved by the Texas Juvenile Probation Commission (TJPC) if a school district or nonprofit charter school is located in a county with a population of greater than 125,000.</p> <p>(2) The second type of JJAEP is any arrangement that is not approved by the TJPC but that relates to placement of students who are expelled under the TEC, §37.007(a)-(f).</p>
Revision Module 3	<p>3.6.2.1 Compliance Monitoring—Organization Codes</p> <p>709–719 ORGANIZATION UNIT—DIRECT COSTS—LOCALLY DEFINED</p> <p>These codes are used, at the option of a nonprofit charter school, to define administrative organizational units that are considered direct costs. For a definition of direct costs, see the Indirect Cost Rate Guidance Handbook on the Indirect Cost Rates webpage of the TEA website.</p>
Revision Module 3	<h3>3.8 Program Intent Codes</h3> <p>A nonprofit charter school must monitor expenditures to ensure that the limit on indirect costs is observed and must take necessary steps to meet this requirement. The United States Department of Education (USDE) has given TEA authority to issue indirect cost rates for independent school districts (districts), open-enrollment charter schools, and certain other government entities. For additional guidance in the areas of direct and indirect costs, it may refer to the Indirect Cost Rates webpage on the TEA website. To ensure compliance with FSP special allotment programs' spending, TEA policy provides maximum flexibility to charter schools by averaging costs over a three-year period. Additionally, TEA will integrate the general fund (fund 420) with the ESSER fund codes 266, 281, 282, and 283 in compliance calculations. The inclusion of ESSER funds is for state compliance requirements only and does not apply to federal fiscal compliance requirements. As TEA reviews state special program expenditures, a nonprofit charter school will have the opportunity to address any issues that may arise. It must consider the implications of some federal requirements (for example, maintenance of effort) when determining local policies on the minimum level of coding expenditures.</p>

Compensatory education under TEC §29.081 provides supplemental programs and services for students identified as at risk of dropping out, including students from low socioeconomic backgrounds. These programs are designed to close achievement gaps through intensive or accelerated instruction, using performance data from STAAR/EOC and other assessments. The goal is to help students reach grade-level performance by the end of the next regular school term and improve graduation rates.</p> <p>State Compensatory Education (SCE) funds can also be used on Title I, Part A schoolwide campuses to supplement federal Title I funds. At these campuses, all students may receive allowable supplemental services funded by SCE, even if they do not meet state at-risk criteria. However, all programs must originate from a comprehensive needs assessment, be included in the campus or district improvement plan, and comply with statutory requirements for evaluation and public reporting. The intent is to reduce disparities in academic performance and high school completion rates among at-risk students compared to other students.</p> <p>Note: The use of PIC 24 is strongly encouraged but not required. When reporting expenditures in PIC 24 to TEA, the expenditures will be automatically rolled by PEIMS into PIC 11 for state reporting purposes.</p>
