## Shared Services Arrangements

X Shared services arrangements (SSAs) are not permitted for this grant.

#### Statutory/Program Assurances

The following assurances apply to this program. In order to meet the requirements of the program, the applicant must comply with these assurances.

Check each of the following boxes to indicate your compliance.

- The applicant provides assurance that program funds will supplement (increase the level of service), and not supplant (replace) state mandates, State Board of Education rules, and activities previously conducted with state or local funds. The applicant provides assurance that state or local funds may not be decreased or diverted for other purposes merely because of the availability of these funds. The applicant provides assurance that supplementary to existing services and activities and will not be used for any services or activities required by state law, State Board of Education rules, or local policy.
- The applicant provides assurance that the application does not contain any information that would be protected by the Family Educational Rights and Privacy Act (FERPA) from general release to the public.
- ☑ The applicant provides assurance to adhere to all the Statutory and TEA Program requirements as noted in the 2020-2023 Blended Learning Grant Program-Planning Grants Program Guidelines.
- ☑ The applicant provides assurance to adhere to all the Performance Measures, as noted in the 2020-2023 Blended Learning Grant Program-Planning Grants Program Guidelines, and shall provide to TEA, upon request, any performance data necessary to assess the success of the program.
- ☑ The applicant will attend the mandatory BLGP Kickoff Summit. The 2020 BLGP Kickoff Summit will take place virtually on November 12-13, 2020. Attendance at the BLGP Summit is mandatory for all participating districts. The district BLGP Project Manager must be in attendance.
- It he applicant will designate and provide a district-level project manager who will be available to dedicate at least 50% of his or her time to designing and implementing the BLGP plan.
- The applicant will list the proposed feeder pattern to be included in the district with a rationale as to why each school is included as part of this grant.
- Image: The applicant will contract with a BLGP Design and Implementation vendor in the fall/winter of the Planning year.
- ☑ The applicant will implement a TEA approved software program in all grade levels selected to participate in the BLGP. Non-math blended learning pilot participants must gain TEA approval for their chosen software program. Different grades participating in the program within a given school (or district) may choose to implement different software programs.
- The applicant will submit the BLGP Strategic Plan in the spring prior to implementation. The Strategic Design component of the BLGP Strategic Plan is tentatively due to TEA in Jan/Feb of 2021. The remainder of the plan is tentatively due in May of 2021. Exact dates will be sent to grantees by email.

		n or set of problems the district and schools are attempting to solve lended learning instructional model.
	know that through the	arning represents innovation in how instruction is delivered. However, we BLGP's robust planning and execution processes, blended learning can <b>perational benefits</b> at the district and school levels - these may include

a. North Lamar ISD seeks to become a Math Innovation Zone district in order to provide the best possible learning opportunities for students in grades K-8. When implemented effectively, blended learning will provide differentiation, extra time for one on one or small group instruction, and student choice, which will ultimately lead to better motivation. Once these effective practices are put into place, learning and test scores will increase. Due to the positive impact of blended learning, a long

explore and embrace these kinds of broader operational innovation.

changes in staffing, scheduling, finance, etc. Please describe your district's willingness to

term vision of the North Lamar ISD is to move classrooms in the district to a blended learning model.

Due to COVID 19, our teachers and students have been forced to learn to use technology with which they were not previously familiar. Because of this, they are no longer scared and overwhelmed by technology they don't know. This fear was a huge roadblock which we were able to move past due to COVID 19. We are now positioned perfectly to move forward with training teachers on blended learning models and benefits, and implementing the initiative.

Members of the Curriculum and Instruction Department at NLISD who are prepared to spend the time and energy needed to implement the blended learning grant as an MIZ pilot are the Assistant Superintendent of Curriculum and Instruction, the Instructional Technology Specialist, and the District Mathematics Coach. The department believes that the strategic planning year of the grant will be instrumental in giving us a roadmap for steps needed to achieve our goal of becoming a blended learning district. A near-term priority of the department is to provide the training and support our teachers need to implement blended learning in their classrooms. Implementation of the MIZ grant will enable us to provide that support.

#### Statutory/Program Requirements

#### 1. Continued: Please use the additional space provided to respond to Program Requirement Question #1.

Given the unique design of the campus grade levels at North Lamar ISD (PK-1, 2-3, 4-5, PK-4, 6-8), we believe the initial launch should begin with grades 4, 5 and 6. This will allow us to support the suggested implementation at the middle school by beginning with grade 6, while capturing a two grade-level campus each year along with matching grade levels at the PK-4 campus as we grow our grant into the early elementary grades. Additionally, we have chosen our 4-5 campus for year one because of the strong innovative leadership and staff. (Currently our second and third grade campus is participating in a blended learning initiative supported by Region 8 ESC specialists.) Our year two plan will include grades 2, 3 and 7. In year three, we will implement the grant in the remaining grade levels.

b.

Over the last three years, NLISD has scored above the state average on the math STAAR in the approaches category. Average district scores for NLISD for approaches compared to the state average were: 2017, +9; 2018, +6; and 2019, +6. However, in the meets and masters category, we have not done as well. Compared to the state in the meets category, NLISD average scores were: 2017, +0; 2018, -2, 2019, +1. In the masters category the district average was about 4% points below the state average for all three years. As a district, we are always concerned about student growth. From 2018-2019 the overall percentage of students who showed growth in math was only 71.5%.

We have significant problems in 4th grade and 6th grade math. Fourth graders in the district scored below the state average in both meets (-5%) and masters (-6%) in 2019. Additionally, their average growth from 2018-2019 was only 67%. Sixth graders in 2019 also scored below the state average in both meets (-9%) and masters (-13%) with only 41% of sixth graders showing growth from 2018-2019.

Student surveys of 4th and 5th grade students administered in the spring of 2020 show that students feel disengaged in the traditional classroom. At least 61% of students surveyed felt their teacher's pace was too fast or too slow for them. Seventy-eight percent said they would like to have some choice in assignments. And 70% wanted more one-on-one time with their teachers to discuss lessons, grades, and goals. Teachers reported feeling like there is not enough time to give the students the one on one time they need in the traditional classroom. We believe both test scores and student engagement can be improved by moving to a blended learning model in the elementary and middle school campuses.

#### c.

North Lamar ISD has a history of consistency within the teachers of the district. That stability is a result of teachers living in the area of rural northeast Texas from childhood to retirement. Many of our teachers are NLISD graduates. Some of those teachers will then retire from the district. With a relatively new administrative team in place, a deep understanding of the need for change has emerged. But with the need for change comes a need to educate those who have to make those changes for the benefit of our students.

We have done our research on blended learning and, in an effort to offer the best education possible for our students, we know that blended learning is the direction we must go. The opportunity to spend a year planning with professionals in the field of innovation makes the grant more attractive to a district that begs for change, but understands how difficult change can be. Even more exciting is the opportunity for assistance in financial sustainability and support in master scheduling. Innovation is a critical component to growth, and without growth we will only limit the very lives we have committed to educate as the future of our community. All of these reasons describe the willingness of North Lamar ISD to explore and embrace the broad operational innovations that could support a sustainable growth model if funded by the MIZ grant.

CDN 139911 Vendor ID 751213053	Amendment #
Statutory/Program Requirements	
1. Continued: Please use the additional space provided to respond	to Program Requirement Question #1.

2. **Project Manager:** Who will lead this work at your district by serving as the **BLGP Project Manager** and why is this person the right person for this role? (*Recommended Length: 0.5 page*)

- a. Include information about the experience, background, and ability to drive student results of the BLGP PM.
- b. Please describe the prospective PM's commitment to and vision for the BLGP in the district. Why is this individual committed to implementing a high-quality blended learning model?
- c. Describe how the district will enable the PM to make decisions across functions (C&I, IT, etc.) and influence district leadership to drive instructional and operational change.

#### a.

Jodie Ingram is a 25 year veteran of education. She has spent the last 13 years supporting teachers as they create engaging lessons. After completing the Uteach courses on Blended Learning 2 years ago, Jodie has taken the lead in our district's push to implement the Blended Learning Initiative. She was the program manager for the grant application process for the Raising Blended Learners Grant. Even before Covid-19 turned summer school into a virtual summer school, Jodie had led the initiative to make it a Blended Learning Pilot.

#### Statutory/Program Requirements

#### 2. Continued: Please use the additional space provided to respond to Program Requirement Question #2.

#### b.

Jodie's drive to move the district to a student-centered teaching environment has been the catalyst for the district's interest in blended learning. Jodie believes there is tremendous power in a teaching environment where individual student data drives the student's path and pace. Small group and one on one teaching allows students and teachers to build relationships and focus on individualized student growth.

c.

Jodie will lead MIZ grant training and update meetings that will include all curriculum and instruction staff and well as the district director of technology. Her supervisor, Dr. Angela Chadwick, is the Assistant Superintendent of Curriculum and Instruction. Dr. Chadwick initiated the decision to apply for the MIZ grant and made the decision to place Jodie in the position of MIZ Project Manager based on her extensive experience and qualifications. Mrs. Ingram and Dr, Chadwick already work side by side to initiate and implement change in innovative instructional practices across the district. Dr. Chadwick is a 34 year veteran educator who spent 15 years as a mathematics teacher in the public school system, 11 years as a campus principal, and 8 years as a central office administrator. Her background and leadership experience in moving people forward assisted in the decision to make Jodie the PM because of Jodie's passion and commitment to learning and knowing what it will take to make the MIZ grant successful.

3. How does the district use data to drive decision making about student achievement? (Recommended Length: 0.5 page)

a. Describe the quantitative goals, metrics, and measures that the district or charter school network tracks. Describe the progress towards these goals and the evidence the district collects to assess this progress. These indicators can include multi-annual, annual, and during-the-school-year goals. If available, include examples of data from the past few years to demonstrate how the district or open-enrollment charter school is tracking results.

At North Lamar ISD we understand the importance of student growth. Our goal each year is for every student at every grade level to show at least one year of growth for one year of instruction. We use data collected from common unit assessments (CUA's), benchmarks, and previous STAAR tests to inform math instruction in pursuit of this goal. The data is tracked and analyzed using Eduphoria, which allows disaggregation of the data in a variety of formats.

CUA's are created by teacher teams from item banks which provide STAAR type questions that align with the TEKS in each TEKS Resource System unit. These tests are administered at the end of each TRS unit. Teachers use the results of the assessments to determine which material to reteach or review with a class, small group, or individual.

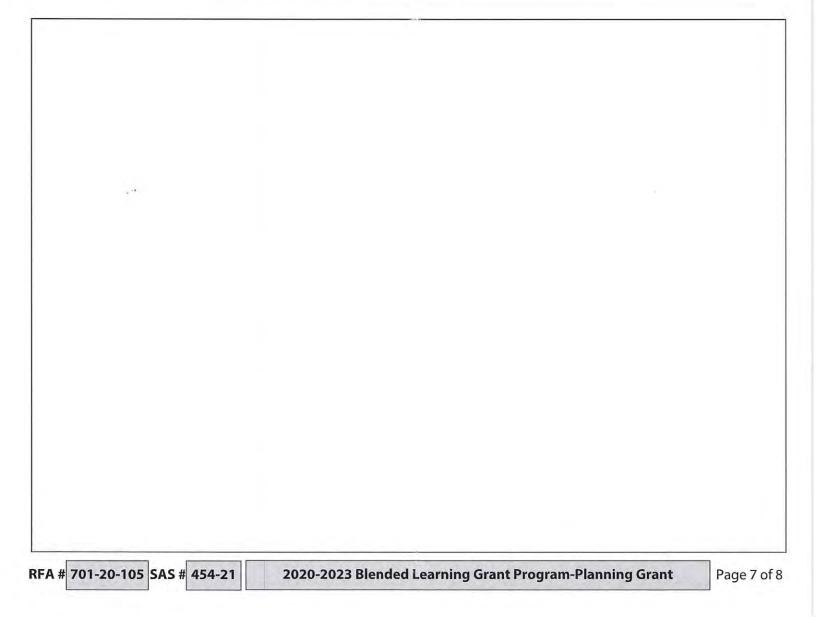

Each spring teachers in NLISD administer benchmark assessments. These tests are created by the curriculum department using the previous year's STAAR test. After assessments are given, the data is analyzed by teachers, coaches and principals to determine which students need additional support on TEKS not yet mastered as well as which students are failing to exhibit growth from the previous year's STAAR.

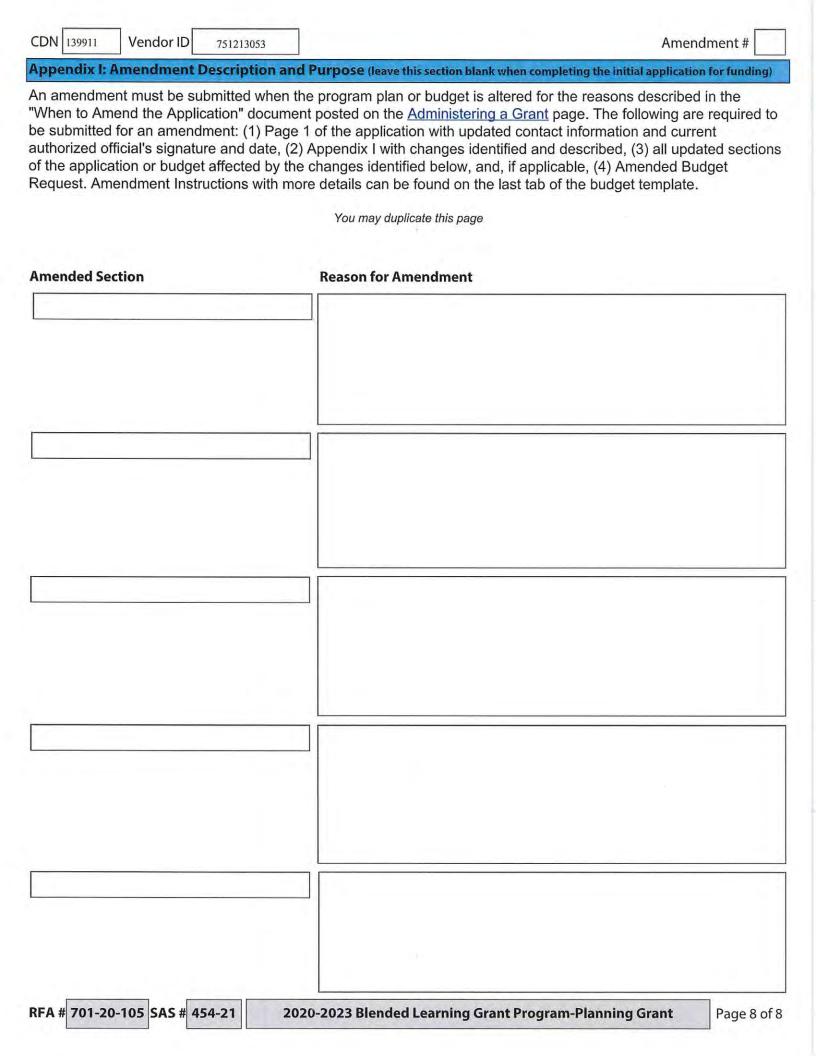

For grades K-5, the district uses the Istation ISIP test to measure student progress in math. At the beginning of each month when students sign in to Istation, they are automatically taken to the test. Reports generated in Istation show student growth from month to month. They also identify the mathematical domains in which students are struggling. Care teams at each campus use the data as one of the components in making whole child decisions for RTI placement.

Statutory/P	rogram Red	uirements (Cont.)	
3. Continued	: Please use t	e additional space provided to respond t	o Program Requirement Question #3.

4. **NON-MATH BLENDED LEARNING PILOT APPLICANTS ONLY:** What on-line curriculum program is intended to be used in the district and schools? (*Recommended Length: 0.5 page*)

a. Describe why this program best meets the needs of students and teachers in the proposed BLGP site(s) and how a high-fidelity use of this program will lead to gains in student achievement.

#### 2020-2023 Blended Learning Grant Program-Planning Grants Authorized by: GAA, Article IX, Rider 41, 86th Texas Legislature; TEC 29.924; TEC 28.020

#### IMPORTANT NOTICE: Application Part 2 is not compatible with Google Docs.

**Complete the supporting budget worksheets first,** i.e., 6100, 6200, 6300.... The Program Budget Summary worksheet is linked to and will auto-populate with the amounts you entered on the respective supporting budget worksheets. All budgeted amounts must be entered in whole dollar amounts. *Do not enter any cents.* 

On each supporting budget worksheet, complete the Total Program Costs and Total Direct Admin Costs lines. Together these lines must equal the Grand Total otherwise the field will change color to red indicating an error. These amounts will automatically populate on the Program Budget Summary worksheet.

If pre-award costs are allowable, budget all pre-award costs in the Pre-Award Cost column on the appropriate supporting budget worksheet(s).

#### Payroll 6100

Complete this worksheet to request payroll costs. Do not request funds for consultants or contractors on this worksheet; those funds should be requested on the Professional and Contracted Services 6200 worksheet.

#### Professional and Contracted Services 6200

Complete this worksheet to request professional services, consulting services, and contracted services.

#### **Supplies and Materials 6300**

Complete this worksheet to request supplies and materials.

#### Other Operating Costs 6400

Complete this worksheet to request other operating costs. Be sure to comply with documentation requirements, where applicable.

#### **Capital Outlay 6600**

Complete this worksheet to request capital outlay costs.

Capital outlay means funds budgeted or expended to purchase capital assets, such as equipment, or expenditures for the acquisition cost of capital assets. Capital assets are tangible or intangible assets having a useful life of more than one year, which are valued at \$5,000 or greater per unit, or the applicant's capitalization level, whichever is less. Capital outlay may include expenditures to make improvements to capital assets that materially increase their value or useful life.

#### **Program Budget Summary**

This worksheet auto-populates from the supporting budget worksheets for Program Costs, Direct Admin Costs, and Pre-award Costs, if applicable. There are only a few fields that may require input from the grantee, if applicable, such as indicating *Consolidate Administrative Funds, Indirect Costs, Shared Services Arrangement,* or the *Administrative Cost Calculation.* 

*Consolidate Administrative Funds* - If applicable, click on the cell, then click on the arrow that appears. Select "Yes, No or N/A" from the drop down selection.

*Indirect Costs* - Refer to the Maximum Indirect Cost Handbook to calculate the maximum indirect costs that may be claimed for the grant and enter the amount of indirect costs budgeted for this grant on line 7 under the Total Budgeted Cost column. <u>Maximum Indirect Cost Workbook</u> link.

Shared Services Arrangement - If applicable, enter amount of payments to member districts on line 9.

*Direct Administrative Cost Calculation* - Enter the Total of All Budgeted Costs from line 8 on line 10 to determine the maximum amount allowable for direct administrative costs.

#### For further guidance, refer to the Budgeting Costs Guidance Handbook.

\*For current year indirect cost rates, please visit the Federal Fiscal Compliance and Reporting Indirect Cost Rates page.

Indirect costs are not required to be budgeted in the grant application in order to be charged to the grant. Indirect costs are calculated and reimbursed based on actual expenditures when reported in the expenditure reporting system, regardless of the amount budgeted and approved in the grant application. Indirect costs claimed are part of the total grant award amount, not in addition to the grant award amount. Do not submit an amendment solely for the purpose of budgeting indirect costs.

To calculate the maximum indirect cost, please use the <u>Maximum Indirect Costs Worksheet</u> on the Grants Administration Division's Administering a Grant page.

#### **Instructions: Request for Amendment**

After the original application is approved and the grantee has received the Notice of Grant Award (NOGA), the grantee may need to make changes to the budget or the planned program. Most grantees are permitted to make some changes to the budget or program without notifying or getting approval from TEA. (Some grantees are required to notify and get approval from TEA for all changes to their budget or programs.) In other cases, however, the grantee is required to submit formal notice to TEA of the desire or intent to change the budget or program.

Refer to the Amendment Submission Guidance section of the Administering a Grant page of the TEA website. The guidance titled "When to Amend the Application" provides details on which grantees are and are not required to submit amendments and when amendments are required. Also refer to the General and Fiscal Guidelines, Amending the Application, for more detailed information about amendments.

Regardless of how a grantee amends the application to distribute funds among the class/object codes, the grantee is still responsible for carrying out the scope and objectives of the grant as described in the approved application.

TEA reserves the right to reject unnecessary amendments without reviewing and approving them.

#### Submitting an Amendment

An amendment must be submitted when the program plan or budget is altered for the reasons described in the "When to Amend the Application" guidance posted in the Amendment Submission Guidance section of the Administering a Grant page of the TEA website.

#### How to Submit an Amendment

An amendment may only be submitted by email to loiapplications@tea.texas.gov.

Pages to Include with an Amendment

#### Required for <u>all</u> amendment requests

- 1. Page one of the application with an updated signature and date
- 2. Appendix I of the applciation: Negotiation and Amendments

#### Required for budget amendment requests

- 3. Request for Amendment excel page
- 4. Program Budget Summary
- 5. Supporting budget pages

#### Assembling the Amendment

Follow these steps to complete all schedules required to be submitted:

1. Complete page 1

a. Complete the box in the upper right corner of the schedule by indicating the number of the amendment. The first amendment you submit for the grant is #1; if that amendment is approved, the next amendment becomes

b. Ensure all applicant information is current and correct.

c. Ensure the authorized official information is current and correct. The authorized official must sign and date with the date that the amendment is being submitted.

2. Complete Appendix 1: Negotiation and Amendments

a. Choose the section you wish to amend from the drop down menu

b. Describe the changes you are making and the reason for the changes. Always work with the most recent negotiated or amended application. If you are requesting a revised budget, please include the budget attachments

3. If you are requesting a budget change, complete the Request for Amendment budget page

a. In column A, enter the grand total for each class/object code in the most recently approved application or amendment.

b. In column B, enter the amount being deleted from each class/object code.

c. In column C, enter the amount being added to each class/object code.

d. Column D and the total direct cost line will automatically calculate your changes

4. If you are requesting a budget change, complete the Program Budget Summary page and the corresponsing supporting budget page. For each class/object code on the budget summary, strike through the previously approved amount and enter

5. Do not resubmit any attachments required in the original application.

5. Do not resubmit any attachments required in the original application.

MATH INNOVATION ZONES APPLICANTS ONLY

District or Charter School Network Information Form

District Overview

Attachment 1A

Math Innovation Zones takes a feeder pattern approach from pilot to scale in four years. Please input your proposed feeder pattern below.

Instructions:

1) Input the school name for the proposed middle (or upper) school and associated elementary schools

2) Indicate the proposed launch grade for **year one** with an "x" in approriate grade level

3) If necessary, provide a **rationale** for the intended grades for year one of MIZ

4) An **example** is provide immediately below for context

Please reach out to MIZ@tea.texas.gov with any questions about this document

		Grade To Be Launched in Year One				ar One

#### To Whom It May Concern:

As the superintendent of North Lamar ISD, I will support the Math Innovation Zone grant. I have been an advocate of improving the academic outcomes of our students through the use of online instruction as part of a blended learning process. As a campus principal, I initiated the only 1:1 campus with Chromebooks in the district because I believed that online learning provided the best option to allow students to learn any time and in the best possible place for them to understand how they learn best.

I am convinced that through the opportunities provided by the MIZ grant, the focus on teacher buy-in for technology as a classroom tool will support a positive perception of technology by students, their parents and the community. This grant is an excellent opportunity for all of our students to have access to the latest research and the very best instructional methods that we can provide, especially in math, where it is critical that they comprehend in order to advance through the curriculum.

Our near-term priorities are to improve academic outcomes in math for all students in Prekindergarten through 8th grade. In the long-term, we want to create a fundamental shift in instruction that optimizes learning for all students in ways that traditional instruction will not. I understand that blended learning will bring that shift to our students through the use of individualized, data-driven instruction.

I realize that creating blended learning classrooms can be challenging for teachers, but the MIZ grant provides the critical capacity to dedicate time and energy to support teachers with high quality professional development so that they feel secure and supported. The timing of our application for this grant has never been better as COVID-19 has increased our district prioritization of blended learning as well as the understanding of the need for innovation in instructional delivery. The planning and execution process provided by the grant will greatly benefit the district and our schools. If North Lamar ISD receives the MIZ grant, I believe that, with the team we have in place, our goal to shift to blended learning will be properly planned and implemented with fidelity.

Sincerely,

towart

Kelli Stewart Superintendent North Lamar ISD kwstewart@northlamar.net

September, 17th, 2020

To Whom it May Concern,

This is my first year as principal of Stone Middle School in North Lamar ISD. For the past two year, I was a SPED inclusion teacher at Stone. During my tenure, I have noticed a deep need for data driven instruction and blended learning in our school.

Prior to coming to Stone, I was an elementary school teacher for 15 years and a principal for four years. During that time, I saw the power of using data as a tool for individualizing instruction. At the grade school level, we used adaptive programs such as Istation and Education Galaxy. This adaptive technology not only provided our students with individualized instruction, but it gave us invaluable data as educators. We used the data to develop appropriate groups for intervention. We then worked with small groups of students daily in a blended learning model driven by the data.

At Stone Middle School, we currently use Read180, however, we do not have a widely available adaptive program for math. Our math lab uses IXL, but that is only available to a small number of struggling students. My vision is to see an individualized adaptive program available to all math students. Eventually, I would like for all of our teachers to use a blended learning model in their classrooms to not only individualize learning, but to provide student choice thereby increasing student motivation.

The MIZ grant will provide us with the resources we need for our math teachers to effectively integrate individualized instruction and blended learning into their classrooms. If our district receives the MIZ grant, I pledge to give my full support in all endeavors to implement its components at Stone Middle School.

Sincerely,

Kudson

Dee Hudson Stone Middle School Principal

September 16th, 2020

To Whom it May Concern,

I am writing in support of the Blended Learning MIZ Grant being submitted by NLISD. I have been the principal at Bailey Intermediate School, a 4th and 5th grade campus, for seven years. Prior to that I was a 5th grade math teacher at Bailey for 14 years. I am passionate about math education, and I understand the power of a blended learning model for providing individualized instructions.

As principal, I have worked with teachers to strengthen the use of data to drive instruction. We analyze common unit assessment data and Istation data throughout the year in order to meet individual student needs. Another goal of mine has been to obtain more devices for our campus. Each year I have used part of my principal's fund to purchase Chrombooks. Eventually, my goal is to be a one to one campus.

I believe the blended learning instructional style is the best model for differentiation and student growth. It also can provide students choice and the opportunity to learn at their own pace, which leads to better student motivation and engagement.

The MIZ grant will provide us with the resources we need to move into a full blended learning model. I am fortunate to have forward thinking math teachers who are always trying to improve their instruction. With quality professional development and the technology they need, I have no doubt our teachers will embrace a blended learning model and data driven instruction.

If we receive the MIZ grant, I will fully back its implementation at Bailey Intermediate School.

Sincerely, Jugela Compton

Angela Compton Bailey Intermediate School Principal

#### September 17th, 2020

To Whom it May Concern,

I have been the principal at Parker Elementary for three years. During my tenure, one of my goals has been to move teachers toward a blended learning model. I believe a blended learning model provides the opportunity for differentiation and data driven instruction our students need.

At Parker Elementary we have one math interventionist covering grades Pre-K through 4th. We have difficulty providing the one on one time our struggling students need. The blended learning model enables teachers to better use class time for intervention and extension. It also allows advanced students to move more quickly. Being able to work at a comfortable pace helps students stay more engaged. The MIZ grant would provide us with resources we need to more effectively serve all of our students.

One of our school improvement goals is to provide adequate professional development opportunities for teachers to develop effective teaching strategies. The MIZ grant will provide the professional development my teachers need to implement blended learning. If our district receives the MIZ grant, I pledge to give my full support to its implementation at Parker Elementary School.

Sincerely,

18

Kristin Hughes Parker Elementary School Principal

#### 9/16/2020

#### To Whom It May Concern,

As the Principal of Everett Elementary, a 2nd and 3rd grade campus, I have begun to implement Blended Learning instructional strategies. Everett received the Instructional Continuity Grant last year as a result of our accountability rating. In a uniquely designed school district, our campus of only 2nd and 3rd grade gives us no opportunity to utilize a growth measure as an option for accountability, so we must perform very well. Having the ability to diagnose student learning needs and identify gaps in understanding is critical to our success. We need online programs to differentiate for those individual student academic needs.

Although instructional continuity might be defined as a need for more instructional devices and hotspots, that technology will not benefit students if their teachers are not well versed in blended learning. I did not want the Everett Elementary teachers or students to get caught without the ability to utilize technology for effective and individualized instruction if we have to send our students home again. I decided to put the majority of the Instructional Continuity Grant money into a year-long blended learning instructional shift with embedded professional development from the instructional technology specialist, elementary mathematics specialist, and elementary ELAR specialist from our education service center. Region 8 ESC designed a blended learning focused training and coaching plan for us.

We are taking the money from the Instructional Continuity Grant to make a permanent change in the way we teach so that we can do a better job of both in-person and remote learning. One day all of our students will be back in the classroom, and when they are, we will be more prepared to offer the very best in blended learning. The MIZ grant will give us an opportunity to take everything we are learning this year and make it even better once our campus becomes part of the program.

I give my full support to the implementation of the MIZ grant if North Lamar ISD is approved as a recipient.

Sincerely,

pre Sanders

Lora Sanders Everett Elementary School Principal

#### 9/16/2020

#### To Whom It May Concern,

I am beginning my fourth year as principal of Higgins Elementary, a pre-kindergarten, kindergarten, and first grade campus. In my beginning years in education, I was a fourth grade math teacher. I am passionate about math education and about making sure all students reach their maximum potential.

An area of concern for our campus is our high retention rate for kindergarten and first grade students as compared to the state. Last year we retained 10.9% of our kindergarten students compared to 1.7% for the state. For the SPED population, 15.4% of our students repeated kindergarten compared to 6.2% for the state. In first grade, we retained 4.3% compared to 3.1% for the state and 24.1% compared to 5.5% for SPED students. This data tells me we need to make a shift in how we serve our struggling students.

Currently we use Istation math with the ISIP assessment. ISIP data allows us to make informed decisions about which students need intervention. However, this knowledge is not always put into action in an effective manner in the classroom. I believe implementing quality blended learning models in our classrooms will allow our teachers to use the data more effectively to individualize instruction so that we don't leave our struggling students behind. It will also give our advanced students the opportunity to move on at a quicker pace. This will help keep our students engaged and excited about learning.

Our teachers already utilize station rotations and small groups. The MIZ grant would give us the resources we need to provide professional development for our teachers so that they can become more effective in using a blended learning model. It will also, if continued, provide us with more devices for our students which will allow more flexibility for individualizing instruction. Because of these advantages, I am in full support of the MIZ grant and the implementation of its components on my campus.

Sincerely,

11 a love

Lori Malone Higgins Elementary School Principal

# Jodie Ingram

#### **Professional Summary**

Innovative Instructional Technology Specialist with 13 years of experience offering outstanding support to users of various levels. Exceptional skills and knowledge in creating engaging lessons. Subject matter expert on blended learning. Established reputation as sharp curriculum expert when working with teachers to identify and deploy solutions. jingram@northlamar.net H: (903) 249-2992 Paris, TX 75462

#### Skills

- Project organization
- Team management
- Problem resolution
- Blended Learning
- Course management
- Process improvement

#### Work History

North Lamar ISD - Instructional Technology Specialist Paris, TX 07/2007 - Current

- Supported district technology integration by designing workshops and planning large-scale professional development events for teachers
- Designed, implemented and managed training programs to meet department and school needs in blended learning.
- Partnered with the curriculum team to analyze district readiness, design teacher preparation workshops, plan parent night information sessions, and garner community support
- Modeled the integration of technology in all curriculum areas using a variety of tools and software
- Assisted teachers to develop curriculum materials and specific lesson plans to utilize technology

#### North Lamar ISD - CTE Technology Teacher

Paris, TX 08/2000 - 07/2007

- Taught Office Education Classes including BCIS I & II
- Taught Technology Education Classes including Computer Applications, Technology Systems, and Drafting

#### **Cooper ISD - CTE Computer Teacher**

Cooper, TX 08/1995 - 07/2000

• Taught Office Education Classes including Computer Science, Business Computer Information Systems I & II

#### Education

#### 04/2019

**Uteach Professional Development** University of Texas Online Blended Learning Series

#### 08/1999

TAMU - Commerce Commerce, TX Master of Science: Training And Development

#### 08/1995

East Texas State University Commerce, TX Bachelor of Science: Education

#### To Whom it May Concern,

September 16, 2020

I am writing on behalf of North Lamar ISD submitting the Blended Learning MIZ Grant. Our school is ready for the challenge of implementing 21st century learning skills, and we believe the blended learning instructional style is the best avenue to grow our students. This grant is written in alignment with our school improvement plan and the philosophy of our school where we focus not only on student learning but also the ability of all teachers to become more effective in their teaching methods. This grant will provide necessary resources and professional development so that teachers can effectively integrate blended learning into their lesson design and create a student-directed classroom.

Over the past two years, my professional interest has been piqued by the instructional method of blended learning. I have attended the Uteach Blended Learning Program courses to learn how blended learning could impact our district. I am excited about the possibilities of reaching every student where they are on their learning path. The time has come to leave behind the instructional method of "teaching to the middle". Our students deserve an education that is designed to propel them forward in their academic growth and success and not be satisfied with students "just passing the class." Reaching each student individually is impossible in the traditional 'teach from the stage' method, but blended learning provides opportunities for small group and individual instruction that can target the student's exact needs. This is the path to student growth and success.

Since attending the Uteach Blended Learning course, I have studied many books over blended learning including *Blended Using Disruptive Innovation to Improve School* by Michael Horn and Heather Staker of the Christensen Institute and the *Blended Learning* series by Catlin Tucker. I have hosted several book studies for the district using *Balance with Blended Learning* by Catlin Tucker, and I have seen our educators embrace the idea of blended learning. It is inspiring to see teachers so excited about the possibilities that blended learning can offer their students. I can't help but imagine how far we can go with the assistance of the MIZ planning grant. The opportunities for professional development will help ensure the success of the blended learning initiative.

Last year I was proud to lead our team as we applied for the Raising Blended Learners grant. We made it through the first round and received much intensive training. Although we were not chosen, the experience cemented for our whole team that blended learning is the direction we need to be going. We are excited about the opportunity to partner with experts in the field to assist in designing an educational plan that will enhance our students' success.

Sincerely,

odie Ingram

Jðdie Ingram, MS Instructional Technology Specialist North Lamar ISD
