Foundation School Program

TEXAS PUBLIC SCHOOL FINANCE OVERVIEW
Foundation School Program (FSP)

The FSP establishes how much state funding school districts and charter schools are entitled to receive.

Formulas are set in statute (Chapters 46 and 48), and they consider both student and district characteristics including the number and type of students enrolled, district size and geographic factors, and local taxable property values and tax rates.

Generally, once entitlements are established, the formulas are used to determine how much a district can generate locally (local share) through property taxes before making up the difference with state funds (state share).
FSP Appropriation (State Aid Only) breakdown for the 2022–2023 Biennium (in millions)

<table>
<thead>
<tr>

</tbody>
</table>
A balancing act:
State Share vs. Local Share

As Local Share Increases...
State Share Decreases
Annual State & Local Statewide FSP Entitlement for FY2022

5.12 million students in average daily attendance
and that number is projected to continue to grow each year.

$50.29 billion (state & local) for FSP M&O
M&O = maintenance & operations -> salaries, utilities, etc.

$8.49 billion (state & local) for FSP I&S
I&S = interest & sinking -> debt service payments on voter approved bonds
Maintenance and Operations Tiers

**TIER ONE**
Refers to the district’s foundation entitlement.

**The calculation is based upon:**

- District characteristics.
- Student characteristics.
- Number of students in average daily attendance (ADA).
- **Basic allotment** per student in ADA, which is set in the General Appropriations Act ($6,160 in FY2020 and FY2021).
- School district tax rate (varies, but State MCR is $0.9134 per $100 of local school district property value).

**TIER TWO**
Refers to the district’s “enrichment” entitlement.

**The calculation is based upon:**

- Number of students in weighted average daily attendance (WADA).
- Number of pennies of tax effort above MCR.
- Guaranteed amounts for pennies of tax effort are set in statute and/or General Appropriations Act called the **Guaranteed Yield Per Penny**.
- School district tax rate (based on local decision to have optional tax rate between MCR and $1.0834* per $100 of local school district property value).

*Not all school districts can levy up to $1.0834, only school districts with an MCR of $0.9134 can go up to $1.0834.
HB 3 infused $4.4 billion of net new revenue (year over year) into district budgets.

$4.4B increase in total funding for public education operations in fiscal year 2020 over fiscal year 2019, resulting in a year over year gain of $872 per ADA.

The numbers on this slide are inclusive of the ADA hold harmless adjustments provided due to Covid 19.
Tax Compression under HB 3

TEXAS PUBLIC SCHOOL FINANCE OVERVIEW
Refresher: M&O Taxes before HB 3 under Prior Law

Tier One

Tier Two (Max 0.17)

First 4 Golden Pennies set by board action

Utilizing the next 13 pennies required voter approval via a Tax Ratification Election (TRE)
HB 3 Year One: Max M&O Tax Rates Dropped From $1.17 to $1.0683

1. Tier One max rate reduced by 7%
2. First two Copper Pennies become Golden Pennies
3. Remaining Copper Pennies are cut in ~ half
4. Rates in most cases cannot be raised for year 1

HB 3 Year One (FY2020)

Tier One

Tier Two (Max 0.17)

$0.93

$1.0683

3.2 cents of future taxing capacity

8 Golden Pennies

9 Copper Pennies

$0.90 $0.91 $0.92

$1.01

$0.92
HB 3 Year Two: Max M&O Tax Rates Dropped to $1.0864 (17 cents above state compression of $0.9164)

1. Tier One State Compression moved from $0.93 to $0.9164
2. Tier One minimum MCR established at $0.8247
3. Each district now has their own maximum total rate.
4. All districts would need a Voter Approval Tax Rate Election (VATRE) in order to exceed [MCR + $0.1383].
5. *Tier One MCR of $0.9164 + $0.1383 = $1.0547, which is the new state maximum M&O tax rate w/out VATRE).
HB 3 Year Three: Max M&O Tax Rates Dropped to $1.0834 (17 cents above state compression of $0.9134)

1. Tier One State Compression moved from $0.9164 to $0.9134
2. Tier One minimum MCR moved from $0.8247 to $0.822
3. Each district now has their own maximum total rate.
4. All districts would need a Voter Approval Tax Rate Election (VATRE) in order to exceed \([\text{MCR} + \$0.1383]\).
5. *Tier One MCR of \(0.9134 + 0.1383 = 1.0517\), which is the new state maximum M&O tax rate w/out VATRE.\]
State Average Rate Compression Under HB 3

Tax Year 2022 tax rates computed as follows (Tier One Tax Rates = Current Law and GAA growth assumptions of 4.36%);
Tax Rates and Tax Collection History

[Graph showing the total M&O tax collections and state average M&O tax rate over the years 2005 to 2021. The graph includes data points for HB 3 (86-R) and HB 1 (79-R).]
The M&O tax rate is then allocated into three portions of the FSP formulas.

**Tier One**
- Compressed M&O Tax Rate ($0.9134)

**Tier Two**
- **LEVEL 1**
  - Eight Golden Pennies* ($0.9134 - $0.9934)
  - No Excess Local Revenue

**LEVEL 2**
- Nine Copper Pennies* ($0.9934 - $1.0834)
- Excess Local Revenue Above Entitlement

*The specific tax rate where the golden and copper pennies begin will vary by district because each district can have different MCRs.*
Tier One Entitlement

TEXAS PUBLIC SCHOOL FINANCE OVERVIEW
How is Tier One funding determined?

The Basic Allotment (BA) is $6,160 per student for the 2022–2023 biennium and is set in Chapter 48 of the Texas Education Code, and it can be increased through the General Appropriations Act (GAA).

The BA is then used in a series of formulas that apply specific weights and adjustments based on student and district characteristics.

These formulas are known as Tier One.
HB 3 increased the basic allotment by **20%** in FY2020.
The regular program allotment is nearly twice as large as the other tier one allotments combined.

Tier One – Subchapters B & C

SUBCHAPTERS B & C (IN WADA FOR TIER TWO PURPOSES)

- Basic Allotment - $6,160 per student in average daily attendance.
- Small & Mid-Sized District Allotment
- Special Education – various weights (HB 3 increased Mainstream from 1.10 to 1.15)
- Allotment for Dyslexia (or related disorder) – 0.10 weight
- Compensatory Education Allotment – 0.225 – 0.275 spectrum of weights
- Bilingual Education Allotment (includes Dual Language) – 0.10 / 0.15 / 0.05 weights
- School Safety Allotment - $9.72 per student in average daily attendance
- Gifted and Talented Allotment - 0.07 per ADA (brought back in HB1525)
Tier One – Subchapters B & C

SUBCHAPTERS B & C (IN WADA FOR TIER TWO PURPOSES)

- Career & Technology Education Allotment – 1.1, 1.28, 1.47 weights, & $50 p-tech/new tech
- Public Education Grant Allotment – 0.10 weight
- Early Education Allotment – 0.10 weight
- College, Career, or Military Readiness (CCMR) Outcomes Bonus - $5,000 / $3,000 / $2,000 for educationally disadvantaged / non-educationally disadvantaged / SPED
- Fast Growth Allotment – 0.15, 0.30, 0.45 weights (excluding charters)
- Teacher Incentive Allotment - $12,000 / $6,000 / $3,000 ranging to $32,000 / $18,000 / $9,000 for master teachers / exemplary teachers / recognized teachers, respectively
- Mentor Program Allotment – $1,800 for each beginning teacher with a qualified mentor teacher
Tier One – Subchapter D

SUBCHAPTER D (NOT IN WADA FOR TIER TWO PURPOSES)

• Transportation Allotment - $1.00 per regular mile for eligible students
• New Instructional Facility Allotment - $1,000 per ADA up to $100 million statewide annually
• Dropout Recovery & Residential Placement Facility Allotment - $275 per ADA
• Tuition Allotment – amount varies, limited by commissioner rule
• College Preparation Assessment Reimbursement
• Certification Examination Reimbursement
Small & mid-sized district allotment

The small and mid-sized district allotment provide for additional funding for some school districts.

The small district allotment (SDA) applies to districts with fewer than 1,600 students and provides the formula that results in the highest level of funding:

- Districts with fewer than 1,600 students = \((1,600 - \text{ADA}) \times 0.0004) \times \text{Basic Allotment}\)

- Single county districts with fewer than 300 students = \((1,600 - \text{ADA}) \times 0.00047) \times \text{Basic Allotment}\)

The mid-size district allotment (MDA) applies to districts with less than 5,000 students.

- MDA = \((5,000 - \text{ADA}) \times 0.000025) \times \text{Basic Allotment}\)
The per-student funding generated by the SDA and MDA formulas decreases as average daily attendance increases.
Small & mid-sized district adjustment as used for SPED and CTE allotments

The (incremental) small and mid-sized district allotment per ADA that is used to calculate the district’s small/mid-sized stand-alone allotment is added to the amount of the district’s basic allotment for use in calculating the total special education and career and technology allotments.

Although all charter schools (regardless of enrollment) receive an adjusted average of the small and mid-sized district allotment per ADA, their special education allotment is funded using the basic allotment. However, HB1525 modified their career and technology allotments to use the state average adjusted allotment.
Career & Technology

Changes Career & Technical Education (CTE) funding from one weight of 1.35 per Full Time Equivalent (FTE) to a system of tiered weights related to courses.

Entitles a district, for each FTE student in average daily attendance in an approved CTE program in grades 7 through 12, to an annual allotment equal to the basic allotment, or, if applicable, the sum of the basic allotment and the allotment under Section 48.101 (Small and Mid-Sized District Allotment) to which the district is entitled, multiplied by:

\[1.1 - \text{for a FTE student in CTE courses not in an approved program of study; }\]
\[1.28 - \text{for a FTE student in levels one and two CTE courses in an approved program of study, as identified by TEA; and }\]
\[1.47 - \text{for a FTE student in levels three and four CTE courses in an approved program of study, as identified by TEA.}\]
Fast Growth Allotment Changes

- Creates 3 tiers (0.48, 0.33, 0.18 - 40%, 30%, 30%)
  - Based on total enrollment growth over 6 years greater than 250 (excludes VSN)
  - Transition $40M Hold Harmless
  - Funded on incremental growth above 250 instead of total enrollment.
  - Caps spending on this allotment at $270 million for 2021-22 school year; $310 million for the 2022-23 school year; and $315 million for the 2023-24 school year

Tier one makes up the vast majority (76%) of the Foundation School Program (FY21).
Tier Two Entitlement

TEXAS PUBLIC SCHOOL FINANCE OVERVIEW
Tier Two Overview

A district’s Tier Two allotment provides for enrichment funding which is intended to supplement the basic funding provided by Tier One funds.

To receive Tier One funding, school districts must tax at their individual maximum compressed tax rate (MCR) per each $100 of local district property value. However, districts have local discretion to set a tax rate that is $0.17 above their individual MCR.

Tier Two focuses on taxpayer equity by ensuring that school districts receive a guaranteed amount of funding for each penny of tax effort up to $0.17 above their MCR for each student in their weighted average daily attendance (WADA).

This guaranteed amount per WADA is called the **guaranteed yield**.
HB 3 linked the tier two guaranteed yields to the basic allotment beginning in FY2020.

The number of golden pennies have expanded over time from four to eight.
The difference between ADA and WADA

AVERAGE DAILY ATTENDANCE (ADA)

The number of actual students in attendance on the average school day.

There are 5.1 million ADA in Texas but there are 7.2 million WADA.

There will always be less ADA than WADA.

Used to calculate Tier One allotments.

WEIGHTED AVERAGE DAILY ATTENDANCE (WADA)

Calculated using Tier One allotments (Subchapters B & C) (not the number of actual students in attendance).

Districts with large populations of students with special characteristics (i.e. compensatory education students) will have more WADA than similar districts with small populations.

Used to calculate Tier Two allotments.
Tier Two: How are the number of weighted students (WADA) in a district calculated?

Tier One
Entitlement – Subchapters B & C

Basic Allotment ($6,160)

= Weighted Average Daily Attendance (WADA)
Revenue generated by a penny of tax effort can vary greatly between districts

Disparities in local taxable property values directly affect how much a penny of M&O tax effort can generate at the local level.

Tier Two introduces the concept of the GUARANTEED YIELD (GY) formula on a “PER PENNY PER WADA” basis to help close the gap.
Districts are equalized up to 160% of the Basic Allotment for the golden pennies.

Golden Pennies equalized up to $98.56 per penny of tax effort per WADA.

No excess local revenue from districts that have revenue greater than 160% of the Basic Allotment.
Districts are equalized up to 80% of the Basic Allotment for the copper pennies.

Copper Pennies equalized up to $49.28 per penny of tax effort per WADA.

No excess local revenue from districts that have revenue greater than 80% of the Basic Allotment.

Excess revenue

---

Tier Two example of a district with an M&O tax rate of $1.09 and a local yield of $75
Local Revenue Levels in Excess of Entitlement

TEXAS PUBLIC SCHOOL FINANCE OVERVIEW
What are local revenue levels in excess of entitlement?

Chapter 48 of the Texas Education Code (TEC) 48.257 ensures that no district retains local revenues that exceed their Tier One entitlement.

In addition, TEC 48.257 ensure that no district retains local revenues that exceed their Tier Two copper penny entitlement under TEC 48.202(a-1)(2).

Districts subject to this provision must choose a method to reduce their local revenue level below their entitlement level.
Excess Local Revenue Levels for each Tier

**Tier One**
Basic Allotment of $6,160
Excess Local Revenue Above Entitlement LEVEL 1

**Tier Two**
LEVEL 1
Eight Golden Pennies at 160% of the Basic Allotment
No Excess Local Revenue

**Tier Two**
LEVEL 2
Nine Copper Pennies At 80% of the Basic Allotment
Excess Local Revenue Above Entitlement LEVEL 2
How does a district reduce excess local revenue levels?

A district has five options available to reduce excess revenue levels:

- Consolidation by agreement [with another district] (TEC, §49.051)
- Detachment and annexation by agreement (TEC, §49.101)
- Purchase of attendance credit (TEC, §49.151) ← This is 100% of current agreements.
- Education of nonresident students [from a partner district] (TEC, §49.201)
- Tax base consolidation [with another district] (TEC, §49.251)

If a district fails or refuses to exercise Option 1, 3, 4 or 5, the commissioner is required to achieve revenue level reduction through detachment and annexation or consolidation (Option 2).
How does the state use excess local revenues?

The most commonly chosen method of reducing excess local revenue levels is Option 3 (paying directly to the state).

Payments historically were made in seven equal installments from February through August of every fiscal year, although HB 3 allows for one August payment, and most districts now choose this option.

Funds received by the state, which will total $5.65 billion in the 2022–2023 Biennium, are appropriated in the General Appropriations Act as a method of finance to help pay for the Foundation School Program (FSP).
In FY2021, HB 3 reduced the combined recapture for the top five recapture districts (under prior law) by $793 million.
Charter School Funding

TEXAS PUBLIC SCHOOL FINANCE OVERVIEW
Charter School Funding Overview

Open enrollment charter schools (charter schools) are entitled to Tier One, but, because they do not have the ability to generate the local share through a property tax base, the state funds 100% of their entitlement.

Charters schools are also funded using state average tax rates for Tier Two.

Charter schools are not eligible for facilities funding under IFA or EDA but do qualify for NIFA as part of the Tier One calculation and qualified for facilities funding beginning in FY2019.
Charter School Funding – Tier One

Charter schools are funded at the state average basic allotment ($6,160 for most school districts unless they tax below their MCR).

All charter schools, regardless of the number of students, receive a stand-alone small & mid-sized district allotment based on an adjusted weighted average of the amounts provided to school districts under TEC, 48.101(b) or (c).

For FY2022 this amount averages to $1,099 per student in average daily attendance and is subject to change.
Charter School Funding – Tier Two

Charter schools do not have the authority to levy a tax rate, therefore they cannot raise local property taxes.

Instead, charter schools’ Tier Two allotments are calculated using the state average M&O tax rates for the golden and copper pennies ($0.0629 and $0.0262, respectively in FY2022).

The result of this formula is that charter schools benefit as more districts hold elections to increase their M&O tax rates.
Charter Facilities Funding

Eligible charter schools will receive a facilities allotment calculated using the state average debt service tax rate for school districts (estimated at 22.4 cents), limited to $60 million in additional statewide funding.

Funding for FY2022 is currently estimated at approximately $165 per student in average daily attendance (ADA) and is subject to change.
Facilities Funding

TEXAS PUBLIC SCHOOL FINANCE OVERVIEW
Facilities Funding

In Texas, school districts can generally adopt interest & sinking (I&S) tax rates up to $0.50 cents to generate revenue used to fund the annual debt service payments associated with bonds that are typically issued for the construction of facilities as well as for other legal, voter-approved purposes.

I&S tax collections are not used to pay directly for construction costs.
Facilities Funding: Instructional Facilities Allotment (IFA)

This program was enacted by House Bill 1 of the 75th Legislature (1997).

The IFA program provides assistance to school districts in making debt service payments on qualifying bonds.

Proceeds must be used for the construction or renovation of an instructional facility only.

The program operates through applications (prior to bond issuance) and has award cycles. The IFA is NOT used to pay directly for construction costs.
Facilities Funding: Existing Debt Allotment (EDA)

Created by the Texas Legislature in 1999, and the roll-forward provision was made permanent in 2009 (HB 3646).

House Bill 21 (2017, First Called Session) increased the EDA guaranteed yield from $35 to the lesser of $40 per ADA per penny on interest and sinking fund (I&S) taxes levied by school districts to pay the principal of and interest on eligible bonds, or an amount that would result in a $60 million increase in state aid from the previous yield of $35. The yield for the 2021–2022 school year is estimated at $39.

EDA can be used to help pay for debt on both instructional and non-instructional facilities. EDA is NOT used to pay directly for construction costs.

The program operates without applications and has no award cycles but, to be eligible, payment of existing bonds must have been made during the final year of the previous biennium.
Eligibility, guaranteed yields, and limits on IFA and EDA

Funding formulas for facilities are similar to Tier Two because they work on a guaranteed yield per penny of tax effort per student. However, facilities funding formulas use ADA instead of the WADA used in Tier Two.

IFA has a guaranteed yield of $35 per student in ADA per penny of tax effort, while EDA has a floating guaranteed yield, and will be $39 in 2021–2022, and EDA funding is currently limited to $0.29 cents of tax effort.

Formula Transition Grant

HB 3 created a five-year formula transition grant program to provide transitional aid for districts experiencing a loss of M&O revenue relative to prior law (FY2020 through FY2024).

HB 1525 added a statewide appropriation cap of $400 million per year.

For 2021-2022, as of January 2022, the uncapped FTG statewide total would have been ~$444 million.
Equalized Wealth Transition Grant (HB 3)

HB 3 created a five-year equalized wealth transition grant program to provide transitional aid for districts experiencing a loss of the 1992-93 Chapter 41 hold harmless calculation.

The amounts of the grants are based on the amount of the benefit these districts received in FY2019 and are stair-stepped down in 20 percent increments over five years.

All eligible districts under the legislation will receive a grant award automatically and do not need to apply to TEA to receive a grant.
