Texas English Language Proficiency Assessment System (TELPAS) Alternate

Program Overview

TELPAS Alternate fulfills federal requirements for assessing the English language proficiency of English learners (ELs) with the most significant cognitive disabilities who cannot participate in the general English language proficiency (ELP) assessment, even with allowable accommodations. ELs whose parents have declined bilingual or English as a Second Language (ESL) program services are also required to be assessed with TELPAS Alternate. TELPAS Alternate assesses students in four language domains: listening, speaking, reading, and writing and is aligned with the Texas English Language Proficiency Standards (ELPS). TELPAS Alternate provides performance data used to fulfill state and federal reporting requirements. Student performance is reported in terms of five English language proficiency ratings: awareness, imitation, early independence, developing independence, and basic fluency.

Assessment Scores

TELPAS Alternate is a holistic inventory for grades 2–12. The inventory is not designed to measure mastery of content with a pass or fail score as learning a second language takes time. Instead, the assessment provides a measure of progress, indicating annually where each EL is on a continuum of English language development. The progress of students along the continuum of the five proficiency ratings is the basis for the TELPAS Alternate reporting system and the key to helping districts monitor whether students assessed with TELPAS Alternate are making steady annual growth in learning to listen, speak, read, and write in English.

The following gives a brief description of the TELPAS Alternate grades 2–12 listening, speaking, reading, and writing scores and proficiency ratings for all language areas assessed. For more detailed technical information about assessment scores, refer to the Technical Digest, available on TEA's Student Assessment Division website.

TELPAS Alternate Scale Score

The TELPAS Alternate scale scores are statistics that can be used for evaluating a student's annual growth and pinpointing how high or low a student performs within a proficiency level. Scale scores allow a comparison of scores by accounting for differences in the difficulty of the assessment form used for each administration. The listening, speaking, reading, and writing domains each have their own scale score, ranging from 600 to 1000. The scale score ranges for each domain are subdivided into the five proficiency levels of awareness, imitation, early independence, developing independence, and basic fluency.
**English Language Proficiency Ratings**

Students who take the TELPAS Alternate assessment receive proficiency ratings in each language area assessed—listening, speaking, reading, and writing—as well as a composite rating that combines the language-area ratings into one overall English language proficiency rating. The following gives a brief description of the abilities associated with the composite and language-area ratings.

Awareness—Students who receive this rating may be aware of English sounds or print, but they have little or no functional ability to participate in communication activities in English.

- EL listeners at this level may require full second language acquisition support, be unable to understand or react to routine directions and simple conversations, and alert to spoken English but be unable to demonstrate understanding.
- EL speakers at this level may require full second language acquisition support, know too little English to communicate simple ideas even when topics are highly familiar, alert to or show reaction to stimuli but be unable to demonstrate ability to clearly communicate thoughts, and not initiate spoken communication in English.
- EL readers at this level may require full second language acquisition support; alert to or show reaction to concrete symbols, letters, and/or words in English but not demonstrate understanding; alert to or show reaction to letter sounds in English but not demonstrate understanding; and not react or respond to letters, words, texts, or concrete symbols.
- EL writers at this level may require full second language acquisition support, know too little English to participate in shared writing activities, and alert to or show reaction to stimuli but not demonstrate the ability to communicate their thoughts in writing.

Imitation—Students who receive this rating match, imitate, or approximate some English in their environment; however, they are not able to independently understand or produce English. They participate in routine communication activities in a familiar environment when the activities are significantly linguistically accommodated.

- EL listeners at this level may require significant second language acquisition support, understand simple familiar spoken words when paired with concrete symbols, and follow single-word directions when paired with concrete symbols.
- EL speakers at this level may require significant second language acquisition support, imitate or attempt to imitate use of spoken English words after modeling, and rarely initiate spoken communication in English independently.
- EL readers at this level may require significant second language acquisition support, understand letters or words when paired with concrete symbols, and recognize a limited number of concrete symbols combined with letters or high-frequency/high-need sight words.
- EL writers at this level may require significant second language acquisition support, begin to participate in routine shared writing activities with teacher modeling, and attempt to write symbols or letters.

Early Independence—Students who receive this rating understand short, simple messages and produce messages of one or two high-need, high-frequency words (e.g., book, cafeteria, teacher).
They are starting to participate in linguistically accommodated communication activities in English in familiar environments.

- **EL listeners** at this level may require moderate second language acquisition support, understand simple, familiar spoken words without understanding how they fit into a larger language context, and follow single-word directions.
- **EL speakers** at this level may require moderate second language acquisition support; communicate with a very limited vocabulary or high-frequency, high-need, concrete one- or two-word responses; not understand how words fit into a larger language context; and hesitate to speak in English and often give up in their attempts to communicate.
- **EL readers** at this level may require moderate second language acquisition support, understand a few single printed words but not how they fit into a larger language context, identify a limited number of high-frequency/high-need sight words, and demonstrate the ability to pair letters with sounds.
- **EL writers** at this level may require moderate second language acquisition support, actively participate in shared writing activities when the writing topic is routine and concrete, and write a few single letters or words but not understand how they fit into a larger language context.*

Developing Independence—Students who receive this rating understand longer messages of multiple sentences in English and produce simple, descriptive, original messages by combining two or more words (e.g., new red bike, big fast truck). They participate meaningfully in linguistically accommodated communication activities in English in familiar environments.

- **EL listeners** at this level may require occasional second language acquisition support, understand short, simple conversations and short, simple discussions on familiar topics, follow single-step directions consisting of a few words, and identify and distinguish key words and phrases necessary to understand the general meaning during social and academic interactions.
- **EL speakers** at this level may require occasional second language acquisition support, combine spoken words to create simple, original messages, and pause to find words to restate or clarify meaning.
- **EL readers** at this level may require occasional second language acquisition support, understand how individual words or phrases connect to other words or phrases, and decode simple words or phrases.
- **EL writers** at this level may require occasional second language acquisition support; actively participate in shared writing activities when the writing topic is familiar; write simple, original messages consisting of a few words or memorized phrases*; and label, list, and copy high-frequency words and phrases.*

Basic Fluency—Students who receive this rating understand and produce more detailed, complex, and elaborate messages with multiple sentences in English. These students participate independently in communication activities in English in familiar environments.

- **EL listeners** at this level may require minimal second language acquisition support; understand longer and more elaborated directions, conversations, and discussions on

* Students using augmentative and alternate communication (AAC) as expressive communication must use symbols that are combined with printed letters or words beginning with the “Early Independence” level.
familiar and unfamiliar topics; follow multi-step directions; and understand most main points, most important details, and some implicit information during social and academic interactions.

- EL speakers at this level may require minimal second language acquisition support, be able to express detailed ideas through spoken words in social and academic English, and occasionally pause to search for words and phrase to clarify meaning.

- EL readers at this level may require minimal second language acquisition support; understand longer and more detailed social and academic texts in English; and decode longer and less familiar words, phrases, or sentences.

- EL writers at this level may require minimal second language acquisition support, contribute written text to shared writing activities when the topic has been recently experienced,* and write detailed texts in social and academic English.*

**Composite Score and Rating**

To fulfill federal requirements, a composite language proficiency score and rating are calculated. The composite score is calculated using an equal-weighted average of the four individual domain scores. The composite score can then be converted to a composite rating.

For example, the spring 2019 TELPAS Alternate composite score and composite rating for a student who has the following language domain ratings are generated as shown below.

The proficiency rating for each of the scored domains is converted to a domain score from 1 (awareness) to 5 (basic fluency).

- **Listening proficiency rating**
  - Early independence = 3

- **Speaking proficiency rating**
  - Basic fluency = 5

- **Reading proficiency rating**
  - Early independence = 3

- **Writing proficiency rating**
  - Imitation = 2

Each domain score is multiplied by the weight—0.25—and then summed to obtain the TELPAS Alternate composite score.

\[
(3 \times 0.25) + (5 \times 0.25) + (3 \times 0.25) + (2 \times 0.25) = 3.25
\]

This student’s composite score of 3.25 and profile of domain scores results in a composite rating of early independence. The TELPAS Alternate composite scores and domain proficiency ratings are converted to the TELPAS Alternate composite ratings according to the domain score of profile descriptors on the following page. All of the criteria listed for a proficiency level must be met for a student to receive that rating.

* Students using augmentative and alternate communication (AAC) as expressive communication must use symbols that are combined with printed letters or words beginning with the “Early Independence” level.

A student who fails to meet the imitation requirements will receive an awareness composite rating.

Report Formats

Standard and additional reports are provided for the TELPAS Alternate assessment. Standard reports are provided automatically to districts. Additional reports are available at a nominal fee to districts. A district must submit a request through the TELPAS Alternate Assessment Management System to receive the additional reports.

The summary reports present assessment results in an aggregated format. All other reports contain confidential student-level results. More information about the confidentiality of students’ results is contained in the General Information section of this manual.

Note that the sample reports included in this guide are for illustration only. They are provided to show the basic layout of the reports and the information they provide. Some information might not correspond to real values.
Resources

Refer to the General Information section of this manual and TEA’s Student Assessment Division website for additional TELPAS Alternate information and resources.

Standard Reports

Information contained in the standard reports is sufficient to satisfy mandatory reporting requirements (refer to the General Information section of this manual). Districts receive the following standard reports for TELPAS Alternate:

- TELPAS Alternate Report Card (Confidential) 5.7
- Confidential Student Label 5.11
- Confidential Campus Roster—All Students 5.13
- Summary Report 5.16
- Individual Student Data File (Confidential) 5.20
A separate TELPAS Alternate Report Card (TARC) is provided for each student for whom a TELPAS Alternate record was submitted. This report indicates the student’s English language proficiency ratings for the four language areas assessed. Information on this report is provided in both English and Spanish. Information from this report can be used to meet state and federal requirements for reporting assessment results to students and parents.

A. Identification information
The top of both pages of the TARC contains identification information, both for the student (name, identification number, etc.) and the school (district, etc.). For confidentiality, the student identification number (PEIMS) is indicated by five asterisks followed by the last four digits of the ID number. The grade, date of testing, and the report date are also indicated.

B. Proficiency levels
This row describes the proficiency levels—awareness, imitation, early independence, developing independence, and basic fluency—that are used to describe student proficiency in each of the four language areas.

C. Proficiency rating for each language area
This section indicates the English language proficiency rating the student received in each language area. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS Alternate proficiency ratings.

D. Detailed proficiency ratings
This section provides additional information about the student’s performance in the domains of listening, speaking, reading, and writing. The student’s scale score for the domain appears on the left and the student performance in each reporting category tested within the domain appears on the right. The performance for each category within a domain is provided as the number of points achieved out of the total number of points possible for that category.

E. Student Portal information
This provides the web address and access code for parents and students to access information from the TELPAS Alternate Report Card online.

F. Document number and process number
The document number found in the bottom right corner of the report is a unique number per administration that is assigned to the student’s record by the testing contractor. Refer to this number if questions arise about the student’s results. The process number found in the bottom-right corner of the report is a unique number, per administration, that is assigned to the report by the testing contractor.

G. Composite rating
The composite rating indicates the student’s overall level of English language proficiency and is determined from the student’s listening, speaking, reading, and writing proficiency ratings. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS Alternate composite rating.
H. Understanding the TELPAS Alternate Report Card
   This section explains the information contained in each section of the report card.

I. Parent Resources
   This section directs parents and caretakers to additional resources that they can use to help their child(ren).

Confidential Student Label
Example shown: Grade 2

An adhesive Confidential Student Label is provided for each student for whom a TELPAS Alternate record was submitted. These labels should be placed on the individual student’s permanent record.

A. Identification information
   Identification information shown at the top of the label includes the student name, student identification number (as used for PEIMS), birth date, district number and name, campus number and name, administration year, and grade.

B. Language area
   This column lists the four language areas assessed: listening, speaking, reading, and writing.

C. Proficiency rating for each language area
   This column indicates the English language proficiency rating the student received—awareness, imitation, early independence, developing independence, and basic fluency—in each language area. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS Alternate proficiency ratings.

D. Composite rating
   The composite results indicate the student’s overall level of English language proficiency and are determined from the student’s listening, speaking, reading, and writing proficiency ratings. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS Alternate composite rating.

</tbody>
</table>
The Confidential Campus Roster is generated for each grade assessed at each campus and lists students for whom a TELPAS Alternate record was submitted. For each student, the report provides the proficiency rating by language area and a composite rating. The report also indicates each student's number of years of enrollment in U.S. schools as submitted by the student's school district. For each language area, performance by proficiency level and reporting category is provided along with the student's raw scores. The information in this report can be useful for instructional planning.

A. Identification information
Identification information shown at the top left corner of the report includes the grade assessed, the district number and name, and the campus number and name. At the top right corner, the report date and date of testing are shown.

B. Student information
Students are identified by name and student identification number (as used for PEIMS).

C. Years in U.S. schools
This column indicates how many years the student has been enrolled in schools in the United States as submitted by the student's school district. For more information, see the document, “Instructions for Years in U.S. Schools Data Collection,” located on TEA's Student Assessment webpage.

D. English language proficiency ratings
These columns indicate the English language proficiency rating the student received—awareness, imitation, early independence, developing independence, or basic fluency—in each language area. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS Alternate proficiency ratings.

Proficiency ratings are listed below.

- **Lvl 1:** This level indicates that the student achieved a proficiency level of awareness.
- **Lvl 2:** This level indicates that the student achieved a proficiency level of imitation.
- **Lvl 3:** This level indicates that the student achieved a proficiency level of early independence.
- **Lvl 4:** This level indicates that the student achieved a proficiency level of developing independence.
- **Lvl 5:** This level indicates that the student achieved a proficiency level of basic fluency.
Possible messages are listed below.

- - - NO RATING/INFORMATION AVAILABLE
  Information could not be determined because the appropriate language-area proficiency ratings were not available.

E  EXTENUATING CIRCUMSTANCES
  The student is unable to be assessed in all four domains due to extenuating circumstances.

M  MEDICAL EXCEPTION
  The student is unable to participate meaningfully in the TELPAS Alternate assessment on the basis of the student's medical condition, as determined by the ARD committee and documented in the student's IEP.

N  NO AUTHENTIC ACADEMIC RESPONSE (NAAR)
  The student is unable to participate meaningfully in the TELPAS Alternate assessment on the basis of the student's disability, resulting in the inability to make an authentic academic response during instruction, as determined by the ARD committee and documented in the student's IEP.

E. Reporting Categories
  Columns under the listening, speaking, reading, and writing language areas show the reporting categories for each area. Directly below each reporting category, the total number of points possible in that category is provided.

F. Scale Score
  Students’ scale score is shown in a column below the language-area head.

G. Composite rating
  The composite rating indicates the student’s overall level of English language proficiency and is determined from the student's listening, speaking, reading, and writing proficiency ratings. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS Alternate composite rating.

Summary Report

Example shown: Grade 6

A summary report is provided for each grade assessed at each district and campus and contains information about every student for whom a TELPAS Alternate record was submitted. These reports describe summary results of the performance of each demographic and program group assessed. The summary report is generated for the “All Students” aggregation only.

Page 1

This section describes summary results for each domain assessed.

A. Identification information
   The top of this report contains identification information for the campus or district. The grade, date of testing, and report date are also indicated.

B. Demographic groups and program information
   Demographic and program categories are listed on the left side of this section. Results for students with no demographic or program information coded are included in the “No Information Provided” categories.

C. Language area administration summary
   This section shows the administration summary information for the four TELPAS Alternate language areas in which students are rated—listening, speaking, reading, and writing. Each section lists the number and percentage of students who were assessed or rated in the language area as well as the number and percentage of students who were not assessed or rated in the language area.

D. Number of students rated
   The number of students rated is provided for each demographic and program category for each language area.

E. Percentage of students receiving each proficiency rating
   These columns show the percentage of students receiving a proficiency rating of awareness, imitation, early independence, developing independence, and basic fluency for each demographic group. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS Alternate proficiency levels.
This section describes the summary results for the composite rating and the yearly progress.

**F. Composite rating administration summary**
The TELPAS Alternate composite rating administration summary indicates the number and percentage of students rated in all language areas, those who were not assessed due to extenuating circumstances, medical exception, or no authentic academic response. Students are classified as “Not Rated” if they do not have a rating in all four language areas because they were absent throughout the TELPAS Alternate assessment window, were not assessed due to an ARD decision, or there were irregularities or extenuating circumstances.

**G. Composite rating—Number of students rated**
The number of students rated is provided for each demographic and program category.

**H. Percentage of students receiving each proficiency rating**
These columns show the percentage of students receiving a composite proficiency rating of awareness, imitation, early independence, developing independence, and basic fluency for each demographic group. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS Alternate proficiency levels.

**I. Process number**
The process number found in the bottom-right corner of the report is a unique number, per administration, that is assigned to the report by the testing contractor.

-- = No Data Reported for Fewer Than Five Students
Individual Student Data File (Confidential)

The Individual Student Data File contains individual data records for each student for whom a TELPAS Alternate record was submitted. The student record includes identification and demographic data as well as proficiency ratings and reporting categories for each language area.
## Additional Printed Copies of Reports

Additional printed copies for the following standard reports are available for a fee to districts. A district must submit a request through the Assessment Management System to receive the additional printed copies of reports. Refer to the “Standard Reports” section for examples of these reports.

- TELPAS Alternate Report Card (Confidential)
- Confidential Student Label
