**Summary of Program**

Provide an overview of the program to be implemented with grant funds. Include the overall mission and specific needs of the organization. Describe how the program will address the mission and needs.

The mission of Region 14 Education Service Center (ESC 14) drives the support of the educational community through quality services that assure excellence, equity, and efficiency. Service remains the key word in this mission statement. Part of that service has included training school districts and community members to keep students in the region safe. While Region 14 has been trained and has consistently addressed suicide prevention, bullying prevention, and substance abuse training, a need for Psychological First Aid – Schools (PFA-S) and Trauma Informed Strategies and Mindfulness training of both ESC staff and school districts and communities continues. COVID-19 has only increased the potential for violence once students return to school, with the increase in mental health concerns brought on by the isolation due to the virus and stress due to economic need caused by parents losing jobs and the pressures that ensue from that. ESC staff need urgent training on both PFA-S and Trauma Informed Strategies and Mindfulness in order to turn around that training to school districts and the community in time for the return to school. Fear of the unknown can spur anxiety that can cause students to act out in unsafe ways. This urgent need requires that the service center support and train school districts and community members as soon as possible before students begin returning to school.

**Goals, Objectives, and Strategies**

Describe the major goals/objectives of the proposed program. What activities/strategies will be implemented to meet those goals/objectives?

The goal of this grant initiative will be to build capacity by attending training such as Trauma TOT training offered at TCU and turn around training in order to meet these grant goals: 1) Increased awareness of traumatic stress and mental health, promotion and services in schools addressing identified needs; 2) Increased capacity for educators to integrate trauma-informed and resiliency building strategies into the curriculum; and 3) Increased Positive School Climate Perceptions based on pre/post climate surveys. The Safe and Effective School Service Consultant at Region 14, acting as dedicated coordinator of this grant, will attend Psychological First Aid TOT Training offered by the National Child Traumatic Stress Network (NCTSN) and turn that training around to districts and the community. Face-to-face Trauma Informed Care and Mindfulness Training earns trainees double hours, or up to 16 hours of credit under TEC 21.054 (g); however, since the moment COVID-19 shut down schools, Region 14 has transitioned into either fully online training or blended online and face-to-face training. Participants who wish to earn double hours can come to the face-to-face training and those who cannot attend face-to-face due to compromised immune systems or other concerns can earn hours for the course but not double credit, unless rules change to offer double credit online as well. Psychological First Aid does not have an approved training that would allow the participant to receive twice the hours, so the incentive to attend the PFA-S training face-to-face would not be as great, thus allowing online training to be a way to possibly train all districts and interested community members in the area. Either way, Region 14 will make online training an option. Offering the training to the community free of charge will count toward the 25% match requirement.

**Performance and Evaluation Measures**

Describe the performance measures identified for this program which are related to student outcomes and are consistent with the purpose of the program. Include the tools used to measure performance, as well as the processes that will be used to ensure the effectiveness of project objectives and strategies.

Region 14 will document attendance at all training funded by this grant. The surveys automatically generate and all training participant must complete surveys rating the training in order to receive their certificate of attendance. A pre/post climate survey will document the perceived level of safety on campuses in the region prior to and after the proposed training. ESC staff will document any Positive School Climate training offered to district staff to turn around to teachers and will request attendance be tracked and reported. Pre/post climate surveys should measure the degree of progress made on the campuses that implement the Positive School Climate training. School counselors involvement in the training will be documented by attendance rosters and pre/post surveys. Of course, the ultimate measure of the success of this initiative will be a reduction in unsafe behavior on campuses in the region. These incidents can be captured and compared over time through the PEIMS system.

**Budget Narrative**

Describe how the proposed budget will meet the needs and goals of the program, including for staffing, supplies and materials, contracts, travel, etc. If applicable, include a high-level snapshot of funds currently allocated to similar programs. Include a short narrative describing how adjustments will be made in the future to meet needs.

Travel and training fees necessary for The Safe and Effective School Service Consultant at Region 14 to attend TOT training and funds to cover a portion of that consultant's salary, as well as costs to purchase necessary training supplies, employ necessary technology, and rent training space will allow the service center to develop a plan to increase awareness of:

- Traumatic stress and mental health needs facilitated by periodic Zoom meetings for counselors through a counselor consortium and similar remote and/or face-to-face meetings for other stake holders;
- Trauma and mental health literacy of school staff, parents, and others who interact with students to recognize the signs and symptoms of mental health concerns that may cause school violence. Parental turn-out, though minimal in the past, could increase due to concern over COVID-19 and the psychological trauma brought about by isolation and fear of the unknown as a result of the pandemic.
- Linking students and families to appropriate services referrals from school district counselors using ESC created referral forms where referrals can be tracked to ensure students in crisis get the care they need.
- Providing training sessions for school officials related to responding to related mental health crises that may precipitate violent attacks on school grounds by offering ESC trainings periodically throughout the school year.
- Allowable training for school staff will concentrate on Psychological First Aid –Schools (PFA- S) and Trauma Informed Strategies and Mindfulness; however, suicide prevention, bullying prevention and substance abuse training naturally flow out of PFA-S and Trauma training and will be included when appropriate.

**Statutory/Program Requirements**

Describe how you will develop your training plans, deliver the training and document outcomes. A training plan will be considered particularly strong if it includes distance or on-line learning delivery systems as part of its programming.

Taking the lead, the Safe and Effective School Service Consultant will receive then turn around training to appropriate district personnel in the region, including counselors, and community members desiring student safety training. Other ESC staff will receive training either directly or through the Safe and Effective School Service Consultant as appropriate. Those other ESC staff will then turn around safety training to their more specific constituents. Both online and face-to-face training will make this crucial information available to all in the most appropriate means possible. All training attendance will be captured through sign-in documentation at face-to-face training and through Zoom attendance capture methods such as log-in reports and survey results. Periodic survey questions using software such as Kahoot will further capture active participation and check for understanding as training occurs. These surveying tools will work equally well with those attending face-to-face and those attending remotely. Pre and post surveys will help presenters to know what information to stress when training and the degree to which that information was successfully processed and integrated across the region.
