**Designated Supports Available for STAAR, STAAR Spanish, and
TELPAS**

TEXAS EDUCATION AGENCY
STUDENT ASSESSMENT DIVISION
2021 - 2022

This guide provides parents with a general overview of the designated supports that are available for use on the State of Texas Assessments of Academic Readiness (STAAR), STAAR Spanish, and the Texas English Language Proficiency Assessment System (TELPAS). Designated supports are accommodations that change the way a student accesses an assessment without changing the content being assessed.

*To effectively use this guide, it is important that you know which academic committee currently serves the student.

*This guide should not be independently used to make assessment decisions for students. For more information on other supports, or for a more detailed explanation of the designated supports listed below, please refer to the [Accommodations Resources](#) page located in the Assessment Section of the Texas Education Agency's website.

LAYOUT OF THIS GUIDE

This guide contains columns with information for each designated support available to students. Below are descriptions of what each column includes.

Support	Description	Eligibility	Examples
<p>This column includes the name of the designated support and lists the assessments it can be used on. Clicking on the link will open the applicable policy document.</p>	<p>This column provides a description of what a test administrator is allowed to do, or the process/materials allowed during testing.</p>	<p>This column provides the eligibility criteria that the student must meet in order to be able to use the designated support.</p> <p>Eligibility will be determined and documented by the appropriate committee.</p> <p>When determining eligibility, it is important to know if the student has routinely and effectively used the support in class. Routinely does not mean the student uses the support every day, it means the student has used the support often enough during class and testing that he or she is able to use it independently. In addition, the support has been proven to be effective in meeting the student's needs.</p>	<p>This column includes specific examples of how the designated support should be used during testing.</p> <p>For some designated supports, only the specific given examples may be provided to the student. For the remaining designated supports, the examples are suggestions of what could be provided to students.</p>
