Texas English Language Proficiency Assessment System (TELPAS)

Program Overview

The Texas English Language Proficiency Assessment System (TELPAS) fulfills federal requirements for assessing the English language proficiency of English learners (ELs) in kindergarten through grade 12 in four language domains: listening, speaking, reading, and writing. TELPAS assesses students in alignment with the Texas English Language Proficiency Standards (ELPS), which are part of the Texas Essential Knowledge and Skills (TEKS). TELPAS provides performance data used to fulfill state and federal reporting requirements. Student performance is reported in terms of four English language proficiency ratings: beginning, intermediate, advanced, and advanced high. TELPAS is administered to all ELs, including ELs who do not participate in a bilingual or English as a second language (ESL) program because of parent denial.

Assessment Scores

The K–12 TELPAS assessments consist of online listening and speaking and reading assessments at grades 2–12, a holistically rated writing assessment for all grades, and a holistically rated process for all domains in grades K–1. These assessments are not designed to measure mastery of content with a pass or fail score, as learning a second language takes time. This is one of the main differences between TELPAS and the State of Texas Assessments of Academic Readiness (STAAR®).

The TELPAS assessment results provide a measure of progress, indicating annually where each EL is on a continuum of English language development designed for second-language learners. This continuum is divided into four proficiency levels: beginning, intermediate, advanced, and advanced high. The progress of students along this continuum is the basis for the TELPAS reporting system and the key to helping district officials monitor whether their ELs are making steady annual growth in learning to listen, speak, read, and write in English.

The following gives a brief description of the grades 2–12 TELPAS listening, speaking, and reading scores and proficiency ratings for all language domains assessed. For more detailed technical information about assessment scores, refer to the Technical Digest, available on TEA's Student Assessment Division website.

TELPAS Listening, Speaking, and Reading Raw Scores

(Grades 2–12)

The TELPAS raw score is the number of items answered correctly on an assessment. By itself, the raw score has limited utility; it can be interpreted only in reference to the total number of items on an assessment. Raw scores should not be compared across administrations.
**TELPAS Scale Score**

*(Grades 2–12)*

The TELPAS scale scores are statistics that can be used for evaluating a student’s annual growth and pinpointing how high or low a student performs within a proficiency level. Scale scores allow a comparison of scores by accounting for differences in the difficulty of the assessment used for each administration. The listening, speaking, and reading domains each have their own scale score, ranging from approximately 1000 to 2000. The scale score ranges for each domain are subdivided into the four proficiency levels of beginning, intermediate, advanced, and advanced high.

**English Language Proficiency Ratings**

Students who take the TELPAS assessments receive proficiency ratings in each language domain assessed—listening, speaking, reading, and writing—as well as a composite rating that combines the language-domain ratings into one overall English language proficiency rating. The following gives a brief description of the abilities associated with the composite and language-domain ratings.

**Beginning**—Students who receive this rating are in the early stages of learning English. These students have a small vocabulary of very common words and little ability to use English in academic settings. These students often communicate using English they have memorized.

- Beginning listeners struggle to understand simple conversations and to identify and distinguish individual words and phrases spoken in English.
- Beginning speakers mainly speak using single words and short phrases and lack the knowledge of English grammar necessary to connect ideas and speak in sentences.
- Beginning readers’ ability to derive meaning from English text is minimal. They rely heavily on previous knowledge of the topic, their limited vocabulary, and pictures to gain meaning from English text.
- Beginning writers lack the English vocabulary and grasp of English language structures and grammar necessary to build writing skills in English and address grade-appropriate writing tasks in a meaningful way.

**Intermediate**—Students who receive this rating are able to use common, basic English in routine academic activities but need considerable English language support to make learning understandable. Socially, these students are able to communicate simply about familiar topics and are generally able to understand conversations but might not comprehend all the details.

- Intermediate listeners usually understand simple or routine directions as well as short, simple conversations and discussions on familiar topics. They frequently understand only part of what they hear and seek clarification by requesting the speaker to repeat, slow down, or rephrase speech.
- Intermediate speakers know enough English to speak in a simple manner using basic vocabulary. They are able to participate in short conversations and speak in sentences, although they might hesitate frequently and for long periods to think of how to communicate their intended meaning.
Intermediate readers are able to understand short, connected texts on familiar topics but tend to interpret English very literally and have difficulty following story lines that have a surprise twist or nonstandard format. Because their English vocabulary consists mainly of high-frequency words, they rely heavily on prior knowledge of a topic for comprehension and need the support of pictures that illustrate meaning.

Intermediate writers have a limited ability to use the English language to build writing skills and a limited ability to address grade-appropriate writing tasks in English. They frequently exhibit features of their primary language when expressing themselves in English and are sometimes unable to be understood by individuals not accustomed to ELs.

Advanced—Students who receive this rating are able to understand and use academic English in classroom activities when given some English language support. In social situations, these students can understand most of what they hear but have some difficulty with unfamiliar grammar and vocabulary.

Advanced listeners can usually understand longer conversations and class discussions but occasionally depend on visuals, verbal cues, and gestures to support understanding.

Advanced speakers are able to participate comfortably in most conversations and academic discussions, with occasional pauses to restate, repeat, or search for words or phrases to clarify meaning. They can narrate, describe, and explain in some detail and have an emerging ability to speak in English using grade-appropriate complex sentences and complex grammar structures.

Advanced readers are able to understand more complex texts because they have acquired a variety of grade-appropriate English vocabulary and are familiar with the structure of the English language. They use this knowledge to understand texts that introduce them to unfamiliar topics, and they can move beyond literal comprehension to begin to think critically about ideas presented in grade-appropriate texts.

Advanced writers have enough knowledge of English to address grade-appropriate writing tasks with support. They can express themselves using a variety of verb tenses and sentence patterns, and they can communicate their ideas in some detail, although they often require assistance when topics are abstract, academically challenging, or unfamiliar.

Advanced high—Students who receive this rating are able to use academic English in classroom activities with little English language support from others, even when learning about unfamiliar material. Students at this level have a large enough vocabulary in English to communicate clearly and fluently in most situations.

Advanced high listeners can understand long conversations and class discussions, with little dependence on visuals, verbal cues, and gestures to support understanding. In both social and instructional interactions, they are able to understand main points and details at a level nearly comparable to native English-speaking peers.

Advanced high speakers are able to use abstract and content-based vocabulary and can participate in extended discussions on a variety of social and grade-appropriate academic topics with only rare disruptions or hesitations.

Advanced high readers might have occasional difficulty with low-frequency vocabulary or new English expressions but demonstrate, at a level nearly comparable to native English-
speaking peers, comprehension of both explicit and implicit information in grade-appropriate texts.

- Advanced high writers have acquired the English vocabulary and command of English language structures to address grade-appropriate writing tasks. They are nearly comparable to native English-speaking peers in their ability to express themselves, with occasional exceptions when dealing with complex or abstract ideas or when attempting to use low-frequency words and expressions.

**Composite Score and Rating**

To fulfill federal requirements, a composite language proficiency score and rating are calculated. To calculate the composite score, the proficiency rating for each of the domains is converted to a domain score from 1 (beginning) to 4 (advanced high). The domain scores are equally weighted and added together for one composite score. The composite score can then be converted to a composite rating.

For example, the spring 2021 TELPAS composite score and composite rating for a student who has the following language domain ratings are generated as shown below.

The proficiency rating for each of the scored domains is converted to a domain score from 1 (beginning) to 4 (advanced high).

Listening proficiency rating
Advanced=3

Speaking proficiency rating
Advanced=3

Reading proficiency rating
Advanced=3

Writing proficiency rating
Intermediate=2

Each domain score is multiplied by the weight—0.25—and then summed to obtain the TELPAS composite score.

\[(3 \times 0.25) + (3 \times 0.25) + (3 \times 0.25) + (2 \times 0.25) = 2.75\]

This student’s composite score of 2.75 results in a composite rating of advanced. The TELPAS composite scores and domain proficiency ratings are converted to the TELPAS composite ratings according to the following rules. All of the criteria listed for a particular rating must be met for a student to receive that rating.
Table 5. TELPAS Composite Rating Profile Descriptors

<table>
<thead>
<tr>
<th>Proficiency Level</th>
<th>Domain Score Profile Descriptors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beginning</td>
<td>• a composite score that fails to meet the intermediate requirements</td>
</tr>
<tr>
<td>Intermediate</td>
<td>• a TELPAS composite score of 1.5 or higher</td>
</tr>
<tr>
<td></td>
<td>• a minimum proficiency level of intermediate in at least half of the domains in which the student was assessed</td>
</tr>
<tr>
<td>Advanced</td>
<td>• a TELPAS composite score of 2.5 or higher</td>
</tr>
<tr>
<td></td>
<td>• a minimum proficiency level of intermediate in all domains</td>
</tr>
<tr>
<td></td>
<td>• a minimum proficiency level of advanced in at least half of the domains in which the student was assessed</td>
</tr>
<tr>
<td>Advanced High</td>
<td>• a TELPAS composite score of 3.5 or higher</td>
</tr>
<tr>
<td></td>
<td>• a minimum proficiency level of advanced in all domains</td>
</tr>
</tbody>
</table>

A small subset of ELs with disabilities who cannot be assessed in all four domains will receive a composite score if they have results for at least two domains. This is only applicable to students who have a decision from the admission, review, and dismissal (ARD) committee, in conjunction with the language proficiency assessment committee (LPAC), to not be evaluated in one or two domains.

Report Formats

Standard and additional reports are available for the TELPAS assessments. Assessment reports are provided automatically to districts. Additional services for assessment reports are also available for a fee to districts. A district must submit a request through the STAAR Alternate 2, TELPAS, and TELPAS Alternate Assessment Management System to receive additional copies of the TELPAS Report Card or Confidential Student Label.

The summary reports present assessment results in an aggregated format. All other reports contain confidential student-level results. More information about the confidentiality of students’ results is contained in the General Information section of this manual.

Note that the sample reports included in this guide are for illustration only. They are provided to show the basic layout of the reports and the information they provide. Some information might not correspond to real values.
### Resources

Refer to the [General Information](#) section of this manual and [TEA's Student Assessment Division website](#) for additional TELPAS information and resources.

### Standard Reports

Information contained in the standard reports is sufficient to satisfy mandatory reporting requirements (refer to the General Information section of this manual). Districts receive the following standard reports for TELPAS (the page numbers listed indicate where information on specific reports can be found in this manual):

<table>
<thead>
<tr>

<td>5.25</td>
</tr>
</tbody>
</table>
A separate TELPAS Report Card (TRC) is provided for each student for whom a TELPAS record was submitted. This report indicates the student's English language proficiency ratings for the four language domains assessed. Information on this report is provided in both English and Spanish. Information from this report can be used to meet state and federal requirements for reporting assessment results to students and parents.

**NOTE:** Listening, speaking, and reading domains are assessed with an online assessment for grades 2–12. The student took an online administration of the reading assessment unless “Paper Administration” appears next to the Reading heading in the TELPAS Proficiency at a Glance section. The student took an online administration of the listening and speaking assessment unless the report indicates in the listening and speaking portions of the TELPAS Proficiency at a Glance section that a holistic assessment was administered. In some grade clusters, the raw score cut points associated with the scale score ranges differ for paper versus online administrations. The complete set of raw score conversion tables for all TELPAS administrations can be found on TEA's Assessment Scoring and Reporting webpage.

---

A. **Identification information**

The top of both pages of the TRC contains identification information, both for the student (name, identification number, etc.) and the school (district, etc.). For confidentiality, the student's Public Education Information Management System (PEIMS) student ID is indicated by five asterisks followed by the last four digits of the ID number. The grade, date of testing, and the report date are also indicated.

B. **Proficiency levels**

This row describes the proficiency levels—beginning, intermediate, advanced, and advanced high—that are used to describe student proficiency in each of the four language domains.

C. **Proficiency rating for each language domain**

This section indicates the English language proficiency rating the student received in each language domain. In grades 2–12, the listening, speaking, and reading proficiency ratings come from the TELPAS listening and speaking and reading online assessments. A holistic rating process is used to determine the proficiency ratings for the domain of writing and grades K–1 listening, speaking, and reading. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS proficiency ratings.

D. **Detailed proficiency ratings**

In grades 2–12, this section provides additional information about the student's performance in the domains of listening, speaking, and reading. The student's scale score for the domain appears on the left, and the student performance in each reporting category tested within the domain appears on the right. The performance for each category within a domain is provided as the number of points achieved out of the total number of points possible for that category. For the writing domain and grades K–1, this section will not provide scores for reporting categories. These domains are rated holistically and therefore have one overall score.
E. **Student Portal information**
   This provides the web address and access code for parents and students to access information from the TELPAS Report Card online.

F. **Document number and process number**
   The document number found in the bottom right corner of the report is a unique number per administration that is assigned to the student's record by the testing contractor. Refer to this number if questions arise about the student's results. The process number found in the bottom right corner of the report is a unique number, per administration, that is assigned to the report by the testing contractor.

G. **Composite rating**
   The composite rating indicates the student’s overall level of English language proficiency and is determined from the student’s listening, speaking, reading, and writing proficiency ratings. For a small subset of ELs with disabilities who cannot be assessed in all four domains, students with results for at least two domains will receive a composite rating. This is only applicable to students who have a decision from the ARD committee, in conjunction with the LPAC, to not be evaluated in one or two domains. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS composite rating.

H. **Understanding the TELPAS Report Card**
   This section explains the information contained in each section of the report card.

I. **Parent Resources**
   This section directs parents and caretakers to additional resources that they can use to help their child.
The TELPAS tests have been designed to assess students who are learning the English language. This report gives you information on your child's English language proficiency and provides resources for you to help them improve even more. (Las pruebas TELPAS se han diseñado para evaluar a los estudiantes que están aprendiendo el idioma inglés. Este informe le proporciona información sobre el dominio que tiene su hijo del idioma inglés y le brinda recursos para ayudarlo aún más.)

Confidential Student Label

Example shown: Grade 2

An adhesive **Confidential Student Label** is provided for each student for whom a TELPAS record was submitted. These labels should be placed on the individual student’s permanent record.

A. **Identification information**

Identification information shown at the top of the label includes the student name, student identification number (as used for PEIMS), birth date, district number and name, campus number and name, date of testing, and grade.

B. **Language area (domain)**

This column lists the four language areas assessed: listening, speaking, reading, and writing.

C. **Test information**

When applicable, information about special administrations is provided. *P* indicates a paper administration, and *h* indicates a holistic rating.

D. **Proficiency rating for each language (domain)**

This column indicates the English language proficiency rating the student received—beginning, intermediate, advanced, or advanced high—in each language area. In grades 2–12, the listening and speaking ratings come from the TELPAS listening and speaking assessment, and the reading proficiency rating comes from the TELPAS reading assessment. A holistic rating process is used to determine the proficiency ratings for the writing domain for all grades and for all domains in grades K–1. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS proficiency ratings.

E. **Composite rating**

The composite results indicate the student’s overall level of English language proficiency and are determined from the student’s listening, speaking, reading, and writing proficiency ratings. For a small subset of ELs with disabilities who cannot be assessed in all four domains, students with results for at least two domains will receive a composite rating. This is only applicable to students who have a decision from the ARD committee, in conjunction with LPAC, to not be evaluated in one or two domains. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS composite rating.

Confidential Campus Roster—All Students
Example shown: Grade 1, Grade 11

The Confidential Campus Roster is generated for each grade assessed at each campus and lists students for whom a TELPAS record was submitted. For each student, the report provides the proficiency rating by language domain and a composite rating. The report also indicates each student’s number of years of enrollment in U.S. schools as submitted by the student’s school district. For grades 2–12, the TELPAS listening, speaking, and reading performance by proficiency level and reporting category is provided along with the student’s corresponding scale scores. The information in this report can be useful for instructional planning.

A. Identification information
Identification information shown at the top left corner of the report includes the grade assessed, the district number and name, and the campus number and name. At the top right corner, the report date and date of testing are shown.

B. Student information
Students are identified by name and student identification number (as used for PEIMS).

C. Years in U.S. schools
(Grades 1–12)
This column indicates how many years the student has been enrolled in schools in the United States as submitted by the student’s school district. For more information, refer to the document, “Instructions for Years in U.S. Schools Data Collection,” located on TEA’s Language Proficiency Assessment Committee Resources webpage.

D. English language proficiency ratings (K–12)
These columns indicate the English language proficiency rating the student received—beginning, intermediate, advanced, or advanced high—in each language domain. In grades 2–12, the proficiency rating comes from the online listening and speaking and reading tests. Writing is holistically rated for grades 2–12. For grades K–1, all four language domains are holistically rated. Proficiency ratings for 2020 and 2021 are shown. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS proficiency ratings.

Proficiency ratings are listed below.

- **BEG (BEGINNING)**
  This rating indicates a beginning level of English language proficiency in the language domain assessed.

- **INT (INTERMEDIATE)**
  This rating indicates an intermediate level of English language proficiency in the language domain assessed.
- **ADV (ADVANCED)**
  This rating indicates an advanced level of English language proficiency in the language domain assessed.

- **A H (ADVANCED HIGH)**
  This rating indicates an advanced high level of English language proficiency in the language domain assessed.

Possible messages are listed below.

- **- - - NO RATING/INFORMATION AVAILABLE**
  The student did not take the TELPAS listening and speaking or reading assessments, or information could not be determined because the appropriate language-domain proficiency ratings were not available.

- **EC EXTENUATING CIRCUMSTANCES**
  The student could not be rated in specified domain(s) due to extenuating circumstances.

- **O NOT SCORED - OTHER**
  The student’s TELPAS listening and speaking or reading record was coded “OTHER” (“Other Student Not To Be Scored” in the online system) for reasons such as illness during the assessment or administration irregularities.

- **X NOT TESTED - ARD DECISION**
  The student did not participate on the basis of the student’s disability as determined by the ARD committee in conjunction with the LPAC and documented in the student’s IEP.

**E. Reporting Categories (2–12)**

In Grades 2–12, columns under the listening, speaking, and reading language domains show the reporting categories for each domain. Directly below each reporting category, the total number of points possible in that category is provided.

**F. Scale Score (2–12)**

In grades 2–12, students’ scale score is shown in a column under each language domain. The writing domain is rated holistically, so it will not include a scale score.

**G. Composite rating**

The composite rating indicates the student’s overall level of English language proficiency and is determined from the student’s listening, speaking, reading, and writing proficiency ratings. Composite ratings for 2020 and 2021 are shown. For a small subset of ELs with disabilities who cannot be assessed in all four domains, students with results for at least two domains will receive a composite rating. This is only applicable to students who have a decision from the ARD committee, in conjunction with the LPAC, to not be evaluated in one or two domains. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS composite rating.

**H. Test Information**

Information about special administrations is provided in this column. P indicates a paper administration, and h indicates a holistic rating.

### TOTAL STUDENTS LISTED: 999

h. Holistic rating administration for listening and speaking

p. Paper administration for reading
Summary Report
Examples shown: Grades K through 2, Grade 6

A Summary Report is provided for each grade assessed at each district and campus and contains information about every student for whom a TELPAS record was submitted. District-level summary reports are also provided for grade clusters K–2 and 3–12. These reports describe summary results of the performance of each demographic and program group assessed. The summary report is generated for the “All Students” aggregation only.

Page 1

This section describes summary results for each domain assessed.

A. Identification information
The top of this report contains identification information for the campus or district. The grade, date of testing, and report date are also indicated.

B. Demographic groups and program information
Demographic and program categories are listed on the left side of this section. Results for students with no demographic or program information coded are included in the “No Information Provided” categories.

C. Language domain administration summary
This section shows the administration summary information for the four TELPAS language domains in which students are rated—listening, speaking, reading, and writing. Each section lists the number and percentage of students who were assessed or rated in the language domain as well as the number and percentage of students who were not assessed or rated in the language domain.

D. Number of students rated
The number of students rated is provided for each demographic and program category for each language domain.

E. Percentage of students receiving each proficiency rating
These columns show the percentage of students receiving a proficiency rating of beginning, intermediate, advanced, and advanced high for each demographic group. Refer to Assessment Scores in the Program Overview for additional information about the TELPAS proficiency levels.

Page 2

This section describes the summary results for the composite rating and the yearly progress.

F. Composite rating administration summary
The TELPAS composite rating administration summary indicates the number and percentage of students rated in all language domains, those who were not assessed due to an ARD decision,
other students not rated, and the total number of documents submitted. Students are classified as “Not Rated” if they do not have a rating in all four language domains because they were absent throughout the TELPAS assessment window or there were irregularities or extenuating circumstances.

G. **Composite rating—number of students rated**
The number of students rated is provided for each demographic and program category.

H. **Percentage of students receiving each proficiency rating**
These columns show the percentage of students receiving a composite proficiency rating of beginning, intermediate, advanced, and advanced high for each demographic group. Refer to [Assessment Scores](#) in the Program Overview for additional information about the TELPAS proficiency levels.

I. **Average composite score**
This column shows the average composite score for each demographic group. The composite results indicate the student’s overall level of English language proficiency and are determined from the student’s listening, speaking, reading, and writing proficiency ratings. The composite score ranges from 1 (ratings of beginning in all language domains) to 4 (ratings of advanced high in all language domains). For a small subset of ELs with disabilities who cannot be assessed in all four domains, students with results for at least two domains will receive a composite score. This is only applicable to students who have a decision from the ARD committee, in conjunction with the LPAC, to not be evaluated in one or two domains. Refer to [Assessment Scores](#) in the Program Overview for additional information about the TELPAS composite score.

J. **Process number**
The process number found in the bottom right corner of the report is a unique number, per administration, that is assigned to the report by the testing contractor.

**Report Date:** MONTH YYYY
**Date of Testing:** SEASON YYYY
The Individual Student Data File contains individual data records for each student for whom a TELPAS record was submitted. The student record includes identification and demographic data as well as proficiency ratings for each language domain. For grades 2–12, reporting category-level data and proficiency-level data are included for students taking the TELPAS listening and speaking test and the reading test.
Additional Printed Copies of Reports

Additional printed copies for the following standard reports are available for a fee to districts. A district must submit a request through the Assessment Management System to receive the additional printed copies of reports. Refer to the “Standard Reports” section for examples of these reports.

– TELPAS Report Card (Confidential)
– Confidential Student Label
