## Introduction

Title I of the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA) of 2015, addresses the provision that students with the most significant cognitive disabilities may participate in alternate assessments based on alternate academic achievement standards (AA-AAAS). Federal policy limits the number of students in a state who may participate in alternate assessments to no more than 1.0 percent of students in the grades assessed. States who anticipate exceeding 1.0 percent are required to submit a waiver request to the United States Department of Education (USDE) requesting permission to exceed the 1.0 percent state cap.

The Texas Education Agency (TEA) administers the State of Texas Assessments of Academic Readiness (STAAR®) Alternate 2 as its AA-AAAS. At this time, TEA does not have sufficient STAAR Alternate 2 test registration data for the 2022–2023 school year to provide an accurate estimate. Table 1 shows that the STAAR Alternate 2 participation rates for the 2021–2022 school year were 1.5 percent for mathematics, 1.4 percent for reading language arts (RLA), and 1.3 percent for science. Based on this data, TEA anticipates the state will exceed the 1.0 percent cap this school year in the number of students assessed with an AA-AAAS and is therefore filing a waiver request with the USDE.

**TABLE 1. SPRING 2022 PARTICIPATION IN ALTERNATE ASSESSMENT BY SUBJECT**

DESCRIPTION	NUMBER	PERCENTAGE
STAAR ALTERNATE 2 TESTS, ALL STUDENTS MATHEMATICS	43,270	1.5%
STAAR TESTS, ALL STUDENTS MATHEMATICS	2,856,986	
STAAR ALTERNATE 2 TESTS, ALL STUDENTS RLA	48,795	1.4%
STAAR TESTS, ALL STUDENTS RLA	3,537,439	
STAAR ALTERNATE 2 TESTS, ALL STUDENTS SCIENCE	17,842	1.3%
STAAR TESTS, ALL STUDENTS SCIENCE	1,337,884	

Table 2 shows the percentages (and numbers) of total students by subject who took the AA-AAAS in school years 2017–2018 through 2021–2022. Texas’ participation rates for the AA-AAAS continue to be above the 1.0 percent threshold. Compared with participation rates for the 2020–2021 school year, there was a 0.2 percent increase in mathematics, a 0.2 percent increase in RLA, and 0.1 percent increase in science. However, there were drops in the number of AA-AAAS testers and total testers in spring 2021.

**TABLE 2: PARTICIPATION IN ALTERNATE ASSESSMENT BY YEAR**

SCHOOL YEAR	MATHEMATICS	RLA	SCIENCE
2017–2018	1.4% (40,646/2,804,047)	1.3% (45,392/3,487,018)	1.3% (16,780/1,271,379)
2018–2019	1.5% (41,836/2,821,402)	1.3% (47,136/3,584,899)	1.3% (16,984/1,280,714)
2019–2020	COVID	COVID	COVID
2020–2021	1.3% (34,805/2,731,920)	1.2% (40,787/3,420,254)	1.2% (14,582/1,263,762)
<b>2021–2022</b>	<b>1.5% (43,270/2,856,986)</b>	<b>1.4% (48,795/3,537,439)</b>	<b>1.3% (17,842/1,337,884)</b>

TEA continues to build on collaboration with local and regional partners to ensure that only students with the most significant cognitive disabilities are participating in STAAR Alternate 2. In doing so, since the 2017–2018 school year through the 2020–2021 school year, Texas had observed downward trend rates in all three subjects. Based on that progress, TEA is requesting an extension of the waiver from the 1.0 percent cap on students who may be assessed with an AA-AAAS.

Pursuant to approval of the 1.0 percent waiver for the 2022–2023 school year, TEA assures it will continue to meet all other requirements of ESEA, including

- reporting student achievement and school performance to parents and the public;
- assessing at least 95 percent of all eligible students and 95 percent of students with disabilities;
- requiring that a local educational agency (LEA) submit information justifying the need to assess more than 1.0 percent of its students in any subject with an AA-AAAS and making the justification information publicly available;
- verifying that each LEA follows all guidelines and assurances that they will address any subgroup disproportionality in the percentage of students taking an AA-AAAS; and
- implementing system improvements to avoid exceeding the 1.0 percent cap in the future.

## One Percent Waiver Request Requirements

The Code of Federal Regulations (CFR) §200.6(c)(4) indicates that if a state anticipates that it will exceed the 1.0 percent cap with respect to any subject for which AA-AAAS are administered in any school year, the state may request that the Secretary of Education waive the cap for the relevant subject for one year pursuant to section 8401 of ESSA.

### I. 34 CFR §200.6(c)(4)(i): Submit 90 Days Prior to Testing

**In accordance with the Code of Federal Regulations (CFR) §200.6(c)(4)(i), the waiver request must be submitted at least 90 days prior to the start of the state’s testing window for the relevant subject.**

The STAAR Alternate 2 testing window for the 2022–2023 school year opens on March 27, 2023. TEA will submit a waiver request to USDE at least 90 days prior to March 27, 2023, to assess more than 1.0 percent of its assessed population in mathematics, RLA, and science with an AA-AAAS.

### II. 34 CFR §200.6(c)(4)(ii): State-Level Data

**In accordance with CFR §200.6(c)(4)(ii), the waiver request must provide state-level data.**

Texas’ state-level data in Table 3 shows the percentage of students who took the AA-AAAS by subject in grades 3–8 and high school across several years. A review of Table 3 data indicates that 2021–2022 participation rates rebounded to pre-pandemic levels. School year 2020–2021 still had lasting effects from the COVID pandemic that resulted in decreased levels of overall test participation. When more typical school years are compared, for example 2018–2019 and 2021–2022, over half of the grades and subjects or courses did not increase in participation. No increase was found in nine of the 18 grades and subjects or courses assessed. Out of the nine grades and subjects or courses where an increase was observed, the increase was 0.2 percent or less.

**TABLE 3. PARTICIPATION RATES BY GRADE AND SUBJECT OR COURSE**

GRADE AND SUBJECT OR COURSE	2018–2019	2020–2021	2021–2022	CHANGE FROM SPRING 2019 TO SPRING 2022

### A. Participation Rates by Subgroup

A state must provide state-level data to show the number and percentage of students in each subgroup of students who took the AA-AAAS.

The data in Table 4 shows the 2021–2022 participation rates by number and percentage of students who took STAAR Alternate 2 by subject and subgroup.

**TABLE 4. ALTERNATE PARTICIPATION RATES BY SUBGROUP FOR 2021–2022**

SUBJECT	GROUP	TOTAL NUMBER IN GRADES 3–8 & HIGH SCHOOL	NUMBER TAKING AA-AAAS IN GRADES 3–8 & HIGH SCHOOL	PERCENTAGE TAKING AA-AAAS IN GRADES 3–8 & HIGH SCHOOL

SCIENCE	Two or More Races Students	35,403	450	1.3%
SCIENCE	White Students	333,014	3,684	1.1%

**B. Assessment of 95 percent of All Students**

**A state must provide state-level data to show the state has measured the achievement of at least 95 percent of all students and 95 percent of students with disabilities who are enrolled in grades for which the assessment is required.**

Texas follows the federal requirements for participation in statewide assessments outlined in ESEA. All students in grades 3–8, including students with disabilities, are required to take both mathematics and reading assessments annually. All students in grades 5 and 8 must take a science assessment. All high school students are required to take end-of-course (EOC) assessments in Algebra I, English I, English II, and Biology.

As shown in Table 5, Texas exceeded the federal guidelines set at 95 percent participation for all students in the 2021–2022 school year. The state’s participation rates for all students assessed was 99.2 percent in mathematics, 98.9 percent in RLA, and 98.6 percent in science. Additionally, Table 5 indicates that overall student participation rates between 2018–2019 and 2021–2022 are a strong comparison since rates remained relatively constant (less than a 0.5 percent change). This uniformity provides additional evidence that 2021–2022 overall participation rates resemble 2018–2019 pre-pandemic rates.

**TABLE 5. PARTICIPATION RATES OF ALL STUDENTS**

SUBJECT	ALL STUDENTS 2018–2019	ALL STUDENTS ASSESSED 2018–2019	PERCENTAGE ASSESSED 2018–2019	ALL STUDENTS 2021–2022	ALL STUDENTS ASSESSED 2021–2022	PERCENTAGE ASSESSED 2021–2022
MATH	2,821,402	2,809,750	99.6%	2,856,986	2,833,052	<b>99.2%</b>
RLA	3,584,899	3,565,111	99.4%	3,537,439	3,497,132	<b>98.9%</b>
SCIENCE	1,280,714	1,268,012	99.0%	1,337,884	1,319,369	<b>98.6%</b>

Table 6 shows Texas exceeded the federal guidelines set at 95 percent participation for all students with

disabilities in the 2021–2022 school year. The state’s participation rates for all students with disabilities assessed was 98.7 percent in mathematics, 98.4 percent in RLA, and 97.9 percent in science. When comparing the numbers of students with disabilities who were eligible to be assessed in 2018–2019 to 2021–2022, Texas experienced significant increases. In 2021–2022, there were 68,196 (or 21.4 percent) more students receiving special education services who were eligible to be assessed in mathematics than in 2018–2019. In 2021–2022, 61,577 (or 15.6 percent) more students receiving special education services were eligible to be assessed in RLA, and 28,863 (or 21.1 percent) more students were eligible to be assessed in science. Although the numbers of students receiving special education services increased, TEA is encouraged that the percentage of students taking the AA-AAAS did not increase at the same rates. When comparing the data in Table 2 from 2018–2019 to 2021–2022, the percentages of students with disabilities who took the AA-AAAS stayed the same for mathematics and science, at 1.5 percent and 1.3 percent, respectively. The percentage for RLA changed slightly from 1.3 percent to 1.4 percent.

**TABLE 6. PARTICIPATION RATES OF STUDENTS WITH DISABILITIES**

SUBJECT	ALL SPED STUDENTS 2018–2019	ALL SPED STUDENTS ASSESSED 2018–2019	PERCENTAGE ASSESSED 2018–2019	ALL SPED STUDENTS 2021–2022	ALL SPED STUDENTS ASSESSED 2021–2022	PERCENTAGE ASSESSED 2021–2022
MATH	318,453	316,264	99.3%	386,649	381,866	98.8%

SCIENCE	136,661	134,919	98.7%	165,524	162,085	97.9%

### III. 34 CFR §200.6(c)(4)(iii): Assurances

**In accordance with CFR §200.6(c)(4)(iii), the waiver must include assurances from the state that it has verified that each LEA that the state anticipates will assess more than 1.0 percent of its assessed students in any subject for which assessments are administer in that school year using an AA-AAAS has met the requirements.**

In October 2022, TEA began to gather [STAAR Alternate 2 Assurances and Justification Forms](#) from the LEAs that exceeded the 1.0 percent participation rate.

#### A. LEAs Followed State’s Guidelines

**LEAs have followed each of the state’s guidelines for students with the most significant cognitive disabilities.**

The STAAR Alternate 2 Assurances and Justification forms submitted by LEAs that exceeded the 1.0 percent participation rate included acknowledgement of assurances of state guidelines that were implemented and an explanation for why participation rates exceeded 1.0 percent. The superintendent or chief administrative officer for each LEA acknowledged the following statements.

- Your district or charter school implements clear and appropriate guidelines, consistent with the STAAR Alternate 2 Participation Requirements, to use in determining when a student’s significant cognitive disability justifies participation in in this alternate assessment.
- Your district or charter school will address any disproportionality in the percentage of students in any subgroup taking STAAR Alternate 2.
- Parents are informed when their student will be assessed based on alternate achievement standards, including information about the implications of participation in STAAR Alternate 2.

- Students with the most significant cognitive disabilities are included, to the extent possible, in the general curriculum and assessments aligned with that curriculum.
- Your district or charter school disseminates information and promotes the use of appropriate accommodations to increase the number of students with the most significant cognitive disabilities who are tested against grade-level academic achievement standards.
- General/special education teachers and other appropriate staff are knowledgeable of the administration of assessments, including making appropriate use of accommodations for students with significant cognitive disabilities.

**B. LEAs Will Address Disproportionality of Subgroups**

**LEAs will address any disproportionality in the percentage of students in any subgroup taking an AA-AAAS.**

As a part of TEA’s oversight process, the Student Assessment Division worked in cooperation with the Performance Reporting Division to develop a simplified process for LEAs to calculate their own disproportionality, discussed in section IV-C below, based on NCEO Brief Number 18 by [Evans and Domaleski \(2019\)](#). District and region testing coordinators received information about this new process to address the disproportionality in the percentage of students taking STAAR Alternate 2 in a special training in September 2022.

In October 2022, TEA notified each LEA that exceeded the 1.0 percent participation rate for students taking an AA-AAAS. With the notification, each LEA received its STAAR Alternate 2 participation data for the 2021–2022 school year and guidance on disproportionality calculations. To address the disproportionality in the percentage of students assessed with STAAR Alternate 2, TEA directed LEAs to use the disproportionality calculations guidance to determine whether there is disproportionality in their STAAR Alternate 2 participation data. TEA directed the LEAs to develop a plan to address any disproportionality found as mentioned in the assurances and justification form the LEAs completed. The *STAAR Alternate 2 Disproportionality Calculation* guidance is also available on the [STAAR Alternate 2 Resources](#) webpage.

**IV. 34 CFR §200.6(c)(4)(iv): Plan and Timeline**

**In accordance with CFR §200.6(c)(4)(iv), the waiver request must include a plan and timeline.**

The plan in Table 7, below, outlines the phased approach TEA has taken to improve guidance on the implementation of its participation guidelines; provide oversight to, monitor, and regularly evaluate each LEA exceeding the 1.0 percent participation rate; and address any disproportionality in the percentage of students taking STAAR Alternate 2.

**TABLE 7. STAAR ALTERNATE 2 PLAN**

PHASE	TARGET AUDIENCE	ACTION
Phase 1	<ul style="list-style-type: none"> <li>• Region testing coordinators</li> <li>• District testing coordinators</li> <li>• Campus administrators</li> <li>• Classroom teachers</li> <li>• Parents</li> </ul>	<ul style="list-style-type: none"> <li>• Participation data to LEAs exceeding 1%, annually in fall</li> <li>• Face-to-face training, completed January 2019</li> <li>• Release of state resources, completed March 2019</li> </ul>
Phase 2	<ul style="list-style-type: none"> <li>• Special education directors</li> <li>• Region testing coordinators</li> <li>• District testing coordinators</li> </ul>	<ul style="list-style-type: none"> <li>• Technical assistance through regions, ongoing</li> <li>• Include participation data in results</li> </ul>

PHASE	TARGET AUDIENCE	ACTION
		driven accountability data system, completed November 2021
Phase 3+	<ul style="list-style-type: none"> <li>Classroom teachers</li> <li>Support staff</li> <li>Campus administrators</li> <li>Parents</li> </ul>	<ul style="list-style-type: none"> <li>Online training module: STAAR Alternate 2 Eligibility, released December 2020</li> <li>Online training module: STAAR Alternate 2 Overview, released December 2020</li> <li>Online training module: STAAR Alternate 2 Overview for Parents, released December 2021</li> <li>Online training course: STAAR Alternate 2: Before, During, and After the Assessment, released January 2022</li> <li>Data-driven revisions and additions to training modules based on new Learning Management System, ongoing</li> </ul>

The timeline in Table 8 outlines the milestones and actionable steps TEA has taken or will take this school year that will bring the state closer to meeting our overall goal of only assessing students with significant cognitive disabilities with an alternate assessment.

**TABLE 8. ACTIONS**

2022–2023 TIMELINE	
August 2022– May 2023	Stakeholder Survey Analysis: Review exit survey data from training modules to determine if training resources impact changes in assessment decisions. Based on this information, future resources will be considered.
August 2022– August 2023	Stakeholder Input: Quarterly meetings with statewide leadership network to discuss technical assistance need for districts over 1.0% participation rate.
September 2022	Data Analysis: TEA Student Assessment Division in cooperation with TEA Performance Reporting Division reviewed and analyzed spring 2022 assessment data.
September 2022	Beginning-of-Year Training: Region testing coordinators and special education personnel received special training on new process for disproportionality calculations.
September 2022	STAAR Accessibility Training: Region and district leadership received accessibility updates regarding allowable accommodations and improved accessibility for the general assessment. With improved accessibility tools, leaders are encouraged to consider the possibility of how increased accessibility tools may impact moving more students to the general assessment.
October 2022	Stakeholder Training: Region specialists, campus administrators, and educators received 2022–2023 assessment updates.
October 2022	STAAR Alternate 2 Participation Data for Region Support: Region testing coordinators received participation data for LEAs exceeding the 1.0% participation rate.
October 2022	LEA Notification: LEAs with participation rates exceeding 1.0% received notice and LEA-specific participation data.
October 2022	STAAR Alternate 2 Assurances and Justification: LEAs exceeding the 1.0% participation rate were requested to complete and submit an assurances and justification form.
October 2022	Disproportionality Guidance: TEA distributed STAAR Alternate 2 Disproportionality Calculation guidance and requested that LEAs, with region support, analyze their participation data for any disproportionality and develop a plan to address any disproportionality that may exist.

2022–2023 TIMELINE	
<b>December 2022</b>	STAAR Alternate 2 Assurances and Justification Summary: TEA analyzed LEA submitted information and posted a STAAR Alternate 2 Assurances and Justification summary, available on the <a href="#">STAAR Alternate 2 Resources</a> webpage.
<b>January 2023</b>	Publish New Learning Management System: TEA will release a new LMS that allows LEAs and the state to track completion and quiz data.
<b>March 2023– April 2023</b>	Spring 2023 Testing Window: The testing window for STAAR Alternate 2 is March 27 through April 28, 2023.

## A. Implementation of Guidelines

### A state will improve the implementation of its guidelines.

To improve the implementation of its guidelines, phase one of the STAAR Alternate 2 plan consisted of delivering annual participation data to all LEAs exceeding the 1.0 percent cap each fall beginning in 2018. In the initial phase of this plan, TEA provided face-to-face foundational training to district testing coordinators and region testing coordinators at each of the 20 educational regions throughout the state to help guide LEAs through a process to review and analyze local participation data. Through a workshop setting, each LEA's district testing personnel and special education staff worked through a series of activities to analyze their participation data and determine next steps to address local procedures. Delivery of agency prepared participation data to LEAs and gathering feedback on data analysis through the assurances and justification form provides TEA with additional information each year to continually improve the guidance and oversight process.

As an additional aspect of phase one, TEA updated and revised the state's participation requirements. TEA also provided a *STAAR Alternate 2 Participation Requirements Companion Document* in English and Spanish as a resource for parents that shows a simplified flowchart of eligibility for STAAR Alternate 2. Individualized education program (IEP) teams also use this resource to assist with making appropriate assessment decisions. These resources are publicly available on the TEA website at [STAAR Alternate 2 Resources](#).

In addition to updating the resources above, Texas continues to provide updated resources to parents and the general public through the Texas Assessment website. On the [STAAR Alternate 2](#) webpages, there is general information about the STAAR Alternate 2 assessment, information on how to help your child, frequently asked questions and answers, and an example and explanation of the STAAR Alternate 2 Student Report Card. Parents are able to access their students' assessment results through the TEA Family Portal. Within the family portal, Texas recently updated the family resources for students receiving special education services to include links to a new [accommodations](#) video, Texas' [Special Education Information Center](#), and the [Texas Transition and Employment Guide](#).

Phase two of the plan included support and oversight to LEAs and is discussed below, in section IV-B.

During phase three of the plan, TEA created several training modules related to STAAR Alternate 2. The first training module, STAAR Alternate 2 Eligibility, focuses on how to use the STAAR Alternate 2 participation requirements to make state testing decisions and includes case studies. The STAAR Alternate 2 Overview module is the second online module created by TEA. This module focuses on the unique characteristics of STAAR Alternate 2. These training modules are available to educators in Texas' Learning Management System (LMS). Each of the training modules includes embedded questions to assess users' understanding of the content presented. Currently, TEA uses quiz results to determine the effectiveness of each module and if any revisions are needed. However, in January 2023, TEA will

release a new LMS that allows LEAs and the state to track completion rates and quiz data to ensure the information is being disseminated and understood.

To focus on parents and give them the information necessary to make informed decisions, TEA created the [STAAR Alternate 2 Eligibility for Parents and Guardians](#) training module. This module provides parents with a general overview of the alternate assessment and guidance on eligibility.

One additional training was created in collaboration with the Texas Complex Access Network. The [STAAR Alternate 2: Before, During, and After the Assessment](#) module is a comprehensive course designed to provide guidance on test administration, accommodating the alternate assessment, and eligibility considerations for an alternate assessment. As with other training modules, TEA will continue to gather exit data on this course to determine additional training needs in the future.

## **B. Support and Oversight**

**A state will take additional steps to support and provide appropriate oversight to each LEA that the state anticipated will assess more than 1.0 percent of its students using an AA-AAAS.**

The plan in Table 7 also outlines the phased approach TEA has taken to provide oversight to, monitor, and regularly evaluate each LEA exceeding the 1.0 percent participation rate.

Phase two of Texas' plan targets special education administrators and district testing coordinators. TEA collaborated with region education specialists from across the state in several face-to-face and virtual meetings to develop a direct technical assistance plan. Region specialists were presented with data for each LEA in their region and asked to complete a report describing the technical assistance that had already been provided to each LEA exceeding the 1.0 percent participation rate. The region reports also include plans to deliver technical assistance to each targeted LEA.

Another component of phase two pertains to a collaboration between TEA's Student Assessment Division and Review and Support Division. The Review and Support Division provides oversight and support to LEAs. During the 2019–20 school year, these two divisions worked together to align Results Driven Accountability indicators with ESEA guidelines for alternate assessments. These divisions joined together to create a new special education indicator in the state's monitoring system to monitor alternate assessment participation rates. As part of this cross-division collaboration, TEA also developed a new database that will make STAAR Alternate 2 participation data more accessible to LEAs along with disproportionality data.

As a part of TEA's oversight process, the Student Assessment Division in cooperation with the Performance Reporting Division analyzed data from the 2021–2022 school year to determine the support that would be provided to district and region testing coordinators through a statewide leadership network for students with intense needs. Those supports for the 2021–2022 school year are listed in Table 8, below.

## **C. Disproportionality of Subgroup**

**A state will address any disproportionality in the percentage of students taking an AA-AAAS.**

TEA reviewed assessment data from the 2021–2022 school year. The disproportionality analysis followed [Evans and Domaleski's brief \(2019\)](#) recommendations to answer the following questions.

1. Is the observed alternate assessment participation rate consistent with the expectation?
2. Do the participation rates vary across student groups?

TEA investigated these questions from two different perspectives:

- (a) Are similar proportions of focal group and non-focal group students participating in the STAAR Alternate 2?
- (b) Are there are similar proportions of focal group students participating in STAAR Alternate 2 and the general assessment, STAAR?

The baselines of the expected proportions are non-focal group STAAR Alternate 2 participation rates and focal group STAAR assessment participation rates for perspectives (a) and (b), respectively. For both perspectives, TEA first calculated the participation rate (PR) for each focal group of students then quantified the difference between the observed participation rate and the expected participation rate using difference in proportions and risk ratios (RR).

The list of focal groups of students includes:

- i. Race and ethnicity
  - African American or Black
  - American Indian
  - Asian
  - Hispanic
  - Pacific Islander
  - Two or more races
  - White
- ii. Social economic status
  - Economically disadvantaged students
- iii. English proficiency
  - English learners
- iv. Gender
  - Female
  - Male

Perspective (a) compares the focal and non-focal groups of students' STAAR Alternate 2 assessment participation rates. Analysis from this perspective assumes that there should be similar proportions of students with significant cognitive disabilities between the focal group and the non-focal group. For example:  $RR = 0.98/0.86 = 1.1421$ . A risk ratio of 1.1421 indicates that the focal group is 1.1421 times more likely to participate in STAAR Alternate 2 than the non-focal group.

Perspective (b) compares the focal group students' STAAR Alternate 2 assessment participation rates and STAAR assessment participation rates. The assumption of the analysis from this perspective follows the definition of disproportionality in [Evans & Domaleski \(2019\)](#): "Disproportionality exists when there are atypical differences in the proportions of participants from a student group who take the alternate assessment in comparison to the general assessment." For example:  $RR = 32.89/30.00 = 1.0963$ . A risk ratio of 1.0963 indicates that the focal group is 1.0963 times more likely to participate in STAAR Alternate 2 than in STAAR. TEA uses the threshold risk ratio value of 2.0 for decision making.

Based on the analyses from both perspectives, the majority of the risk ratios are less than 2.0. African American students, male students, and economically disadvantaged students were more likely to be identified to participate in the 2022 STAAR Alternate 2 assessment. The risk ratios for American Indian and Pacific Islander students in certain subjects are greater than 1.5. However, these numbers need to be interpreted with caution due to the uncertainty associated with small population sizes (less than 30). In contrast, English learner students and female students were less likely to participate in STAAR Alternate 2.

Based on the disproportionality analyses at the state and local level, TEA will continue to collaborate with region testing coordinators through the statewide leadership network to address any disproportionality in the participation data at the state, region, and local level.

#### V. 34 CFR §200.6(c)(4)(v): Substantial Progress

**In accordance with CFR §200.6(c)(4)(v), the request to extend the waiver must demonstrate substantial progress towards achieving each component of the prior year's plan and timeline.**

Texas' participation rate is still above the 1.0 percent threshold. Table 1 shows that the STAAR Alternate 2 participation rates for the 2021–2022 school year were 1.5 percent for mathematics, 1.4 percent for RLA, and 1.3 percent for science. On the surface, Table 2 indicates participation rates from 2020–2021 to 2021–2022 increased in mathematics by 0.2 percent, in RLA by 0.2 percent, and in science by 0.1 percent. Yet when we dig into the data, we can see progress.

As illustrated in Table 2, there were drops in the number of AA-AAAS testers and total testers in the 2020–2021 school year. The lasting effects of the COVID pandemic resulted in decreased levels of overall test participation that year. But the data indicates that 2021–2022 participation rates rebounded to pre-pandemic levels. Therefore, we can see progress if we look at the data from the 2021–2022 school year and compare it to the data from more typical school years.

The data show that the number of students in Texas, the number of students with disabilities, and the number of students assessed with an AA-AAAS continue to increase. When comparing the numbers of students with disabilities who were eligible to be assessed in 2018–2019 to 2021–2022 from Table 6, Texas experienced significant increases—19.9 percent in mathematics, 13.8 percent in RLA, and 18.6 percent in science. Although the numbers of students receiving special education services increased significantly during this period, the percentage of students taking the AA-AAAS did not see the same increases. The percentages of students with disabilities who took the AA-AAAS from Table 2 stayed the same for mathematics and science, at 1.5 percent and 1.3 percent, respectively. The percentage for RLA only changed slightly, from 1.3 percent to 1.4 percent.

This is an indication that IEP teams across Texas are using the updated resources and trainings to ensure that only students with the most significant cognitive disabilities are participating in STAAR Alternate 2. Over the last few years, TEA has built strong collaborative relationships with regional and local special education leaders and has taken and will continue to take steps to ensure that all students with disabilities are assessed appropriately.

## Appendix I: 2021–2022 Statewide Data

### A. Statewide Data for Alternate Assessment

#### Texas State-level Alternate 2 Participation Rates by Subject, 2021–2022 School Year

Description	Number	Percentage
Alternate 2 Tests, All Students Mathematics Numerator	43,270	1.5%
All Students, STAAR Mathematics Denominator	2,856,986	
Alternate 2 Tests, All Students RLA Numerator	48,795	1.4%
All Students, STAAR RLA Denominator	3,537,439	
Alternate 2 Tests, All Students Science Numerator	17,842	1.3%
All Students, STAAR Science Denominator	1,337,884	

#### Texas State-level Alternate 2 Participation Rates by Test, 2021–2022 School Year

Description	Number	Percentage
Alternate 2 Tests, All Students, Algebra I Numerator	5,992	1.1%
All Students, Algebra I Denominator	569,673	
Alternate 2 Tests, All Students, Biology Numerator	5,854	1.1%
All Students, Biology Denominator	526,707	
Alternate 2 Tests, All Students, English I Numerator	6,011	1.0%
All Students, English I Denominator	596,895

## Appendix II: Public Comments

No.	Date	Subject	Commenter	District	Comment
1	11/28/22	For 1.0% waiver	Heather L. Hughes, Executive Director, Special Programs	Eagle Mountain-Saginaw Independent School District	I support the State's request for a waiver of the arbitrary 1% alternate assessment participation rate. A review of the data indicates that more than the special education population in most districts who meet the participation requirements exceeds 1% of the students in tested grades. Just as we are to locate and evaluate all students who may be in need of special education services in order to meet our Child Find obligation without regard to a percentage or cap, the same is true for assessment participation. If students meet the participation requirements and the IEP reflects instruction on alternative standards, then EVERY student in need of participating in an alternate assessment is entitled to do so. Arbitrary limits placed upon the state that do not meet the educational needs of every child are in direct conflict with the IDEA.
2	11/28/22	For 1.0% waiver	Dr. Dayna Smith Director, Special Programs	Orangefield Independent School District	<p>We need a waiver to exceed the 1.0 percent cap on STAAR ALT 2. The reasons include the following:</p> <ul style="list-style-type: none"> <li>• Our school district offers a quality Complex Needs program for students with the most severe and profound needs, and families move into our school district so their child/children with complex disabilities can participate in the quality educational programming we provide. Having a 1.0 percent cap almost feels like a punishment for providing a great program.</li> <li>• Our school district cannot control the number of students with complex and severe disabilities who enroll in our schools. We cannot turn them away or deny them an education; we cannot simply tell them, "We are full," now <i>[sic]</i> would we want to.</li> </ul>
3	11/28/22	Against 1.0% cap	Rusty W. Brawley, Director of Special Ed.	Greenbelt Special Education Services	The waiver requested to exceed the 1% cap for Alt. 2 testers violates the "individual" part of the IEP. By placing a "cap" on the percentage of testers for the Alternative test, that means a district has to make that decision on what is not best for the student, but what will not hurt the district in their accountability ratings. Considering the five checks that have to be met for the option of Alternative Testing, a district has absolutely no control on the number of students who might be eligible for

No.	Date	Subject	Commenter	District	Comment																																																																																																																																																																																																																																																																																																																																																																														
					<p>this type of testing. The 1% rule is telling districts that they cannot do what is best for their students.</p>																																																																																																																																																																																																																																																																																																																																																																														
4	11/28/22	Against 1.0% waiver	Kendra Franklin, District and Campus Testing Coordinator	West Texas High School	<p>I believe the above 1% STAAR ALT waiver is not necessary. If all required stakeholders have determined that a student needs to be tested on the STAAR ALT 2; requesting districts to submit a waiver is just another added step to a long list of steps that districts are already required to meet.</p>																																																																																																																																																																																																																																																																																																																																																																														
5	11/28/22	Against 1.0% cap	Tracey Gilman	Breckenridge Independent School District	<p>As you can read in the graph below, the prevalence of persons with cognitive disabilities in Texas is 4.6%. I do not understand where your arbitrary number comes from that only allows 1% of students to take the STAAR Alt 2 exam. There is no research in your number. Please consider the true demographics of your data and increase that number to a fair and equitable (and reasonable) number.</p> <p><small>Questioner</small>  <small>1. 2022 STAAR ALT 2 Waiver Request - 11/28/22 - 11/28/22 - 11/28/22 - 11/28/22</small>  <small>2. 2022 STAAR ALT 2 Waiver Request - 11/28/22 - 11/28/22 - 11/28/22 - 11/28/22</small>  <small>3. 2022 STAAR ALT 2 Waiver Request - 11/28/22 6	11/28/22	Against 1.0% cap	Sheila Jones, Director of Special Programs	Quinlan Independent School District	<p>Capping the STAAR Alt 2 at 1% is harmful for students that require an alternative assessment. Districts evaluate students carefully to ensure it is the appropriate test for their individualized needs. As such, the state and districts should not be punished for meeting the students' need for an alternative test.</p> <p>Our district has a high number of students due to low socioeconomics, poor medical care, and other factors. We have an excellent program that attracts families with students that have intense needs. Our numbers continue to grow and the regular STAAR would not be appropriate for students that require extremely modified curriculum</p> <p>Please give consideration to removing the 1% cap.</p>																																																																																																																																																																																																																																																																																																																																																																														
7	11/28/22	Against 1.0% cap	Dr. Audrey Young	Nacogdoches Independent School District	<p>With intellectual disability impacting 1-3% of the population it is negligent of the Federal Legislature to fail to recalibrate the archaic percentage factor of 1% to accurately represent the number of students who meet</p>																																																																																																																																																																																																																																																																																																																																																																														

No.	Date	Subject	Commenter	District	Comment
					<p>the criteria and increase this percentage "up to 3%".</p> <p><i>[The decision to administer STAAR Alternate 2 is made by the ARD committee based solely on the student's educational need, not administratively based on federal accountability requirements, which limit the number of students assessed with an alternate assessment to no more than 1.0% of the total number of students in the State who are assessed in a subject.]</i></p> <p>Our Texas Congressmen need to be notified of the importance of an update to this law and its continued negative impact on Texas public education.</p>
8	11/28/22	Against 1.0% cap	Kimberly Hierholzer	Goliad Special Education Cooperative	<p>I am an educational diagnostician with the Goliad Special Education Cooperative. We currently serve 9 school districts who are particularly small in comparison to a lot of school districts in Texas. A small school with just one student taking the Alternative Test could put the district over the 1% limit. Putting a 1% cap on who can take the Alternative assessment is like what happened years back when the state of Texas put an illegal cap on the number of children (8%) who should be identified as qualifying for special education. How can this be a possible to say that any particular district only has 1% of students with the most significant needs. As a public school who must take all that walk through their doors we can not control the child who is born with significant issues, the child who has suffered a traumatic brain injury from shaken baby syndrome or a fall from a bike/auto accident, those that are born with down syndrome or other significant cognitive impairment and other issues that are learning through prerequisite skills. The state doesn't put a cap on who we say is gifted, who can test and take dual credit courses, or the amount of student a public school allows through their doors. Nor should we ever put a cap on these things. Children are not mere numbers or data that can be manipulated to fit the idea percent outlined by TEA. These individuals are children with unique and some complicated needs and should be treated as such, rather than a number or percentage to fit in a nice neat box. Public education is far from a nice neat box in the state of Texas because we educate</p>

					children, not numbers.
9	11/28/22	For 1.0% waiver	Dr. Bernie Batto, Director of Special Programs	Poteet Independent School District	As a director in a district that places students in programs based on INDIVIDUAL NEED, I find it unnecessary to impose a limit of 1% for STAAR Alt 2. I am a small district with 256 students in Special Education. With this cap I would only be allowed to test 2.56 students on STAAR Alt 2. How is that fair to my approximately 30 students in extensively modified settings that meet the requirements to be able to take the STAAR Alt 2? I support the request for a waiver to this ludicrous standard for my students who are unable to take the STAAR tests due to their educational and mental needs as well as their disability that prevent them from accessing the STAAR at a level that does not meet their INDIVIDUAL needs.
10	11/28/22	Against 1.0% cap	Jennifer Lance, Principal	McLeod Independent School District	I am writing in regards to the waiver request for administration of STAAR Alt 2 assessments in excess of 1.0 percent. My district is very small. At any time, administering even 1 STAAR Alt 2 assessment will put us in excess of 1.0 percent for that subject area.
11	11/28/22	For 1.0% waiver	Megan Gonzalez, Director of Special Education Instruction	Irving Independent School District	I am advocating for the waiver to remain in place via the guidelines posted on the TEA website. It is extremely difficult to follow the guidelines for 1% while still following the expectations for which students qualify for STAAR Alt 2, it is not always going to end up exactly under 1%.
12	11/28/22	Against 1.0% cap	Amanda Urias, Assistant Superintendent	Fort Stockton Independent School District	A reason that Texas schools assess more than 1.0 percent of students with an alternative assessment is due to the greater needs of students. The social impacts that the field of education faces at the current time are a large reason that more students are identified with severe intellectual disabilities, therefore requiring alternative assessments.
13	11/29/22	For 1.0% waiver	Kimberly Arnold, Director of Academic Programs	Orenda Public Charter School District	Believing that teachers understand their students and want to provide what is best for them, requesting a waiver would be the most prudent choice. This alleviates the stress put on students and teachers when an inappropriate testing instrument is required for a student that would otherwise be successful with an alternative assessment.
14	11/30/22	Against 1.0% cap	Mary Ann Williams, Educational	Sulphur Springs Independent	The purpose of this email is to provide public comment regarding the statewide cap on the number of students who can be assessed with

			Diagnostician	School District	the State of Texas Assessments of Academic Readiness (STAAR®) Alternate 2. As educators and support staff, we are tasked with providing a Free Appropriate Public Education (FAPE), individualizing instruction to meet each students unique, individual needs. For a portion of our student population, that means proving an alternate curriculum, to meet the child at their learning level, working towards making growth/progress each school year. As a result, for some students, the most appropriate assessment is STAAR Alt 2. Any hinderance to providing the most appropriate assessment in order to monitor knowledge and growth, is a disservice to our students, which includes having a 1.0% cap placed on the number of students who “should” be participating on this assessment. Thank you for taking time to read and consider all comments that are provided.
15	11/30/22	Against 1.0% cap	Lyndsay Anderson, Director of Special Programs	Sulphur Springs Independent School District	The purpose of this email is to provide public comment regarding the statewide cap on the number of students who can be assessed with the State of Texas Assessments of Academic Readiness (STAAR®) Alternate 2. As educators and support staff, we are tasked with providing a Free Appropriate Public Education (FAPE), individualizing instruction to meet each students unique, individual needs. 16	12/01/22	Against 1.0% cap	Carole Idom, Special Needs Teacher	McLeod Independent School District	As a school district we have no control over the students we serve in our district. We cannot have a sign on the front door that says "Sorry, we can't accept your child if he/she qualifies for taking the STAAR ALT 2". As an educator of 42 years I have always felt it was my job to educate those students we have to the best of our ability. If the

18	12/07/22	Against 1.0% cap	Annie Seiter, Director of Special Education and Section 504	Boerne Independent School District	Talking points for TEA public comments on waiver for STAAR-Alt 2: 1. People are moving in from out of state with children with significant needs. They and indicate they are looking for programs to support their children. You cannot control who is moving into your area. We also have “school finders” calling supporting parents looking for programs for low incidence disabilities. 2. There are facilities that specialize in working with children with low-incident disabilities. These are residential facilities that take children from all over the US. 3. Some school districts are so small the one or two they may have puts them over the 1.0. 4. The growth in Texas alone has led to a greater number of children with low incidence moving to our school districts.
19	12/08/22	For 1.0%	Mackenzie Carroll,	Plano Independent	We strongly need to continue the 1% waiver for STAAR-ALT 2. It is important that we are

		waiver	Executive Director of Student Support Services	School District	making assessment decisions based on the required participation requirements and what is right for kids, and not putting students on tests that could be detrimental to them because of a 1% cap. Our decisions always need to be student focused and student centered.
20	12/14/22	Against 1.0% cap	Kristi Maciel, District Testing Coordinator	Grand Saline Independent School District	Texas schools will need to be able to request waivers to exceed the 1.0 percent statewide cap as students meet the criteria to be assessed with the State of Texas Assessment of Academic Readiness (STAAR®) Alternate 2. While these numbers will remain low, the number of students in any district that meet this criteria is unpredictable. Thank you for allowing our district to be take part as your incorporate the comments in the final waiver request before submission to USDE.
