#### Abstract

This report examines Advanced Placement (AP) and International Baccalaureate (IB) participation and performance in Texas during the 2006-07 school year. The percentage of Texas public school 11th and 12th grade students participating in AP and IB examinations was higher than in previous years. In 2006-07, the percentages of AP examinees and examinations with scores of 3-5 and the percentages of IB examinees and examinations with scores of 4-7 decreased from the previous year. Higher percentages of Asian/Pacific Islander and White students earned AP scores of 3-5 than African American and Hispanic students. A higher percentage of Asian/Pacific Islander students earned IB scores of 4-7 than other student groups. Participation in AP examinations by Texas public and nonpublic school students combined increased more rapidly than participation nationally between 1986-87 and 2006-07. In 2006-07, the percentages of AP examinations with scores of 3-5 in public and nonpublic schools decreased from the previous year in Texas and in the United States.

Keywords. Advanced placement, international baccalaureate, credit by examination, testing, incentive, high school, financial need, scores, gifted and talented.
Additional copies of this document may be purchased using the order form in the back of this publication. Also, the report is available in PDF format on the agency website at http://www.tea.state.tx.us/research/. Additional information about this report may be obtained by contacting the Texas Education Agency Division of Accountability Research by phone at (512) 475-3523, by e-mail at research@tea.state.tx.us, or via the division website at http://www.tea.state.tx.us/research/.
For additional information about AP examinations, contact the College Board Southwestern Regional Office at (512) 721-1800 or http://www.collegeboard.com. For information about IB examinations, contact the IB Organization's North American Office at (212) 696-4464 or http://www.ibo.org/.

## Highlights

## Results for Texas Public Schools

## Statewide Results

- In the 2006-07 school year, 96,478 Texas public school students took 197,036 Advanced Placement (AP) examinations. From 1994-95 to 2006-07, the percentage of 11th and 12th graders taking AP examinations rose from 6.8 percent to 19.8 percent.
- The percentage of AP examinees scoring in the 3-5 range on at least one examination was 50.0 percent in 2006-07. The percentage of examinations with scores in the $3-5$ range was 46.0 percent.
- In the 2006-07 school year, a total of 1,975 Texas public school students took 5,226 International Baccalaureate (IB) examinations. From 1994-95 to 2006-07, the percentage of 11th and 12th graders taking IB examinations rose from 0.1 percent to 0.4 percent.
- In 2006-07, 85.1 percent of IB examinees scored in the 4-7 range. The percentage of AP and IB examinees combined who met the score criteria for either AP or IB (50.5\%) was fivetenths of a percentage point higher than for AP alone.
- Among AP examinees tested in 2006-07, 92.9 percent completed advanced academic courses during the year.
- In 2006-07, a total of 683 ( $63.5 \%$ ) of the 1,076 Texas public school districts and charter schools with Grade 11-12 enrollment had students who took at least one AP examination. Of these 683 districts, 24 had students who took one or more IB examinations.
- In 1992-93, there were only 158 Texas public schools ( $9.6 \%$ ) with Grade 9-12 enrollment offering AP courses to students. In 2006-07, 1,134 schools (50.7\%) offered at least one AP course.

## Participation and Performance by Ethnicity

- Although AP participation rates for Hispanics and African Americans in Texas public schools climbed steadily between 1994-95 and 2006-07, only 16.3 percent of Hispanics and 10.9 percent of African Americans took AP examinations in 2006-07. By comparison, 23.3 percent of Whites and 45.4 percent of Asian/Pacific Islanders took AP examinations that year.
- As with AP participation, Asian/Pacific Islander students in Texas public schools had the highest IB examination participation rate ( $2.2 \%$ ) among all ethnic groups in 2006-07.
- In 2006-07, Hispanic students made up 38.5 percent of public school enrollees in Grades 11-12 and 31.6 percent of AP examinees. African American students represented 13.7 percent of enrollees and 7.5 percent of AP examinees. In contrast, White students made up 43.9 percent of enrollees and 51.7 percent of AP examinees, and Asian/Pacific Islander students represented 4.0 percent of enrollees and 9.1 percent of AP examinees.
- In 2006-07 the percentages of Texas public school AP examinees scoring in the 3-5 range on at least one AP examination increased over the previous year for African Americans, Asian/Pacific Islanders, and Whites and decreased for Hispanics and Native Americans.
- In 2006-07, Asian/Pacific Islanders had the highest percentage of Texas IB examinees scoring in the $4-7$ range ( $90.1 \%$ ), followed by Whites ( $85.9 \%$ ), African Americans (83.7\%), Hispanics ( $79.2 \%$ ), and Native Americans (71.4\%). Compared to 2005-06, performance increased for African Americans but decreased for Asian/Pacific Islanders, Hispanics, and Whites.

## Participation and Performance by Gender

- From 1994-95 to 2006-07, the participation rate for Grade 11-12 female students taking AP examinations increased by 14.4 percentage points to 21.9 percent; participation for males increased by 11.4 percentage points to 17.5 percent.
- The percentage of female examinees scoring in the 3-5 range on AP examinations was 48.2 percent in 2006-07. The percentage of male examinees scoring in the 3-5 range was 52.5 percent.
- A slightly higher percentage of female (86.1\%) than male (84.0\%) IB examinees achieved scores in the 4-7 range in 2006-07.

## Comparative Results for Texas, Other States, and the United States

- In 2006-07, a total of 135,130 students in 1,307 Texas public and nonpublic schools took 246,096 AP examinations. Texas was 26th among the states in the percentage increase (9.9\%) in number of examinees from the previous year.
- Between 1986-87 and 2006-07, participation in AP examinations increased more rapidly in Texas than in the nation as a whole. In Texas, there were more than 15 times as many examinees in 2006-07 ( 135,130 examinees) as in 1986-87 ( 8,792 examinees), whereas nationally, there were just over 5.5 times as many examinees in 2006-07 (1,432,169 examinees) as in 1986-87 ( 259,222 examinees).
- The number of Texas public and nonpublic schools participating in AP examinations rose between 1986-87 and 2006-07, from 285 to 1,307. Nationally, the number of participating schools increased from 7,776 to 15,505 .
- In 2006-07, the three AP examinations with the largest numbers of test takers were the same in Texas and the nation: English Language and Composition, United States History, and English Literature and Composition.
- Compared to the United States, Texas had higher percentages of AP examinations with scores in the 3-5 range on six examinations: European History, Studio Art-2D Design, Studio Art Drawing, Studio Art-3D Design, Chinese Language and Culture, and Italian Language and Culture.

## Overview

This report provides 2006-07 Advanced Placement (AP) and International Baccalaureate (IB) examination results for Texas high school students. The report is arranged in six major sections. The first section of the report includes: (a) descriptions and brief histories of the AP and IB programs; (b) information on the courses offered by each program; (c) information on the structure of and development of examinations offered by each program; and (d) a summary of student and school fees for participation in each program. The second section includes: (a) College Board, Texas, and federal policies and programs related to access to AP and IB programs and (b) a history of state and federal funding of programs designed to increase access to and encourage participation in AP and IB programs. The third section discusses (a) the use of AP and IB examination results in Texas college admissions policy and (b) the use of student participation in and performance on AP and IB examinations as an indicator in the Academic Excellence Indicator System (AEIS). The fourth section presents information on data sources and the reporting of AP and IB scores.

The fifth section of the report includes: (a) combined AP and IB participation and performance results of students in the Texas public schools, for AEIS reporting purposes; (b) AP and IB examination participation and performance results; (c) the percentage of all Grade 11-12 students who met AP or IB criterion scores; (d) a demographic profile of AP and IB examinees in Texas; and (e) an in-depth look at advanced course- and examination-taking patterns of Texas public high school students through the 2006-07 school year. The sixth section presents AP results for public and nonpublic high school students in Texas, other states, and the United States. Appendix A provides additional information on AP and IB courses and examinations and on trends in participation and performance. Appendix B provides AP and IB examination results for each district and campus in Texas. Appendix C provides average AP and IB participation and performance by selected district characteristics.

# Advanced Placement (AP) and International Baccalaureate (IB) Programs 

## Introduction

## Program Descriptions

The Advanced Placement Program and the International Baccalaureate Diploma Programme are advanced academic programs that expose secondary school students to rigorous, college-level academic content. The Advanced Placement Program is a cooperative educational partnership between secondary schools and colleges and universities, overseen by the College Board. The International Baccalaureate Diploma Programme is overseen by the International Baccalaureate Organization (IBO), a nonprofit educational foundation.

The Advanced Placement Program offers students the opportunity to take one or more advanced level courses and examinations from six academic areas: art and music, English, other languages, mathematics and computer science, science, and social science and history. Although most students participate in AP courses before taking the corresponding examinations, they may take AP examinations without having taken the courses.

The International Baccalaureate Diploma Programme is a high school curriculum for students ages 16-19 that is anchored by three core components: a Theory of Knowledge (TOK) course; Creativity, Action, and Service (CAS) activities; and an extended essay project based on original, independent research. Six academic subject groups build on the core components: Language A1 (first language), Second Language, Individuals and Societies, Experimental Sciences, Mathematics and Computer Science, and The Arts. Although student participation in the IB courses and examinations is designed to culminate in attainment of an IB Diploma, students who do not satisfy all requirements or who choose to take fewer than six subject examinations are awarded certificates for examinations completed with acceptable scores (IBO, 2002).

## Outcomes for Students

Participation in AP and IB programs benefits students, teachers, high schools, and the colleges and universities attended by program participants. Students who participate in AP or IB courses are given the opportunity to complete college-level coursework while still in high school. Those who perform well on AP or IB examinations may qualify for college credit and gain advanced placement in college courses when they enroll in institutions of higher education. Students who perform well on AP examinations are eligible for and automatically considered for several types of AP Scholar Awards.

Colleges and universities around the world recognize student participation and performance in AP and IB courses and examinations. Students participating in the AP Program can earn the Advanced

## Lighthouse Initiative

The Lighthouse Initiative, overseen by the Texas Education Agency (TEA), provides teachers with resources for preparing students to participate in College Board Pre-AP and AP courses and examinations. Resource guides are provided in the subject areas of English/language arts, mathematics, social studies, and science. One of the goals of the program is to help teachers make a connection between the Texas Essential Knowledge and Skills (TEKS) and the material taught in Pre-AP and AP courses. The resource guides published by the Lighthouse Initiative provide strategies for teachers to incorporate into their teaching to prepare students for success in advanced level work.

The Lighthouse Initiative was begun in 2001 when TEA brought together a group of English/language arts and reading teachers to develop a guide for 6th through 12th grade teachers that illustrates the alignment between the TEKS and the College Board's AP curriculum. The success of the English/language arts guide subsequently led to the development of similar guides for mathematics, social studies, and science. The resources are available to educators free of charge through the Lighthouse Initiative website.

Source. http://www.tealighthouse.org/ (2006).

Placement International Diploma (APID) for overseas study. To obtain an APID, students attending schools in the United States must indicate on at least one AP examination answer sheet that scores should be sent to a designated university outside the United States. The APID is not a substitute for a high school diploma; rather, it is an acknowledgement to universities in other countries that recipients are ready for the challenge of post-secondary work. More than 600 universities in over 35 countries outside the U.S. and Canada recognize participation in the AP Program in student admissions processes. To receive an APID, students must earn scores of 3 or higher on at least five AP examinations in the following content areas:

- two different languages selected from among English and the other world languages;
- one from a discipline designated as offering a global perspective, such as World History, Government and Politics: Comparative, and Human Geography;
- one from a science or mathematics content area; and
- one from any content area except English and other world languages.

To satisfy one of the two AP language requirements, students may submit letters from administrators at their schools verifying mastery of a language that is not currently available in the AP Program. Students who take this option must submit the results of an additional AP examination from another content area. Regardless of how students satisfy the two-examination language requirement, they must submit a total of five AP examination grades of 3 or higher to qualify for the APID.

Students who successfully complete the IB Diploma Programme and meet IBO score criteria on examinations are awarded IB Diplomas in addition to traditional high school diplomas. To receive an

IB Diploma, candidates must accumulate at least 24 of 45 total examination points in the required subject areas, plus complete the TOK course, CAS activities, and the extended essay at satisfactory levels. The maximum score of 45 points includes scores of 7 on each of the six subject examinations and 3 bonus points for an exceptional essay and exceptional performance in TOK. Many institutions of higher education outside the United States accept the IB Diploma for partial fulfillment of admissions requirements.

## Benefits for Teachers and Schools

Secondary school teachers who teach AP or IB courses benefit from opportunities for professional development and the chance to teach challenging subjects to high-performing, motivated students. High schools benefit by expanding the academic choices for students who wish to take rigorous courses and by enhancing the quality and reputation of their college preparatory programs. Colleges and universities have a means of identifying and recruiting students who successfully meet the demands of challenging, college-level courses while still in high school.

## History

## AP Program

The AP Program was developed over a six-year period, beginning in 1951. Initially named the Kenyon Plan, the program originated with a committee of representatives from 12 colleges that was established to develop descriptions of advanced level courses through which high school students could obtain college credit. The School and College Study of Admissions and Advanced Standing committee was funded through the Ford Foundation Fund for the Advancement of Education. Later expanded to include 12 secondary schools, the committee was renamed the Central Committee of the School and College Study (CCSCS).

Also in 1951, a study supported through the Fund for the Advancement of Education examined what students were being taught in the final two years of high school and the first two years of college. The study was conducted by a committee of representatives from three private high schools and three universities and resulted in the report, General Education in School and College (Blackmer, Bragdon, Bundy, \& Harbison, 1952). The report concluded that secondary and post-secondary schools were failing to view their roles in education as parts of a single, continuous process. Following adoption of the recommendations contained in the General Education in School and College report, CCSCS developed 11 advanced course and examination descriptions for secondary schools that would satisfy the credit-granting standards of the 12 member colleges. In 1952, CCSCS implemented a program to pilot the 11 courses in seven high schools. Academically advanced students in each high school were offered the opportunity to take the courses in their senior years.

During the 1953-54 school year, the Educational Testing Service (ETS) assisted CCSCS in the development and administration of examinations for each of the 11 advanced courses. The examinations were first administered in May 1954 to seniors in the pilot high schools and to freshmen
at the 12 member colleges. To ensure the validity of the examinations, the high school student results were compared to those of the college freshmen.

In 1956, CCSCS invited the College Board to administer what was still referred to as the Kenyon Plan on a national level. Under College Board leadership, the Kenyon Plan became what is now the Advanced Placement Program.

## IB Diploma Programme

An interest in creating a high school program and college entrance examination that would be acceptable to colleges and universities around the world emerged through discussions over a number of years among faculty in primarily European institutions of higher education. The idea was first presented by the International School of Geneva (Ecolint) in 1925 and reemerged in 1948 at the Conference of Internationally-minded Schools. Finally, in 1961, faculty and administrators at Ecolint organized a conference aimed at exploring social studies curricula in international schools. The conference took place with the assistance of the International Schools Association (ISA) and with funding from the United Nations Educational, Scientific and Cultural Organization (UNESCO). After the conference, ISA obtained further funding from UNESCO and called for the establishment of a separate organization dedicated to the development of an international high school program and college entrance examination. The International Schools Examination Syndicate (ISES) was created in 1965.

Initially, membership in ISES included individuals from ISA, Ecolint, the European Office of the Carnegie Endowment for World Peace, and Oxford University. Using grants from UNESCO and the Twentieth Century Fund, ISES studied several elements of an international curriculum and associated set of examinations. Forming an internationally agreed upon curriculum required a compromise among different curriculum traditions/standards in the various countries. At one extreme was a standard that required students to devote the first half of their secondary education to "general studies" and then allowed them to devote the remaining two years to a narrower, specialized course of study. At the opposite extreme was a standard requiring students to devote all four years of their secondary education to the same wide range of general studies.

The first draft of a common, international curriculum was presented at a conference in Geneva in March 1965. To accommodate the variety of standards from different countries, it was proposed that the curriculum include no individual subject specifications for students enrolled in the two-year program. Instead, the curriculum would consist of several general subject areas, from which students would choose at least one specific course each. In 1966, after a second curriculum conference, the completion of several studies, and an expansion of ISES to include individuals from the United Nations International School in New York and the College Board, ISES received a grant from the Ford Foundation. Subsequently, ISES was renamed the International Baccalaureate Organization.

The newly established IBO set out to meet five objectives: (a) to establish a unified international curriculum and examination system, (b) to obtain the agreement of a significant number of universities in different countries to accept results of the IBO examinations for admission, (c) to
obtain the agreement of several schools to teach the new curriculum, (d) to obtain acceptance of the program by parents whose children would be educated using the new curriculum, and (e) to obtain sufficient funding to maintain the program. In large part, all of these objectives were achieved within a year, and the entire proposed structure, along with several completed syllabi, was presented at a final conference in 1967. In 1970, the first 29 students completed the program and used the examination results for college entrance.

## Courses

## AP Program

The College Board's AP Program offered 37 courses during the 2006-07 school year: 5 art and music, 2 English, 11 other languages, 5 mathematics and computer science, 5 science, and 9 social science and history (College Board, AP Central, 2007c). Table A-1 in Appendix A lists each Texas public school AP course, corresponding AP examinations, and minimum college credit hours recommended by the American Council on Education (ACE, 2004).

AP courses are developed at individual campuses by high school educators, based on course descriptions provided by the College Board. Although high school AP teachers have flexibility to present the material in the way they deem most appropriate, course descriptions include specific information about what students are expected to know in the corresponding college courses. Each of the 37 course descriptions was developed by one of 22 committees composed of three or four college faculty and three or four high school AP teachers (College Board, AP Central, 2008b). The descriptions are reviewed on a regular basis through curriculum surveys to make sure that content is representative of what would be presented in corresponding college courses.

In 2007, the College Board began requiring high schools to submit AP Course Audit materials to request authorization to assign the "AP" designation to advanced classes. AP Course Audit materials include a subject-specific audit form and a course syllabus from each teacher who teaches an AP course. For courses to receive the AP designation from the College Board, course curricula must meet or exceed expectations established by college and secondary school faculty for corresponding college-level courses. After receiving initial authorization from the College Board to offer a specific AP-designated course, schools will not need to re-submit Course Audit materials in subsequent years unless the teacher of the course changes, requirements for the course are revised, or a new AP course is added.

The AP Course Audit was created to provide to teachers and administrators clear guidelines on curricular and resource requirements for AP courses and to help colleges and universities better interpret courses designated as AP on student transcripts (College Board, AP Central, 2006a). Schools that do not offer AP courses are not affected by the new AP Course Audit requirement; the College Board allows any school to administer AP examinations, regardless of the courses offered to students.

## IB Diploma Programme

In the 2006-07 school year, the IB Diploma Programme offered courses across the six academic areas: First Language, Second Language, Individuals and Societies, Experimental Sciences, Mathematics and Computer Sciences, and The Arts. First Language courses introduce students to literature from around the world in their native language, allowing them to develop their oral and written communication skills and to learn techniques of literary criticism. Second Language courses provide students with an opportunity to learn to understand and use a second language. Individuals and Societies courses include nine subjects: economics, geography, history, philosophy, psychology, social and cultural anthropology, business and management, Islamic History, and information technology in a global society. Experimental Sciences courses include biology, chemistry, physics, and environmental systems. Mathematics courses allow students to either study the topic in depth or enhance their understanding of other subjects; Computer Science courses teach students about the range and organization of computer systems as well as the use of computers in a wide range of disciplines, applications, and contexts. Courses in The Arts area include visual arts, music, and theater arts-allowing students to learn to express themselves artistically and to explore art forms from different cultures.

Diploma candidates are required to select one course from each academic area. The single exception is in The Arts area, where students may substitute a second course from one of the other five areas. The six subject-area courses are taken at either the Standard Level, which consists of 150 teaching hours, or the Higher Level, which consists of 240 teaching hours. Students must take at least three, but not more than four, subject-area courses at the Higher Level. This allows them sufficient freedom to investigate their favorite subjects in greater depth, while ensuring that they complete a broad curriculum during the two-year period (IBO, 2002). Typically, course materials are reviewed every seven years, although curricula may be revised more often if significant changes occur within a discipline.

## Examinations

## AP Program

Each AP examination contains a multiple choice section and a free response section, with the following exceptions: the music theory examination also contains a sight-singing portion; language examinations also contain oral portions; and AP Studio Art is a portfolio assessment only. Multiple choice questions may be reused in a subsequent year, but free response questions are used only once. Each examination is three hours in length, except for the two Physics C examinations, which are an hour and a half in length. Scores range from 1 to 5 (Table 1).

Annual AP examinations are developed by the same committees that produce AP course specifications. The committees meet throughout the year to discuss and develop new examination items (College Board, AP Central, 2006b). Multiple choice items are created by college faculty members on the development committees, and free response questions are created by the full
committees. To help ensure reliability of the free-response and essay sections, scorers of these sections receive extensive training and monitoring.

The process of examination development can essentially be broken down into three stages. The first stage consists of item writing and ensuring the content validity of items. The second stage consists of pretesting items and ensuring that they meet proper psychometric standards. The third stage consists of setting grading standards through the use of college comparability studies. In cooperation with ETS, AP development committees establish grading standards to ensure that AP scores are valid measures of college-level performance (College Board, AP Central, 2007b). College comparability studies begin with the administration of newly created AP examinations to college students in corresponding college courses. For example, an AP psychology examination would be administered to college students in an introductory-level college psychology course. The college students' raw scores on the AP examinations are then compared with their grades in the course. The average AP raw score of those students who receive an A in the course becomes the minimum cutoff for a standard score of 5 on the AP examination. The average AP raw score of those students who receive a B in the course becomes the minimum cutoff for a standard score of 4 on the AP examination, and so on for standard scores of 3,2 , and 1 . After the initial development of an examination, college comparability studies are conducted only intermittently to recalibrate scores. Year to year scoring standards are maintained through test equating procedures to ensure that scores have the same meaning from one year to the next.

Table 1
Description of Scores in Advanced Placement (AP) and International Baccalaureate (IB) Examination Grading Scales

| AP examinations |  | IB examinations |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Subject examinations |  | Theory of Knowledge examination and Extended Essay examinations |  |
| Score | Description | Score | Description | Score | Description |
| 5 | Extremely well qualified | 7 | Excellent | A | Excellent |
| 4 | Well qualified | 6 | Very good | B | Good |
| 3 | Qualified | 5 | Good | C | Satisfactory |
| 2 | Possibly qualified | 4 | Satisfactory | D | Mediocre |
| 1 | No recommendation | 3 | Mediocre | E | Elementary |
|  |  | 2 | Poor | F | No grade |
|  |  | 1 | Very poor |  |  |

Source. College Board and Educational Testing Service (1994a) and International Baccalaureate Organization (1997).

## IB Diploma Programme

The IB Diploma Programme uses three types of assessments to evaluate student mastery of IB course material: internal assessments, standardized examinations, and non-examination components. Internal assessments include oral presentations, art and music portfolios, and write-ups of experimental results; they are overseen and scored by the local teacher of a course. Non-examination
components include extended essays, theory of knowledge essays, language world literature assignments, language written tasks, and music investigations; they are assessed externally by an IBO examiner. Standardized examinations include the traditional formats of multiple choice, short response, and essay questions; they are administered locally but scored externally. Because standardized examinations are assumed to be the most objective and reliable of the three types of assessment, their results account for the largest portion of final student scores.

Examination questions are developed during the 18 to 24 months prior to the administration of an examination by a team of senior examiners, IBO staff, and external consultants. After initial examination drafts are completed, editing meetings are held to review examination items for attributes such as course content coverage and lack of bias. Revised drafts are sent to external advisors for review and, after final revisions have been made, examinations are sent to a production department for formatting, typesetting, and printing. Finally, the examinations are translated into French and Spanish, reviewed one more time for translation accuracy, and delivered to schools. For open-ended and non-multiple choice items, detailed scoring criteria are provided to examiners so the items can be scored as objectively as possible. Scores for each assessment are converted to grades ranging from 1 to 7 , and all grades are combined to create a final score (Table 1 on page 9).

Most diploma candidates complete all six subject area assessments in May at the end of the twoyear program, but some choose to take one or two examinations at the end of their first year. Candidates complete the standardized assessments over a two-day period and are tested for no more than six hours each day.

## Student and School Fees

## AP Program

For the 2006-07 school year, the fee for each AP examination was $\$ 83$, of which schools retained $\$ 8$ for administering the examinations. The College Board offered a $\$ 22$ credit per examination to qualified students with financial need, and schools were expected to forgo their $\$ 8$ administrative rebates for these candidates (College Board, AP Central, 2007d). The state and federal governments provided additional financial support to Texas students taking AP examinations (see Policy Related to Access to Advanced Placement (AP) and International Baccalaureate (IB) Programs on page 13). Current information on AP examination fees and student fee assistance is available through the College Board.

## IB Diploma Programme

Participation in the IB Diploma Programme carries fees for schools as well as student examinees. For the 2006-07 school year, schools wishing to participate in the program paid an application fee of $\$ 4,500$. Once authorized to participate, schools paid an annual subscription fee of $\$ 8,850$ to offer IB courses and examinations (IBO, 2005). For diploma candidates taking all six examinations in one session during 2006-07, the fee per student was $\$ 154$ plus $\$ 80$ for registration. For candidates seeking

## The Texas High School Project

The Texas High School Project (THSP) is a public-private partnered initiative dedicated to preparing high school students for college, increasing graduation rates and college enrollment rates, and preparing students for career success in the 21st century. The idea for THSP was initiated by Bill Gates during the National Education Summit on High Schools in Washington, D.C., in March of 2005. Two of the main goals of the program are to expand student access to dual credit, Advanced Placement (AP), and International Baccalaureate (IB) programs, and to provide more teachers with training in teaching AP and IB courses. THSP activities include redesigning high schools, developing education leadership, building new schools and charter schools, creating early college high schools programs, and improving Science, Technology, and Mathematics performance (T-STEM).

THSP partners include the Texas Education Agency (TEA), the Bill and Melinda Gates Foundation, the Michael \& Susan Dell Foundation, The Wallace Foundation, and others. Partners work closely with the Office of the Governor and legislators to ensure that all students have access to a rigorous and relevant curriculum. State and federal funding for the project is managed by TEA, and private investments are managed by Communities Foundation of Texas. Since 2005, Texas has dedicated $\$ 148$ million in state and federal funds for the project totals. Private partners have contributed another $\$ 112$ million, making the THSP a $\$ 260$ million joint venture.

Source. http://thsp.org/ (2006)
certificates and not diplomas, the fee per student was $\$ 85$ plus $\$ 56$ for registration. Additional fees included $\$ 60$ for each subject examination at the Higher or Standard Level, $\$ 38$ for each extended essay examination, and $\$ 13$ for each Theory of Knowledge test. As was the case for AP examinees, the state and federal governments provided financial support to Texas students taking IB examinations (see Policy Related to Access to Advanced Placement (AP) and International Baccalaureate (IB) Programs). Current examination and school fee information is available through IBO.

# Policy Related to Access to Advanced Placement (AP) and International Baccalaureate (IB) Programs 

College Board and IBO Policy

In an effort to promote participation in the AP Program by traditionally underserved populations, the College Board provides fee assistance to students in financial need and offers programs, such as the AP Fellows Program, to teachers. The AP Fellows Program provides funding for teachers serving minority or economically disadvantaged student populations to attend AP Summer Institutes (College Board, AP Central, 2008a). The institutes provide subject-specific professional development opportunities related to teaching AP courses (College Board, AP Central, 2006c). College Board has also sought to form partnerships with national and regional organizations that have as their goal expanding access to high-quality education. This includes establishing partnerships with the National Indian Education Association (NIEA) and the Hispanic Association of Colleges and Universities (HACU) and currently seeking to partner with the National Alliance of Black School Educators (NABSE) and the National Association for the Advancement of Colored People (NAACP) (College Board, AP Central, 2007a).

## State Policy

## Texas AP Incentive Program

Purpose. The Texas AP Incentive Program was created in 1993 by the 73rd Texas Legislature to recognize and reward students, teachers, and schools that demonstrate success in achieving the educational goals of the state (Texas Education Code [TEC] §§35.001-35.008, 1994; 19 TAC §74.29, 1996). The IB Diploma Programme was added to the AP Incentive Program by the 74th Texas Legislature in 1995 (TEC §§28.051-28.058, 1996). In 2001, SBOE rules implementing the AP Incentive Program were amended to include IB (19 TAC $\S 74.29,2002$ ).

Awards and subsidies. Six types of awards may be funded under the AP Incentive Program (TEC §28.053, 2004). Funding of individual components of the AP Incentive Program during each fiscal biennium is subject to legislative appropriations (Table A-2 in Appendix A). Teachers may receive subsidies of up to $\$ 450$ for Pre-AP, AP, Pre-IB, or IB teacher training sponsored or endorsed by the College Board or International Baccalaureate Organization (IBO) (TEA, 2006a). Participating schools may receive up to $\$ 100$ for each student who receives a score of at least 3 on an AP examination or 4 on an IB examination. Awards received by schools must be used for the sole purpose of academic enhancement, and school principals must establish campus teams to determine the uses of funds awarded (TEC $\S 28.053,2004$; TEC $\S 28.055,1996$ ). A one-time $\$ 3,000$ equipment grant for providing a College Board AP course or IB course, based on need as determined by the commissioner of education, was funded from the 1998-1999 fiscal biennium through the 2002-2003 fiscal biennium. Three types of awards specified in the AP Incentive Program have never been funded
by the state: (1) a one-time award of $\$ 250$ for teaching an AP or IB course for the first time; (2) a share of the teacher bonus pool proportional to the number of classes taught; and (3) a testing fee reimbursement, not to exceed $\$ 65$, for a student receiving a score of at least 3 on an AP examination or 4 on an IB examination.

The AP Incentive Program also includes subsidies for AP and IB examinations. Subsidies are available to all examinees in Texas public schools, with greater subsidies available to examinees who exhibit financial need (TEC $\S 28.053$, TEC $\S 28.054,1996$ ). The State Board of Education (SBOE) is responsible for adopting guidelines for determining financial need that are consistent with College Board and IBO definitions of financial need. The Texas Education Agency (TEA) allocates $\$ 30$ for each AP and IB examination taken by Texas public school students who participate in AP or IB courses or are recommended by their principals. Additionally, a student who qualifies under the College Board criteria for financial need is eligible for an additional $\$ 22$ fee reduction from the College Board and a $\$ 18$ fee reduction from TEA for each examination (College Board, AP Central, 2008c).

With subsidies provided by the AP Incentive Program, AP examinees in 2006-07 who met financial need criteria and took AP courses corresponding with the tests paid no more than $\$ 5$ per AP examination. Support from the program also ensured that all other AP examinees taking AP courses in corresponding subject areas paid no more than $\$ 53$ per examination (College Board, AP Central, 2008c). Students in financial need who took IB courses corresponding with the tests paid no more than $\$ 5$ per examination in 2006-07; all other IB examinees paid no more than $\$ 25$ per examination (TEA, 2006a).

History of funding. The AP Incentive Program was first implemented in the 1994-1995 fiscal biennium under the authority of TEC $\S 35.001$ (1994).

1994-1995 fiscal biennium. One million dollars of the appropriation for Gifted and Talented education was transferred and reallocated to TEA for the purpose of implementing the AP Incentive Program (General Appropriations Act, Article III, Rider 67, 73rd Legislature). A separate and additional source of funding for the program was recommended by the SBOE in 1994.

1996-1997 fiscal biennium. Two million dollars from the appropriation for Gifted and Talented education was allocated for the AP Incentive Program (General Appropriations Act, Article III, Rider 39, 74th Legislature).

1998-1999 fiscal biennium. A total of $\$ 3$ million was appropriated for the program. Two million dollars was again transferred from the Gifted and Talented appropriation; in addition, $\$ 500,000$ for each year of the biennium was allocated from funds appropriated for the Foundation School Program (General Appropriations Act, Article III, Rider 34 and Strategy B.1.1, 75th Legislature).

2000-2001 fiscal biennium. Funding for the AP Incentive Program received a substantial increase to $\$ 21$ million (Figure 1). In addition to $\$ 2$ million allocated from the Gifted and Talented fund, $\$ 19$ million was allocated in FY 2000 and FY 2001 ( $\$ 8$ million and $\$ 11$ million, respectively) from

Figure 1
State Funding for Advanced Placement (AP)/International Baccalaureate (IB) Programs, Texas Public Schools, 1996-97 Through 2006-07

Source. General Appropriations Act, Article III, Rider 39, 74th Legislature; General Appropriations Act, Article III, Rider 34, 75th Legislature; General Appropriations Act, Article III, Rider 30, 76th Legislature; General Appropriations Act, Article III, Rider 29, 77th Legislature; and General Appropriations Act, Article III, Rider 26, 78th Legislature.
the Foundation School Program (General Appropriations Act, Article III, Rider 30 and Strategy B.1.1, 76th Legislature).

2002-2003 fiscal biennium. A total of $\$ 34$ million was appropriated for the AP Incentive Program. One million dollars per year was allocated from the Gifted and Talented fund for the AP Incentive Program and pre-AP and IB activities. From the Foundation School Program, $\$ 14.5$ million was allocated for FY 2002 and $\$ 17.5$ million was allocated for FY 2003. Additional support for AP and IB programs came from funds appropriated for textbook expenditures (General Appropriations Act, Article III, Rider 29 and Strategy B.1.1, 77th Legislature). According to Rider 29, funding priority for teacher training was to be given to teachers at public school campuses not offering AP or IB courses. The rider also provided for making AP and IB courses available at as many public schools as possible, "without regard to the rural/urban status of the campus and the socioeconomic status of its students" (p. III-13).

2004-2005 fiscal biennium. Funding decreased to $\$ 27$ million; $\$ 13.5$ million per year was allocated from the Foundation School Program for pre-AP and IB activities and the AP Incentive Program. Unlike in previous years, no additional funding was appropriated from the Gifted and Talented fund. Any funds allocated for FY 2004 but not used by August 31, 2004, were appropriated for FY 2005 (General Appropriations Act, Article III, Rider 26 and Strategy A.2.1, 78th Legislature).

2006-2007 fiscal biennium. Funding remained at $\$ 27$ million: $\$ 13.5$ million per year from the Foundation School Program to support pre-AP and IB activities and the AP Incentive Program (General Appropriations Act, Article III, Rider 27 and Strategy A.2.1, 79th Legislature). Based on Rider 27, TEA continues to give funding priority to examination fee subsidies for students and to training for teachers at public school campuses not offering AP or IB courses. Rider 27 also restates the goal of providing student access to AP and IB courses at as many public schools as possible (p. III-11).

2008-2009 fiscal biennium. Funding increased to $\$ 28.4$ million; out of the funds appropriated in Strategy A.2.1, Student Success, $\$ 14.2$ million in fiscal year 2008 and $\$ 14.2$ million in fiscal year 2009 was allocated for both pre-Advanced Placement/International Baccalaureate activities and for the Advanced Placement Incentive Program. (General Appropriations Act, Article III, Rider 25 and Strategy A.2.1, 80th Legislature). Rider 25 also states that examination fee subsidies for students should be the priority for the allocated funds. For funds allocated to teacher training, funding priority should be given to teachers at public school campuses that do not currently offer Advanced Placement/International Baccalaureate courses (p. III-11).

## Federal Policy

## Federal AP Fee Assistance Program

The federal AP fee assistance program was first authorized by Congress in the 1992 Higher Education Act. The program was first funded in federal FY 1998. It was first implemented in 34 states, including Texas, to provide fee assistance for low-income students, defined as students whose family incomes were at or below the Census Bureau definition of the poverty threshold. The secretary of education expanded the program to include students with financial need taking IB examinations. In federal FY 1999 Congress appropriated $\$ 4$ million for the AP and IB fee assistance program. Of the $\$ 4$ million, Texas received $\$ 300,000$ for May 2000 examinations. In May 2001, the Texas share of federal monies increased to $\$ 379,000$. In 2007, the amount awarded to Texas was $\$ 400,000$.

## Federal Advanced Placement Incentive Program

In the FY 2001, the Department of Education allocated $\$ 22$ million in grants as part of its Advanced Placement Incentive Program (United States Department of Education, 2008). These grants were designed to provide assistance to students from low-income families, encourage their enrollment and participation in the AP Program, and increase the availability of AP courses in schools serving low-income areas. In FY 2006, funding increased to approximately $\$ 24.7$ million and in FY 2007 was just over $\$ 25$ million.

# Policy Related to Uses of Advanced Placement (AP) and International Baccalaureate (IB) Examination Results 

Texas College Admissions Policy

In 2005, the 79th Legislature passed a mandate requiring all public institutions of higher education in Texas that provide freshman-level courses to develop and implement policy granting college credit to entering students who have successfully completed the IB Diploma Programme or have achieved qualifying scores on one or more AP examinations (TEC $\S 51.968,2005$ ). Additionally, the legislation requires colleges and universities to grant at least 24 hours of credit to entering students who have obtained an IB Diploma and received scores of at least 4 on all examinations taken to achieve the diploma.

The American Council on Education (ACE) recommends a minimum number of college credit hours to be granted for AP examination scores of 3 or higher (ACE, 2004). Colleges that recognize IB scores usually award credit or advanced placement to students who score in the 4-7 range on IB examinations. Each college and university determines its own policies regarding the use of data on course and examination participation and performance to evaluate the abilities of applicants and admitted students (College Board, AP Central, 2007e). Students can contact colleges or universities for information about specific academic policies related to AP and IB courses and examinations, or they can visit the College Board website to find the policies different colleges and universities have in place for granting AP credit (College Board, 2008).

The SBOE encourages high schools to participate in the programs by allowing AP and IB courses to satisfy high school graduation requirements (Texas Administrative Code [TAC], Title 19, §§74.11-74.13, 2002).

## Academic Excellence Indicator System (AEIS) Measures

Texas state goals for public education are supported by an integrated state accountability system. The AEIS is a comprehensive, statewide system that reports district and campus performance on all indicators used for Texas public school accountability. Through AEIS, Texas recognizes, rewards, sanctions, and intervenes with school districts and campuses to ensure excellence in education for all students. Three types of indicators are used in AEIS reports: base, Gold Performance Acknowledgement, and report-only (TEA, 2007c).

In recent years, AP examination results have been used by states as one of many indicators of educational progress and comparative performance. Because AP examinations measure higher-level learning in a broad array of subject areas, the results provide valuable information to high schools about preparing students for academic challenges beyond the secondary school level. In April 1996, the SBOE approved inclusion of Grade 11 and 12 student participation in, and performance on, AP examinations as an indicator in the AEIS. The indicator was made up of three measures to be reported
at the district, region, and state levels: the percentage of non-special education students taking at least one AP examination, the percentage of examinations with scores of 3 or above, and the percentage of examinees with at least one score of 3 or above. At the time, not all schools participated in the AP Program. As a result, the indicator was defined as "report-only" and not used for campus and district ratings.

The SBOE recommended the incorporation of IB participation and performance within two years. In the fall of 1998, the indicator was revised to include IB and was defined as follows:

- the percentage of non-special education 11th and 12th graders taking at least one AP or IB examination;
- the percentage of non-special education examinees scoring 3 or above on at least one AP examination or 4 or above on at least one IB examination; and
- the percentage of total AP examinations with scores of 3 or above and IB examinations with scores of 4 or above.

In 2001, the Texas Legislature enacted the Gold Performance Acknowledgement (GPA) system to acknowledge districts and campuses for high performance on indicators not used to determine accountability ratings (TEC, $\S 39.0721,2002$ ). Included in the GPA is an indicator made up of two measures: the percentage of non-special education students who take an AP or IB examination and the percentage of non-special education examinees who perform at or above the criterion score on at least one AP or IB examination (TEC $\S 39.0721,2002$ ).

For acknowledgement on the GPA indicator, the following two criteria must be met for all students and separately for African American, Hispanic, and White students:

- Non-special education 11th and 12th graders taking at least one AP or IB examination must represent 15.0 percent or more of the non-special education students enrolled in 11th and 12th grades, and
- Fifty percent or more of the non-special education examinees must have at least one score of 3 or above on an AP examination or 4 or above on an IB examination.

## Advanced Placement Strategies

Advanced Placement Strategies, Inc. (APS) is a nonprofit organization that partners with schools and businesses in Texas to help provide Pre-AP and AP incentive programs for students, teachers, and campuses. The main goal of APS is to increase the number of Texas students who pass AP examinations. The organization was started in 2000 by the contribution of a single donor. Currently, more than 60 corporate and individual donors provide monetary contributions to help fund incentives. There are three primary components of AP Incentive Programs: (a) private donors to fund specific programs and assist in monitoring program performance; (b) AP Strategies ${ }^{\mathrm{TM}}$ to perform the assessment, setup, implementation, and management of specific programs; and (c) school districts to deliver the programs.

A separate organization within APS, Laying the Foundation (LTF), is specifically dedicated to providing comprehensive Pre-AP training. LTF was begun in 2001 when APS realized the need to provide teachers with training in teaching Pre-AP courses. In 2005, LTF received a five-year, multimillion dollar grant from the Michael \& Susan Dell Foundation. Although APS itself operates exclusively within Texas, LTF was launched as a national Pre-AP training company on January 1, 2008.

## Data Sources and Score Reporting

## Data Sources

Advanced Placement (AP) test data for Texas public high school examinees were provided to the Texas Education Agency (TEA) by the College Board. International Baccalaureate (IB) test data for Texas public high school examinees were provided to TEA by the International Baccalaureate Organization (IBO) in Cardiff, Wales, Great Britain. AP and IB results for Texas public high school examinees in previous years were obtained from TEA reports (1995, 2000a, 2000b, 2001, 2002, 2003, 2004, 2005, 2006, 2007a). AP results for all public and nonpublic school examinees in Texas and the United States were obtained from summary reports released annually by the College Board and Educational Testing Service (1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994b, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007). Comparable reports were not available for IB performance.

Student grade, ethnicity, and gender, as well as other relevant district, campus, and student information, were obtained from the TEA Public Education Information Management System (PEIMS). The College Board also collects student grade level, ethnicity, and gender information for AP examinees; these data were used when they were not available in PEIMS. The IBO does not collect this information.

## Reporting of Scores

The College Board AP Program offered 37 subject examinations across 6 academic areas in the 2006-07 school year. The International Baccalaureate Diploma Programme offered subject examinations across 6 academic areas in the 2006-07 school year. Students may take AP and IB subject examinations only once per school year. Students who have valid AP scores in the range of 1 to 5 or valid IB scores in the range of 1 to 7 for at least one examination taken in the current school year are counted as examinees that year. Counts of examinations are based on the number of examinations taken in the current school year that received valid scores. Examination counts are higher than examinee counts, because some examinees take more than one subject examination.

For two AP examinations, Music Theory and Calculus BC, students receive examination subscores in addition to overall examination scores. Students who take the Music Theory examination receive aural and non-aural subscores. Students who take the Calculus BC examination receive Calculus AB subscores in addition to Calculus BC subscores. By TEA convention, subscores were included with overall examination scores in all calculations during the period 1994-95 through 2002-03. Since the 2003-04 school year, subscores have no longer been included in the calculations.

There are two AP Physics C examinations: the Mechanics examination and the Electricity and Magnetism examination. Students can take either of the examinations or both. In Table A-11 in Appendix A, when students have scores for both examinations, only one of the two scores is counted
in the calculation of the number of examinations taken with or without the corresponding course. In all other tables, results for both examinations are included in the calculations.

AP and IB courses can be one or more semesters in length. For a course that extends over more than one semester, completion of the course is defined as successful completion of all semesters of the course. For example, a student is counted as having completed AP United States History, a twosemester course, only after completing both the first and second semesters of the course. In addition, successful completion of a course requires a student to meet "... the standard requirements of the course, including demonstrated proficiency in the subject matter ..." (19 Texas Administrative Code §74.26, 2002).

When comparing performance measures within a student group over time, the reliability of performance changes over time is dependent on the size of the group. When a group is small, reliability is reduced and caution should be used when interpreting year-to-year change. In general, smaller groups require a larger change in scores for the change to be statistically significant; larger groups require a smaller change to attain the same level of statistical significance.

When comparing performance measures across student groups, the appropriateness of comparisons is dependent on the size of all groups. When groups differ substantially in size, comparisons of performance changes between them can be misleading and generally are not recommended.

## Results for Texas Public Schools

# Advanced Placement (AP) and International Baccalaureate (IB) Combined Participation and Performance 

## Gold Performance Acknowledgement (GPA)

The Academic Excellence Indicator System (AEIS) reports results for Texas public school students who take AP examinations, IB examinations, or both AP and IB examinations. Combined results of AP and IB examination participation and performance are used as indicators for Gold Performance Acknowledgement (see Academic Excellence Indicator System (AEIS) Measures on page 17). GPA indicators are reported for all examinees and for the three student groups included in determining school and district ratings: African American, Hispanic, and White examinees. The indicators include the percentage of students participating in at least one AP or IB examination, the percentage of examinees meeting or exceeding the criterion score, and the percentage of examinations with scores at or above the criterion score.

## All Examinees

The percentage of students participating in at least one AP or IB examination rose from 8.6 percent in 1996-97 to 20.0 percent in 2006-07 (Figure 2 on page 24 and Table A-3 in Appendix A). During the same period, the percentage of examinees meeting or exceeding the criterion score decreased from 62.0 percent to 50.5 percent. The percentages of examinees and examinations with scores at or above criterion decreased slightly between 2005-06 and 2006-07 from 51.3 percent to 50.5 percent and from 47.2 percent to 46.8 percent, respectively (Figure 3 on page 24 and Table A-3 in Appendix A).

## By Student Group

The rates at which all student groups participated in at least one AP or IB examination climbed steadily between 1996-97 and 2006-07 (Table A-3 in Appendix A). During this period, the participation rate for African American examinees increased by 7.8 percentage points; for Hispanic examinees, by 11.1 percentage points; for Native American examinees, by 11.3 percentage points; for White examinees, by 12.8 percentage points; and for Asian/Pacific Islander examinees, by 20.5 percentage points. The percentages of Asian/Pacific Islander and White students taking at least one AP or IB examination were consistently higher than those of African American and Hispanic students (Table A-3 in Appendix A). While the combined AP and IB participation rates for African American and Hispanic students were consistently lower than the rates for the other student groups during this period, both rates more than tripled-rising from 3.3 percent to 11.1 percent and from 5.3 percent to 16.4 percent, respectively.

Advanced Placement (AP) and International Baccalaureate (IB) Examinee Performance, Grades 11-12, by Student Group, Texas Public Schools, 1996-97 Through 2006-07

Source. College Board, International Baccalaureate Organization, and Texas Education Agency.

The percentages of Grade 11-12 examinees scoring at or above criterion on AP or IB examinations increased from 2005-06 to 2006-07 for African Americans (from 24.8\% to 26.1\%), Asian/Pacific Islanders (from $67.3 \%$ to $68.5 \%$ ), and Whites (from $58.5 \%$ to $59.9 \%$ ); and decreased for Hispanics (from $40.2 \%$ to $35.7 \%$ ) and Native Americans (from $51.5 \%$ to $48.6 \%$ ) (Table A-3 in Appendix A). There were overall decreasing trends in the percentages of examinees with scores at or above criterion for all groups during the period 1996-97 to 2006-07.

Among 11th and 12th grade AP and IB examinees, the percentages of examinations with scores at or above criterion increased from 2005-06 to 2006-07 for Asian/Pacific Islander (from $62.2 \%$ to $63.3 \%$ ), African American (from 22.6\% to 24.0\%), and White students (from $54.9 \%$ to $55.4 \%$ ), and decreased for Native American (from 48.7\% to 42.9\%) and Hispanic students (from 30.4\% to 28.6\%) (Table A-3 in Appendix A).

## AP Participation and Performance

## All Examinees

Between school years 1994-95 and 2006-07, the percentage of 11th and 12th graders taking AP examinations rose from 6.8 percent to 19.8 percent (Figure 4 on page 26 and Table A-4 in Appendix A). In 2006-07, a total of 96,478 Grade 11-12 students in 1,995 Texas public schools took 197,036 AP examinations, up from the 23,980 students in 426 schools taking 39,859 AP examinations in 1994-95 (Table A-4 in Appendix A).

The percentages of Grade 11-12 AP examinees and AP examinations with scores in the 3-5 range decreased slightly between 2005-06 and 2006-07, from 50.8 percent to 50.0 percent and from 46.4 percent to 46.0 percent respectively (Figure 5 on page 26 and Table A-4 in Appendix A).

## By Ethnicity

The rates at which African American and Hispanic public school students participated in AP examinations climbed steadily between 1994-95 and 2006-07, from 1.9 percent to 10.9 percent for African Americans and from 3.8 percent to 16.3 percent for Hispanics (Figure 4 on page 26 and Table A-4 in Appendix A). Although the rate of participation for Native American students fluctuated from year to year, it increased from 9.0 in 1994-95 to 18.9 in 2006-07. Despite gains, participation rates in 2006-07 for these three groups of students remained low relative to the rates for Whites ( $23.3 \%$ ) and Asian/Pacific Islanders (45.4\%) (Table 2 on page 27).

The percentages of Grade 11-12 Texas public school AP examinees with scores in the 3-5 range increased from 2005-06 to 2006-07 for Asian/Pacific Islanders, African Americans, and Whites and decreased for Hispanics and Native Americans (Figure 5 on page 26 and Table A-4 in Appendix A). In 2006-07, among AP examinees, 67.8 percent of Asian/Pacific Islanders, 59.5 percent of Whites,

Source. College Board and Texas Education Agency (TEA).
Note. Final AP results data for 2006-07 were obtained from the College Board. Grade level, gender, and ethnicity were taken from the TEA Public Education Information Management System, as available. Thus, the sums of examinees by gender and ethnic group may be slightly less than the total for all examinees.
48.6 percent of Native Americans, 35.3 percent of Hispanics, and 25.3 percent of African Americans received scores in the 3-5 range (Table 2).

Among 11th and 12th grade AP examinees, the percentages of examinations with scores in the 3-5 range increased from 2005-06 to 2006-07 for Asian/Pacific Islander, African American, and White students, and decreased for Native American and Hispanic students (Table A-4 in Appendix A).

## By Gender

The percentage of 11th and 12th grade female students taking AP examinations in Texas public schools increased from 7.5 percent in 1994-95 to 21.9 percent in 2006-07 (Table A-4 in Appendix A). During this same period, the percentage of 11th- and 12th-grade male students taking AP examinations in Texas public schools increased from 6.1 percent to 17.5 percent. The gap between the participation rates for the two genders widened from 1.4 percentage points in 1994-95 to 4.4 percentage points in 2006-07.

The percentages of both female and male 11th and 12th grade AP examinees earning scores in the 3-5 range decreased from 2005-06 to 2006-07. Since 1994-95, male examinees have outperformed female examinees.

## IB Participation and Performance

## All Examinees

As with the AP Program, the participation of public school students in the IB Diploma Programme increased between 1994-95 and 2006-07 (Table A-5 in Appendix A). In 2006-07, a total of 1,975 Grade 11-12 students in 28 Texas public schools took 5,226 IB examinations, up from the 429 students in 11 schools taking 910 IB examinations in 1994-95.

The percentage of Texas public school IB examinees earning scores in the 4-7 range decreased from 86.9 in 2005-06 to 85.1 percent in 2006-07. The percentage of examinations with scores in this range decreased from 77.6 percent in 2005-06 to 76.6 percent in 2006-07 (Table A-5 in Appendix A).

The most popular examinations in 2006-07 were English A1 Higher Level, which accounted for 17.7 percent of Texas public school IB examinations, followed by History: Americas Higher Level ( $10.3 \%$ ) and Spanish B Standard Level ( $7.9 \%$ ) (Table A-6 in Appendix A). Among the three examinations, mean scores were highest on English A1 Higher Level and Spanish B Higher Level (both with mean scores of 4.8), followed by History: Americas Higher Level (4.5).

## By Ethnicity

Among Texas public school students, Asian/Pacific Islanders had the highest IB examination participation rate in 2006-07 (2.2\%), followed by Whites ( $0.5 \%$ ), and African Americans and Hispanics ( $0.2 \%$ each ) (Table 3). From 2005-06 to 2006-07, the number of IB examinees increased for all student groups (Table A-5 in Appendix A). The numerical increase in participation between

| State | 486,774 | 1,975 | 0.4 | 1,681 | 85.1 | 5,226 | 4,001 | 76.6 |

Source. International Baccalaureate Organization (IBO) and Texas Education Agency (TEA).
Note. Final IB results data for 2006-07 were obtained from IBO. Grade level, gender, and ethnicity were taken from the TEA Public Education Information Management System, as available. Thus, the sums of examinees by gender and ethnic group may be slightly less than the total for all examinees.

2005-06 and 2006-07 was greatest for Hispanics students (106). Because of the extremely small number of Native American examinees, participation and performance results for this group are not reported here.

The percentages of Texas public school IB examinees earning scores in the 4-7 range increased from 2005-06 for African Americans but decreased for Asian/Pacific Islanders, Hispanics, and Whites (Table A-5 in Appendix A). Asian/Pacific Islanders had the highest percentages of examinees scoring in the $4-7$ range ( $90.1 \%$ ), followed by Whites ( $85.9 \%$ ), African Americans ( $83.7 \%$ ), and Hispanics (79.2\%).

The percentages of examinations with scores in the 4-7 range increased from 2005-06 to 2006-07 for African American and Asian/Pacific Islander examinees and decreased for Hispanic, Native American, and White examinees. The percentages of examinations with scores of $4-7$ were highest for Asian/Pacific Islander and White students ( $84.4 \%$ and $79.0 \%$, respectively), followed by Hispanics (66.0\%) and African Americans (65.6\%).

## By Gender

Between 1994-95 and 2006-07, IB examination participation rates increased from 0.1 percent to 0.4 percent for male examinees and from 0.1 percent to 0.4 percent for female examinees (Table A-5 in Appendix A). The percentage of female examinees scoring in the 4-7 range decreased from 86.9 percent in 2005-06 to 86.1 percent in 2006-07. At the same time, the percentage of male examinees scoring in the $4-7$ range decreased from 87.3 percent to 84.0 percent.

## Qualification for College Credit

In addition to considering the percentage of examinees who met the criterion score on an AP or IB examination, it is useful to examine the percentage of all Grade 11-12 students who attained this level of achievement (Figure 6 on page 30). Because students who have met the criterion scores on one or more AP or IB examinations are in a position to be awarded credit for freshman courses in many colleges and universities, the percentage of students who meet the criterion may be viewed as one indicator of college readiness among Texas public high school students.

The percentage of all students who met the criterion score on an AP or IB examination steadily increased from 5.3 percent in 1996-97 to 10.1 percent in 2006-07. (Figure 6 on page 30 and Table A-7 in Appendix A). For each ethnic group, students who met the criterion increased from 1996-97 to 2006-07. Asian/Pacific Islanders had the highest percentages of students meeting the criterion in 2006-07 (31.5\%), followed by Whites (14.1\%), Native Americans (9.3\%), Hispanics (5.9\%), and African Americans (2.9\%). From 1996-97 through 2006-07, a substantially larger percentage of Asian/Pacific Islander students than any other student group met the criterion score on an AP or IB examination (25.2\%), followed by Whites (10.8\%), Native Americans (7.4\%), Hispanics (5.1\%), and African Americans (2.0\%).

Figure 6
Students Qualifying for College Credit Based on Advanced Placement (AP) or International Baccalaureate (IB) Examination Performance, Grades 11-12, by Ethnicity, Texas Public Schools, 1996-97 Through 2006-07

Source. College Board, International Baccalaureate Organization, and Texas Education Agency.

## Examinee Population Profile

Historically, African American and Hispanic students have accounted for smaller proportions of the AP and IB examinee population than of the student population in Texas public high schools. This trend continued in 2006-07 (Figure 7). African Americans made up 13.7 percent of public school students in Grades 11-12, but only 7.5 percent of AP examinees and 7.2 percent of IB examinees. Hispanics made up 38.5 percent of the Grade 11-12 enrollment, but only 31.6 percent of AP examinees and 20.9 percent of IB examinees.

## Advanced Courses and AP Examination Participation and Performance

## School Participation in the AP Program

According to data collected through the Texas Education Agency, Public Education Information Management System (PEIMS), the number of Texas public schools offering AP courses and/or examinations increased dramatically between 1992-93 and 2006-07 (Table 4 on page 32). During

Figure 7
Enrollment and Examinees, Grades 11-12, by Ethnicity, Texas Public Schools, 2006-07

Source. College Board, International Baccalaureate Organization, and Texas Education Agency (TEA).
Note. Grade level and ethnicity were taken from the TEA Public Education Information Management System, as available, and from Advanced Placement (AP) files, otherwise. Thus, the sums of percentages by ethnic group may not total 100 percent. In 2004-05, Native American students represented fewer than five International Baccalaureate examinees, and Native American participation in AP represented less than 1.0 percent of all AP examinees.
this period, the number of public schools offering AP courses rose from 158 ( $9.6 \%$ of the 1,639 schools with Grades 9-12 in 1992-93) to 1,134 ( $50.7 \%$ of the 2,237 schools with Grades $9-12$ in 2006-07). The number of schools with students completing examinations rose from 426 ( $26.0 \%$ of the 1,639 schools with Grades 9-12 in 1992-93) to 991 ( $44.3 \%$ of the 2,237 schools with Grades $9-12$ ). In 1992-93, about two-thirds of the 426 schools with students completing AP examinations offered no AP courses. In 2006-07, the proportion was only 4.0 percent (40) of the 991 Grade 9-12 schools with students completing AP examinations.

## Student Completion of Advanced Courses

The period from 1994-95 through 2006-07 was marked by an increase in the number of Texas public school students completing one or more courses considered academically advanced (Table A-8 in Appendix A). The number of students in Grades 9-12 completing at least one of any type of advanced course increased from 117,791 in 1994-95 to 259,286 in 2006-07. The percentage of students completing at least one advanced course who took an AP course increased from 27.8 in 1994-95 to 64.9 in 2006-07. The percentage of students in Grades 9-12 completing at least one advanced course who took a course described as "other advanced" decreased from 86.8 percent in 1994-95 to 61.7 in 2006-07.

Table 4

| $2005-06$ | 991 | 1,135 | 951 | 35 | 165 |
| $2006-07$ |  |  |  | 40 | 195 |

Source. College Board and Texas Education Agency.
Note. Final semester completion of courses was used as the basis for numerical counts.

Among all types of advanced courses, the completion rate of advanced courses that were identified as AP courses increased from 27.2 percent in 1994-95 to 61.5 percent in 2006-07 (Table A-8 in Appendix A). In contrast, the completion rate of advanced courses that were identified as "other advanced" decreased from 72.8 percent to 36.5 percent.

## Correspondence Between Advanced Courses and AP Examinations

Not all AP examinees complete AP or other advanced academic courses, nor do all students who complete advanced courses take AP examinations. Between 1994-95 and 2006-07, the percentage of AP examinees completing at least one advanced course-an AP course, other advanced course, or both-rose from 87.1 percent to 92.9 percent (Table A-9 in Appendix A). During the same period, the percentage of AP examinees completing no advanced course decreased from 12.8 percent to 7.1 percent. In 2006-07, 89.7 percent of examinees completed AP courses, and 3.2 percent of examinees completed another type of advanced course.

The percentage of AP course completers who took at least one AP examination increased, from 40.4 percent in 1994-95 to 64.6 percent in 2006-07 (Table A-10 in Appendix A). During the same period, the percentage of AP examinees who completed advanced courses other than AP decreased from 30.0 percent to 3.2 percent (Table A-9 in Appendix A), and the percentage of students completing advanced courses other than AP who took AP examinations also decreased (from 8.2\%
to $4.2 \%$ ) (Table A-10 in Appendix A). The growth of student participation in AP courses and examinations was accompanied by state funding increases between school years 1998-99 and 2002-03 (Figure 1 on page 15). Although state funding decreased in 2003-04, student participation continued to rise through 2006-07.

## AP Course and Examination Correspondence Within Subjects

Between 1992-93 and 2006-07, the relationship between student AP course completion and participation in corresponding AP examinations changed dramatically (Table A-11 in Appendix A). In 1992-93, just over a quarter of examinations ( $27.2 \%$ ) were taken by students who had completed the corresponding AP courses. In 2006-07, over four-fifths of examinations (83.0\%), were taken by students who had completed the corresponding courses. Similarly, in 1992-93, only 34.8 percent of completed AP courses were taken by students who went on to take the corresponding AP examinations. In 2006-07, over half of completed AP courses ( $59.2 \%$ ) were taken by students who went on to take the corresponding AP examinations. Of examinations taken by students who had not completed the corresponding AP courses, the largest percentage (19.7\%) were in the Spanish Language subject area, followed by English Language and Composition (18.9\%), and United States History (8.8\%).

In 2006-07, the mean score on all AP examinations taken by students without prior participation in corresponding AP courses was 2.54 , while the mean score on examinations taken by students who had participated in corresponding AP courses was 2.49 (Table A-12 in Appendix A). Nevertheless, in all but 8 of the 28 subject-area examinations in which at least 500 students participated, students who had completed the corresponding AP courses performed the same as or better than those who had not completed the corresponding AP courses (Table A-13 in Appendix A). The eight courses in which AP non-course completers outperformed course completers were English Language and Composition, United States History, English Literature and Composition, World History, Biology, Physics B, Human Geography, and French Language.

## Results for Texas and the United States

## Introduction

Policymakers and educators view statewide student participation and performance in advanced academic programs as indicators of how well schools and districts in their state are preparing high school students for college-level courses. Comparisons of state performance with nationwide performance and with other states are most appropriate when examination participation rates, demographic characteristics of examinees, and policies are similar. The College Board prepares summary reports of national and state Advanced Placement (AP) examination results (College Board \& ETS, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994b, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007).

## AP Examination Trends

In school year 2006-07, a total of 135,130 students in Texas public and nonpublic schools took 246,096 AP examinations (Table 5 on page 36). This put Texas second in the nation, behind California, in the number of AP examinees and the number of AP examinations taken (Table A-14 in Appendix A). Texas was 26th among the states in the percentage increase ( $9.9 \%$ ) in number of examinees from the previous year.

From 1986-87 to 2006-07, participation in AP examinations increased more rapidly in Texas than in the nation as a whole (Table 5 on page 36). The number of Texas AP examinees in 2006-07 $(135,130)$ was more than fifteen times greater than in 1986-87 $(8,792)$, whereas the national number increased just over five times, from 259,222 to $1,432,169$. During the same time period, the number of examinations taken by Texas students increased from 12,506 to 246,096, and the number of examinations taken nationally increased from 364,804 to 2,476,962.

The number of Texas public and nonpublic schools participating in AP examinations also rose during this period, more than quadrupling from 285 to 1,307 . Nationally, the number of participating schools nearly doubled, from 7,776 to 15,505 (Table 5 on page 36). The percentage of Texas schools participating in AP examinations in 2006-07 (80.0\%) exceeded the national percentage ( $66.0 \%$ ) (Table A-14 in Appendix A). Hawaii had the highest percentage of participating schools ( $100 \%$ ), and Nebraska had the lowest percentage of participating schools (22.0\%).

Along with increases in numbers of examinees and examinations, Texas experienced a dramatic increase in the number of AP scores in the 3-5 range, from 8,897 in 1986-87 to 116,809 in 2006-07 (Table 5 on page 36). Compared to 2005-06, the percentage of Texas AP examinations with high scores decreased slightly from 48.5 percent to 47.5 percent in 2006-07. Nationally, this percentage decreased from 59.4 percent in 2005-06 to 59.0 percent in 2006-07.

Table 5
Advanced Placement (AP) Examination Trends, Texas and the United States, 1986-87 Through 2006-07

Source. College Board and Educational Testing Service (1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994b, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007).
Note. Data are based on public and nonpublic examinees.

In both Texas and the United States as a whole, declines in the percentages of high AP examination scores may be related to rising participation rates. In recent years, greater numbers of schools have offered AP Programs for the first time. As a result, a growing proportion of AP examinees are students taking AP courses and examinations for the first time. AP examinees who have had progressively rigorous academic preparation may have some performance advantage over students who have not (College Board, 2006).

## AP Examinee Profile

In 2006-07, 49.7 percent of Texas AP examinees reported their ethnicity as African American, Asian/Pacific Islander, Hispanic, or Native American (Table 6). The combined proportion of these
groups across the U.S. was considerably smaller (31.5\%). The greater diversity of the Texas examinee population is, in large part, because of the higher percentage of Hispanic AP examinees in Texas (33.8\%) compared to the U.S. (13.1\%).

Source. College Board and Educational Testing Service (2004, 2005, 2006, 2007).
Note. Data are based on public and nonpublic examinees. Statistics for examinees who were not in Grades 9-12 are excluded from the grade-level groups above. Parts may not add to 100 percent because of rounding. Change in percent calculations are based on non-rounded values.

## AP Examination Profile

The three examinations with the largest numbers of test takers were the same in Texas and in the United States as a whole: English Language and Composition, United States History, and English Literature and Composition (Table A-15 in Appendix A). Nationally, Calculus AB remained the fourth most popular AP examination in 2006-07. In Texas, World History was the fourth most popular examination. The top four examinations accounted for 49.5 percent of all AP examinations taken in 2005-06 by Texas public and nonpublic school students and 44.7 percent of all AP examinations taken by students in the United States.

In 2006-07, the three AP examinations with the highest percentages of scores in the 3-5 range in Texas were Chinese Language and Culture (99.5\%), Italian Language and Culture (87.5\%), and Calculus BC $(74.5 \%)$. The three AP examinations with the highest percentage of scores in the 3-5 range in the United States were Chinese Language and Culture (97.1\%), Calculus BC (79.8\%),
and Computer Science AB (71.2\%). Compared to the United States, Texas had higher percentages of examinees with scores in the 3-5 range on examinations of Chinese Language and Culture, European History, Studio Art-2D Design, Studio Art Drawing, Studio Art-3D Design, and Italian Language and Culture.

| 2005-06 | 109,509 | 96,479 | 88.1 | 4,131 | 3.8 | 8,899 | 8.1 |
| 2006-07 | 121,198 | 108,767 | 89.7 | 3,848 | 3.2 | 8,583 | 7.1 |

Source. College Board and Texas Education Agency (TEA).
Note. Last semester completion of courses was used as the basis for numerical counts. AP examinees were linked to AP and advanced course completers by student to obtain the statistics. Thus, some counts may be slightly imprecise because data needed for perfect student matching were not available. Parts may not add to 100 percent because of rounding.
aPrior to the 2000-01 school year, other advanced courses did not include courses designated only as dual enrollment. Starting with that school year, advanced courses, as defined by TEA (2007b), were broadened to include dual enrollment courses.

Note. In this table, counts of examinees and examinations that are less than 5 are replaced with "<5." Counts that could be used to impute those that are replaced with "<5" are replaced with "<XX," where XX is the actual count rounded up to the next multiple of 5 . For example, a count of 43 would be listed as $<45$. Percentages calculated using masked values are replaced with a "-."

Note. In this table, counts of examinees and examinations that are less than 5 are replaced with "<5." Counts that could be used to impute those that are replaced with "<5" are replaced with "<XX," where XX is the actual count rounded up to the next multiple of 5 . For example, a count of 43 would be listed as <45. Percentages calculated using masked values are replaced with a "-."

Note. In this table, counts of examinees and examinations that are less than 5 are replaced with "<5." Counts that could be used to impute those that are replaced with "<5" are replaced with "<XX," where XX is the actual count rounded up to the next multiple of 5 . For example, a count of 43 would be listed as $<45$. Percentages calculated using masked values are replaced with a "-."

Note. In this table, counts of examinees and examinations that are less than 5 are replaced with "<5." Counts that could be used to impute those that are replaced with "<5" are replaced with "<XX," where XX is the actual count rounded up to the next multiple of 5 . For example, a count of 43 would be listed as $<45$. Percentages calculated using masked values are replaced with a "-."

## Notes on Appendix B

Of the 1,076 Texas public school districts and charter schools with Grade 11-12 enrollment in school year 2006-07, a total of 683 districts had students who took at least one Advanced Placement (AP) examination, and 24 of these 683 districts also had students who took at least one International Baccalaureate (IB) examination. In addition, a total of 592 districts had five or more AP examinees in 2006-07, a decrease from 599 districts in 2005-06. More than two-thirds of these 592 districts (406) had five or more examinees earning scores of 3 or above, an increase from 392 districts in 2005-06.

The 2006-07 AP examination results listed for each district and campus in Table B-1 include: the total number of students enrolled in Grades 11-12, number and percentage of 11th and 12th graders who took at least one AP examination, number and percentage of examinees earning at least one score within the 3-5 range, total number of examinations taken, and number and percentage of AP examinations receiving scores in the 3-5 range. Similarly, IB results for 2006-07 are listed by district and campus in Table B-2; however, columns pertaining to the number and percentage of examinees and examinations refer to scores within a 4-7 range. Table B-3 contains combined Texas AP and IB examination results in 2006-07 for those districts and campuses in which both AP and IB examinations were offered.

In Tables B-1 through B-3, to protect student confidentiality, AP and IB participation and performance data are not presented for districts and campuses with fewer than five students. In this case, the note " $<5$ " appears. In addition, the note " $<5$ " appears where fewer than five students met or exceeded the AP or IB criterion score on at least one examination, where fewer than five examinations were taken, and where fewer than five examinations had scores that met or exceeded the AP or IB criterion score. This masking ensures that single sets of scores cannot be identified or linked with any individual. When it is possible for these data to be arithmetically inferred from other district- or campus-level data, additional masking is employed using intervals of 5 students, and a note such as the following appears: " $<10, "$ " $<15, "$ " $<20, "$ etc. Similarly, to prevent inference of these data from percentages, the symbol, "-" appears in place of the corresponding percentages.

## Notes on Appendix C

Source. Data about teachers, district expenditures, and students are from the Public Education Information Management System (PEIMS). Tax and property data are provided by the Comptroller's Property Tax Division. Information about college admission examinations and the Texas Assessment of Knowledge and Skills (TAKS) is provided by the test contractors. All data are for the 2006-07 school year, with the exception of college admissions and district expenditures, which lag one year.

## Cost of Education Index

The Cost of Education Index (CEI) reflects geographic variations in costs beyond the control of districts. The CEI has a minimum value of 0.0 and a maximum of 1.2. Most districts have CEI values of at least 1.0. Districts with CEI values of 0.0 are primarily charter school districts. Districts are grouped into five subcategories, each with approximately the same number of districts.

## District Type

Districts are grouped into eight subcategories, ranging from major urban to rural, based on factors such as enrollment, growth in enrollment, economic status, and proximity to urban areas. Charter school districts make up a ninth subcategory. The subcategories are as follows.

## Major Urban

A district is classified as major urban if: (a) it is located in a county with a population of at least 725,000 ; (b) its enrollment is the largest in the county or at least 75 percent of the largest district enrollment in the county; and (c) at least 35 percent of enrolled students are economically disadvantaged. A student is reported as economically disadvantaged if he or she is:

- eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program;
- from a family with annual income at or below the federal poverty line;
- eligible for Temporary Assistance to Needy Families or other public assistance;
- a recipient of a Pell Grant or comparable state program of need-based financial assistance;
- eligible for programs assisted under Title II of the Job Training Partnership Act; or
- eligible for benefits under the Food Stamp Act of 1977.

## Major Suburban

A district is classified as major suburban if: (a) it does not meet the criteria for classification as major urban; (b) it is contiguous to a major urban district; and (c) its enrollment is at least 3 percent that of the contiguous major urban district or at least 4,500 students. A district also is classified as major suburban if: (a) it does not meet the criteria for classification as major urban; (b) it is not contiguous to a major urban district; (c) it is located in the same county as a major urban district; and
(d) its enrollment is at least 15 percent that of the nearest major urban district in the county or at least 4,500 students.

## Other Central City

A district is classified as other central city if: (a) it does not meet the criteria for classification in either of the previous subcategories; (b) it is not contiguous to a major urban district; (c) it is located in a county with a population of between 100,000 and 724,999 ; and (d) its enrollment is the largest in the county or at least 75 percent of the largest district enrollment in the county.

## Other Central City Suburban

A district is classified as other central city suburban if: (a) it does not meet the criteria for classification in any of the previous subcategories; (b) it is located in a county with a population of between 100,000 and 724,999 ; and (c) its enrollment is at least 15 percent of the largest district enrollment in the county. A district also is other central city suburban if: (a) it does not meet the criteria for classification in any of the previous subcategories; (b) it is contiguous to an other central city district; (c) its enrollment is greater than 3 percent that of the contiguous other central city district; and (d) its enrollment exceeds the median district enrollment for the state of 743 students.

## Independent Town

A district is classified as independent town if: (a) it does not meet the criteria for classification in any of the previous subcategories; (b) it is located in a county with a population of 25,000 to 99,999 ; and (c) its enrollment is the largest in the county or greater than 75 percent of the largest district enrollment in the county.

## Non-Metropolitan: Fast Growing

A district is classified as non-metropolitan: fast growing if: (a) it does not meet the criteria for classification in any of the previous subcategories; (b) it has an enrollment of at least 300 students; and (c) its enrollment has increased by at least 20 percent over the past five years.

## Non-Metropolitan: Stable

A district is classified as non-metropolitan: stable if: (a) it does not meet the criteria for classification in any of the previous subcategories; and (b) its enrollment exceeds the median district enrollment for the state.

## Rural

A district is classified as rural if it does not meet the criteria for classification in any of the previous subcategories. A rural district has either: (a) an enrollment of between 300 and the median district enrollment for the state and an enrollment growth rate over the past five years of less than 20 percent; or (b) an enrollment of less than 300 students.

## Charter School Districts

Charter school districts are open-enrollment school districts chartered by the State Board of Education. Established by the Texas Legislature in 1995 to promote local initiative, charter school districts are subject to fewer regulations than other public school districts. Generally, charter school districts are subject to laws and rules that ensure fiscal and academic accountability but that do not unduly regulate instructional methods or pedagogical innovation. Like other public school districts, charter school districts are monitored and accredited under the statewide testing and accountability system.

## Education Service Center Regions

The state is divided into 20 geographic regions, each served by an education service center (ESC). Although not usually the case, an ESC may serve districts outside its geographic boundaries. For this category, districts are grouped by the ESC regions that serve them, not by the ESC regions in which they are located geographically.

## Enrollment

Districts are grouped into nine subcategories based on number of students enrolled. Enrollment counts are taken on a specified date in late October of each year.

## Highest Property Value

Each district is placed into one of four subcategories of taxable property based on type of property with the highest value for the district. Special statutory school districts and charter school districts make up a fifth subcategory, labeled "non-taxing entities," because they do not have taxable property. The four subcategories of taxable property are:

- residential: single-family and multi-family residential, and residential inventory;
- land: vacant lots and taxable rural real property;
- oil and gas: oil, gas, and minerals; and
- business: commercial and industrial real property, commercial and industrial personal, and utilities.

## Operating Cost Per Student

Operating costs are the sum of actual expenditures for a district's operation. Note that the number shown is not the amount actually spent on each student, but rather a per-student average of the total. Per-student amounts are calculated as expenditures for the prior school year divided by the current number of students. Districts are grouped into five subcategories, each with approximately the same number of districts.

## Property Wealth: Average, Equal Student Groups, and Median

Property wealth is used as an indicator of a district's ability to raise local funds on a per-student basis. It is calculated as total taxable property value for the last completed calendar year divided by total enrollment for the current school year. Taxable value is the traditional measure of value, not the alternative value used in state funding formulas. The "property wealth: average" category classifies districts as either under or over the state average for district property wealth. The "property wealth: equal student groups" category groups districts by property wealth into 20 subcategories, each accounting for approximately the same number of students. The "property wealth: median category" groups districts by property wealth into 10 subcategories, each with approximately the same number of districts. In each of the three categories, special statutory school districts and charter school districts make up a separate subcategory, labeled "non-taxing entities," because they do not have taxable property wealth.

## SAT/ACT 2005-06: At or Above Criterion, Percentage

Districts are grouped into five subcategories based on percentage of examinees in the prior year who scored at or above the criterion score on either the SAT or ACT. Districts that did not have test takers make up a sixth subcategory. Criterion on the SAT is a combined score of 1110, and criterion on the ACT is a composite score of 24 .

## SAT/ACT 2005-06: Participation, Percentage

Districts are grouped into three subcategories based on percentage of non-special education graduates who took the SAT, ACT, or both in the prior year. Districts that did not have graduates make up a fourth subcategory.

## Small/Sparse Adjustment

Districts are grouped into four subcategories, each with approximately the same number of districts, based on adjustments to state funding to compensate for small and/or sparsely populated districts. Districts receiving no small/sparse adjustment make up a fifth subcategory. Small/sparse adjustments are shown as percentages of total adjusted basic allotment amounts.

## Student Change: 2005-06 - 2006-07

Districts are grouped into five subcategories based on change in enrollment from the prior school year to the current school year.

## Student Density

Districts are grouped into four subcategories based on number of students per square mile. Special statutory school districts and charter school districts make up a fifth subcategory, labeled "non-taxing entities," because they do not have mileage information.

## Students: African American, Hispanic, and Non-White, Percentage

In each of these three categories, districts are grouped into six subcategories based on racial/ethnic composition of enrollment. The term "Non-White" is used to designate the following groups combined: African American, not of Hispanic origin; Asian or Pacific Islander; Hispanic; and Native American or Alaskan Native.

## Students: Economically Disadvantaged, Percentage

Districts are grouped into six subcategories based on percentage of enrollment reported as economically disadvantaged. A student is reported as economically disadvantaged if he or she is:

- eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program;
- from a family with annual income at or below the federal poverty line;
- eligible for Temporary Assistance to Needy Families or other public assistance;
- a recipient of a Pell Grant or comparable state program of need-based financial assistance;
- eligible for programs assisted under Title II of the Job Training Partnership Act; or
- eligible for benefits under the Food Stamp Act of 1977.

## TAKS: Passing All Tests Taken, Percentage

Districts are grouped into five subcategories based on percentage of Texas Assessment of Knowledge and Skills (TAKS) examinees in Grades 3-11 who passed all TAKS tests taken. Districts that did not administer TAKS make up a sixth subcategory. The percentages include only examinees who were enrolled in the same districts in October of the school year.

## Tax: Local Adopted Rate

Districts are grouped into four subcategories, each with approximately the same number of districts, based on total locally-adopted tax rate. Special statutory school districts and charter school districts make up a fifth subcategory, labeled "non-taxing entities," because they do not levy property taxes. The total locally-adopted tax rate is made up of a maintenance and operation rate and a debt service rate (sometimes referred to as the Interest and Sinking fund rate). Rates are expressed per $\$ 100$ of taxable value.

## Tax: Local Maintenance \& Operation Rate

Districts are grouped into four subcategories based on locally-adopted maintenance and operation (M\&O) tax rate. Special statutory school districts and charter school districts make up a fifth subcategory, labeled "non-taxing entities," because they do not levy property taxes. The $\mathrm{M} \& \mathrm{O}$ rate includes money generated by districts for equalizing wealth.

## Teacher Experience

Districts are grouped into four subcategories, each with approximately the same number of districts, based on average years of teacher experience. The average for a district is calculated by multiplying the full-time-equivalent (FTE) count for each teacher by years of experience. Results are summed, then divided by the FTE count for all teachers.

## Teacher Salary

Districts are grouped into four subcategories, each with approximately the same number of districts, based on average teacher salary. The average for a district is calculated by dividing the salary for all teachers by the full-time-equivalent (FTE) count for all teachers. Salaries reflect pay for regular duties only; they do not include pay for supplemental duties.

## Teachers: Non-White, Percentage

Districts are grouped into six subcategories based on percentage of non-White teachers. The term "Non-White" is used to designate the following groups combined: African American, not of Hispanic origin; Asian or Pacific Islander; Hispanic; and Native American or Alaskan Native. The percentage for a district is calculated by dividing the full-time-equivalent (FTE) count for non-White teachers by the FTE count for all teachers.

## Teachers: With Advanced Degrees, Percentage

Districts are grouped into four subcategories, each with approximately the same number of districts, based on percentage of teachers with advanced degrees. The percentage for a district is calculated by dividing the full-time-equivalent (FTE) count for teachers with master's or doctorate degrees by the FTE count for all teachers.

## Compliance Statement

Title VI, Civil Rights Act of 1964, the Modified Court Order, Civil Action 5281, Federal District Court, Eastern District of Texas, Tyler Division.

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

1. acceptance policies on student transfers from other school districts;
2. operation of school bus routes or runs on a nonsegregated basis;
3. nondiscrimination in extracurricular activities and the use of school facilities;
4. nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;
5. enrollment and assignment of students without discrimination on the basis of race, color, or national origin;
6. nondiscriminatory practices relating to the use of a student's first language; and
7. evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

Title VII, Civil Rights Act of 1964 as Amended by the Equal Employment Opportunity Act of 1972; Executive Orders 11246 and 11375; Equal Pay Act of 1964; Title IX, Education Amendments; Rehabilitation Act of $\mathbf{1 9 7 3}$ as Amended; 1974 Amendments to the Wage-Hour Law Expanding the Age Discrimination in Employment Act of 1967; Vietnam Era Veterans Readjustment Assistance Act of 1972 as Amended; Immigration Reform and Control Act of 1986; Americans With Disabilities Act of 1990; and the Civil Rights Act of 1991.

The Texas Education Agency shall comply fully with the nondiscrimination provisions of all federal and state laws, rules, and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any educational programs or activities which it operates on the grounds of race, religion, color, national origin, sex, disability, age, or veteran status (except where age, sex, or disability constitutes a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency is an Equal Opportunity/Affirmative Action employer.

    Note. Final AP results data for 2006-07 were obtained from the College Board. Grade level, gender, and ethnicity were taken from the TEA Public Education Information Management System, as available. Thus, the sums of examinees by gender and ethnic group may be slightly less than the total for all examinees.
