

Certified Superintendent Demographics by Preparation Route 2011-2015

This table shows the number and percentage of candidates who received their first standard Superintendent certificate through each preparation route, broken down by gender and by race or ethnicity.

Definition. A standard certificate is a certificate offered since 1998-99 that is renewed every five years.

Results

- The overall majority of Superintendents were male except in academic year 2014-15, when a small majority were female.
- Superintendents were largely white, with Hispanics/Latinos and blacks/African Americans making up the second largest groups.
- Few Superintendents were Asian and American Indian/Alaska Native; none were Native Hawaiian or identified as Other.
- The university post-baccalaureate route produced a large majority of certified Superintendents in each academic year shown.
- The overall number of certified Superintendents has declined each academic year since 2012-13.

* Results for individual routes may not sum to the total for All Routes, because the total is a count rather than a sum. A sum of routes may contain duplication as educators can be prepared through more than one route.

Certified Superintendent Demographics by Preparation Route 2011-2015

Summary of methodology. Five tables were extracted containing identification numbers, preparation route codes, genders, and races or ethnicities of individuals obtaining their first standard Superintendent certificate for academic years 2010-11 through 2014-15. For each academic year and preparation route, a total of all Superintendents was obtained, together with counts by gender and race or ethnicity. Each count was then taken as a percentage of the corresponding total. The process was repeated to obtain overall results for all routes. Finally, the two sets of results were combined into one table.
