

Chapter 7—Other Accountability System Processes

Most accountability ratings are determined through the process detailed in Chapters 1–5. Accommodating all districts and campuses in Texas increases the complexity of the accountability system but also ensures the fairness of the ratings assigned. This chapter describes other processes necessary to implement the accountability system.

Pairing

All campuses serving prekindergarten (PK) through grade 12 must receive an accountability rating. Campuses that do not serve any grade level for which STAAR assessments are administered are paired with another campus in the same district for accountability purposes. A campus may pair with its district and be evaluated on the district’s results.

The Texas Education Agency (TEA) analyzes TSDS PEIMS fall enrollment data to determine which campuses need to be paired. Campuses that serve only grades not tested on the STAAR (i.e., PK, K, grade 1, or grade 2) are paired with either another campus in the district or the district itself.

Charter school campuses and alternative education campuses (AECs) registered for evaluation by alternative education accountability (AEA) provisions are not paired with another campus. Likewise, traditional campuses may not be paired with AECs.

Paired data are not used for distinction designation indicators; therefore, paired campuses cannot earn distinction designations.

Pairing Process

Districts may use the prior-year pairing relationship or select a new relationship by completing the pairing form on the TEA Login (TEAL) Accountability application. In 2020, as districts and campuses receive a *Not Rated: Declared State of Disaster* label, the pairing process was not necessary.

If a district fails to inform TEA of its pairing preference, pairing decisions are made by TEA. For campuses that have been paired in the past, staff assumes that prior-year pairing relationships still apply. For campuses in need of pairing for the first time, pairing selections are based on the guidelines given in this section in conjunction with analysis of attendance and enrollment patterns using TSDS PEIMS data.

Guidelines

Campuses that are paired should have a “feeder” relationship and should serve students in contiguous grades. For example, a kindergarten (K) through grade 2 campus should be paired with the campus that serves grade 3 in which its students will be enrolled following grade 2.

When a campus being asked to pair is a PK or K campus with a “feeder” relationship to a campus that also requires pairing (e.g., a grade 1–2 campus) both campuses should pair with the same campus that serves grade 3 in which their students will be enrolled following grade 2.

A campus may be paired with its district instead of with another campus. This option is suggested for cases in which the campus has no clear relationship with another single campus in the district. A campus paired with its district is evaluated using the district’s assessment results (for all grades tested in the district). Note that pairing with a district is not required in this instance; districts may select another campus for pairing.

Multiple pairings are possible. If several K–2 campuses feed the same 3–5 campus, all the K–2 campuses may pair with that 3–5 campus.

Districts may change pairings from year to year. Any changes should, however, be based on establishing the most appropriate pairing relationship. For example, a change in attendance zones that affects feeder patterns may cause a district to change pairing. A change in a pairing relationship does not change accountability ratings assigned in previous years to either campus.

Non-Traditional Education Settings

Even though districts are responsible for the performance of all their students, statutory requirements affect the rating calculations for residential treatment facilities (RTF), Texas Juvenile Justice Department (TJJD), juvenile justice alternative education program (JJAEP), and disciplinary alternative education program (DAEP) campuses.

Inclusion or Exclusion of Performance Data

The performance of students served in certain campuses cannot be used in evaluating the district where the campus is located. Texas Education Code (TEC) §39.055 requires that students ordered by a juvenile court into a residential program or facility operated by the TJJD, a juvenile board, or any other governmental entity or any student who is receiving treatment in a residential facility be excluded from the district and campus when determining the accountability ratings. Please see Appendix G.

Student Attribution Codes

Districts with RTF or TJJD campuses are required to submit student attribution codes in TSDS PEIMS.

JJAEPs and DAEPs

State statute and statutory intent prohibit the attribution of student performance results to JJAEPs and DAEPs. Each district that sends students to a JJAEP or DAEP is responsible for properly attributing all performance and attendance data to the home campuses according to the Texas Education Data Standards and testing guidelines.

Special Education Campuses

Campuses where all students are served in special education programs and tested on STAAR are rated on the performance of their students.

Specialized Programs or Campuses

The assessment; college, career, and military readiness; and graduation outcomes for students who attend specialized programs or campuses, such as, but not limited to magnets, P-TECHs, schools of choice, or academies must be attributed to the campus at which the student receives instruction. These outcomes may not be attributed to a student's campus of origin, if the student receives instruction at the campus that houses the specialized program. Campuses are rated on the performance of their students. Campuses that house multiple programs, such as a magnet program and a zoned attendance program, are rated on the performance of all students.

AEA Provisions

Alternative performance measures for campuses serving at-risk students were first implemented in the 1995–96 school year. Over time, these measures expanded to include charter schools that served large populations of at-risk students. Accountability advisory groups consistently recommend evaluating AECs by separate AEA provisions due to the large number of students served in alternative education programs on AECs and to ensure these unique campus settings are appropriately evaluated for accountability.

AEA provisions apply to and are appropriate for

- campuses that offer nontraditional programs, rather than programs within a traditional campus;
- campuses that meet the at-risk enrollment criterion;
- campuses that meet the grades 6–12 enrollment criterion;
- open-enrollment charter schools that operate only AECs; and
- open-enrollment charter schools that meet the AEC enrollment criterion.

AEA Campus Identification

AECs, including charter school AECs, must serve students at risk of dropping out of school as defined in TEC §29.081(d) and provide accelerated instructional services to these students. The performance results of students at registered AECs are included in the district's performance and used in determining the district's accountability rating.

The following types of campuses are registered for evaluation by AEA provisions:

- AEC of choice – At-risk students enroll at AECs of choice to expedite progress toward performing at grade level and high school completion or to be served by a specialized program for an exceptional population.
- Dropout recovery school (DRS) – Education services are targeted to dropout prevention and recovery of students in grades 9–12, with enrollment consisting of at least 50 percent of the students 17 years of age or older as of September 1, 2019, as reported for the fall semester TSDS PEIMS submission.

In this manual, the terms *AEC* and *registered AEC* refer collectively to AECs of choice, residential facilities, and dropout recovery schools that are registered for evaluation by AEA provisions and meet the at-risk and grades 6–12 enrollment criteria.

DAEPs, JJAEPs, and stand-alone Texas high school equivalency certificate (TxCHSE) programs are ineligible for evaluation by AEA provisions. Data for these campuses are attributed to the home campus.

AEA Campus Registration Process

The AEA campus registration process is conducted online using the TEAL Accountability application. AECs rated by 2019 AEA provisions are re-registered automatically in 2020, provided the campus continues to meet enrollment and at-risk criteria as determined by TSDS PEIMS October snapshot data. If a campus was registered in 2019 using the at-risk safeguard and does not meet the at-risk enrollment criterion in 2020, the campus is not eligible for AEA and is not re-registered for AEA in 2020.

Campuses that were not registered in 2019 but meet eligibility in 2020 are automatically registered for AEA by the agency. Districts may choose to remove a campus from evaluation under AEA procedures by submitting an AEA rescission form. The 2020 registration process occurred May 15–June 1, 2020.

AEA Campus Registration Criteria

Campuses must meet thirteen criteria to register for AEA. However, the requirements in criteria 8–13 may not apply to charter school campuses (depending on the terms of the charter) or for community-based dropout recovery campuses established in accordance with TEC §29.081(e).

- 1) The AEC must have its own county-district-campus number for which TSDS PEIMS data are submitted and test answer documents are coded. A program operated within or supported by another campus does not qualify.

- 2) The AEC must have its own county-district-campus number on TSDS PEIMS October snapshot day (October 25, 2019).
- 3) The AEC must be identified in AskTED (Ask Texas Education Directory database) as an alternative instructional campus. This is a self-designation that districts and charter schools request via AskTED.
- 4) The AEC must be dedicated to serving students at risk of dropping out of school as defined in TEC §29.081(d). Each AEC must have at least 75 percent at-risk student enrollment at the AEC verified through current-year TSDS PEIMS fall enrollment data.
- 5) At least 50 percent of students at the AEC must be enrolled in grades 6–12 verified through current-year TSDS PEIMS fall enrollment data.
- 6) The AEC must operate on its own campus budget.
- 7) The AEC must offer nontraditional settings and methods of instructional delivery designed to meet the needs of the students served on the AEC.
- 8) The AEC cannot be the only middle school or high school listed for its district in AskTED.
- 9) The AEC must have an appropriately certified, full-time administrator whose primary duty is the administration of the AEC.
- 10) The AEC must have appropriately certified teachers assigned in all areas including special education, bilingual education, and/or English as a second language (ESL) to serve students eligible for such services.
- 11) The AEC must provide each student the opportunity to attend a 75,600-minute school year as defined in TEC §25.081(a), according to the needs of each student.
- 12) If the campus has students served by special education, the students must be placed at the AEC by their Admission, Review, and Dismissal (ARD) committee. If the campus is a residential facility, the students must have been placed in the facility by the district.
- 13) Students served by special education must receive all services outlined in their current individualized education programs (IEPs). English learners (EL) must receive all services outlined by the language proficiency assessment committee (LPAC). Students served by special education or language programs must be served by appropriately certified teachers.

At-Risk Enrollment Criterion

Each registered AEC must have at least 75 percent at-risk student enrollment on the AEC verified through current-year TSDS PEIMS fall enrollment data in order to be evaluated by AEA provisions. TEC §29.081 defines fourteen criteria used to identify students as “at-risk of dropping out of school”. Districts and charter schools must identify students in TSDS PEIMS who meet one or more of the fourteen criteria. The at-risk enrollment criterion restricts use of AEA provisions to AECs that serve large populations of at-risk students and enhances at-risk data quality.

Prior-Year Safeguard. If a registered AEC does not meet the at-risk enrollment criterion in the current year, it remains registered for AEA if the AEC meets the at-risk enrollment criterion in the prior year. For example, an AEC with an at-risk enrollment below 75 percent in 2020 that had at least 75 percent in 2019 remains registered in 2020.

Grades 6–12 Enrollment Criterion

In order to be evaluated by AEA provisions, each registered AEC must have at least 50 percent student enrollment in grades 6–12 based on total students enrolled (early education–grade 12) verified through current-year TSDS PEIMS fall enrollment data. The grades 6–12 enrollment criterion restricts use of AEA provisions to middle and high schools.

Final AEA Campus List

The final list of AEA campuses is posted on the TEA website in June at which time an email notification is sent to all superintendents.

The *2020 Final AEA Campus List* includes DRS designations. If at least 50 percent of the students enrolled at an AEA campus are 17 years of age or older as of September 1, 2019, then the AEC of choice is designated as a DRS (TEC §39.0548).

AEA Charter School Identification

Charter school ratings are based on aggregate performance of the campuses operated by the charter school. Performance results of all students in the charter school are used to determine the charter school's accountability rating and distinction designations.

- Charter schools that operate only registered AECs are evaluated by AEA provisions.
- Charter schools that operate both non-AEA campuses and registered AECs are evaluated by AEA provisions if the AEC enrollment criterion described below is met.
- Charter schools that operate both non-AEA campuses and registered AECs that do not meet the AEC enrollment criterion described below do not qualify for evaluation by AEA provisions.
- Charter schools that operate only non-AEA campuses do not qualify for evaluation by AEA provisions because the campuses choose not to register for AEA evaluation, do not meet the at-risk criteria, or do not meet the grades 6–12 enrollment criteria.

AEC Enrollment Criterion for Charter Schools

A charter school that operates both non-AEA campuses and registered AECs is eligible for evaluation by AEA provisions if at least 50 percent of the charter school's students are enrolled at registered AECs. AEC enrollment is based on total students enrolled (early education–grade 12) verified through current-year TSDS PEIMS fall enrollment data.

Final AEA Charter School List

After the *2020 AEA Campus List* is finalized, AEA charter schools eligible for evaluation by AEA provisions are identified. The final list of AEA charter schools is posted on the TEA website in June, at which time an email is sent to all superintendents.

AEA Modifications

“Chapter 2—Student Achievement Domain” and “Chapter 5—Calculating 2020 Ratings” describe the provisions and targets used to evaluate AEA campuses and AEA charter schools.
