School districts shall ensure that:

(1) prior to assignment in the program, teachers who provide instruction and services that are a part of the program for gifted students have a minimum of 30 hours of staff development that includes nature and needs of gifted/talented students, assessing student needs, and curriculum and instruction for gifted students;

(2) teachers without training required in paragraph (1) of this section who provide instruction and services that are part of the gifted/talented program must complete the 30-hour training requirement within one semester;

(3) teachers who provide instruction and services that are a part of the program for gifted students receive a minimum of six hours annually of professional development in gifted education; and

(4) administrators and counselors who have authority for program decisions have a minimum of six hours of professional development that includes nature and needs of gifted/talented students and program options.
All personnel involved in the planning, creation, delivery and administration of services to gifted/talented students possess the knowledge required to develop and provide differentiated programs and services.

Qualifications

• Who is qualified to provide the 30-hour training? Who may offer the 30-hours of professional development required for G/T teachers?

Law & Rule:

• Currently that decision rests with local school districts.

Best Practice:

• The basic 30-hour G/T training should be provided by an expert in gifted education who, at the very least, is an experienced, trained (according to TAC 89.2) G/T teacher. Professional development providers should have passed the G/T TExES or have an advanced degree in Gifted Education.

If AP® classes serve as the mode of delivery for your services to G/T students, teachers should have the 30 hours of training in G/T education.

A part of the College Board five day summer institute training can count toward the curriculum and instruction component, but the teacher still needs approximately six hours each in the nature and needs of G/T students and assessing student needs training components.
Completing Training

Law & Rule:
• As long as the training is completed before a teacher begins teaching in the gifted program, there are no state requirements determining the length of time within which the training must be completed. Local districts, however, may have requirements regarding this.

Best Practice:
• Districts should strive to provide the training within the first six weeks of school.
6-hour G/T Update
Law & Rule:

• All teachers who are part of a district’s defined G/T services are required to participate in an annual G/T update professional development session. (TAC §89.2(3); TAC 233.1; State Plan 5.6)

Best Practice:

• All G/T trained teachers are encouraged to continue the annual updates even if not currently teaching G/T students in order to continue their G/T trained status and to help them appropriately serve G/T students who may be enrolled in their classes.

• However, G/T updates, like all professional development sessions, are more effective if the participants are knowledgeable about the field and interested in learning more in order to better serve their students.
6-hour G/T Update Training

Required G/T updates should meet some or all the following criteria:

- Designed specifically to prepare teachers to meet the needs of gifted students
- Designed specifically to provide teachers with content knowledge above and beyond that gained in a typical undergraduate teacher-preparation program
- Designed based on identified needs either of the district or G/T students
- Designed to increase understanding of nature and needs of G/T students
- Provided by an expert in gifted education
- Provided by an expert (practitioner-level) in the content area
6-hour Update

- Individualized for teachers
- Comprehensive needs assessments
- District Improvement Plan
- Objectives of the G/T program services
- Annual gifted program evaluation
- Campus Improvement Plan
• The district defines the annual professional development calendar.

• Efforts should be made to ensure that a teacher receives a six-hour update early enough in the year to use the strategies and techniques they learned with the students they are currently teaching.

Best Practices From the Field

Share your practices.
Clarification

- G/T Certified in Texas refers to a teacher who has obtained the G/T Supplemental Certificate available through successful challenging of the G/T TExES.
- This certificate alone, however, does not qualify a teacher to teach gifted students in Texas. It must be accompanied by the 30-hour basic training required by TAC 89.2.
- A teacher with the appropriate 30-hour training but without the supplemental certificate is considered “G/T trained.” (TAC 89.2; State Plan 4.1.1C)
Documentation

- Who is the keeper of the certificates?
- What is acceptable documentation?
- Who verifies outside trainings for G/T content?
- How long do you maintain that documentation?
- Do you have procedures in place pertaining to G/T professional learning?
• 5.4 A written plan for professional learning in the area of gifted/talented education that is based on identified needs is implemented and updated annually.

• 5.11 Evaluation of professional learning activities for gifted/talented education is ongoing and related to state teacher gifted/talented education standards, and the results of the evaluation are used in making decisions regarding future staff development plans (19 TAC §89.5 and TAC §233.1).
