Overview

“...not all pre-k programs successfully support early learning. It is decidedly not the case that just any pre-k program operating under just any circumstances will provide young children with the inputs they need to produce, let alone sustain, early developmental gains.”

The Current State of Scientific Knowledge on Pre-Kindergarten Effects. Brookings Institute. April 2017. p 23.

High-Quality Prekindergarten Components

- Curriculum
- Student progress monitoring
- Teacher qualifications
- Teacher/student ratio
- Family engagement
- Program evaluation
- Data reporting

Data Reporting

Effective schools showing outstanding gains in academic measures report that the wide and wise use of data has a positive effect on student achievement and progress. Data driven decision making is suggested to be a main tool to move educational organizations towards school improvement and educator effectiveness.

Wayman, Jeffrey (2005). "Involving teachers in data driven decision making: Using computer data systems to support teacher inquiry and reflection." *Journal of education for students placed at risk*: page 296-300.

Importance of Using Data

To help districts, schools, educators, and other stakeholders to make data-informed decisions to improve student learning and outcomes

To facilitate research to increase student achievement and close achievement gaps

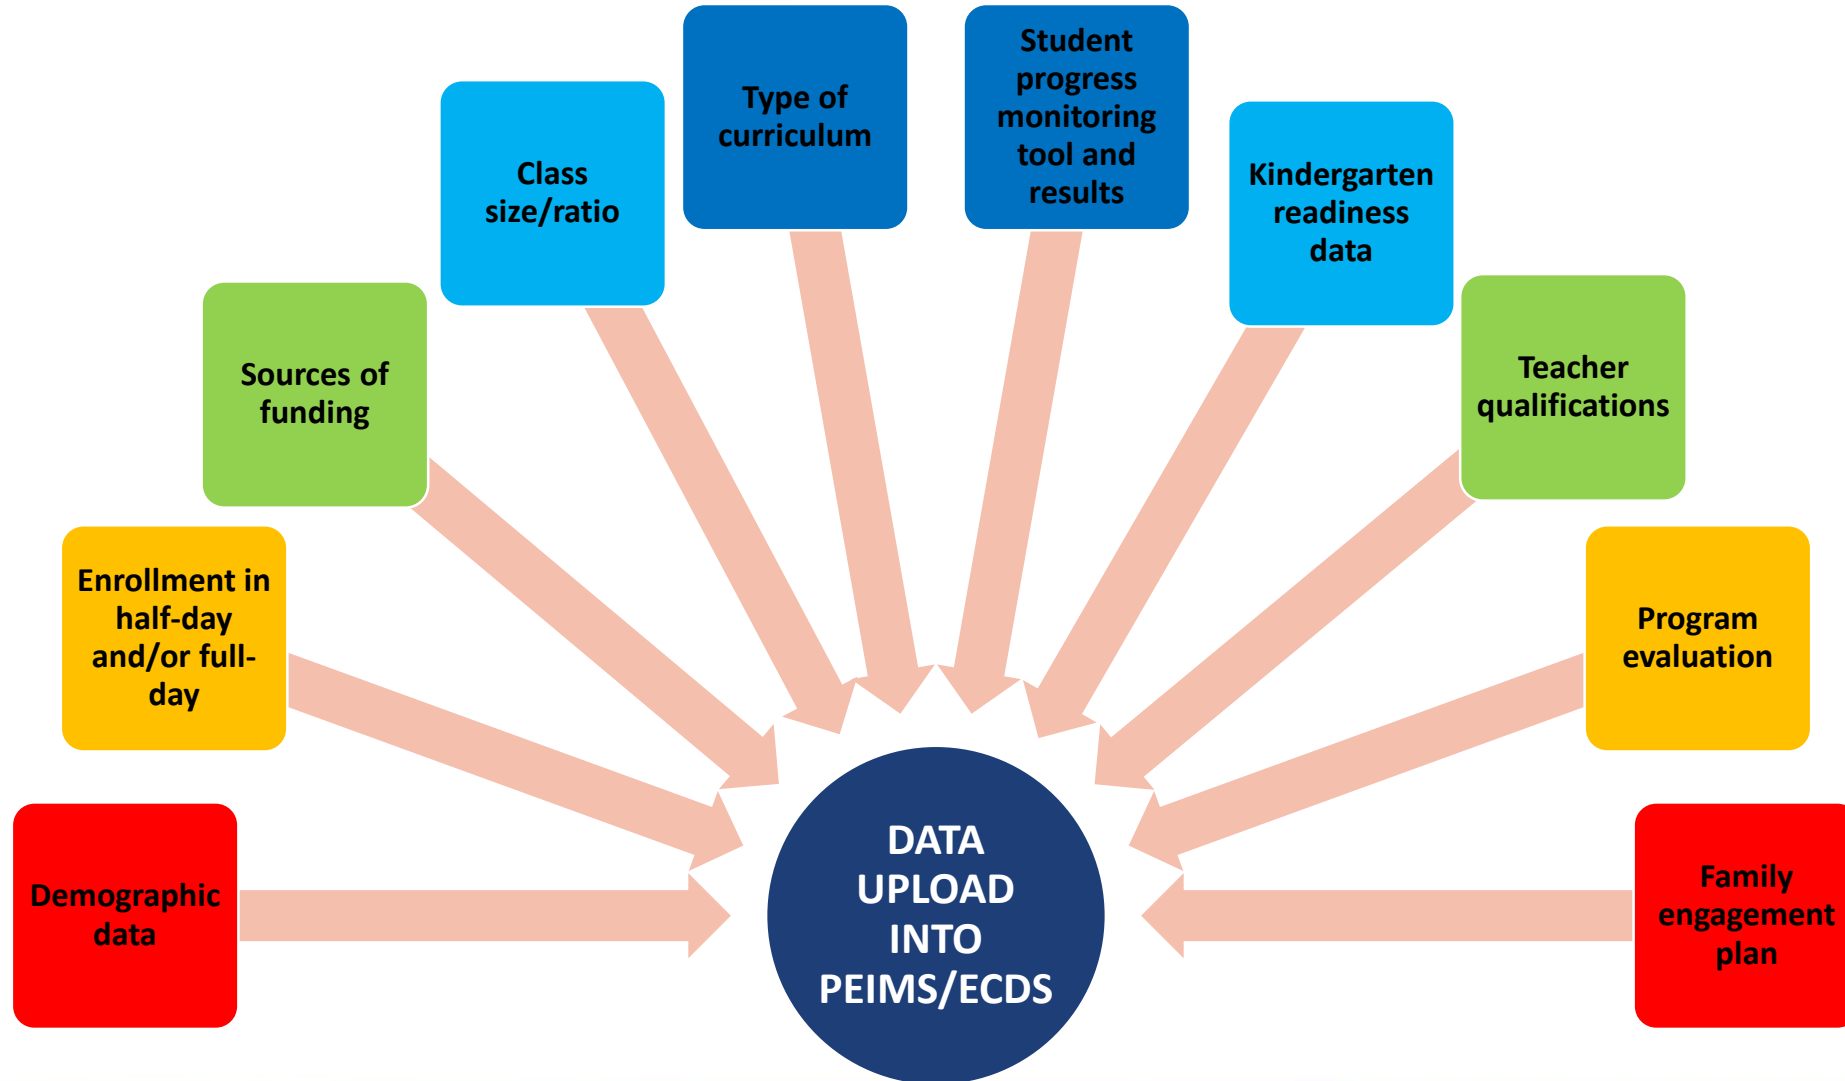

All information contained in this webinar can be found in:

- Statute: TEC §29.1532
- Statute: TEC §29.161
- Statute: TEC §29.164 – 29.172
- Commissioner's Rule: TAC §102.1003
- 86th Legislative Session: HB3

What Does it Mean?

- LEAs must upload the data that is specified in statute or Commissioner's Rule into ECDS.
- Information regarding the submission of required data is communicated through a *To the Administrator Addressed* correspondence in September of each year:
https://tea.texas.gov/taa_letters.aspx

What Data Is Required?

New HB3 Prekindergarten Data Elements to be Reported in TSDS:

- Update and add instructional program type code for prekindergarten
- Full-day waiver indicator code
- Prekindergarten school type code
- Prekindergarten funding source code for early education allotment

Question:

Who can help an LEA if they are having difficulty uploading their data into ECDS?

Answer:

LEAs are encouraged to seek help from one of the following when experiencing difficulty uploading their data:

- Each district's assigned PEIMS Coordinator
- Each Education Service Center's trained and certified "ECDS Champion"
- Submit a TIMS ticket; TIMS is a web-based system that allows one to submit incidents when problems or questions come up.

Early Childhood Data System (ECDS)

ECDS Overview and Purpose

ECDS Overview

State-wide reporting feature of the Texas Student Data System (TSDS). The system includes the collection of both prekindergarten and kindergarten student data

ECDS Purpose

To better inform families, school administrators, educators, community stakeholders, and policy makers about the effectiveness of prekindergarten programs in preparing children for success in kindergarten

Public Prekindergarten Student Counts by Class Size or Student-to-Teacher Ratio Including Instructional Aides for 2017-18

	Student Count
Class size 1-11	13,633
Class size 12-18	72,328
Class Size 19 or More	158,703
Ratio 1:1-10:1	24,460
Ratio 11:1-15:1	86,064
Ratio 16:1 or More	138,827

Notes: 1. Curricula, class size and student-to-teacher ratio data are based on the Texas Education Agency's Early Childhood Data System (ECDS). 2. Not all schools and districts reported curricula data; schools and districts may use multiple curricula. 3. Counts within categories for Class Size or Student-to-Teacher Ratios are distinct student counts; however, a student may be counted in multiple categories so the total number of students in all categories may exceed the number of PK students enrolled.

Prekindergarten Assessment Report

Texas PK-16 Public Education Information Resource

Texas Public Prekindergarten Assessment Results for 4-Year-Olds

198,473
4-year-old Prekindergarten Students Reported in the Texas Education Agency's Early Childhood Data System (ECDS) for School Year 2017-18

156,279 (79%)
Assessed Beginning-of-Year (BOY) in 2017-18

157,571 (79%)
Assessed End-of-Year (EOY) in 2017-18

141,716 (71%)
Assessed Both BOY and EOY in 2017-18

Notes: 1. Percentages of assessed prekindergartners are based on the number of 4-year-old public prekindergarten students reported in ECDS. ECDS includes assessment data for two public prekindergarten assessment periods: beginning-of-year (BOY) and end-of-year (EOY). Students may be administered an assessment BOY, EOY, or both BOY and EOY. 2. The focus of this report is students who were administered the same assessment(s) BOY and EOY for the same subject(s) at the same school in the same school year. 3. The data download for this report includes the data in this report and data for all students who took an assessment either BOY or EOY or both BOY and EOY. 4. Proficiency Percentage Point Difference is percent proficient EOY minus percent proficient BOY. 5. The subject areas 'Emergent Literacy Reading', 'Emergent Literacy Writing' and 'Language and Communication' may be abbreviated as ELR, ELW and L&C, respectively. 6. For school year 2017-18, CIRCLE LS and CIRCLE CLI Emergent Literacy Writing (ELW) assessments are not included in this report because benchmarks were unavailable for assessing BOY proficiency. This resulted in small assessment and proficiency counts for the 'ELW' subject area in this report.

Higher Quality

Higher Quality
leads to
Positive Child Outcomes

Items to Ponder:

- Does the LEA do any professional development with staff focusing on collecting and using data effectively?
- Is the annual data reviewed and analyzed before it is submitted to TEA? How can that data be used to improve the effectiveness of the prekindergarten program?
- How could a district's process of collecting the required data be improved?
- Does the time frame used by the LEA allow for unanticipated difficulties?

High-Quality Checklist

Prekindergarten High-Quality Measure – Data Reporting	Proficiency	Proficiency in Progress	Follow-Up
The LEA annually submits the required prekindergarten data according to the timeline specified by the Texas Education Agency.			
The LEA provides appropriate professional development to staff focusing on collecting and using data appropriately.			
The LEA annually reviews and analyzes their prekindergarten data before it is uploaded into ECDS.			
The LEA annually uses its prekindergarten data in its continuous improvement efforts.			
The LEA assigns oversight to data collection to specific trained personnel within the district/charter.			
The LEA has a written process for the collection and submission of required prekindergarten data that includes ample timelines for unanticipated challenges.
