### Stimulus 4a

Molly was a great student in middle school. But in high school Molly started coming to school with her homework only half finished. I always did my homework as soon as I got home from school.

One afternoon I went to Molly's house after school. She was sitting at the kitchen table trying to study with her fingers in her ears. The television in the living room was loud. I could hear the baby crying upstairs.

"I don't understand this math problem!" Molly shouted. "Mom! I need help!"

Molly's mother came to the stairs holding the crying baby. "Molly, I hear you, but I'm busy with the baby right now."

"How am I supposed to get my homework done?" Molly shouted.

"You will have to wait," Molly's mother shouted back.

Molly jumped to her feet. "I'm tired of waiting. It's just not fair!" She picked up her books and stomped out of the house.

Tears were streaming down Molly's face. "You'll just have to wait! I bet you never hear your mom say that."

"My mom doesn't have eight kids. Let's just go to my house for a while," I said. We went inside my house. We ate popcorn and drank lemonade. My mom said, "Let's see about that math homework."

Together we figured out how to work the problems. I started to understand a little bit about why Molly thought I had it so good.
