

## Schoolnet Roles and Data Permissions for Texas Formative Assessment Resource (TFAR)

Access to specific data and functionality within the Schoolnet system is determined based on user roles and permissions.

<b>Role in Schoolnet</b>	<b>Data Permissions</b>
District Testing Coordinator	Users with this role have permission to see all district, campus, teacher, and student data.
Campus Testing Coordinator/Campus Administrator	Users with this role have permission to see all campus, teacher, and student data for assigned campus. Users can see summary level data for other campuses in the district but will not be able to see individual student data at other campuses.
Teacher	Users with this role have permission to see all data for the students in their course sections, including test results for their students from other classes.
Student	Users with this role have permission to see only their individual data.

NOTE: A campus administrator role may encompass a campus principal, campus instructional coach, etc.
