

Data-Based Individualization (DBI)

... method for using data to determine when and how to provide more intensive intervention. Over the past year, staff members from TEA and certain Education Service Centers (ESCs) have received training on DBI and its components from NCII, the University of Texas at Austin, and the University of Houston. This school year, we are piloting the DBI process with three Texas schools, San Saba Elementary in San Saba ISD, O'Donnell Intermediate in Fabens ISD, and Wills Point Middle School in Wills Point ISD. Over the year, ESC and TEA staff will train and coach educators and administrators at these schools in applying DBI with their students. If you would like more information about NCII and DBI, please see the NCII website at intensiveintervention.org.
