- describe significant societal issues of this time period such as the War on Drugs and the AIDS epidemic (US)

**Geography skills.** The student uses directions to locate their relative position in space and to locate their home and school in their community (Pre-K.VII.C).

**Geography.** The student understands the concept of location (K.4). The student understands the relative location of places (1.4). The student understands the purpose of maps and globes (1.5). The student uses simple geographic tools such as maps and globes (2.5). The student understands the concepts of location, distance, and direction on maps and globes (3.5). The student uses geographic tools to collect, analyze, and interpret data (4.6; 5.6). The student understands the factors that influence the locations and characteristics of locations of various contemporary societies on maps and/or globes (6.3). The student is expected to

### *Geographic Location Using Tools*

- identify and create common features in the natural environment (Pre-K)
- use terms, including over, under, near, far, left, and right, to describe relative location (K)
- locate places on the school campus and describe their relative locations (K)
- identify tools that aid in determining location, including maps and globes (K)
- locate places using the four cardinal directions (1)
- describe the location of self and objects relative to other locations in the classroom and school (1)
- create and use simple maps such as maps of the home, classroom, school, and community (1)
- locate the community, Texas, and the United States on maps and globes (1)
- interpret information on maps and globes using basic map elements such as title, orientation (north, south, east, west), and legend/map keys (2)
- create maps to show places and routes within the home, school, and community (2)
- use cardinal and intermediate directions to locate places on maps and globes such as the Rocky Mountains, the Mississippi River, and Austin, Texas in relation to the local community (3)
- use a scale to determine the distance between places on maps and globes (3)
- identify and use the compass rose, grid system, and symbols to locate places on maps and globes (3)
- create and interpret maps of places and regions that contain map elements, including a title, compass rose, legend, scale, and grid system (3)

- translate geographic data, population distribution, and natural resources into a variety of formats such as graphs and maps (4)
- apply geographic tools, including grid systems, legends, symbols, scales, and compass roses, to construct and interpret maps (4–5)
- translate geographic data into a variety of formats such as raw data to graphs and maps (5)
- identify and explain the geographic factors responsible for patterns of population in places and regions (6)
- explain ways in which human migration influences the character of places and regions (6)
- identify and locate major physical and human geographic features such as landforms, water bodies, and urban centers of various places and regions (6)
- identify the location of major world countries for each of the world region (6)

**Geography.** The student understands how humans use and modify the physical environment (2.8). The student understands how humans adapt to variations in the physical environment (3.4). The student understands how people adapt to and modify their environment (4.9; 5.9). The student understands the impact of interactions between people and the physical environment on the development and conditions of places and regions (6.5). The student understands the effects of the interaction between humans and the environment in Texas (7.9). The student understands the physical characteristics of North America and how humans adapted to and modified the environment through the mid-19th century (8.11). The student understands the relationship between population growth and the physical environment (US14). The student is expected to

*Relationship between People and Physical Environment*

- identify ways in which people have modified the physical environment such as building roads, clearing land for urban development and agricultural use, and drilling for oil (2)
- identify positive and negative consequences of human modification of the physical environment such as the use of irrigation to improve crop yields (2)
- identify ways people can conserve and replenish natural resources (2)
- describe and explain variations in the physical environment, including climate, landforms, natural resources, and natural hazards (3)
- identify and compare how people in different communities adapt to or modify the physical environment in which they live such as deserts, mountains, wetlands, and plains (3)
- describe the effects of physical processes such as volcanoes, hurricanes, and earthquakes in shaping the landscape (3)
- describe the effects of human processes such as building new homes, conservation, and pollution in shaping the landscape (3)
- identify and compare the human characteristics of various regions (3)
- describe ways people have adapted to and modified their environment in Texas, past and present, such as timber clearing, agricultural production, wetlands drainage, energy production, and construction of dams (4)
- identify reasons why people have adapted to and modified their environment in Texas, past and present, such as the use of natural resources to meet basic needs, facilitate transportation, and enhance recreational activities (4)
- compare the positive and negative consequences of human modification of the environment in Texas, past and present, both governmental and private, such as economic development and the impact on habitats and wildlife as well as air and water quality (4)
- describe how and why people have adapted to and modified their environment in the United States, past and present, such as the use of human resources to meet basic needs (5)

- analyze the positive and negative consequences of human modification of the environment in the United States, past and present (5)
- describe ways people have been impacted by physical processes such as earthquakes and climate (6)
- identify and analyze ways people have adapted to the physical environment in various places and regions (6)
- identify and analyze ways people have modified the physical environment such as mining, irrigation, and transportation infrastructure (6)
- identify ways in which Texans have adapted to and modified the environment and explain the positive and negative consequences of the modifications (7)
- explain ways in which geographic factors such as the Galveston Hurricane of 1900, the Dust Bowl, limited water resources, and alternative energy sources have affected the political, economic, and social development of Texas (7)
- analyze how physical characteristics of the environment influenced population distribution, settlement patterns, and economic activities in the United States (8)
- describe the positive and negative consequences of human modification of the physical environment of the United States (8)
- identify the effects of population growth and distribution on the physical environment (US)
- identify the roles of governmental entities and private citizens in managing the environment such as the establishment of the National Park System, the Environmental Protection Agency (EPA), and the Endangered Species Act (US)

**Geography.** The student understands how geographic factors influence the economic development and political relationships of societies (6.4). The student understands the impact of geographic factors on major events (US12). The student is expected to

*Geographic Influence on History*

- explain the geographic factors responsible for the location of economic activities in places and regions (6)
- identify geographic factors such as location, physical features, transportation corridors and barriers, and distribution of natural resources that influence a society's political relationships (6)
- analyze the impact of physical and human geographic factors on the Klondike Gold Rush, the Panama Canal, the Dust Bowl, and the levee failure in New Orleans after Hurricane Katrina.

**Geography.** The student understands how physical characteristics of places and regions affect people's activities and settlement patterns (2.7). The student understands the location and patterns of settlement and the geographic factors that influence where people live (4.8). The student understands the location and patterns of settlement and the geographic factors that influence where people live (5.8). The student understands the characteristics, distribution, and migration of population in Texas in the 19th, 20th, and 21st centuries (7.10). The student understands the causes and effects of migration and immigration on American society (US13). The student is expected to

*Population and Settlement Patterns*

- describe how weather patterns and seasonal patterns affect activities and settlement patterns (2)
- describe how natural resources and natural hazards affect activities and settlement patterns (2)
- explain how people depend on the physical environment and natural resources to meet basic needs (2)

- identify the characteristics of different communities, including urban, suburban, and rural, and how they affect activities and settlement patterns (2)
- identify and explain clusters and patterns of settlement in Texas at different time periods such as prior to the Texas Revolution, after the building of the railroads, and following World War II (4)
- describe and explain the location and distribution of various towns and cities in Texas, past and present (4)
- explain the geographic factors such as landforms and climate that influence patterns of settlement and the distribution of population in Texas, past and present (4)
- identify and describe the types of settlement and patterns of land use in the United States (5)
- explain the geographic factors that influence patterns of settlement and the distribution of population in the United States, past and present (5)
- analyze the reasons for the location of cities in the United States, including capital cities, and explain their distribution, past and present (5)
- identify why immigrant groups came to Texas and where they settled (7)
- describe how immigration and migration to Texas have influenced Texas (7)
- describe the structure of the population of Texas using demographic concepts such as growth rate and age distribution (7)
- analyze the effects of the changing population distribution and growth in Texas and the additional need for education, health care, and transportation (7)
- analyze the causes and effects of changing demographic patterns resulting from migration within the United States, including western expansion, rural to urban, the Great Migration, and the Rust Belt to the Sun Belt (US)
- analyze the causes and effects of changing demographic patterns resulting from immigration to the United States (US)

**Geography.** The student understands physical and human characteristics of place (K.5). The student understands various physical and human characteristics (1.6). The student understands the locations and characteristics of places and regions in the community, state, and nation (2.6). The student understands the concept of regions (4.7). The student understands the concept of regions in the United States (5.7). The student understands the location and characteristics of places and regions of Texas (7.8). The student understands the location and characteristics of places and regions of the United States, past and present (8.10). The student is expected to

*Characteristics of Places and Regions*

- identify the physical characteristics of place such as landforms, bodies of water, natural resources, and weather (K)
- identify how the human characteristics of place such as ways of earning a living, shelter, clothing, food, and activities are based upon geographic location (K)
- identify and describe the physical characteristics of place such as landforms, bodies of water, natural resources, and weather (1)
- identify examples of and uses for natural resources in the community, state, and nation (1)
- identify and describe how the human characteristics of place such as shelter, clothing, food, and activities are based upon geographic location (1)
- identify major landforms and bodies of water, including each of the continents and each of the oceans, on maps and globes (2)
- locate places of significance, including the local community, Texas, the state capital, the U.S. capital, major cities in Texas, the coast of Texas, Canada, Mexico, and the United States on maps and globes (2)

- examine information from various sources about places and regions (2)
- describe a variety of regions in Texas and the United States such as political, population, and economic regions that result from patterns of human activity (4)
- identify, locate, and compare the geographic regions of Texas (Mountains and Basins, Great Plains, North Central Plains, Coastal Plains), including their landforms, climate, and vegetation (4)
- compare the geographic regions of Texas (Mountains and Basins, Great Plains, North Central Plains, Coastal Plains) with regions of the United States and other parts of the world (4)
- describe a variety of regions in the United States such as political, population, and economic regions that result from patterns of human activity (5)
- describe a variety of regions in the United States such as landform, climate, and vegetation regions that result from physical characteristics such as the Great Plains, Rocky Mountains, and Coastal Plains (5)
- locate on a map important political features such as the ten largest urban areas in the United States, the 50 states and their capitals, and regions such as the Northeast, the Midwest, and the Southwest (5)
- locate on a map important physical features such as the Rocky Mountains, Mississippi River, and Great Plains (5)
- locate and compare the Mountains and Basins, Great Plains, North Central Plains, and Coastal Plains regions (7)
- locate and compare places of importance in Texas in terms of physical and human characteristics such as major cities, waterways, natural and historic landmarks, political and cultural regions, and local points of interest (7)
- analyze the effects of physical and human factors such as climate, weather, landforms, irrigation, transportation, and communication on major events in Texas (7)
- locate places and regions directly related to major eras and turning points in the United States during the 17th, 18th, and 19th centuries (8)
- compare places and regions of the United States in terms of physical and human characteristics (8)
- analyze the effects of physical and human geographic factors such as weather, landforms, waterways, transportation, and communication on major historical events in the United States (8)

**Economic skills.** The student learns that their community benefits from many different people working in many different ways (Pre-K.VII.B).

**Economics.** The student understands that basic human needs and wants are met in many ways (K.6). The student understands the value of jobs (K.7). The student understands how families meet basic human needs (1.7). The student understands the concepts of goods and services (1.8). The student understands the condition of not being able to have all the goods and services one wants (1.9). The student understands the value of work (1.10; 2.9). The student understands the roles of producers and consumers in the production of goods and services (2.10). The student understands the purposes of earning, spending, saving, and donating money (3.6). The student understands the concept of the free enterprise system (3.7). The student understands how businesses operate in the U.S. free enterprise system (3.8). The student understands the various ways in which people organize economic systems (6.7). The student is expected to

*Evolution of Economic Systems Based on Human Need*

- demonstrate that all people need food, clothing, and shelter (Pre-K)
- demonstrate an understanding of what it means to be a consumer (Pre-K)
