# Advanced Placement and International Baccalaureate Examination Results in Texas Public Schools, 2014-15 

This report presents Advanced Placement (AP) and International Baccalaureate (IB) examination participation and performance results for students in Texas public schools. AP and IB examination results are used by colleges and universities to make class placement decisions and to award college credit to incoming students who meet qualifying standards on the examinations.

AP and IB examination results for Texas public school students are also used in the public school accountability system in awarding distinction designations, which recognize school districts and campuses for outstanding achievement in specified academic areas (Texas Education Agency [TEA], 2016d; Texas Education Code Chapter 39, Subchapter G, 2016). The distinction designations are based on results across a number of indicators. Results for a campus are evaluated in relation to results for a comparison group of similar campuses. Results for a district are evaluated based on results for campus-level indicators aggregated across all campuses in the district. To be eligible to earn a distinction designation, a district or campus must receive an accountability rating of Met Standard.

For the 2016 accountability ratings cycle, academic achievement distinction designations (AADDs) were available at the campus level in four subject areas: English language arts (ELA), mathematics, science, and social studies. Each AADD included two AP/IB indicators: participation in, and performance on, AP/IB examinations in the specified subject area. AADDs were not available for districts. One postsecondary readiness distinction designation (PRDD) was available at the campus level, and one was available at the district level. In each case, the PRDD included one AP/IB indicator: performance on AP/IB examinations in any subject.

The AP/IB indicators were evaluated based on data for the 2014-15 school year. For purposes of awarding distinction designations, AP/IB examination performance indicators measure the percentages of examinees in Grades 11 and 12 who scored at or above a criterion score on at least one examination. The criterion scores are defined as 3 or higher on an AP examination and 4 or higher on an IB examination.

When groups differ substantially in size, comparisons of performance changes between them can be misleading and generally are not recommended. The non-Hispanic American Indian and Pacific Islander examinee populations are small in number, compared to other racial/ethnic examinee populations. Similarly, within the overall Hispanic examinee population, African American, Asian, Pacific Islander, and multiracial examinees are small in number, compared to other racial examinee populations. Therefore, discussions of performance results in this report, including comparisons across racial/ethnic groups, do not include these populations.

AP test data for Texas public high school examinees were provided to TEA by the

College Board. IB test data for Texas public high school examinees were provided to TEA by IB. For additional information about AP and IB examinations and results reported by the TEA Division of Research and Analysis, including definitions of terms and explanations of calculations, please see Advanced Placement and International Baccalaureate General Information, 2014-15 (TEA, 2016a), and Advanced Placement and International Baccalaureate Glossary of Terms, 2014-15 (TEA, 2016b). AP examination results for Texas public and nonpublic schools combined are presented in the report Advanced Placement Examination Results in Texas and the United States, 2014-15 (TEA, 2016c).

## Results for Texas Public Schools: Distinction Designation Indicators for Advanced Placement and International Baccalaureate Combined

## Reporting of Results

For the 2016 accountability ratings cycle, the distinction designation indicators for Advanced Placement (AP) and International Baccalaureate (IB) examinations were evaluated for all students only. In addition to results for all students, this section of the report presents results by race/ethnicity, economic status, and gender.

## Academic Achievement Distinction Designations

## English Language Arts Participation

- In the 2014-15 school year, 15.1 percent of Texas public school students in Grades 11 and 12 took at least one AP or IB English language arts (ELA) examination, an increase of 0.1 percentage points from the previous year (Table 1 on page 7).
- Among 11th- and 12th-grade students, 39.0 percent of Asian, 18.6 percent of multiracial, 17.1 percent of White, 16.0 percent of Pacific Islander, 12.8 percent of Hispanic, 11.2 percent of American Indian, and 10.8 percent of African American students took at least one AP or IB ELA examination.
- Among 11th and 12th graders, a higher percentage of students not identified as economically disadvantaged (19.1\%) than students identified as economically disadvantaged (11.0\%) took at least one AP or IB ELA examination.
- A higher percentage of female (18.2\%) than male (12.1\%) students in Grades 11 and 12 took at least one AP or IB ELA examination.

## ELA Performance

- In the 2014-15 school year, 43.7 percent of all ELA examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB ELA examination, a decrease of 1.0 percentage point from the previous year (Table 1 on page 7).
- Among 11th- and 12th-grade ELA examinees in the five largest racial/ethnic groups, 69.9 percent of Asian, 62.1 percent of White, 60.7 percent of multiracial, 24.5 percent of African American, and 23.8 percent of Hispanic students scored at or above criterion on at least one AP or IB ELA examination.
- A higher percentage of non-economically disadvantaged (57.0\%) than economically disadvantaged (20.7\%) ELA examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB ELA examination.
- A higher percentage of male (44.3\%) than female (43.4\%) ELA examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB ELA examination.

## Mathematics Participation

- In the 2014-15 school year, 6.8 percent of all students in Grades 11 and 12 took at least one AP or IB mathematics examination, an increase of 0.3 percentage points from the previous year (Table 2 on page 8).
- Among 11th- and 12th-grade students, 27.1 percent of Asian, 9.1 percent of multiracial, 8.6 percent of White, 8.3 percent of Pacific Islander, 5.3 percent of American Indian, 4.7 percent of Hispanic, and 3.0 percent of African American students took at least one AP or IB mathematics examination.
- A higher percentage of non-economically disadvantaged (9.5\%) than economically disadvantaged $(4.0 \%)$ students in Grades 11 and 12 took at least one AP or IB mathematics examination.
- A higher percentage of male (6.8\%) than female (6.7\%) students in Grades 11 and 12 took at least one AP or IB mathematics examination.

## Mathematics Performance

- In the 2014-15 school year, 51.7 percent of all mathematics examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB mathematics examination, a decrease of 1.9 percentage points from the previous year (Table 2 on page 8 ).
- Among 11th- and 12th-grade mathematics examinees in the five largest racial/ethnic groups, 71.7 percent of Asian, 63.2 percent of multiracial, 62.6 percent of White, 31.9 percent of African American, and 31.2 percent of Hispanic students scored at or above criterion on at least one AP or IB mathematics examination.
- A higher percentage of non-economically disadvantaged (61.1\%) than economically disadvantaged ( $29.3 \%$ ) mathematics examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB mathematics examination.
- A higher percentage of male (55.0\%) than female (48.2\%) mathematics examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB mathematics examination.

## Science Participation

- In the 2014-15 school year, 10.2 percent of all students in Grades 11 and 12 took at least one AP or IB science examination, an increase of 3.3 percentage points from the previous year (Table 3 on page 9). The increase coincided with the introduction of the AP Physics 1 examination, which was taken by a relatively large number of students (Table 16 on page 36 ).
- Among 11 th- and 12 th-grade students, 35.0 percent of Asian, 12.9 percent of multiracial, 11.9 percent of White, 11.6 percent of Pacific Islander, 8.1 percent of Hispanic, 7.8 American Indian, and 5.6 percent of African American students took at least one AP or IB science examination.
- A higher percentage of non-economically disadvantaged (13.3\%) than economically disadvantaged ( $7.0 \%$ ) students in Grades 11 and 12 took at least one AP or IB science examination.
- A higher percentage of female ( $10.4 \%$ ) than male ( $10.0 \%$ ) students in Grades 11 and 12 took at least one AP or IB science examination.

## Science Performance

- In the 2014-15 school year, 35.4 percent of all science examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB science examination, a decrease of 10.3 percentage points from the previous year (Table 3 on page 9). The decrease coincided with the introduction of the AP Physics 1 examination, which had the lowest mean score of all AP examinations offered (Table 16 on page 36).
- Among 11th- and 12th-grade science examinees in the five largest racial/ethnic groups, 56.6 percent of Asian, 48.1 percent of White, 46.4 percent of multiracial, 17.7 percent of Hispanic, and 17.0 percent of African American students scored at or above criterion on at least one AP or IB science examination.
- A higher percentage of non-economically disadvantaged (45.7\%) than economically disadvantaged ( $16.0 \%$ ) science examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB science examination.
- A higher percentage of male (40.3\%) than female (30.6\%) science examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB science examination.

## Social Studies Participation

- In the 2014-15 school year, 14.4 percent of all students in Grades 11 and 12 took at least one AP or IB social studies examination, an increase of 0.6 percentage points from the previous year (Table 4 on page 10).
- Among 11th- and 12th-grade students, 41.2 percent of Asian, 17.6 percent of multiracial, 16.1 percent of White, 15.8 percent of Pacific Islander, 12.2 percent of Hispanic, 11.3 percent of American Indian, and 9.4 percent of African American students took at least one AP or IB social studies examination.
- A higher percentage of non-economically disadvantaged (18.2\%) than economically disadvantaged ( $10.5 \%$ ) students in Grades 11 and 12 took at least one AP or IB social studies examination.
- A higher percentage of female (15.7\%) than male (13.2\%) students in Grades 11 and 12 took at least one AP or IB social studies examination.

## Social Studies Performance

- In the 2014-15 school year, 40.1 percent of all social studies examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB social studies examination, a decrease of 1.5 percentage points from the previous year (Table 4 on page 10).
- Among 11th- and 12th-grade social studies examinees in the five largest racial/ethnic groups, 65.2 percent of Asian, 56.2 percent of White, 55.6 percent of multiracial, 23.5 percent of African American, and 21.2 percent of Hispanic students scored at or above criterion on at least one AP or IB social studies examination.
- A higher percentage of non-economically disadvantaged (52.3\%) than economically disadvantaged ( $19.0 \%$ ) social studies examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB social studies examination.
- A higher percentage of male (43.4\%) than female (37.3\%) social studies examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB social studies examination.

## Postsecondary Readiness Distinction Designations

## Performance in Any Subject

- In the 2014-15 school year, 49.1 percent of all examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB examination, a decrease of 2.2 percentage points from the previous year (Table 5 on page 16).
- Among 11th- and 12th-grade examinees in the five largest racial/ethnic groups, 72.0 percent of Asian, 62.9 percent of White, 61.7 percent of multiracial, 36.5 percent of Hispanic, and 27.2 percent of African American students scored at or above criterion on at least one AP or IB examination.
- A higher percentage of non-economically disadvantaged (59.2\%) than economically disadvantaged (33.4\%) examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB examination.
- A higher percentage of male ( $50.5 \%$ ) than female ( $48.0 \%$ ) examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB examination.

Source. Primary data from College Board, IB, and Texas Education Agency (TEA).
Note. Examinees who took multiple examinations are counted only once. Sums of examinees by race/ethnicity, by economic status, or by gender may differ from one another or from the total of all examinees. See Advanced Placement and International Baccalaureate General Information, 2014-15 (TEA, 2016a) for additional information. Racial groups (African American, American Indian, Asian, Pacific Islander, White, and multiracial) do not include students of Hispanic ethnicity. ${ }^{a}$ Economically disadvantaged.

## Results for Texas Public Schools: Advanced Placement and International Baccalaureate Combined

## Comparison of Results Across Years

Beginning with results for 2011-12, Texas public school Advanced Placement (AP) and International Baccalaureate (IB) participation rate calculations were changed to include students served in special education programs in the denominators. Consequently, results for 2011-12 and later school years are not comparable to results for 2010-11 and earlier school years. See Advanced Placement and International Baccalaureate General Information, 2014-15 (Texas Education Agency [TEA], 2016a), and Advanced Placement and International Baccalaureate Glossary of Terms, 2014-15 (TEA, 2016b), for additional information.

## Statewide Results

- In the 2014-15 school year, 24.9 percent of Texas public school students in Grades 11 and 12 took at least one AP or IB examination, an increase of 1.4 percentage points from the previous year (Figure 1 on page 14 and Table 5 on page 16).
- Among 11th- and 12th-grade examinees, 49.1 percent scored at or above criterion on at least one AP or IB examination, a decrease of 2.2 percentage points from the previous year (Figure 2 on page 15 and Table 5 on page 16).
- Because all Texas colleges and universities must adopt and implement policies to award credit for freshman courses to students who have completed the IB Diploma Programme or who have achieved required scores on one or more AP examinations (Texas Education Code §51.968, 2016), the percentage of all enrolled students who meet the criterion may be viewed as one indicator of college readiness among Texas public high school students. Whereas indicators of performance discussed earlier in this report were based on the percentage of examinees who met the criterion score on an AP or IB examination, this indicator of qualification for college credit is based on the percentage of all students who met the criterion score. Among 11th- and 12th-grade students, 12.2 percent scored at or above criterion on at least one AP or IB examination, an increase of 0.1 percentage points from the previous year (Figure 3 on page 21 and Table 8 on page 22).

## Participation and Performance by Race/Ethnicity

- Among 11th- and 12th-grade students in the 2014-15 school year, 58.3 percent of Asian, 28.4 percent of multiracial, 27.4 percent of White, 25.3 percent of Pacific Islander, 22.5 percent of Hispanic, 19.6 percent of American Indian, and 16.6 percent of African American students took at least one AP or IB examination (Table 5 on page 16).
- Among 11th- and 12th-grade examinees in the five largest racial/ethnic groups, 72.0 percent of Asian, 62.9 percent of White, 61.7 percent of multiracial, 36.5 percent of Hispanic, and 27.2 percent of African American students scored at or above criterion on at least one AP or IB examination.

## Participation and Performance by Economic Status

- Among 11th- and 12th-grade students in the 2014-15 school year, a higher percentage of students not identified as economically disadvantaged ( $30.3 \%$ ) than students identified as economically disadvantaged (19.3\%) took at least one AP or IB examination (Table 5 on page 16).
- Similarly, a higher percentage of non-economically disadvantaged (59.2\%) than economically disadvantaged ( $33.4 \%$ ) examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB examination.

## Participation and Performance by Gender

- In the 2014-15 school year, a higher percentage of female (28.1\%) than male (21.8\%) students in Grades 11 and 12 took at least one AP or IB examination (Table 5 on page 16).
- By contrast, a higher percentage of male (50.5\%) than female (48.0\%) examinees in Grades 11 and 12 scored at or above criterion on at least one AP or IB examination.

## Participation and Performance by Program Participation

- Among 11th- and 12th-grade students in the 2014-15 school year, participation rates for students in all special instructional programs except gifted and talented (65.6\%) were lower than the state average ( $24.9 \%$ ), ranging from 1.9 percent for students in special education to 22.9 percent for students in career and technical education (CTE) (Table 6 on page 19).
- Among 11th- and 12th-grade examinees, those in gifted and talented or in bilingual or English as a second language programs scored at or above criterion on at least one AP or IB examination at higher rates ( $66.9 \%$ and $51.4 \%$, respectively) than the state average ( $49.1 \%$ ). Students in CTE, special education, or Title I programs scored at or above criterion on at least one AP or IB examination at lower rates than the state average.

## Participation and Performance by Student Characteristic

- Among 11th- and 12th-grade students in the 2014-15 school year, participation rates for all special populations were lower than the state average ( $24.9 \%$ ), ranging from 9.9 percent for students identified as English language learners (ELLs) to 19.2 percent for students identified as immigrants (Table 7 on page 20).
- Among 11th- and 12th-grade examinees, those identified as immigrants or ELLs scored at or above criterion on at least one AP or IB examination at higher rates ( $66.7 \%$ and $50.5 \%$, respectively) than the state average (49.1\%). Students identified as at risk of dropping out or migrant scored at or above criterion on at least one AP or IB examination at lower rates than the state average.

Figure 3
Students Qualifying for College Credit Based on Advanced Placement (AP) or International Baccalaureate (IB) Examination Performance, Grades 11 and 12, by Race/Ethnicity, Texas Public Schools, 2010-11 Through 2014-15

Source. Primary data from College Board, IB, and Texas Education Agency (TEA).
Note. Students who took multiple examinations are counted only once. Racial groups (African American, American Indian, Asian, Pacific Islander, White, and multiracial) do not include students of Hispanic ethnicity. Beginning with results for 2011-12, calculation of percentages of Texas public school students qualifying for college credit based on AP or IB examination performance was changed to include students served in special education programs in the denominator. Consequently, results for 2011-12 and later school years are not comparable to results for 2010-11 and earlier school years. See Advanced Placement and International Baccalaureate General Information, 2014-15 (TEA, 2016a), and Advanced Placement and International Baccalaureate Glossary of Terms, 2014-15 (TEA, 2016b), for additional information.

## Results for Texas Public Schools: Advanced Placement

## Comparison of Results Across Years

Beginning with results for 2011-12, Texas public school Advanced Placement (AP) participation rate calculations were changed to include students served in special education programs in the denominators. Consequently, results for 2011-12 and later school years are not comparable to results for 2010-11 and earlier school years. See Advanced Placement and International Baccalaureate General Information, 2014-15 (Texas Education Agency [TEA], 2016a), and Advanced Placement and International Baccalaureate Glossary of Terms, 2014-15 (TEA, 2016b), for additional information.

## Statewide Results

- In the 2014-15 school year, 163,120 Texas public school students in Grades 11 and 12 took 374,459 AP examinations (Table 9 on page 27). Among 11th- and 12th-grade students, 24.6 percent took at least one AP examination, an increase of 1.4 percentage points from the previous year (Table 15 on page 33).
- Among 11 th- and 12 th-grade AP examinees, 48.3 percent scored in the 3-5 range on at least one AP examination, a decrease of 2.1 percentage points from the previous year.
- A total of 86,896 students in Grades 9 and 10 took $99,817 \mathrm{AP}$ examinations (Table 11 on page 29). Among 9th- and 10th-grade students, 11.1 percent took at least one AP examination, an increase of 1.7 percentage points from the previous year.
- Among 9th- and 10th-grade AP examinees, 47.0 percent scored in the 3-5 range on at least one AP examination, a decrease of 3.4 percentage points from the previous year.
- A total of 4,775 students in Grade 8 took 4,795 AP examinations (Table 13 on page 31). Among 8th-grade students, 1.2 percent took at least one AP examination, an increase of 0.1 percentage points from the previous year.
- Among 8th-grade AP examinees, 79.1 percent scored in the 3-5 range on at least one AP examination, a decrease of 2.5 percentage points from the previous year.
- Of the 36 AP subject examinations taken by students in Grades 9-12 in 2014-15, the five most frequently taken, in rank order, were: English Language and Composition, United States History, World History, English Literature and Composition, and Physics 1 (Table 16 on page 36).
- Between 2013-14 and 2014-15, the number of AP examinations taken by students in Grades 9-12 increased for 30 of the 33 subjects available in both years (Table 16 on page 36 and TEA, 2015, Table 16). In 2014-15, a new examination-Capstone Seminar-was introduced, and Physics 1 and Physics 2 replaced Physics B. Compared to the 9,525 Physics B examinations taken in the

2013-14 school year, 31,290 Physics 1 examinations and 2,843 Physics 2 examinations were taken in 2014-15.

## Participation and Performance by Race/Ethnicity

- Among 11th- and 12th-grade students in the 2014-15 school year, 57.1 percent of Asian, 28.0 percent of multiracial, 27.0 percent of White, 24.5 percent of Pacific Islander, 22.3 percent of Hispanic, 19.3 percent of American Indian, and 16.2 percent of African American students took at least one AP examination (Table 9 on page 27).
- Among 11th- and 12th-grade AP examinees in the five largest racial/ethnic groups, 71.1 percent of Asian, 62.3 percent of White, 61.1 percent of multiracial, 35.6 percent of Hispanic, and 25.9 percent of African American students scored in the 3-5 range on at least one AP examination.
- Of the 320,587 students in Grades 11 and 12 who identified their ethnicity as Hispanic, 224,237 (69.9\%) identified White as their race, and 80,525 (25.1\%) identified American Indian (Table 10 on page 28). Among 11th- and 12th-grade Hispanic students, 22.4 percent of White and 21.3 percent of American Indian students took at least one AP examination.
- Among 11th- and 12th-grade Hispanic AP examinees, 35.9 percent of White and 34.2 percent of American Indian students scored in the 3-5 range on at least one AP examination.
- Among 9th- and 10th-grade students in the 2014-15 school year, 35.7 percent of Asian, 13.1 percent of multiracial, 12.0 percent of White, 10.3 percent of Pacific Islander, 9.8 percent of Hispanic, 8.5 percent of American Indian, and 6.4 percent of African American students took at least one AP examination (Table 11 on page 29).
- Among 9th- and 10th-grade AP examinees in the five largest racial/ethnic groups, 67.5 percent of Asian, 54.5 percent of multiracial, 54.1 percent of White, 39.8 percent of Hispanic, and 24.2 percent of African American students scored in the 3-5 range on at least one AP examination.
- Of the 397,933 students in Grades 9 and 10 who identified their ethnicity as Hispanic, 285,855 (71.8\%) identified White as their race, and 92,918 (23.4\%) identified American Indian (Table 12 on page 30). Among 9th- and 10th-grade Hispanic students, 9.9 percent of White and 9.3 percent of American Indian students took at least one AP examination.
- Among 9th- and 10th-grade Hispanic AP examinees, 41.6 percent of American Indian and 39.3 percent of White students scored in the 3-5 range on at least one AP examination.
- AP participation and performance results for 8th-grade students by race/ethnicity are shown in Table 13 on page 31, and results for 8th-grade Hispanic students by race are shown in Table 14 on page 32 .

## Participation and Performance by Economic Status

- Among 11 th- and 12th-grade students in the 2014-15 school year, a higher percentage of students not identified as economically disadvantaged ( $29.9 \%$ ) than students identified as economically disadvantaged (19.0\%) took at least one AP examination (Table 9 on page 27).
- Similarly, a higher percentage of non-economically disadvantaged (58.4\%) than economically disadvantaged ( $32.5 \%$ ) examinees in Grades 11 and 12 scored in the 3-5 range on at least one AP examination.
- The overall patterns for Grades 9 and 10 were like those for Grades 11 and 12. A higher percentage of non-economically disadvantaged (15.0\%) than economically disadvantaged (7.8\%) students took at least one AP examination, and a higher percentage of non-economically disadvantaged (53.8\%) than economically disadvantaged (36.8\%) examinees scored in the 3-5 range on at least one AP examination (Table 11 on page 29).
- AP participation and performance results for 8th-grade students by economic status are shown in Table 13 on page 31.

## Participation and Performance by Gender

- In the 2014-15 school year, a higher percentage of female (27.7\%) than male ( $21.5 \%$ ) students in Grades 11 and 12 took at least one AP examination (Table 9 on page 27).
- By contrast, a higher percentage of male (49.8\%) than female (47.1\%) examinees in Grades 11 and 12 scored in the 3-5 range on at least one AP examination.
- The overall patterns for Grades 9 and 10 were like those for Grades 11 and 12. A higher percentage of female ( $12.6 \%$ ) than male ( $9.6 \%$ ) students took at least one AP examination (Table 11 on page 29), and a higher percentage of male (49.2\%) than female ( $45.3 \%$ ) examinees scored in the 3-5 range on at least one AP examination.
- AP participation and performance results for 8th-grade students by gender are shown in Table 13 on page 31.

Racial groups (African American, American Indian, Asian, Pacific Islander, White, and multiracial) do not include students of Hispanic ethnicity. Because of a change to participation rate calculations, Texas public school AP participation results for 2011-12 and later school years are not comparable to results for 2010-11 and earlier school years. See Advanced Placement and International Baccalaureate General Information, 2014-15 (TEA, 2016a), and Advanced Placement and International Baccalaureate Glossary of Terms, 2014-15 (TEA, 2016b), for additional information.

## Results for Texas Public Schools: International Baccalaureate

## Comparison of Results Across Years

Beginning with results for 2011-12, Texas public school International Baccalaureate (IB) participation rate calculations were changed to include students served in special education programs in the denominators. Consequently, results for 2011-12 and later school years are not comparable to results for 2010-11 and earlier school years. See Advanced Placement and International Baccalaureate General Information, 2014-15 (Texas Education Agency [TEA], 2016a), and Advanced Placement and International Baccalaureate Glossary of Terms, 2014-15 (TEA, 2016b), for additional information.

## Statewide Results

- In the 2014-15 school year, 4,302 Texas public school students in Grades 11 and 12 took 13,963 IB examinations (Table 17 on page 44). Among 11th- and 12th-grade students, 0.6 percent took at least one IB examination, a decrease of 0.1 percentage points from the previous year (Table 19 on page 46)
- Among 11th- and 12th-grade IB examinees, 85.6 percent scored in the $4-7$ range on at least one IB examination, a decrease of 2.0 percentage points from the previous year.
- The five most frequently taken IB examinations, in rank order, were: English A: Literature, History: Americas, Spanish B, Mathematics, and Biology (Table 20 on page 49).

## Participation and Performance by Race/Ethnicity

- Among 11th- and 12th-grade students in the 2014-15 school year, 3.3 percent of Asian, 1.1 percent of Pacific Islander, 0.9 percent of multiracial, 0.7 percent of White, 0.6 percent of both African American, and American Indian, and 0.4 percent of Hispanic students took at least one IB examination (Table 17 on page 44).
- Among 11th- and 12th-grade IB examinees in the five largest racial/ethnic groups, 91.3 percent of Asian, 89.9 percent of White, 86.3 percent of multiracial, 83.5 percent of Hispanic, and 68.4 percent of African American students scored in the 4-7 range on at least one IB examination.
- IB participation and performance results for 11th- and 12th-grade Hispanic students by race are shown in Table 18 on page 45.

## Participation and Performance by Economic Status

- Among 11 th- and 12th-grade students in the 2014-15 school year, a higher percentage of students not identified as economically disadvantaged ( $0.9 \%$ ) than students identified as economically disadvantaged ( $0.4 \%$ ) took at least one IB examination (Table 17).
- Similarly, a higher percentage of non-economically disadvantaged (88.8\%) than economically disadvantaged ( $78.2 \%$ ) examinees in Grades 11 and 12 scored in the $4-7$ range on at least one IB examination.

## Participation and Performance by Gender

- In the 2014-15 school year, a higher percentage of female ( $0.8 \%$ ) than male $(0.5 \%)$ students in Grades 11 and 12 took at least one IB examination (Table 17).
- Similarly, a higher percentage of female (86.0\%) than male (85.1\%) examinees in Grades 11 and 12 scored in the 4-7 range on at least one IB examination.

## Results for Texas Public Schools: Advanced Coursework

- In the 2014-15 school year, 475,740 Texas public school students in Grades 9-12 completed at least one advanced course (Table 21 on page 56 ). Of those, 65.4 percent completed at least one Advanced Placement (AP) course, an increase of 1.5 percentage points from the previous year.
- Most students who took AP examinations also completed at least one advanced course. Among AP examinees, 92.6 percent completed at least one AP course, and an additional 1.8 percent completed other types of advanced courses (Table 22 on page 57). Fewer than 6 percent of AP examinees did not take any advanced course.
- Among students who completed at least one AP course, 74.3 percent took at least one AP examination, an increase of 1.8 percentage points from the previous year (Table 23 on page 58).
- Of the $596,824 \mathrm{AP}$ courses completed, 70.0 percent were completed by students taking corresponding examinations, an increase of 1.5 percentage points form the previous year (Table 24 on page 59). Of the 470,622 AP examinations taken, 88.8 percent were taken by students completing corresponding courses.
- The overall mean score for all AP examinations taken by students who had completed corresponding AP courses (2.5) was higher than the overall mean score for students who had not completed the courses (2.3) (Table 25 on page 60).
- On 19 of the 25 AP examinations that had at least 250 examinees who completed corresponding AP courses and at least 250 examinees who did not complete corresponding AP courses, examinees who completed corresponding AP courses had higher mean scores (Table 26 on page 61). AP examinees who did not complete corresponding AP courses had the same mean scores as examinees who completed corresponding AP courses on Physics 1, Physics C: Mechanics, and Studio Art: Drawing examinations and higher mean scores on European History, Microeconomics, and Physics 2.

| 2013-14 | 400,077 | 359,591 | 89.9 | 524,912 | 359,591 | 68.5 |
| 2014-15 | 470,622 | 417,726 | 88.8 | 596,824 | 417,726 | 70.0 |

Source. Primary data from College Board and Texas Education Agency.
Note. Counts of examinations include only one of the two Physics $C$ examinations when students have scores for both. This is because the table provides a count of instances in which there is a one-to-one relationship between a student's participation in an examination and his or her participation in the corresponding course. A student enrolled in a multi-semester course is counted as a completer only when he or she completes the final semester of the course. Counts of AP course completers may differ from counts of AP examinees because (a) not all course completers take examinations, (b) not all examinees complete advanced courses, and (c) some College Board records for examinees could not be matched to student records in the Public Education Information Management System.

Source. Primary data from College Board and Texas Education Agency.
Note. Counts of examinations include both of the two Physics $C$ examinations when students have scores for both. A student enrolled in a multi-semester course is counted as a completer only when he or she completes the final semester of the course. Counts of AP course completers may differ from counts of AP examinees because (a) not all course completers take examinations, (b) not all examinees complete advanced courses, and (c) some College Board records for examinees could not be matched to student records in the Public Education Information Management System. Parts may not add to 100 percent because of rounding.

Austin, TX: Author.
Abstract. This report presents Advanced Placement (AP) and International Baccalaureate (IB) examination participation and performance results in Texas public schools for the 2014-15 school year. Data are provided by student characteristics, including race/ethnicity; gender; and economic, at-risk, English language learner, immigrant, and migrant statuses. Data also are provided by participation in bilingual education or English as a second language, career and technical education, gifted and talented, special education, and Title I programs.

Keywords. Advanced placement, International Baccalaureate, credit by examination, testing, high school, scores, gifted and talented.

The report is available in PDF format on the agency website at http://tea.texas.gov/acctres/ ap ib index.html. Additional information about this report may be obtained by contacting the Texas Education Agency Division of Research and Analysis by phone at (512) 475-3523 or by e-mail at Research@tea.texas.gov.
For additional information about AP examinations, contact the College Board Southwestern Regional Office at (866) 392-3017 or http://www.collegeboard.org/. For additional information about IB examinations, contact the IB Americas Office in Bethesda, Maryland, at (301) 202-3000 or http://www.ibo.org/.

Notes on Second Edition. The 2014-15 IB data for Texas public schools were reprocessed after it was discovered that Environmental Systems and Societies examinations were mistakenly counted twice. The update affected the examination counts and percentages in Tables 5-7 and Tables 17-20 (as well as the order of appearance of examinations in Table 20) and the corresponding text. The campus- and district-level data files available at http://tea.texas.gov/acctres/ap ib index.html were also updated to account for the correction. In addition, the final bullet on page 55 was corrected to consider only AP examinations that had at least 250 examinees who completed corresponding AP courses and at least 250 examinees who did not complete corresponding AP courses.

[^0]:    Source. Primary data from IB and Texas Education Agency (TEA).
    Note. Excluded from the results are satisfactory theory of knowledge course and essay completions, which are required for the IB Diploma but excluded in TEA accountability system reporting of Advanced Placement (AP) and IB subject examinations. Also excluded are subjects in which the total number of examinations taken is less than five: Arabic AB, Astronomy, German A: Literature, Hebrew B, Hindi A: Literature, Italian AB, Japanese AB, Japanese B, Korean A: Literature, Mandarin AB, Portuguese A: Literature, and Swahili AB. A dash (-) indicates data are not reported to protect student anonymity. When the number of examinations is not reported, it is presented in such a manner as to provide a general idea of the number while maintaining student anonymity. Parts may not add to 100 percent because of rounding.
