

Chapter 6—Distinction Designations

In 2021, districts and campuses receive a *Not Rated: Declared State of Disaster* label overall and in each domain. Distinction designations are not awarded for 2021.

Campus Comparison Groups

Each campus is assigned to a unique comparison group comprised of Texas schools that are most similar to it. To determine the campus comparison group, each campus is identified by school type (See the school types chart in “Chapter 1—2021 Accountability Overview” for more information.) then grouped with 40 other campuses from anywhere in Texas that are most similar in grade levels served, size, percentage of students who are economically disadvantaged, mobility rate, percentage of English learners, percentage of students receiving special education services, and percentage of students enrolled in an Early College High School program. Each campus has only one unique campus comparison group. There is no limit on the number of comparison groups to which a campus may be a member. It is possible for a campus to be a member of no comparison group other than its own or a member of several comparison groups.
